GERMAIN'S CHOICE ROSES

Beginning with January 1, 1924, The Germain Seed and Plant Company announces that in the future its efforts along plant lines will be restricted to the growing and distribution of roses. This plan has been under way for some time and we are now in a position to place before you Roses of the best quality and varieties at a price far below their value.

In the following pages you will find a comprehensive list, containing the best of the new sorts and the old favorites. Bush roses and climbers in a vast array of colors and habits.

The culture of the Rose in California has attained mammoth proportions. Nowhere else will they be found to grow in such profusion and abundance.

We beg to call your particular attention to such roses as: Wm. F. Dreer, Crusader, George Ahrends, Hadley, Hoosier Beauty, Irish Fireflame, Lolita Armour, Los Angeles, which are but a few of a large number of varieties, all beautiful.

In general you will note the prices are 50 cents each or \$5.50 per dozen. Those listed at 75 cents are \$7.50 per dozen and those at \$1.00 are \$10.00 per dozen. Orders placed for four or more include packing and postage anywhere in the world. Where less than four roses are ordered your remittance should include 5 cents additional for each rose to cover postage and packing.

For your convenience we have made up several small collections of roses which show quite an advantage in price. No substitutions are allowed on these collections.

Collection No. 1—Bush Roses.

Alex. Hill Grey	\$.50
Betty	.50
Cecil Brunner	.50
Crimson Queen	.50
Karl Druschki	.50

Paul Neyron	.50
Black Prince	.50

Regular price	\$3.00
Collection price	\$2.50

IMPORTANT NOTICE

The prices on all roses are quoted on dormant roots for shipment after January 1st, and before April 1st. After that time the varieties available can be shipped in gallon cans at the following prices—Fifty cent roses seventy-five cents each—Seventy-five cent roses at one dollar—One dollar roses at one dollar and a half; all prices F. O. B. Los Angeles.

NON-WARRANTY. We give no guarantee, express or implied, as to the growth, productiveness, quality, or any other matter of any trees, plants or seeds that we send out, and will not be in any way responsible for crops. If the purchaser does not accept the goods on these terms, they must be returned at once.

SUBSTITUTION. Where particular varieties are ordered and particular ages and sizes of trees, kinds of stock, etc., it should be stated whether and to what extent substitution will be allowed in case the order cannot be filled to the letter. Where no instructions in this respect accompany the order, we shall feel at liberty to substitute other varieties as nearly similar as possible. If the selection of varieties is left entirely to us, we shall endeavor to send only such sorts as are acknowledged to give general satisfaction.

CLAIMS. Should any errors occur we desire to be informed upon receipt of goods, that we may rectify them without delay. All claims must be filed within ten days after the arrival of shipments. No plants shipped C. O. D.

PLANTING. Dig holes large enough to allow the roots of the tree to spread out in their natural position, carefully placing the finest

and best soil from the surface in among the roots; when the soil is nearly filled in, thoroughly settle the earth by filling the hole with water; after it settles, fill in the remainder of earth. In most soils, the use of water to settle the earth is much better than treading the soil with the foot.

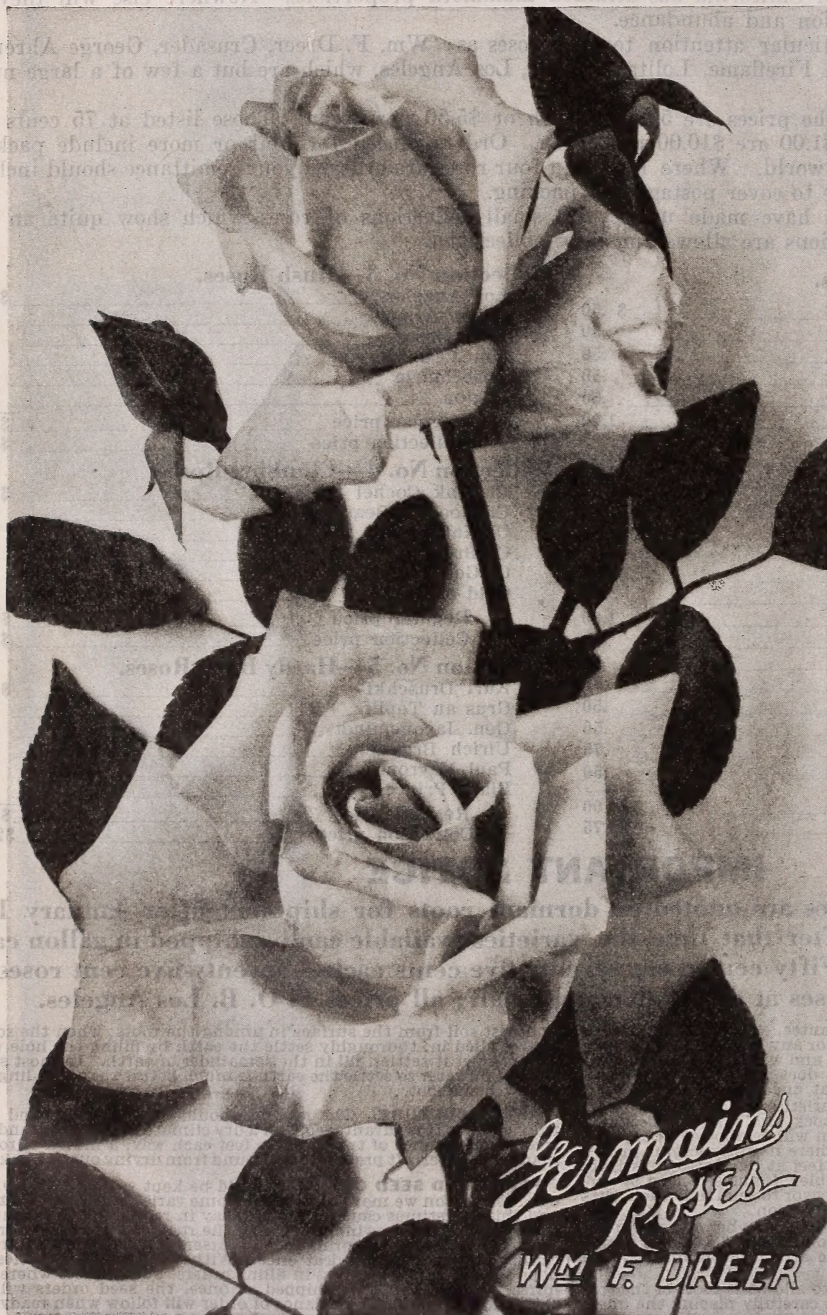

AFTER CULTURE. The ground should be kept loose and free from weeds. It is advantageous in a dry climate to throw around the tree, for a distance of two or three feet each way, a mulch of rough manure or litter. It prevents the ground from drying out and baking.

PLANT AND SEED ORDERS. should be kept separate, as during our rush season we may run short of some varieties of plants or trees and this sometimes causes a slight delay in receiving consignments from our various growing grounds. The rush of business is terrific during the winter and spring in the Nursery Department and orders cannot always be shipped at once. With our present facilities we hope to have but few delays in filling orders, but in cases where the nursery stock cannot be shipped at once, the seed orders will be shipped at once, and the balance of order will follow when ready.

Novelties and Specialties for 1924

WM. F. DREER ROSE

A beautiful Rose of the same parentage as Los Angeles, and which, for delicacy of coloring, is not comparable to any other variety, it reminding one of the delicate tints of some varieties of water lilies. The flowers, which are similar in shape to Los Angeles, and like that variety, beautiful in all stages of development, are at their best in the half-expanded flower. These, in expanding, are of a soft, silvery shell-pink, the base of the petals of a rich golden-yellow, which, at certain stages of development, gives a golden suffusion to the entire flower, this golden suffusion being particularly brilliant early and late in the season. Strong, two-year-old plants, \$1.00 each.

PAUL'S SCARLET CLIMBER

One of the most sensational novelties in climbing Roses ever introduced. It is a climber with splendid foliage and glorious vivid scarlet flowers. These are borne in wonderful profusion. A plant in bloom arrests the attention at once. Although only introduced a few seasons ago from England, it has already taken a high position amongst hardy climbing Roses. For pergola effects or pillars this Rose is absolutely unexcelled. There is no variety with which we are acquainted that can equal it. This Rose will stand exceptionally low temperatures without any danger of freezing. No Rose garden, large or small, should be considered complete without a plant or two of this superb sort. We cannot do otherwise than give it the highest recommendation possible. It has already proved its worth. At this price Paul's Scarlet Climber is an exceptional buy and well worth it. Each 50c.

Roses
WM F. DREER

GERMAIN'S CHOICE ROSES

Our stock of Roses for the present year is finer than ever and we direct your attention to the splendid novelties which we are offering for the first time. During the months January, February and March we can supply them as dormant or bare root plants. From April on, they will be sent out in gallon cans with the following prices: All 50-cent Roses 75 cents each, 75-cent Roses \$1.00 each, \$1.00 Roses \$1.50 each, all prices after April 1st being F. O. B. Los Angeles.

GERMAIN'S BUSH ROSES

	Each		Each
AARON WARD. Deep rich Indian yellow. Stems constantly throw quantities of beautiful medium size buds. Splendid for cut flowers.....	\$0 50	GENERAL JACQUEMINOT. A celebrated and much sought after variety, both for planting out and pot forcing; shapely buds and handsome blooms of bright, shining crimson, rich, brilliant, velvety and fragrant. Everybody knows and wants the "Jack" for its all 'round good qualities.....	.50
AMERICAN BEAUTY. One of the best Roses for the hot interior sections of the Western United States. Does magnificently in Arizona, Imperial section, etc. Throws especially fine, large blossoms during early fall and spring.....	.50	GEN. McARTHUR. One of the most popular and freest blooming of all red garden Roses. Color is a bright rosy crimson. It is not subject to mildew. Especially valuable for bedding purposes.....	.50
ALEXANDER HILL GRAY. Its color is a solid deep yellow throughout.....	.50	GEORGE AHRENDTS, or PINK AMERICAN BEAUTY. This is the wonderful "Pink American Beauty." The growth and make-up of the plants is superb, while the delicate pink color is unapproachable.....	.50
ANGELUS. White, with cream tinted center resembling K.A.V.; full and rounded with high center; a free producing and fragrant forcer and good keeper; stiff stemmed, upright grower with deep green, glossy and handsome disease-resisting foliage.....	.50	GEORGE ELGER. Yellow Baby Rambler, or Dwarf Wm. A. Richardson. Dainty coppery golden-yellow buds opening to a deep clear yellow; early and free, flowering in large corymbs. Erect growth; wood smooth, reddish green; foliage brilliant dark green, brown underneath.....	.50
ANTOINE RIVOIRE. Yellow ground, tinted with rosy flesh. A superb color combination.....	.50	GOLDEN SPRAY. Unique in habit and growth, it sending up long arching shoots which form great loose elegant sprays, every bud of which opens up in succession. The buds are very long, of deep yellow, opening to almost single blooms of clear lemon-yellow.....	.50
AUGUSTA VICTORIA. A free, healthy grower, with splendid foliage and superb buds. Pure white, occasionally tinted with cream at the center of the open flowers.....	.50	HADLEY. In color it is a deep velvety crimson, retaining its brilliancy at all seasons of the year. The variety is double and buds are well formed. The fragrance is excelled only by American Beauty. It is a strong, rapid grower, and the flowers are borne on long, stiff stems. It has proven itself under thorough trial to be an all-the-year-round forcing variety.....	.50
BETTY. Copper Rose, shaded to golden yellow at the base. Buds long and pointed.....	.50		
BLACK PRINCE. Intensely dark crimson, approaching black; cup-shaped, large and full, one of the finest of its class and color.....	.50		
BRIDESMAID. Clear, shining pink; buds of exquisite shape; stems long and stiff; a profuse bloomer. A good forcer, and an outdoor favorite.....	.50		
BRITISH QUEEN. Purest white on opening, after disappearance of an occasional slight flush in the bud. Type of flower between White Maman Cochet and Frau Karl Druschki, with Tea Rose form and refinement of finish; petals massive, with an exquisite reflex producing a globular and yet pointed form. Stiff slender stems; free and fragrant. An all around Rose, valuable alike for exhibiting, massing, bedding, decorating and forcing.....	.50		
CAPTAIN CHRISTY. Delicate flesh-pink, shading deeper at center of magnificent double flowers of bright satiny-appearance.....	.50		
CAROLINE TESTOUT. Satiny pink. Flowers beautifully cup-shaped and intensely fragrant.....	.50		
CLARA WATSON. Pearly-white center tinted with pale rosy-peach; a free and continuous bloomer.....	.50		
COLUMBIA. A rose which is popular with all cut flower buyers throughout America. In color a delightful shade of rose pink. In outdoor planting the bushes attain a moderate height and blossom freely through a long season.....	.50		
COUNTESS OF GOSFORD. Color, salmon-pink shading to rose and pink, suffused with saffron-yellow.....	.50		
CRIMSON CHATENAY. A seedling from Mme. Abel Chatenay. Very similar to the parent, but a stronger grower, and bright crimson in color; very fragrant.....	.50		
CRIMSON QUEEN. Rich, bright velvety crimson; large and full flower; strong, upright grower; beautiful, broad foliage.....	.50		
RUSADER. Rich, velvety crimson; heavily petaled; big double blooms open perfectly, supported on strong-necked stems. Robust, strong-growing, free-flowering, disease-resisting.....	.75		
DUCHESS DE BRABANT. Light rose, shading to salmon; very free. A good grower.....	.50		
DUCHESS OF WELLINGTON. Intense saffron yellow, stained crimson. As the flower ages it becomes a deep saffron yellow. Blooms fairly full, buds long and pointed, very free flowering. Exceedingly fragrant.....	.50		
EDWARD MAWLEY. A gold medal winner. One of the best dark velvety crimson Roses in existence. Color rich and lustrous.....	.50		
ETOILE DE FRANCE, or STAR OF FRANCE. A brilliant shade of clear red-crimson velvet, centering to vivid cerise; large flowers on long stiff stems; remarkably vigorous, free-blooming and hardy, with bronzy-green foliage.....	.50		
ETOILE DE LYON, or STAR OF LYON. Deep golden-yellow; a healthy, vigorous grower, blooming freely early and late; full, deep and rich flowers; very sweet; extremely hardy both as to heat and cold.....	.50		
FRANK W. DUNLOP. Bright rose-pink, in color almost identical with Mrs. Charles Russell. Vigorous grower, free-flowering, abundant in petalage, free from spot.....	.50		
		HOOSIER BEAUTY	
		In our opinion, one of the finest red hybrid tea Roses in existence. A rose of American origin and one which easily out-distances any other red on the market. Flowers are of superb form, not unlike a perfect Sunburst in shape. They are beautiful either in bud or in the fully expanded bloom. The tone of color is one of those rich dark velvety reds, not unlike the color to be noted in the old variety "Black Prince." It is freer in growth than McArthur, with a color which far surpasses the latter variety. Each 75c.	
		IRISH ELEGANS. A beautiful single pink bush rose.....	.50
		IRISH FIREFLAME. Old gold, coppery-yellow or deep madder-orange, flamed with ruddy crimson, becoming fiery orange as the spiral bud develops, the intense and varying color graduations spontaneously conveying the impression of a flame of fire. Large single flowers, strongly and deliciously tea-perfumed and never out of bloom. Handsome and shiny wood of vigorous growth and deep, bronzy-green olate foliage.....	.50
		J. L. MOCK. Enormous deep rose-colored blooms, equally beautiful in bud or open flower. Throws splendid canes. An ideal cut flower variety.....	.50
		JULIET. A wonderful combination of orange, scarlet, salmon, gold, etc. By way of color it is one of the most sensational Roses ever introduced. Hardy in all sections. Especially fine in early Spring and late Autumn.....	.50
		K. OF K. A single scarlet rose of recent introduction.....	.75
		LADY ALICE STANLEY. Outside of petals coral-pink, inside pale flesh-pink.....	.50
		LADY ASHTOWN. Rose-pink, shading to silvery pink, with touches of yellow at base of petals and a silvery-pink reflex; large, full, well formed flowers with high pointed center.....	.50
		LADY HILLINGDON. One of the best of recent introductions. A lovely shade of apricot yellow. Free blooming and splendid for cut flower purposes.....	.50
		LA FRANCE. Silvery-rose, with pink shades and satin-like petals of unsurpassable beauty; large, symmetrical and deliciously fragrant blooms from June until frost; hardy with protection.....	.50
		LEGION. Bud, well shaped globular; flower, large, full, lasting, cerise-red throughout; fragrant; foliage large, glossy red-dish green.....	.75

GERMAIN'S CHOICE ROSES

BUSH VARIETIES

MISS LOLITA ARMOUR

Each

We believe this rose to be one of the greatest breaks by way of color ever known in Roses. There is nothing we know of in cultivation like it. Regardless of color, we doubt if there are any more beautiful. The color is difficult of description, but may be briefly described as follows: Chrome yellow at the base, shading to burnt orange and copper. The reflex of the petals is chrome yellow at the base, shading to bright salmon with brilliant copper suffusion. The flower is quite double, the bud similar in shape to those noted in the variety Caroline Testout. As the flowers of this variety age they turn to a delightful shade of shrimp pink and copper. The flowers are more or less cup shaped and display to splendid advantage the colors noted above. Each \$1.00.

THE WONDERFUL PRIZE WINNING ROSE "LOS ANGELES"

No words can adequately convey the wondrous beauty of this superb novelty. Its fame is already world-wide and its popularity ever increasing. It is the Gold Medal Rose of the year, winning at Paris, France, in June, 1918, the coveted Gold Medal awarded by the City of Paris in the Rose trials at the Bagatelle Gardens, Bois de Boulogne Park. This in competition with Roses from all parts of the world.

It is a Rose without a fault. It is strong in growth, sending out enormous canes clothed with dark, handsome foliage. The foliage is mildew proof. It is hardy, deliciously fragrant and during the spring, summer and autumn months produces an endless succession of ravishingly beautiful blossoms. The buds are long and pointed and expand to a flower of glorious size. Its color is of transcendent beauty, being an indescribable tone of flame pink, with superb golden yellow shadings at the base of the petals. The color combinations in the open flower possess a fire and intensity not found in any other Rose. Our stock for the present season is limited. Extra strong plants, \$1.00.

MAD. ABEL CHATENAY. Lovely shade of salmon pink, especially useful as a winter blooming Rose, in the warmer sections of the country. Buds and open flowers ideal as to form..... .50

MAD. EDOUARD HERRIOTT

The famous Daily Mail Rose. Winner of the \$5,000 prize at the International Horticultural Exposition held in London, England. Buds coral red shaded with yellow at the base. Open flowers of medium size, when fully expanded they take on a superb coral red color with yellow shadings. As the flower ages it passes to bright, rosy scarlet and shrimp red. Each \$1.00.

MADemoiselle CECILE BRUNNER. This is the popular Baby Pink or "Sweetheart" Rose. In the past year or two this Rose has fairly jumped into popularity. It has become quite the rage. It makes a handsome miniature Rose, coming in sprays of three to five buds. Color bluish, shaded light salmon-pink; distinct and desirable..... .50

MAMAN COCHET. Deep rose-pink; inner side of petals silvery rose; very double. Extra strong grower; fine bloomer. The finest Rose by far that has yet been introduced for a long time. We can confidently recommend it..... .50

MISTRESS JOHN LAING. A beauty in clear, bright, shining pink; each bud in its long, serrated calyx with adjacent green foliage forms a dainty and lovely boutonniere; immense, full blooms on long, stiff stems; sweetly scented.. .50

MRS. A. R. WADDELL. Reddish apricot toned with salmon. An odd type in Roses, the petals being somewhat loose and irregular in formation. As a garden Rose it is without an equal. Before the buds expand it is ideal for cutting purposes..... .50

MRS. CHARLES RUSSELL. No other forcing Rose except "American Beauty" can compete with it when it comes to counting points. Stems three feet long, stiff and surmounted by grand, rosy-pink blooms of largest size and build..... .50

OPHELIA. A Rose which has made a record for itself as a cut flower variety, and is admired by everyone. It is perfect in form, large in size and of a most pleasing delicate tint of salmon flush with rose shadings..... .50

OLD GOLD. The tint is a vivid reddish-orange with rich coppery-red and coppery-apricot shadings..... .50

PAUL NEYRON. The largest Rose in cultivation. Blossoms often eight inches in diameter. Rich, deep Rose in color. 50

Each

PERLE d'OR, or YELLOW Mlle. CECILE BRUNNER. Coppery-gold, changing to fawn; very double and exquisitely perfumed..... .50

PINK KILLARNEY. A lovely shade of clear, soft pink. An ideal cut flower Rose, on account of its splendid bud formation. Deliciously fragrant..... .50

PRINCE DE BULGARIE. Silvery-flesh, very delicately shaded with salmon, long bud opening to full cup-formed flowers .50

RADIANCE. A Rose of American origin and to our mind one of the best varieties in cultivation today. Buds long and pointed expanding to blooms of enormous size. Similar in shape to Caroline Testout, but in color deep rich rose pink..... .50

RED LETTER DAY. Velvety, brilliant, glowing scarlet-crimson buds and non-fading cactus-like flowers with reflex of petals satiny crimson-scarlet with no trace of blue or magenta. A charming decorative and bedding Rose..... .50

RED RADIANCE. A sport from the well known pink form. Flowers equal in size, but of a deep, rosy red color. Buds and open flowers of mammoth proportions. Deliciously fragrant; a constant and free bloomer. An ideal Rose for cut flower purposes..... .50

ROSE MARIE

Amongst the various Roses which we have had under trial there are but few more meritorious than this magnificent American novelty. The buds are long and pointed, the petals large and well-rounded, and the open bloom ideal as to form. One of the finest Roses we know of for cut flower purposes. The color is a delightful shade of pure rose pink. Highly recommended. Each 75c.

SUNBURST. Orange-copper or golden-orange and golden-yellow, all intense shades, giving an extremely brilliant effect. A giant Rose, long stems, long, pointed buds, vigorous, free and healthy, with splendid keeping qualities as a forcer and also an excellent bedder..... .50

TEPLITZ. An ideal red Rose for hedge purposes. Blossoms constantly throughout the year. Color velvety crimson, has a splendid constitution, good clean foliage, strong, upright canes..... .50

THE BRIDE. Pure white, with tinge of pink when planted in the garden; large, full and most perfect form..... .50

ULRICH BRUNNER. Color a rich cherry crimson. Produces its blossoms on the end of the canes. These may often be cut with a stem length of three to four feet. Especially fine during the early spring and late autumn months... .50

WAKEFIELD CHRISTY MILLER. A superb pink Rose. One of phenomenal size and vigorous growth. The petals have a beautifully crinkled and wavy outline at the edges. One of the best hybrid teas of its particular color. .50

WHITE AMERICAN BEAUTY (Druschski). An ideal hardy white Rose, pure white in color. A remarkably vigorous grower. Free flowering to a degree. In our opinion, the best of all white Roses..... .50

WHITE CECIL BRUNNER. The well-known Rose in a white blossom..... .50

WHITE COCHET. An exact replica of the pink with the exception of color, which is pure creamy white with tinting of pink..... .50

WHITE LA FRANCE. Large and finely formed buds and blooms having broad petals of silvery-white with very delicate pink shadings. A fragrant, free and continuous bloomer..... .50

GERMAIN'S SELECTION OF CLIMBING ROSES

- AMERICAN BEAUTY.** (Climbing.) Crimson flower 3 to 4 inches in diameter; well formed, fragrant, strong grower, holds foliage late; blooms in May and June and occasionally during the summer..... \$0.50
- BANKSIA WHITE.** The flowers of this very desirable Rose are pure white, violet scented, very small, double and borne in umbels of twelve to fifteen blossoms. Spring bloomer..... .50
- BANKSIA YELLOW.** Small, double sulphur-yellow flowers in clusters. A vigorous grower..... .50
- CHEROKEE RED.** A rampant climber identical in every way with the other roses of the same name except in color..... .50
- CHEROKEE WHITE.** The well-known Cherokee of the South. A vigorous and rampant climber. Large single white, fragrant flowers produced in early spring in great profusion; evergreen; foliage bright, glossy green; most desirable for pergolas and trellises. Will climb to the top of the loftiest tree..... .50
- CLIMBING BELLE SIEBRECHT.** This rose is known in England as Climbing Mrs. W. J. Grant. Imperial pink, large and beautifully formed. Sweetly perfumed..... .50
- CLIMBING BRIDESMAID.** Like Bridesmaid, but with climbing habit; clear pink..... .50
- CLIMBING ETOILE DE FRANCE.** This Rose is identical in every respect with Etiole de France, save that it is a rampant climber, making it one of the very best dark, velvety crimson Climbing Roses..... .50
- CLIMBING FRAU KARL DRUSCHKI.** A new Rose destined to prove very popular. Flowers similar to the bush variety..... .50
- CLIMBING GEN. MCARTHUR.** (New.) Similar to the bush variety..... .50
- CLIMBING HADLEY.** (New.) The well-known Rose now in a climbing form..... .50
- CLIMBING HOOSIER BEAUTY.** A new rose. The climbing form of the popular and well known bush variety. Dark velvety red..... 1.00
- CLIMBING KAISERIN AUGUSTA VICTORIA.** A strong climbing form of the variety of the same name. Pure white..... .50
- CLIMBING KILLARNEY.** A vigorous climber, otherwise possessing all of the splendid qualities of the parent Killarney..... .50

THE HOOSIER BEAUTY

CLIMBING KILLARNEY

We Do Not Ship Plant Orders

[5]

- CLIMBING MADAME CAROLINE TESTOUT.** Beautiful glowing pink, identical in flower with its parent namesake; a rampant climber..... .50
- CLIMBING MADEMOISELLE CECILE BRUNNER.** Rosy-pink on a rich creamy-white ground; a beauty..... \$0.50
- CLIMBING SOUVENIR OF WOOTTON.** Velvety red; same in bloom as the bush Wootton, from which it is a sport; vigorous; profuse with splendidly formed flowers..... .50
- CLIMBING SUNBURST.** A true "Sunburst" of vigorous climbing habit..... .50
- CLIMBING PAPA GONTIER.** A climbing sport of Papa Gontier. Color rich red; a beauty..... .50
- CLIMBING WHITE MAMAN COCHET.** Here we have a climbing form that will become as popular a climber as its parent has as a bush Rose. Grand, huge white flowers tinged pink..... .50
- GOLD OF OPHIR.** A splendid yellow climber..... .50
- LADY GAY.** A bright rose-pink; similar to Dorothy Perkins, but later, the flowers being larger and fewer to the cluster..... .50
- LAMARQUE.** Pure white. A favorite Climbing Rose. Large clusters of double sweet white blossoms. It is a beautiful Rose and there is a great demand for it..... .50
- MAMAN COCHET CLIMBING.** No Rose we grow is so popular as Maman Cochet. Here we have an exact counterpart of that popular variety, except that it is a vigorous climber..... .50
- PILLAR OF GOLD.** The blooms are double to the center, of the largest size, and come in immense bouquets of from five to ten blooms on a single branch, and the effect throughout the blooming season is a perfect sheet of color. The color, ruby-red suffused with golden-yellow, is a happy combination..... .50
- REINE MARIE HENRIETTE.** Deep cherry-red. This Rose takes the lead as a climber..... .50
- REVE D'OR, or GOLDEN CHAIN.** Buff-yellow, a very free bloomer, very pretty. Strong grower; will do well in any situation..... .50
- SILVER MOON.** Flowers very large, four and one-half inches and over in diameter. Pure white in color; petals of great substance, beautifully cupped, forming a clematis-like flower. The large bunch of yellow stamens in the center adds to its attractiveness..... .50
- TAUSENDSCHOEN OR THOUSAND BEAUTIES.** Bright clusters of blossoms varying in color from flushed white to rosy-carmine. A vigorous hardy climber with few thorns..... .50
- WILLIAM ALLEN RICHARDSON.** Orange-yellow; center coppery-yellow..... .50

Amounting to Less Than \$1.00

Deciduous and Citrus Fruit Trees and Small Trees

Contained in the following you will find a complete list of the various fruit trees, vines, and berry plants that we have to offer for this season. After the description of each variety we have noted the month of ripening. All prices are quoted f. o. b. Los Angeles, and due to market changes, are subject to change without notice. In general we supply one dozen trees for the price of ten. Please write us for special prices in large quantities.

PLANTING INSTRUCTIONS

On receipt of shipment unpack it immediately, and if not planted at once place the roots of the trees in a trench, cover them with soil, and water thoroughly, so as to settle the dirt well about the roots. For this purpose it is well to open the bundle. If on account of delay enroute the trees look withered, bury them entirely in wet soil for a few days until they have recovered.

It is of great importance to dig holes deeper and larger than is necessary to admit all the roots in their natural position, keeping the surface and subsoil separate. While we exercise the greatest care possible in digging and packing the trees the loss or injury of the roots is sometimes unavoidable. Any injured roots should be cut off with a sharp knife. Fill the hole with the surface soil, so that the tree after the earth has settled will stand about as deep as it did in the nursery, a line which can usually be noted by a difference in color. Settle the soil well around the roots by filling the hole with water. Never let manure come in contact with the roots, but it can be used as a top dressing.

Grass or weeds should never be allowed to grow around the trees. The ground should be thoroughly cultivated, so that the finely pulverized soil forms a mulch over the whole surface of the ground.

Apples, Apricots, Peaches, Pears, etc., should be pruned back according to the size of the tree. Tree protectors should be used against sunburn.

GUARANTEE

While we exercise the greatest care to have all stock true to its name, it is understood and agreed that should any stock prove untrue to name we shall be held liable only for the sum paid for the stock that may prove untrue and shall not be held liable for any greater amount.

APPLES—75c EACH

DELICIOUS. An excellent variety of delicious flavor. Large, conical, brilliant red on yellow ground. Flesh crisp, juicy and sweet. Strong grower, good bearer and keeper. "November."

EARLY HARVEST. Medium, flattened, yellow. A favorite summer variety. "July."

JONATHAN. Fruit medium, roundish, skin yellow nearly covered with lively red, flesh fine grained, good keeper. "October to December."

MAIDEN BLUSH. Medium size, flattened, beautiful yellow apple with distinct red cheek, flesh tender and sweet. "August."

RED ASTRACHAN. A well-known summer apple, medium to large, red, rich acid flavor. "August."

RED JUNE. Medium, oblong, deep red, excellent early table variety. "June to July."

RHODE ISLAND GREENING. Large yellow, round and tender, juicy and rich, rather acid. One of the best for cooking and dessert. A good bearer. "October."

ROME BEAUTY. Yellow striped with red, sprinkled with light dots. Good keeper. Fine for mountain valleys and Southern California. "October and November."

WHITE WINTER PEARMAN. Medium size, skin light yellowish green, flesh tender. One of the leading varieties. "November."

WINESAP. Medium size, dark red. A favorite variety in the West. "November."

WINTER BANANA. Very large, round, slightly flattened, golden yellow with pink cheek. Bears early and heavy. Highly recommended. "September."

YELLOW BELLFLOWER. Large yellow with a blush on the sunny side. Very tender, juicy. An excellent apple. "October."

YELLOW NEWTON PIPPIN. Medium to large, yellow, very firm, crisp, juicy with a very high flavor. "December."

CRAB APPLES—75c EACH

TRANSCENDENT. Medium large, round, yellow striped with red. Highly recommended. "August."

YELLOW SIBERIAN. Medium large, beautiful golden yellow. "August."

APRICOTS—75c EACH

ROYAL. Medium to large, oval, orange in color, sweet excellent flavor. Very productive. Highly recommended for all purposes. "Early June."

BLENHIME. Fruit large and oval, deep yellow, rich and juicy, good for canning and drying. "June."

NEWCASTLE. Medium, orange with red cheek. Ripens early. Fine for family and an early market. "First of June."

ALMONDS—75c EACH

I. X. L. Nut large, soft shell, good bearer. Vigorous, upright grower. One of the best commercial varieties.

NE PLUS ULTRA. Nut large, soft shell, vigorous and productive. An old standard variety.

TEXAS PROLIFIC. Medium size, soft shell, regular and heavy bearer. Good for pollenizing others.

NONPAREIL. Medium size, thin shell, good quality and prolific.

CHERRY—\$1.00 EACH

BLACK TARTARIAN. Large, purplish black flesh, juicy, rich and sweet. Strong grower and prolific bearer. "June."

EARLY RICHMOND. Medium size, red, melting juicy, slightly acid flavor. "Late May."

MORELLO. Medium to large, blackish red, acid, juicy. Very productive. "July."

ROYAL ANN. Large, yellow light with red cheek. Flesh juicy and sweet. "Late June."

PEARS—75c EACH

WINTER NELIS. An early winter pear of very good quality. Fruit medium size and dark russet in color, heavy bearer and good flavor. "December."

KIEFFER. A large fruit variety of golden yellow color. Flesh somewhat coarse and juicy, and quince flavor. "October."

BARTLETT. The best known and most popular pear in California. The tree is a vigorous grower, bearing abundantly, fruit of large size, and rich flavor. "August."

WINTER BARTLETT. Resembles the early Bartlett in shape and appearance. Ripens about three months later than the Early Bartlett. "October and November."

QUINCE—75c EACH

This fruit succeeds almost everywhere in California and is especially in demand for jellies and preserving.

CHAMPION. Large, light yellow, very productive. "September."

ORANGE. Large, greenish yellow, valuable old variety. "Late September."

PINEAPPLE. The name is suggested by the flavor. Resembles the orange, excellent quality.

VAN DEMAN. Originated by Burbank. Hardy and a strong grower, early and prolific bearer, ripens through a long season and keeps well. "Late September."

PLUMS—75c EACH

This fruit grows well in all parts of the state. The Japanese varieties and their crosses occupy a prominent place in the plum culture of California. The European varieties are also held in considerable favor, especially for canning purposes.

BLUE DAMSON. Small, skin purple, flesh yellowish green. Juicy and rather tart. An old favorite sort for making jam. "September."

BEAUTY. Large, beautiful crimson, flesh firm and sweet, vigorous and very prolific. "June."

BURBANK. Medium large, yellow mottled red, flesh yellow, small pit, very productive. "July."

DUARTE. An excellent blood plum resembling the Satsuma, good flavor and quality. Vigorous and prolific. "July."

HALE. Medium, yellowish green slightly shaded red. Very juicy and delicious. Regular and heavy bearer, fine for table and market. "Late June."

KELSEY. Very large heart-shaped, yellow with light red cheek, flesh yellow, rich and spicy flavor, very productive. "August."

SANTA ROSA. Large purplish crimson, flesh yellow mottled crimson. Very good quality, excellent for all purposes. "Early July."

SATSUMA. A very large and well flavored plum with blood red flesh, skin bluish red, a very small pit. Vigorous and productive. A well known variety much in demand for home canning. "July."

WICKSON. Deep cherry red to a rich claret color when ripe. Flesh amber very juicy. "August."

PLUMCOTS—75c EACH

APEX. This fruit is indicated by its name. Is a very satisfactory combination of the Apricot and the Plum. Large round, yellow, rich and aromatic. "June."

PRUNES—75c EACH

The prune is really a plum with the distinguishing characteristic that it dries sweet and makes a commercial product. In California the prune industry is one of the great horticultural interests of the state.

FRENCH. The best of all commercial Prunes. Medium size, skin reddish purple with a blue bloom. Flesh very sweet and rich. Regular bearer, used extensively for drying in California. "August."

SUGAR. Medium large, dark purple, flesh yellow, juicy and sweet. Excellent for canning and drying. Vigorous and productive. "August."

TRAGEDY. Large, dark purple, yellowish green meat, rich and sweet. Fine table prune. "July."

PEACHES—75c EACH

The trees do best on a well drained sandy loam, rather than on land inclined to be moist. When too many fruits have set the only remedy is to thin them out. Thinning is done before the pit has formed.

FREE STONE

ALEXANDER. Medium size, skin greenish white shaded with dark red. Juicy and sweet. "Early June."

EARLY CRAWFORD. Very large, oblong, golden yellow with red cheek. Flesh yellow, juicy and sweet. "July."

ELBERTA. Oblong, bright golden yellow with beautiful red cheek. Flesh very firm, juicy and sweet, vigorous and very productive. One of the best for all purposes. "August."

FOSTER. Large, bright yellow with dark cheek. Resembles Early Crawford, much better quality, ripens earlier. "July."

GEORGE IV. Large, flesh white, skin creamy white shaded red, prolific. "July."

J. H. HALE. Valuable new variety, resembles Elberta but larger and better quality. Skin almost fuzzless, flesh very firm, good shipper. One of the best yellow freestones. "August."

LATE CRAWFORD. Large golden yellow with dull red cheek. Flesh yellow, juicy and sweet. "August."

LUKEN'S HONEY. Medium, oblong, yellowish white, shaded red. Flesh white, juicy and sweet like honey. A favorite for the table. "Early August."

LOVELL. A California variety, large, almost perfectly round, clear golden yellow, with faint red blush. Flesh fine, grain firm and yellow to the pit. A superb canning and drying peach. Also excellent for table use. Highly recommended. "August."

MAYFLOWER. Medium, beautiful red skin, flesh firm and juicy. One of the best early peaches, productive and vigorous. "May."

SALWAY. Large round, yellow shaded red, sweet and rich flavor. Good canning peach, also best for late market. "September."

SAUCER. Australian, medium size, flattened on both ends. Creamish white, shaded crimson. Flesh white. A peculiar sweet flavor. "June."

IMPERIAL. Early free, a strong vigorous grower yielding abundantly. Fruit large with small pit, skin yellow, heavily shaded with dark red. Flesh yellow, rich and firm. Desirable for both shipping and home use. "Late June to July."

CLINGSTONE

Clingstone peaches are much sought after by canners on account of their richness and firmness. Recommended for home canning.

LEMON CLING. Large, oblong, yellow shaded red. Flesh yellow. "August."

MCCLURE'S STRAWBERRY CLING. A new valuable variety, large creamy white, nearly covered with brilliant crimson. Flesh white, red around the pit. Excellent for table and market. "August."

RED BIRD CLING. Handsome, good shipper, white flesh, deep red skin. Larger than most other early varieties. "Early June."

TUSCAN CLING. A popular canning variety. A fancy peach, large, deep red on sunny side, solid yellow fleshed. Early and heavy bearer. "July."

ORANGE CLING. Very large, golden yellow with crimson cheek. Flesh yellow, sweet, delicious. Much desired for home canning. "Late August."

PHILLIP'S CLING. This prime variety is well known and esteemed as the standard of excellence among canning peaches. Large, round with a slight blush on the sunny side. Flesh firm, yellow to the center, pit small. "Late August."

SIMS CLING. One of the newest varieties much preferred for canning. A good all around peach. "July and August."

NECTARINES—75c EACH

The Nectarine is practically a peach with a smooth skin. Its delicious and aromatic flavor makes it especially valuable for the table and also for drying and canning. It requires the same culture as the peach.

BOSTON. Large, deep yellow with bright blush and mottling of red. Sweet and of a peculiar, pleasant flavor. Ripens in August.

HARDWICK. Medium, cream color with red cheek, flesh white. One of the best, vigorous and prolific. "August."

LORD NAPIER. Large, greenish yellow with red cheek, flesh white, rich, spicy. "August."

STANWICK. Large, greenish white with violet cheek, flesh white, juicy and delicious. "August."

WALNUTS

PLACENTIA PERFECTION SEEDLINGS. Trees of this variety are grown from selected nuts, from the best Placentia Perfection trees. Most of the old bearing orchards of California are of this type. Many old growers prefer a good strain of hardy seedlings, especially where frosts are liable to injure them. 6 to 8 feet. \$1.50 each.

ENGLISH SOFT SHELL ON BLACK ROOT. The English Walnut is the great commercial nut of California, and the class of nuts known as soft shells is the one universally planted at the present time. A deep rich soil is best adapted for the Walnut. Much attention has been given in recent years to the budding and grafting of the Walnut. Budded or grafted trees yield a nut larger than the average seedlings.

EUREKA, ON BLACK ROOT. Large oblong, soft shell tightly sealed. Tree vigorous grower, blight resisting, good producer, blooms very late. Therefore, not so much subject to late frosts. 6 to 8 feet. \$2.50 each. 10 to 12 feet. \$3.00 each.

PLACENTIA PERFECTION, ON BLACK ROOT. A favorite in Southern California. Nuts large, soft shell, white meat of excellent quality. Heavy and regular bearer. 6 to 8 feet. \$2.50 each. 10 to 12 feet. \$3.00 each.

FIGS—75c EACH

There is probably no fruit that repays its owner so well as a few fig trees. From early summer till late fall there is a constant supply of wholesome appetizing fruit. The trees require sufficient moisture to keep them constantly growing during the summer months, in order to fruit well.

BLACK MISSION. This is probably the most common black fig in California today. Fair size, dark purple, almost black in color. Flesh very rich and sweet. Strong grower and heavy bearer. "August."

BLACK SPANISH. Not so black in color as the Black Mission, but a much larger fig, vigorous and very prolific. "August."

BROWN TURKEY. Large, dark purplish red, good quality, earliest to ripen and bearing fruit constantly until frost. Valuable market variety. "July."

KADOTA, or WHITE PACIFIC. This is one of the very best white figs. Medium size, slightly elongated, yellowish green, flesh yellow, of excellent quality, rich and sweet as honey. Does not crack or sour and dries perfectly. Highly recommended for all purposes. "August to November."

WHITE ADRIATIC. Large, greenish yellow skin, red flesh. Vigorous grower and prolific bearer. One of the most common sorts grown in California. "August."

SAN PEDRO BLACK. A fine table variety, fruit large, somewhat elongated. Color violet black, tending to green toward the neck. Pulp of a coppery red color. Ripens early in September.

OLIVES

The olive will thrive wherever Oranges do. The trees should be planted 24 to 30 feet apart and special care should be taken to prevent the roots from drying out when planting.

MISSION. 4 to 6 feet. \$1.50 each. This well-known old Spanish variety is still generally planted in California. Fruit medium large, jet black and most productive. Very vigorous. "November."

FEIJOA "PINEAPPLE GUAVA"

A vigorous growing shrub with glossy green foliage. Silvery white underneath and beautiful showy flowers. Fruit egg-shape, creamy white meat, with a pineapple and banana flavor. Quite hardy. "October." Balled plants, \$1.00 each. Gallon can size, 75c each.

CHERIMOYA—"CUSTARD APPLE"

A most delicious fruit with creamy white flesh, resembling custard in flavor and appearance. Trees grow quite large. Fruit should be picked green and kept until soft. \$1.00 each.

GUAVA

The Guava is prized for making jelly and preserves as well as eating out of the hand. They are also very ornamental and can be used as a hedge.

STRAWBERRY GUAVA. A beautiful evergreen shrub, producing an abundance of luscious dark crimson fruit about as large as a strawberry, and of a similar flavor. Ripens late in the fall when little other fresh fruit is available. 50c each, in gallon cans.

LOQUATS

This is a fine evergreen tree that is useful as well as ornamental. The fruit is yellow to orange in color and the size of a large plum. It is a very desirable fruit, ripening in the late winter and early spring when fruit is scarce. The trees are easily cultivated, require no pruning, and bear abundantly. \$1.50 each. Larger sizes, \$2.50 to \$6.00.

POMEGRANATE

The Pomegranate grows in bush form, and should not be pruned very much if a large crop of fruit is the main object. However, its glossy light green foliage and beautiful scarlet flowers render it also very desirable for ornamental purposes. A pomegranate hedge is especially beautiful. \$1.00 each.

PERSIMMONS

The value of this beautiful and luscious fruit is becoming more and more recognized. Persimmons are particularly hard to transplant. The root must never be allowed to become dry before planting, and after planting until well established they must be well supplied with water. If this is neglected a large percentage may die.

FUYUGAKI. This variety possesses several characteristics which place it in a class by itself. So far as our information goes, it is never astringent, is always light fleshed, is edible while still hard, and may be peeled and eaten like an apple. It keeps well, and in quality is one of the best. The fruit is medium in size and rather flattened, a beautiful deep red in color, and the tree is very prolific. We believe this variety will surpass all other Japanese Persimmons so far introduced as a market fruit. It can be placed on the market while still hard without waiting for the fruit to soften. 4 to 5 feet. \$3.00. 5 to 7 feet. \$3.50.

HACHIYA. Very large, oblong conical, with short pit. Very showy. Diameter three and three-fourths inches, skin bright red with occasional dark spots or blotches and rings at the apex. Flesh is a deep yellow, astringent until ripe, then very fine. The largest of all trees and vigorous. 3 to 4 feet, \$1.50. 4 to 5 feet, \$2.00.

TAMOPAN. This valuable new vigorous variety was introduced by Mr. Frank N. Meyer, Agricultural explorer of the Department of Agriculture of Washington, D. C. In Japan this is considered the best of all Persimmons. Fruit is a bright orange red, skin thick and tough, flesh light colored, seedless, of excellent quality. Some without astringency and can be eaten while still hard. Tree is a thrifty grower. 4 to 5 feet. \$2.00.

CITRUS TREES

When planting a citrus tree the burlap should be left on the ball of the tree. If removed the soil is apt to fall away from the roots, thus lessening the chances of the tree to live.

ORANGE

WASHINGTON NAVEL. The world wide famous California Orange. Fruit large and seedless. Flesh juicy, sweet and highly flavored. Ripens November to March. \$2.50 and \$3.00 each.

VALENCIA. Sharing more and more the popularity of the Navel, and often bringing the highest prices in the market. Ripens after Navel season is over. Fruit medium size, few seeds, tender, sweet and delicious. "May to October." \$2.50 and \$3.00 each.

LEMONS

EUREKA. This is the most commonly grown and leading market variety. Almost thornless. Fruit of a good even size and splendid quality. Almost seedless. \$3.00 each.

GRAPE FRUIT

MARSH'S SEEDLESS. Extra large, practically seedless. It has a very fine flavor. Best of all Grape Fruits. Strong grower and heavy bearer. \$3.00 and \$3.50 each.

LIMES

Fruit medium roundish, sweet and mild. Vigorous, productive and hardy. \$3.50 each.

TANGERINE

DANCY. Very popular Mandarin variety. Skin orange red, meat juicy and sweet, few seeds. Vigorous and prolific. "March." \$3.50.

SATSUMA. Excellent Japanese Orange. Fruit medium size, skin deep orange, flesh tender and delicious. Tree of semi-dwarf habit. Thornless and good bearer. "December." \$3.50 each.

GRAPES

FOREIGN VARIETIES—15c Each—\$1.50 Doz.

CORNICHON. Berries long and large, skin blue-black and thick. Flesh firm, good flavor. Late keeper and good shipper. "October."

EMPEROR. Fruit large, oval, dark red, juicy and sweet. Good shipping and keeping quality. "November."

MALAGA. Very large, greenish white, meaty, sweet and juicy. "August."

MISSION. Medium size, blue-black, good for table and wine. "September."

MUSCAT. Standard table and raisin grape. Fruit large, greenish yellow. Flesh firm, sweet and juicy.

SULTANA. Small, seedless, amber colored, very sweet, used for raisins. "August."

THOMPSON SEEDLESS. Small, yellow, very sweet and delicious flavor, prized for table raisins. "August."

ZINFANDEL. Bunches large and compact. Planted extensively in California for the juice. "September."

BLACK MALVOISE. Vine a very strong grower, berries large, oblong, reddish black with faint bloom. Fresh juicy, flavor neutral. An immense bearer, a fine table grape. "September."

FLAME TOKAY. Bunches and berries very large, pale red with bloom, flesh firm and sweet. "September."

AMERICAN OR EASTERN GRAPES—25c Each—\$2.50 Doz.

CONCORD. The most widely known and popular of all American grapes. The vine is a healthy, vigorous grower, and being hardy, it succeeds where the more tender varieties fail. "August."

NIAGARA. Large fruit, pale yellow color, skin thin and tough, tender and sweet flesh. "August."

SMALL FRUITS

There are few if any sections in California where one or more of the so-called small fruits or berries do not thrive well. They are especially adapted to the garden, on account of the small space occupied, and the short time in which fruit can be obtained.

BLACKBERRIES

A most rampant grower. Should be trained on a trellis and be pruned back like the grape vine.

MAMMOTH. Strong grower and heavy bearer. Berries large, highly flavored and very sweet. Ripens early and fruits over a long period. Should also be grown on a trellis. Highly recommended. 20c each, \$2.00 doz.

CORY'S MAMMOTH THORNLESS. Plant vigorous, sending up strong, stocky canes early in the spring, which often make a growth of twenty feet in one season. Can be kept in bush form by pruning. Ripens early, flavor delicious, sweet, flesh firm, melting and juicy, few seeds. Berries are very large. Vines are thornless, making picking easy. "June and July." 25c each, \$2.50 doz.

HIMALAYA. A very rampant grower and heavy yielder. Fruit has few seeds. 15c each, \$1.50 doz.

DEWBERRIES

A trailing low bush blackberry.

GARDENA. Berries large, ripens early, vigorous and very productive, fine quality. 15c each, \$1.50 doz.

LUCRETIA. A delicious berry of high quality. 15c each, \$1.50 doz.

LOGANBERRIES

Supposed to be a hybrid between the Blackberry and Raspberry, but it is entirely distinct from either of its parents. When fully ripe it is a very dark red very large, often an inch and a quarter long. The vines are rampant growers. 20c each, \$2.00 doz.

RASPBERRIES

CUTHBERT. An old standard variety, very large, fine flavor, ripens over a long period. 15c each, \$1.50 doz.

ST. REGIS EVERBEARING. A new early variety, ripens throughout the season. Berries large and of best quality, strong grower. 15c each, \$1.50 doz.

KANSAS BLACK CAP. One of the best black Raspberries, vigorous and productive. 15c each, \$1.50 doz.

CURRENTS

BLACK NAPLES. Especially esteemed. Has a new pleasant taste. 25c each, \$2.50 doz.

FAY'S PROLIFIC. Extra large, very productive, red, excellent quality. 25c each, \$2.50 doz.

WHITE GRAPE. The best white currant. 25c each, \$2.50 doz.

GOOSEBERRIES

OREGON CHAMPION. Medium large, round, fine quality, productive and free from mildew. 25c each, \$2.50 doz.

STRAWBERRIES

CAROLINA. A new berry that has met with instant favor. A vigorous grower, with strong foliage, producing heavily berries of large size and fine flavor. 35c doz., \$2.50 per 100.

KLONDYKE. A very popular berry. A vigorous grower, berries of medium size and good flavor. Recommended for shipping purposes. 25c doz., \$1.50 per 100.

PROGRESSIVE. A new variety that will bear over a longer period than any other. The fruit is of fine flavor and good size. 50c doz., \$3.00 per 100.

VEGETABLE PLANTS AND ROOTS

We beg to call your attention to the fact that in dozen and lots of 100, the prices below are parcel post or express prepaid. In lots of 1000 the price quoted is F. O. B., Los Angeles. Owing to the fact that our vegetable plant stock is grown at a different nursery from other plants, we are compelled to make shipment of vegetable plants separately.

The plants mentioned below are usually sent out packed carefully in moss. If desired, sent in a flat, please add fifty cents for each flat.

Germain's

PANAMA RHUBARB

Nothing in recent years has met with the instant favor that has fallen to Germain's Panama Rhubarb. It has literally taken the gardening public by storm. One market gardener alone in the Montebello district purchased 30,000 roots from us, which he has planted for the Eastern market.

For flavor, productiveness, and growing qualities it is unsurpassed. A rhubarb that grows all winter through, that yields two to three times more than any other rhubarb known, that requires less than one-half the amount of sugar that other varieties do, that requires no peeling whatever, that is comparatively free from acid, THAT'S PANAMA RHUBARB.

Panama Rhubarb can be planted in the fall as well as in the spring. Frost will not kill it, and in the absence of frost it will make its best and most profitable growth during the winter months.

Prices: Each 35 cents Dozen \$3.50
Postpaid.

Catalog Prices Subject to Change Without Notice.

Due to extremely unsettled conditions in the seed market this year we find it necessary to make all catalog prices subject to change without notice. At a time we shall have in mind our customers' welfare, and prices will be consistent with the market.

The California Home Garden

By Ross H. Gast

The California home garden is a permanent, all year 'round institution, and an economical adjunct to the kitchen. To succeed in its culture, one must know certain fundamentals, which can only be learned in the garden; but, as an incentive to those who are hesitant in making a start, and to gardeners from the East who are trying to adapt themselves to local conditions, these general cultural directions are submitted. The Germain Culture Bulletins, covering the culture of the various vegetables should be consulted for more detailed information. A complete list of these bulletins will be found on page thirteen at the bottom of the page.

Most of the failures in the home garden are due to over-enthusiasm at the start. The average beginner buys more tools and supplies than he really needs, consequently his first effort shows a loss. To begin with, a hoe, a rake, a good spade, and a sufficient length of hose, are the only necessities. Then there are many little odds and ends the gardener can make himself, which will help in cutting down the initial expense.

GARDEN SOILS

To get the best results from its tillage, the gardener should know something of the soil with which he must struggle, for only in knowing the faults and virtues of his own particular type, can he hope to prepare it properly for planting. Efficient soil preparation is the key to successful gardening.

Soils of lighter texture are best adapted to vegetable culture, though any type can be made to produce well on a small scale if they are improved. Because of adverse soil conditions, the gardener need not despair, for there are many ways of supplying the natural deficiencies of soil without going to a great expense.

SANDY LOAM

He who is fortunate enough to have the sandy loam for a garden soil, should offer up thanks, and pay his taxes cheerfully. For they are the easiest of all soils to till, and vegetable culture, with the sandy loam to practice on, is soon mastered by the amateur. They do not bake in summer, and drain well in winter. They are not liable to check when left too long without cultivation, and when in proper tilth, will absorb the warmth of the sun readily, that being an important factor in winter gardening. Truly, the sandy loam is the ideal gardening soil, yet they should be fertilized often, so that they will not become depleted of plant foods.

THE ADOBE

"Adobe" is really a clay, the red color in some of them being due to the presence of iron in the rocks that went toward their formation. There are many different adobes, ranging from the discouraging "muck" to those which contain a large per cent of gravel, and which are fairly easy to handle.

Most of the adobes have a sort of "psychological moment," a time between wetness and dryness when it will work up nicely, without sticking to the plow or spade, nor yet require a pick to break it up. By experimentation, the gardener will soon discover the right time to cultivate, and all will be plain sailing thereafter.

SANDY SOILS

The sandy soils are not as highly prized as the loams, for they are naturally deficient in plant foods. Their redeeming virtue lies in their ability to absorb and hold the heat well, insuring early crops. But the lighter sands require a great deal of water, and only fertilizers which act quickly can be used for others are carried down beyond reach of the roots before they are available.

Sandy soils can be built up by the addition of any sort of humus which is well decayed before it is incorporated. Otherwise it will only tend to make them of less value than before. Well rotted stable manure, or decayed vegetation of any kind will be useful, and when once built up, the sandy soils will prove to be very satisfactory for home gardening.

THE PREPARATION OF THE SEED BED

In Southern California, the home garden should be a permanent institution, for many vegetables can be planted every month

in the year. The main planting season is the Spring, and the secondary season in the early Fall, so usually different methods of preliminary soil preparation are practiced. But in either Spring or the Fall the main object is to insure the proper moisture content of the soil before planting, as the success of the planting depends upon it.

SPRING PREPARATION

Early in the Spring, the garden site, if new, should be cleared off, plowed or spaded, and manure, if available incorporated. Manure does the most good when applied at this time. Then the garden should be harrowed, or raked over, and left to benefit by the rains of the early Spring, which are usually sufficient to supply enough moisture for a planting.

Just before planting, the soil should be turned over again, very thoroughly this time, and left in readiness to make up for planting. Should there seem to be insufficient moisture in the soil, then it should be flooded as will be described in the following paragraphs, under Fall preparation.

FALL PREPARATION

For early Fall and Winter preparation, the soil must be soaked up to a depth of three or four feet before it is turned over, to store a supply of moisture in the soil; a sort of reservoir for the seed and the seedlings to draw upon during the first stages of growth. The Celestial Water Plant usually supplies this moisture in the Winter, for Spring planting, but after the hot months of summer, we must depend upon a more reliable source.

To prepare the soil for Fall planting, "check" it up to flood. Checks are beds about four feet square, with raised borders to hold the water. Let these fill up and soak in three or four times, so that the water will penetrate to a depth of three feet at least. If the soil has baked, or has never been cultivated before, then the surface should be broken up to allow the water to penetrate more rapidly. It is best that only one plot in the garden be soaked up at a time, so that the subsequent spading and planting will not have to be hurried.

As soon as the soil is tillable, the borders should be levelled down, and the plot spaded about twelve inches deep. With a rake, pulverize the clods, and mulch the surface carefully.

And now we have the Fall plot in the same condition as we left the Spring one a few paragraphs back. As the general procedure is the same, the following planting directions will serve for both.

WAYS TO PLANT

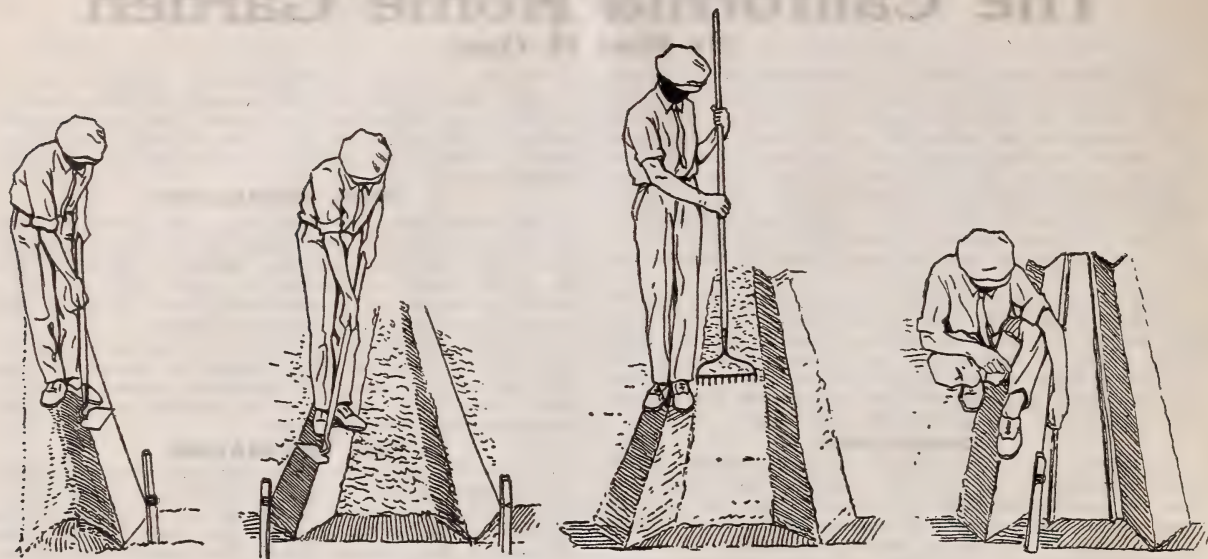

The market gardeners have two ways to plant their root crops, lettuce etc.; the double row system, and in open beds. The larger vegetables, including corn, beans, and vine crops are planted in hills, or in furrows, while tomatoes, cabbage, and their near relatives are started in beds, and later transplanted to the field. As the planting methods of these vegetables vary, the planting of them is given in detail, in the series of bulletins mentioned above.

THE DOUBLE ROW SYSTEM

The double row system is the practice of planting on ridges, so that the seeds are assured good drainage in the Winter, and an opportunity of making the best of the sun while it shines. This system is especially recommended for adobe soils, for they usually have poor natural drainage on account of their position and texture. By this method of planting, two rows are irrigated with one furrow, and with only one furrow to cultivate, it is economical of both time and water. The ridges should be four to six inches high, measuring from the bottom of the furrow, and running north and south, if possible. The distance across varies with the crop to be planted.

The hoe, the rake, and the garden line are the only tools necessary in making up the double rows. If the ridges are to be two feet and a half apart, center to center, then cut a measuring stick that length. Shorten the garden line to the length of the plot to be ridged up and fasten stakes to both ends. This is the "guide."

THE DOUBLE ROW

Starting from the side of the plot, at the end, measure off thirty inches (one length of the measuring stick), and set one stake of the guide. Then from the same side of the plot, at the other end, do likewise.

To make a ridge that is neat and even in height is harder than might be supposed. For the benefit of those who have never planted seed after this system, every step in the preparation of them will be taken up in detail, and illustrated with pictures. It sounds as clear as mud on paper, but if the instructions are followed, the double row will be easily evolved.

Like most work with the hoe, the gardener walks backward. Standing on the right of the guide, plunge the hoe into the soil, with the cutting edge toward the guide. Draw the soil out sharply away from the guide, depositing it each time, so that it will not bunch up ahead of the hoe. When this furrow is opened up, move the guide back to the edge of the plot, and from the opposite end from which the start was made, draw another furrow in the same manner. Changing positions, the soil will be thrown toward the first furrow. When this has been done the first ridge is completed. The rest are easy. Measure the length of the measuring stick from the center of

the first furrow made, set the guide, and repeat all the operations detailed in making the first ridge. Only one new furrow is made, however, for the soil for one side will be taken out of the first furrow made. When the entire length of the plot has been worked over, it will be found that the ridges are about five inches high, and fourteen across.

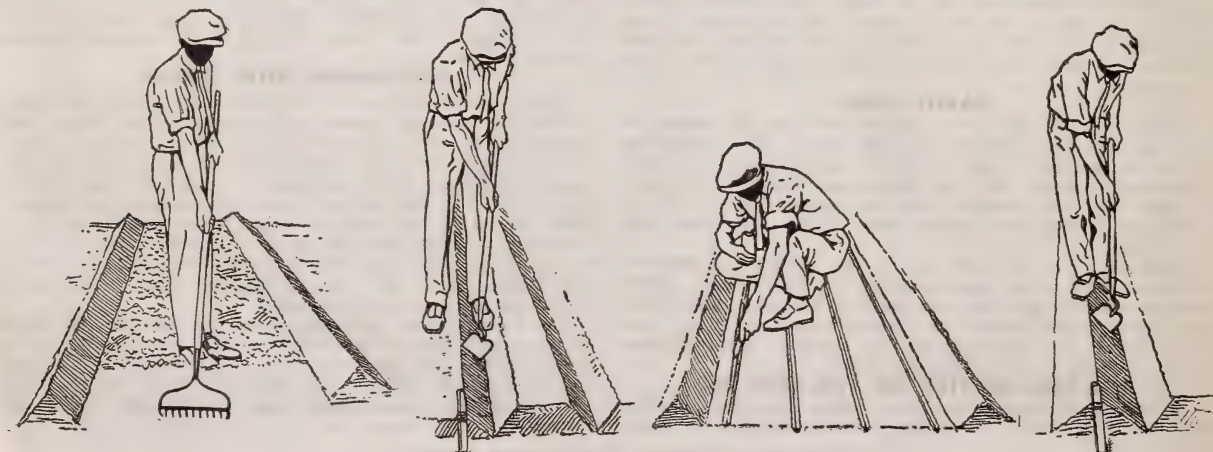

It is upon the shoulders of these ridges that the seed are to be planted, consequently they should be put in good condition to receive them.

THE OPEN BED SYSTEM

The open bed system is the old fashioned method, but still good, especially in light soils, and during the summer months. These beds are formed by making borders six or eight inches high, and levelling the space between. For the home garden, they should be four or five feet across, as the city water will not flood a wider bed. The borders should be firm, to hold water through many irrigations, and the middles raked clear of the larger clods. The guide can be used in running the borders, so that they will be parallel all the length of the plot.

In the midsummer, it is best that the beds be flooded before they are planted, and then the top four inches of soil worked up, mulched and smoothed, for planting.

THE OPEN BED

PLANTING THE SEED

There is an old gardener's rule concerning the planting depths, applying to ideal soil and weather conditions (proven by exceptions, as there are to all good rules), that the seed should be planted to a depth equal to four times their diameter. But the nature of the soil, and the season also should be taken into consideration in determining the depth to which seed should be covered. During the winter months, and in heavy soils, seed should not be covered too deep, for if they are placed a depth to which the sun's heat does not penetrate they do not germinate, but rot in the soil. In the lighter soils, the seed can be planted deeper without danger of rotting, for the lighter soils absorb and hold the heat more readily than the heavier ones. If there is a possibility of rain falling before the seedlings are above the surface, the seed should be covered carefully as a precaution against washing out. The culture bulletins mentioned above give a great deal of detailed information on the planting of the various vegetable seeds, and they should be consulted, especially for the planting of the larger vegetable crops.

ON THE DOUBLE ROW

The guide can also be utilized in planting the double row. It should be set so that the cord runs along the shoulder of the ridge; then with a lath, or a straight edged strip of some sort, a small furrow made, the depth depending upon the seed to be planted. After the seeds are planted, cover them carefully. When that row is planted there will be two straight rows on the ridge, about ten or twelve inches apart.

SEED SHOULD BE SOWN RATHER LIBERALLY, FOR IT EASIER TO THIN THAN TO REPLANT

After the entire plot is planted, sometimes it is advisable to spread an artificial mulch of some kind, grass cuttings for instance, over the top of the ridges, so that the ridges will not dry out, or in case of a heavy rain the soil will not bake. This is especially expedient in the adobe, for it will be hard to stir up the surface after a rain without disturbing the seed. After planting the ridges the only excuse for touching them again before the seedlings are above the surface is to mulch after a rain, and that is not always advisable.

IN OPEN BEDS

When planting the open bed, use the guide again to insure straight rows equal distance apart. In a five foot bed, space allowed for the borders, five drills ten inches apart, or four drills spaced twelve inches apart can be planted. The method of planting the seed as given above, for the double row system should be practiced with the open bed.

THE IMPORTANCE OF PROPER PREPARATION

After the seed has been planted, and carefully mulched, our reserve supply of moisture begins its work. Through the minute soil spaces, the moisture stored when the plot is flooded, rises to the surface, like the oil in a wick of an old fashioned lamp. Coming to the surface, some of it passes off into the air, but most of it is retained, that is, if the soil has been properly mulched before and at the time the seeds are planted. This moisture will be sufficient to germinate the seed, and to nourish the seedling plant until they are large enough to irrigate. This is not a theoretical system, tried out only on paper, but the practice which commercial vegetable growers are taught by experience. It will be taken up more in detail under Cultivation.

IRRIGATION

The first essential in irrigating a soil, or a crop, is the preparation of the soil to receive it, and such preparation has been taken up in detail, in the series of Bulletins, referred to before.

A makeshift method of handling water, where the garden is temporarily placed, can be made up with the hose, and a large can or bucket. The can should be slit well toward the bottom, and the end of the hose set in it, so that the water can be turned on full force without danger of washing the soil out of place. Still another method is used, especially in flooding checks. A "T" joint, of a size corresponding to that of the nozzle of the hose, is screwed on the threads, then a piece of heavy sacking wrapped and secured over all. This breaks the force of the water handily, and can be carried from one place to the other with little trouble.

When irrigation is once begun, the soil must be soaked down below the roots each subsequent application. To wet the surface is harmful rather than beneficial, for it has a tendency to bring the roots to the surface, instead of encouraging them to spread out in search of plant foods. Some soils require more water than others, that is why a thorough understanding of one's own soil is important. Usually, a good irrigation once every ten days will

CULTIVATION AND MULCHING

Any practical gardener knows that one cultivation is worth two irrigations, and that a dust mulch is of more value than an artificial one. Hoeing is a practice that cannot be overdone. Though the consequences of a few hours in company with that instrument may cause a temporary stiffness in the back (especially if the gardener is a novice) the satisfactory results seen in the garden should afford an early relief.

Cultivation accomplishes three important things. First, it breaks up the surface of irrigated soil into small particles, so that the soil water will not evaporate when it moves up to the surface, by capillarity, and meets this well worked layer of soil. Second, it assists free root growth by loosening and aerating the soil, allowing the warmth of the sun to penetrate. The warmer the soil is, the faster everything grows, provided, of course, that there is enough moisture for the requirements of the plant. Oxygen from the air, so necessary to growing plants, and to germinating seed, enters open soil, and assists in bringing soil bacteria into action, liberating a great deal of plant food that might not otherwise be available. Third, hoeing keeps down the weeds, which, if left to grow, rob the soil of both plant foods and moisture.

Shallow cultivation is best, for if the tools are allowed to reach down deep, especially close to the plants, many of the fine roots are damaged. These fine roots are those which absorb water, carrying plant food solvent in it, to nourish the growing plant. Therefore, it is imperative that they not be destroyed.

On the half acre places, the wheel hoe, with its various attachments, is a necessity. This tool can be rigged up to perform many duties which would not be possible to do with a hand hoe. But the hand hoe will be useful in cultivating up close to the plants.

GARDEN HELPS

You who read this catalog are naturally interested in gardening and garden information. With this thought in mind we have prepared for you a series of bulletins on vegetable and field crops. The list is not complete as yet, and from year to year we will add bulletins dealing with new varieties and methods.

These pamphlets are for the use of our patrons, and a complete set or any particular ones will be mailed, upon your request, free of charge with every order.

The following are the subjects now available:

Artichoke	Kale	Alfalfa
Asparagus	Kohlrabi	Corn—Field
Bean	Lettuce	
Beet, Table	Muskmelon and Casaba	Melilotus Alba
Brussels Sprouts	Mustard	Melilotus India
Broccoli	Onion and Onion Sets	Mushroom Culture
Cabbage	Parsley	Rhodes Grass
Cabbage, Chinese	Parsnip	Sudan Grass
Carrot	Pea, Garden	Sweet Sorghums
Cauliflower	Pepper	Whipporwill Cow Pea
Celery and Celeriac	Pumpkin	
Chervil	Radish	Strawberry
Chicory	Roselle, Okra	
Collards	Salsify	Planting and Care of Trees
Corn Salad	Sorrel	Success with Flower Seeds
Corn—Sweet	Spinach	Making and Care of Lawns
Cress or Pepper Grass	Squash	
Cucumber	Tomato	
Dandelion	Turnip	
Egg Plant	Water Cress	
Endive	Watermelon	Dahlia
Garlic, Leeks, Chives, Shallots		

How to Beautify an Old Lawn and How to Make a Beautiful New Lawn by

GERMAIN'S NULAWN PLAN

WRITE FOR PAMPHLET

Nothing adds to the attractiveness and salability of a home like a rich, well-kept, velvety-green lawn. It breathes an air of opulence and acts as a graceful foil for other vegetation. The money expended in making a beautiful lawn and keeping it beautiful is more than repaid by the feeling of satisfaction which this inviting approach to your home will give.

California offers every natural advantage for a beautiful lawn—abundance of sunshine, no extremes of heat or cold, fertile soil, and plenty of water. All that is needed is Germain's Nulawn Plan.

You've seen nice, green lawns during July and August, haven't you?—and then September comes along and you notice a brown spot here and there. October brings more brown spots, and by the time December arrives, what do you see? Not a "green" lawn, but a "brown" one, apparently lifeless and really a detriment to the appearance of the home. To remedy such a condition we are offering the Nulawn Plan.

The Germain Seed & Plant Company has devised what we are pleased to call our Nulawn Plan which we believe is by far the best method for putting in a new lawn and also renew the old one.

With the Nulawn Plan you can have a beautiful lawn 365 days out of the year with very little expense and very little trouble. Our method has been tried out and has accomplished and is accomplishing wonders.

And the method is simple. All that is needed is Germain's Grass Seed, Nuvida Fertilizer, a Cutter Bar Rake and a little of your time.

The H. C. Baker home on Arden Road Pasadena

The accompanying photographs show a few Southern California homes that have been treated with Nuvida Fertilizer. We can absolutely assure you lawns like these if you follow the Nulawn Plan.

A well kept lawn, rich green in color, adds hundreds of dollars to the value of your home

The H. G. Wylie home. 17 Chester Place L. A.

We carry a complete line of grass seeds of all kinds. The common varieties are listed below.

KENTUCKY BLUE GRASS—Premium Grade—is the finest grade of Blue Grass on the market. Grown from specially selected strains and in carefully selected fields, the seed gives the greatest satisfaction, due to its quality, purity and freedom from other seed. Per lb. 60c; 10 lbs. \$5.50, postpaid.

WHITE CLOVER. Our seed is strictly first-class, absolutely clean and pure and of the highest quality. Per lb. \$1.00; 10 lbs. \$9.00, postpaid.

AUSTRALIAN, OR PERENNIAL RYE GRASS. An extremely hardy sort, requiring less fertile soil and withstanding more hardships. Used extensively in Arizona and becoming very popular in So. California. Per lb. 35c; 10 lbs. \$3.00, postpaid.

NUVIDA LAWN AND GARDEN FERTILIZER

The verdict of all who have used the Nuvida Lawn and Garden Fertilizer is that it is the most complete and satisfactory Lawn Dressing ever placed on the market. It is manufactured by us and we guarantee that it contains all the elements required and in the proper proportions to produce a luxuriant growth. It is a clean, odorless material and can be applied without offending one's sense of smell or sight. Being quick in action the effect can be noticed within a very short time by the rich green coloring and that velvety appearance so much sought after. Its superiority over stable manure can scarcely be estimated, as the latter, in addition to disfiguring the lawn by its unsightly appearance, also gives out an unpleasant odor, and always contains weeds and other undesirable seeds.

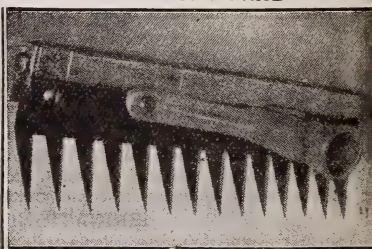

Trial bag for 300 square feet, 10 lbs.	\$0.60
25 lbs. sacks for 750 square feet.	1.25
50 lbs. sack for 1000 square feet.	2.25
100 lb. sack for 3000 square feet.	4.00

Write For Nuvida Pamphlet

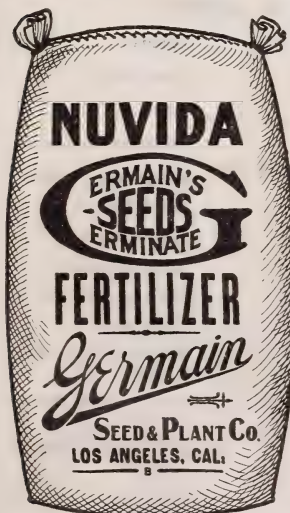

NUVIDA FLOWER AND FERN FERTILIZER

It is of a concentrated nature requiring but very small doses to the plant and will undoubtedly yield good results. We confidently feel assured of its success, because of its purity, its food value, and its proportions of fertilizer elements. Nuvida Flower and Fern Fertilizer, 35 cents per can.

BERMUDA RAKE

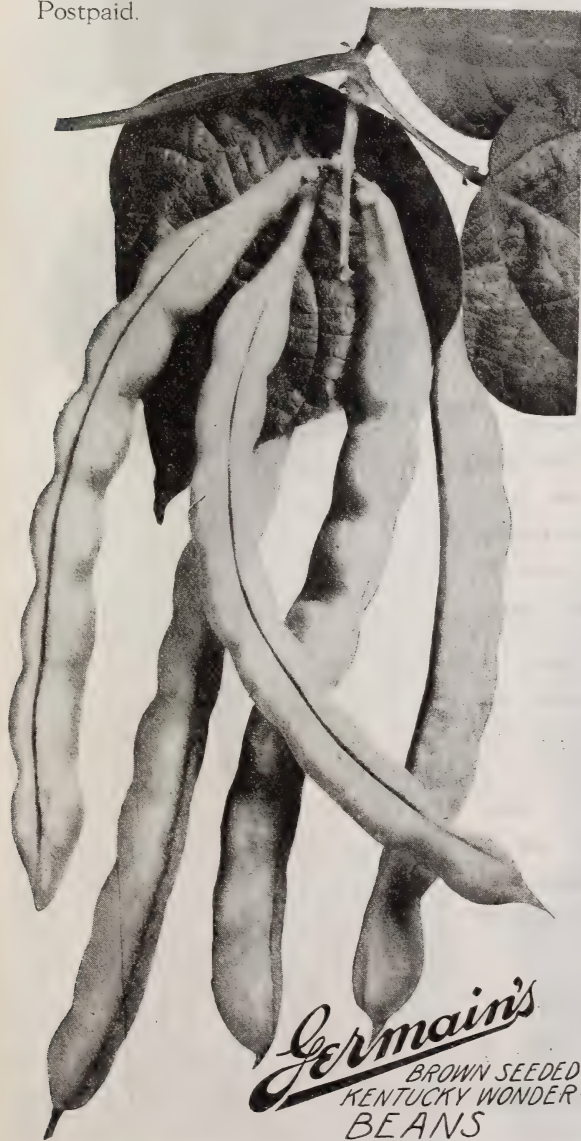

This tool is all machine made, with all working parts detachable, and the metal of each part selected for its particular use. The angle of the teeth, and its weight, keep it in the ground in the heaviest lawn. The sharp blades cut the grass in sections and the cross cutter bar completes the work. A lawn raked and cross raked is free of all runners and the work has left a perfect seed bed to sow clover or grass seed. Brown Bermuda lawns can be skinned in the fall with this tool with a fraction of the labor necessary by any other method. Many lawns burn out in spots because the heavy soil has become impervious. Occasional use of the Bermuda Rake will so loosen the soil it will again take water. Price each \$5.00.

Germain's Brown Seeded Kentucky Wonder Beans

It would be hard to find a more appetizing Bean than this one. Sometimes, in fact very often, we find that the old standby the one we've known for years and years is still the best, and for that reason we are recommending this season the well known **Brown Kentucky Wonder**.

Round in shape, growing to a length of from seven to nine inches, meat crisp and tender, the **Kentucky Wonder Bean** is one that will give you unquestionable satisfaction. We have a strain of seed which brings out strongly all its good features. For culture see page twenty-nine. Prices: Packet, 10c; ½ pound, 20c; one pound, 35c; 10 lbs., \$3.00 Postpaid.

Germain's Stringless Green Pod Beans

Stringless Green Pod. This variety has become very popular because of its hardiness and productiveness. It is stringless, ripens early and remains tender and crisp a long time after maturity. Pods are pale green, long and straight, round, meaty and of excellent flavor. The plants have a spreading habit of growth, and produce large quantities of pods which are very uniform both in size and shape. It is by far one of the best beans offered for market or home garden purposes. Packet, 10c; ½ pound 20; one pound, 35c; 10 lbs., \$3.00. Postpaid.

GERMAIN'S CROSBY'S EGYPTIAN BEET

This beet is famous for palatability. It is by far the best tasting and best flavored beet on the market. For many years it has been a prime favorite, and now in Germain's improved strain you have the acme of quality. The strain has been selected for shape, color, quality and uniformity. It is a very early variety, coming on the market measurably earlier than others. The color is a deep red, the meat is tender and sweet, the skin smooth, and by all odds the finest flavored.

We believe this variety should be grown with care to retain its earliness. For home garden and market garden purposes it is ideal. It bunches well, has an attractive appearance, and will out-sell other varieties on the market.

Price: Packet 10 cents, ounce 20 cents, $\frac{1}{4}$ lb. 45 cents, one pound \$1.25, postpaid.

GERMAIN'S DANVER'S HALF LONG CARROT

Remarkable for its edible qualities, fine appearance, and immense yield, Germain's Danvers Half Long Carrot is deservedly popular, and is planted probably more than any other variety in this section of the country. It attains perfection in those qualities considered desirable, such as sweetness, color, and appearance. It more than any other variety combines these qualities, and its great yielding properties have made it the most commonly grown.

It is a rich orange red variety, very smooth, and of splendid appearance. The tops are of medium size, and the flesh is sweet, tender, and crisp. By all odds, in size, shape, sweetness, color and flavor it surpasses all others.

Price: Packet 10 cents, ounce 20 cents, $\frac{1}{4}$ -lb. 45 cents, one pound \$1.25, postpaid.

Germain's Winnigstadt Cabbage

THE PROVEN STRAIN

We recommend **Germain's Winnigstadt Cabbage** for many reasons, the most important of which are as follows:

SURE HEADER. Germain's Winnigstadt Cabbage is a strain that has been improved upon year after year until we have a type that is a sure header.

HARDINESS. Germain's strain, is a type that withstands wet and cold, is as immune from disease as any one is able to get it; its rugged growth withstands the attacks of insect pests.

GOOD SHIPPER. It is a strain of seed that will enable you to place on the market with the local or eastern houses a Cabbage that is in fine condition and commands the highest prices. It has proven without a doubt, that it is the best keeper, and therefore the best Cabbage California can produce.

EARLINESS. It is the earliest of the early. It is the one that is on the market before other strains. The first Cabbage from the field is usually the Cabbage that commands the highest market prices, and if you desire to grow for an early market, you cannot secure a type of Cabbage that will produce a crop earlier and more perfect than **Germain's strain of Winnigstadt Cabbage.**

Prices: Packet, 10 cents; ounce, 35 cents; 1/4-pound, \$1.20; one-pound, \$3.50.

The Winnigstadt Cabbage Seed you sent me last spring came up splendidly in large thrifty plants, and having more than I wanted I furnished my neighbors with plants. They are all unanimous in saying that the cabbage is far superior to anything of the kind they have ever grown. They are solid, sweet and very crisp and tender.

Willis E. Steadman, Inspiration, Ariz.
I wish to tell you that I had very good results from the Early Winnigstadt Cabbage Seed, and also with all the other seeds that I purchased from you.

Maira G. Lima, San Luis Obispo, Calif.
The Winnigstadt Cabbage Seed did wonderfully. I have about twelve heads of the cabbage yet.

Wm. J. Leonard, Isabella, Calif.

Germain's Cannon Ball Cabbage

This is an early variety of the round-headed type, producing a very heavy crop. For uniformity of head, solid, compact nature, and excellent quality it is unsurpassed. The meat is tender, the very few outer leaves make it a variety in great demand. It can be placed on the market as early as any other Cabbage, thus finding an exceptionally good market, invariably. Below we are reproducing a field of **Cannon Ball Cabbage** showing the immensity of its growing properties. We recommend it.

Prices: Packet, 10c; ounce, 40c; 1/4-lb., \$1.35; one pound, \$4.00.

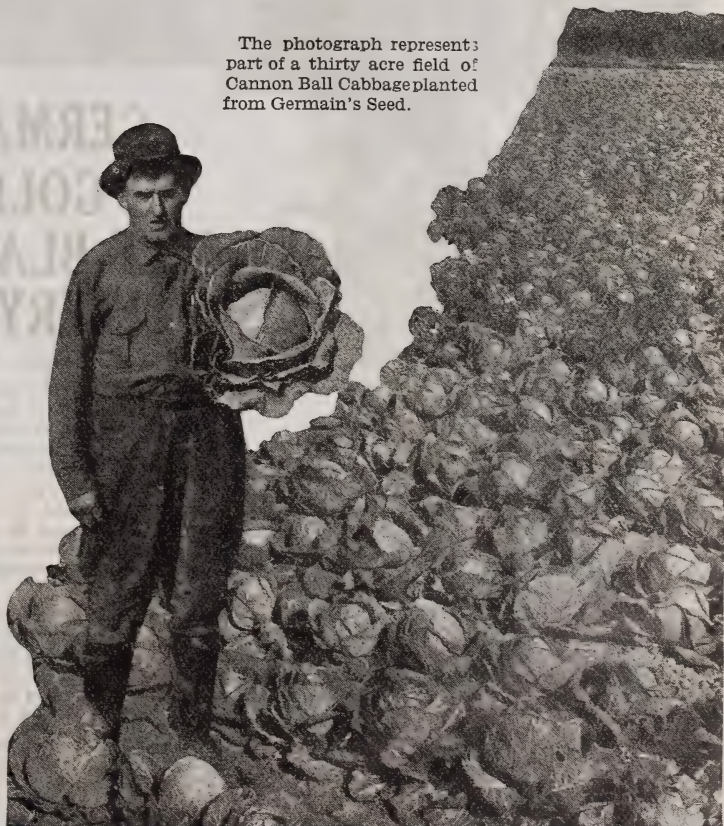

The cabbage seed is all you advertised and am well pleased with the cabbage, very fine flavor, sweet and juicy, and for me I always want the Cannon Ball Cabbage and no complaint to find with any other seed purchased from your company

W. L. BUTTERFIELD, Manzanar, Calif.

I was very well pleased with the Cannon Ball Cabbage Seed, and that the flavor of the cabbage is even better than I expected. It is, in fact, the best flavored cabbage I ever ate. I am going to try it as a variety winter cabbage. It is a splendid heading. I have been very well pleased with all the seeds and plants I have received from you.

MRS. FRANCIS WILSON, Petaluma, Calif.

The photograph represents part of a thirty acre field of Cannon Ball Cabbage planted from Germain's Seed.

GERMAIN'S SNOWFLAKE CAULIFLOWER

For Cultural Directions, see page 33

Out of the many varieties of cauliflowers introduced and exhibited, we claim that Germain's Snowflake Cauliflower stands out supreme. It has the best appearance, best keeping qualities, it withstands the sudden climatic changes better than any other type and with its perfect leaf protection over the head, is a thoroughly bleached product of pure white, from whence it derives its name "Snowflake." It retains its snowflake appearance longer than any other strain and those who have once grown it never fail to demand Germain's Snowflake Cauliflower.

GERMAIN'S EARLY SNOWFLAKE

This type should be planted from June fifteenth to the first of July. We, however, do not recommend the planting of cauliflower too early because of the possibility of its heading prematurely, and climatic conditions also have considerable to do with the success of the grower.

Price: Packet 20c; $\frac{1}{4}$ oz. 65c; 1 oz. \$2.00; $\frac{1}{4}$ lb. \$6.65; 1 lb. \$20.00.

GERMAIN'S MEDIUM SNOWFLAKE

Plant from May twentieth to July fifth. This is the money-maker for the market grower as it becomes ready for the market at the time when prices are best. Price: Packet 20c; $\frac{1}{4}$ oz. 65c; 1 oz. \$2.00; $\frac{1}{4}$ lb. \$6.65; 1 lb. \$20.00.

GERMAIN'S LATE SNOWFLAKE

Here we have a distinctive type which should be planted June 25th to August 25th. If planted too early it has a tendency to go into foliage and the grower will have additional expense and labor in taking care of his field. Earlier planting will not bring any earlier crop as this type will not form its head until the proper season. This is a taller plant than the other type as it grows to a height of three feet or more. It should be planted two feet apart in rows three feet apart. Price: Packet 20c; $\frac{1}{4}$ oz. 65c; 1 oz. \$2.00; $\frac{1}{4}$ lb. \$6.65; 1 lb. \$20.00.

GERMAIN'S GOLDEN SELF-BLANCHING CELERY SEED

(French Stock)

Nothing compares with this superb strain of celery seed. We have endeavored year after year to obtain only the best of French stock to offer our customers, and we feel well repaid for our efforts in this variety. One who delights in crisp, tender yet mild celery, which has a characteristic flavor, will not hesitate to plant Germain's Golden Self-Blanching. It is true to the name in being self-blanching, and is of the highest quality. Our seed is selected for purity and germination and will unquestionably meet with your approval.

We are satisfied we are offering the greatest value for the money in this tried and true sort. Celery seed has for many years been a strong item with Germain's for purity and high quality, but with the establishment of our testing grounds we are in a better position than ever to praise this item. It is a thrifty variety, growing 18 to 22 inches in height, very stocky, heavy, perfectly solid and a splendid shipper, and from every point of analysis is entitled to the mark of approval of this house. Packet, 15c; ounce, \$2.00; $\frac{1}{4}$ lb., \$6.00; 1 lb. \$20.00.

Try the King and Queen [18] Watermelon

GERMAIN'S GOLDEN BANTAM CORN

As a sweet corn one might say that Golden Bantam is unsurpassed. It is by far the sweetest and most delicious corn ever introduced. Golden Bantam is a dwarf early variety, growing four to five feet in height. The grains are golden yellow in color, the ears being eight rowed and from six to seven inches long. On account of its remarkable flavor it is an ideal home garden variety and we feel that no garden is complete without it.

Golden Bantam can be planted in hills three feet apart each way, or in rows three feet apart and the plants standing singly at nine inch intervals.

We heartily recommend it:

Gentlemen:—In the East we use Golden Bantam Sweet Corn altogether. It is one of the finest corns in the United States. Why don't you people recommend a corn of this quality in your catalogue rather than give it mere mention. People don't seem to know about it! By all means give it a lot of publicity and you will never regret it as the seed will sell itself.

A. G. BALDWIN, Covina, Cal.

Price, packet 10c, ½-pound 20c, pound 35c, 10 pounds \$3.00, postpaid.

GERMAIN'S OREGON EVERGREEN CORN

Germain's Oregon Evergreen Corn is the best type to grow in Southern California both for its quality and for its yield. We have a strain of specially selected seed that will afford you ears most palatable and delicious. There is none better than Germain's Oregon Evergreen Corn, whether you are a home gardener or a market gardener. It can be grown early or late and with ordinary care will give more than a satisfactory crop. This Corn is extra sweet and due to the tight-folding of its shucks, is as near corn-worm proof as any.

Prices: Pkt. 10c; ½-lb. 20c; 1 lb. 35c; 10 lbs. \$3.00. Postpaid.

Riverside, Calif.

Will say that it (the Evergreen Corn) was very satisfactory. The ears were large and full and very sweet. Will also add that other seed purchased from you gave very good satisfaction.

A. C. GIBFORD.

Blythe, Calif.

I am glad to say that my corn has done wonderfully, and has yielded by far the most of any I have ever planted. I planted two rows about 150 feet long, two seeds to the hill, and the hills three feet apart, and it was no time until it suckered out until the rows were solid and every stalk had from two to four ears on it of good size and good flavor. We ate all we could, supplied two of our neighbors with all they could eat, and then I am sure I must have fed all of two bushel to the hogs because it got too rich on me. This coming year I will certainly have another patch of it. All my other garden seeds and plants which I have bought of you have also done splendidly except my Cauliflower, but I don't think I put them out at the right time. You can be assured of my order for all my garden seeds and plants for the coming year.

JOE BRUYNEEL.

Somerton, Ariz., September 25, 1921.

The Oregon Evergreen Corn was very satisfactory, being tender and of good flavor. All the seed purchased from you gave good results.

MRS. E. FRAUENFELDER.

The corn (Oregon Evergreen) was very satisfactory. Will plant it again in the spring.

C. I. BRADBURY, Artesia, Cal.

Germain's Lemon Cucumber

The thousands of home gardeners who have tried **Germain's Lemon Cucumber** have been so thoroughly pleased with it, that its reputation as a wonderful salad, far superior to the ordinary Cucumber, is spreading far and wide. The rare delicacy of flavor, its piquancy of taste, its good yielding properties are points that make it so much talked about. The color when ready for picking is like a Pearmain Apple. The photograph shows the actual picking size, although it will be found satisfactory also when somewhat larger.

Prices: Packet, **10c**; ounce, **30c**; $\frac{1}{4}$ -lb., **\$1.00**; 1 lb., **\$3.00**.

Nothing in our family garden gave so much satisfaction as the Lemon Cucumbers. Two hills of them supplied more than our needs, as they are very prolific, and far superior to other varieties. The children had their mother peel one, and ate it down with as much relish as a good apple.

Dr. W. H. Thompson, Riverside, Calif.

I was able to get only one Lemon Cucumber to come up owing to the very cold Spring here. But the one vine has been furnishing all the cucumbers needed for a family of from seven to fourteen. Without exception they are the best Lemon Cucumbers I have ever eaten.

F. M. Houk, Orcutt, Cal.

Germain's Long Green Cucumber

This improved strain of cucumber is probably the best variety to use for general purposes. For slicing for the table and for pickling it stands out supreme. Our strain has been improved for many years through selection, and we offer this as being the best to be had.

The vines are very vigorous and prolific, and the fruit forms early, attaining at maturity a length of about twelve inches. Having a firm and crisp flesh, and a distinctive, pleasing flavor, the finest pickles can be made, and for sweet pickles are superior to any other variety.

Price: Packet, **10c**;
ounce, **25c**; $\frac{1}{4}$ -lb., **85c**;
lb., **\$2.50**, postpaid.

We have found the Long Green Cucumber the finest variety to plant. It has met every need for our table both for pickling and table purposes. All your seeds have proven very satisfactory.

MRS W. P. NELSON,
Denver, Colo.

GERMAIN'S BIG BOSTON LETTUCE

This is a very large, smooth-leaved, solid heading variety, grown very extensively throughout the East and South, but not so well known in this section. It is a lettuce that will grow under practically all climatic conditions, and is a remarkably good shipper. The plants are very hardy and vigorous, the heads sometimes measuring ten to twelve inches across. The leaves are quite smooth and broad, wavy at the edge, thin, very hard and crisp. The heads are beautifully blanching, the inner leaves blanching to an attractive greenish white, tinged with light yellow. In color the heads are a bright light green tinged with reddish brown.

In flavor and quality we believe the Big Boston to be unsurpassed. If one prefers a delicacy in both texture and flavor you will find this variety superior to any other. It is a mighty fine lettuce.

The home gardener will find the Big Boston Lettuce a welcome addition to his garden; with Los Angeles Market Lettuce you have the two best types.

Price, per packet 10c, ounce 25c, $\frac{1}{4}$ pound 85c, 1 pound \$2.50, postpaid.

NOTE THE SMOOTHNESS OF THE LEAVES.

Note the smoothness of the leaves. Big Boston does not have the hard, cabbage-like texture to its leaves.

Germain's
**BIG
BOSTON
LETTUCE**

This lettuce is grown very extensively for the Eastern market. Hundreds of acres are being grown this season in Southern California.

Big Boston commands a very good price and for that reason is a good crop for the commercial grower.

The writer does not know of any lettuce that he would recommend as being better or even as good for the table.

The cross-section photograph shows the crispness and fineness of the inner leaves. Big Boston Lettuce is hard to photograph and it is almost impossible to do justice to its excellence. A trial, we are sure, will convince you of its merit.

GERMAIN'S PERSIAN MUSKMELON

GERMAIN'S PERSIAN MUSKMELON is a new type in salmon-fleshed melons and has a wonderful flavor. Primarily a home garden melon. It grows to a large size, but is always of good quality. Prices: Packet, **10c**; ounce, **60c**; $\frac{1}{4}$ -pound, **\$2.00**; pound, **\$6.00**.

The Persian Muskmelon is a grand melon in every way. It is easy to germinate and easy to grow. I have good melons on my vines at this date. It is sweet and fine flavor and can not be praised too highly.

R. O. SMITH, Elk Grove, Calif.

Will say never had better flavored melons in my life. They sure were good.

M. E. ANDREWS, Bangor, Calif.

I found that they yielded a very nice crop and the flavor was excellent though the soil used was rather poor.

LIONEL GWYTHER, Santa Barbara, Calif.

I planted fourteen "hills" of this variety with the result that almost all the seed came up. But before any melons "set" on the vines the aphids killed all but one vine which I saved by putting sulphur on it every few days. I have taken no less than a dozen big fine melons from it so far. It is far superior to any muskmelon I have seen.

W. A. CONDIFF, Fertilta, Calif.

The Persian Muskmelon certainly is a fine melon and a good yielder and will recommend it to all my friends.

MRS. JOHN B. WILKINSON, JR., Lakeside, Calif.

These are the first Persian Melons I have raised, and I am probably not as well qualified to judge Persian Melons as I might be. The melons were of large size of uniform shape and excellent quality. The vines grew very rank, but not a heavy yield of melons, but enough to be entirely satisfactory.

R. R. BUTLER, Hanford, Calif.

GERMAIN'S GOLDEN HONEY DEW MUSKMELON

Germain's Golden Honey Dew Melon is everything that the name implies. The name even fails to do justice to its indescribably delicious flavor. If you want the last word in melon flavor be sure to plant the Honey Dew and Golden Honey Muskmelons.

A new introduction of great merit. In general it is very much like the Green Fleshed Honey Dew mentioned below, being slightly smaller in size and somewhat different in flavor.

The flesh is a rich golden color, very thick and sweet. It combines the spicy flavor of the Emerald Gem with the sweetness and long keeping qualities of the original Honey Dew. A packet of this variety in your garden together with the Honey Dew, Persian, and Indiana melons will give you an assortment of muskmelons that will delight your appetite.

Price, packet **10c**, oz. **30c**, $\frac{1}{4}$ -pound **\$1.00**, pound **\$3.00**.

**GERMAIN'S
GOLDEN HONEY DEW
MUSKMELON**

A Golden Honey melon at breakfast will beat hot biscuits and honey all hollow.

Germain's King and Queen Watermelon

At last a Christmas Watermelon, the dream of the seedman for years, and at last we are able to offer in limited quantities the seed of this remarkable melon.

You and we and all of us know what a great part the watermelon plays in the dessert of the average dinner. Particularly at Christmas and New Years when we've gone through the whole meal from appetizer through soup, salad, turkey, dressing, potatoes and other vegetables we finally come to the dessert. And when we look at the pudding or mince pie or both we almost give up the ghost. It's too much. Just as Shakespeare said "A kingdom for a horse" we used to say "A kingdom for a piece of melon."

But now this is a thing of the past. We can enjoy a heavy dinner and wind up with something light, appetizing, and healthful.

Germain's King and Queen Winter Watermelon has a hard hornlike shell, and if properly stored can be kept until February in any climate. This melon is new and seed has been carefully guarded by the few who had it. There are ten carloads being stored at Rocky Ford, Colorado, for Winter shipments to the east, and the price they are receiving is extremely high. The melon is of Russian origin. We stored some until January 10th last year, and the eating qualities were perfect at that time.

Price: Packet 10 cents, ounce 30 cents, one-fourth pound \$1.00, one pound \$3.00, postpaid.

GERMAIN'S KLONDIKE WATERMELON

With the introduction of this superior melon several years ago a new step forward was taken in the development of a watermelon for home garden purposes. It is unquestionably the most popular one on the Los Angeles market, the market gardeners in this section having been won over very rapidly.

The Klondike Melon grows to a medium size, but is best known for its remarkable flavor and sweetness. It is unlike any other melon, but is peculiar to itself. The rind is thin, the seed small, about half the size of the ordinary watermelon, and the color of the seed is brown mottled with black.

As a melon for the back yard garden it is unsurpassed, and for the local market it will command the highest prices. However, it will not stand shipping, on account of the thin rind and tender nature.

Price: Packet 10 cents, ounce 30 cents, one-fourth pound \$1.00, one pound \$3.00, postpaid.

**KLONDIKE
WATERMELON**

GERMAIN'S EPICURE RADISH

You know the old saying, "What's in a name." Truly there's something in a name when you consider Germain's Epicure Radish. Nothing more epicurean has ever been offered than this select strain of scarlet, white-tipped Radish, which is one reason for its popularity among market gardeners. It is the quickest growing Radish we know of, maturing in eighteen days. Firm, very mild in flavor and never pithy, it is truly a joy to the planter in every sense.

Prices: Packet, 10c; ounce, 30c; ¼-pound, \$1.00; pound, \$3.00.

We have found the "Epicure Radish Seed" to be all you claim it to be and more. You could not give too much praise if you tried.

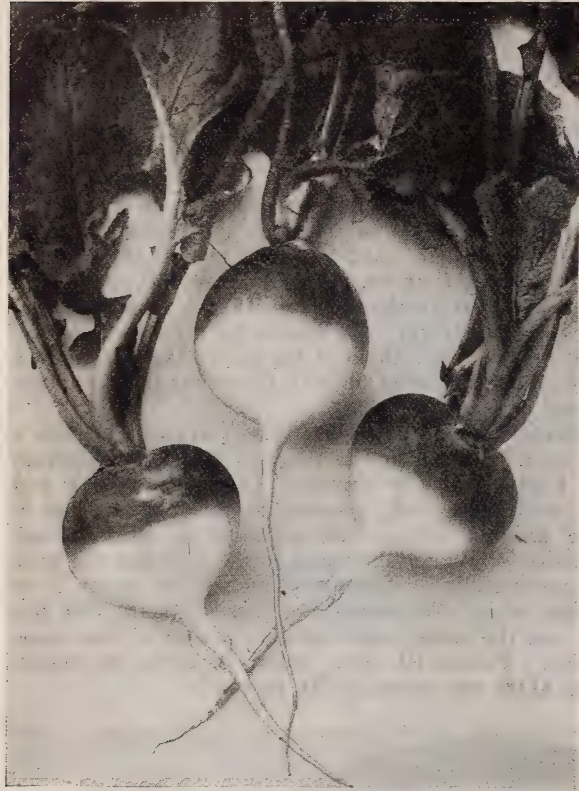

G. A. BEAMER, Yermo, Calif.

The Epicure Radish Seed purchased from you was all you claimed for it.

BEN H. NICHOLAS, Water, Calif.

I found the Epicure Radish, also the White Tipped Scarlet Turnip Radish to be excellent.

MRS. A. F. ARNOLD, Bakersfield, Calif.

**GERMAIN'S STRATAGEM PEAS**

Germain's Stratagem Pea is unsurpassed in sweetness and its prolific bearing qualities. It has only recently come into prominence, being a comparatively new variety, and has had marked success ever since its introduction.

It goes without saying that to be commercially desirable a Pea must bear heavily and must be palatable. In both these points Germain's Stratagem Peas excel and for that reason it has been in such great demand among market gardeners. Prices: Packet, 10c, ½ lb. 20c, 1 lb. 35c, 10 lbs. \$3.00. Postage paid.

It gives me great pleasure to inform you that the Stratagem Pea Seed fulfilled every expectation that your announcement regarding its excellence raised. Not only did the vines bear prolifically, but they kept on yielding when the rest of the garden had withered because of lack of water.

L. MOTT, Avalon, Calif.

Of the 100-lbs. of Stratagem Peas, I harvested four tons of as fine as I ever saw or tasted.

ELMER G. BLOSSOM, El Cajon, Calif.

I will surely recommend the Pea to anyone. One thing, they didn't mildew as do the other kinds, owing to us living so near the coast.

A. H. CHRISTENSEN, Oxnard, Calif.

**INOCULATE THIS
SEED WITH
FARMOGERM**

Germain's
CHINESE
GIANT
PEPPER

GERMAIN'S CHINESE GIANT PEPPER

One couldn't ask for more in a vegetable than is found in **Germain's Chinese Giant Pepper**. In size it is the largest Pepper grown, the photograph being actual size, although they grow still larger. The plants are strong and vigorous, dwarf in habit, seldom growing over two feet high. The fruit is thick and mild.

Prices: Packet, 10c; ounce, 80c; $\frac{1}{4}$ -lb., \$2.65; one pound, \$8.00.

I am pleased to state that the Chinese Giant Peppers have grown to a fine size, are rank and thrifty and are bearing a fair crop of large handsome fruit. The flesh of the peppers is tender and sweet, and I enjoy it very much.

WM. A. EARLS, San Dimas, Calif.

I have obtained very satisfactory results with Chinese Giant Peppers. They are the largest I have ever seen, having grown as long as six inches. I have always had good results from Germain's seeds.

W. S. WILLIAMS, Hemet, Calif.

I planted the Chinese Giant Pepper Seed and neighbors in front of me, left of me and right of me had all they wanted and then some. People passing my place were given of them and so far they are the best ever. My neighbors planted seed from my stock and there are quite a lot of them in San Bernardino.

L. B. YERXA, Seeley Flats, Calif.

GERMAIN'S RUBY KING PEPPER

Without fear of contradiction we can recommend Germain's Ruby King Pepper as being an ideal pepper for both home and market garden purposes. It is, in fact, one of the most popular of the many varieties.

We can absolutely recommend our strain for its many good qualities. The fruit grows to a size of four to five inches in length and three to three and one-half inches thick. The color is dark green when young, turning to a bright ruby red, and really ideal for pickling purposes. The flesh is thick, crisp, and tender, and the flavor is quite mild.

To our mind the two varieties Ruby King and Chinese Giant are by far the most desirable to be had. Price per packet 10 cents; ounce 80 cents; $\frac{1}{4}$ lb. \$2.65; 1 lb. \$8.00. Postpaid.

GERMAIN'S BANANA SQUASH

If you enjoy baked squash you will find Germain's Banana squash a dish fit for the gods. The flesh is solid and firm of a beautiful pumpkin pie shade and of very fine quality. The squash grows from one to two feet in length, the skin varying from a bright yellow to a light green shade. It is an excellent keeper and will last from one season to the next. It can also be used as a summer squash during the early stages of its growth.

Price, pkt. 10c, ounce 20c, ¼-pound 65c, pound \$2.00.

TRY THIS RECIPE

Cut squash into pieces about two inches square, removing the stringy portions and the seeds. Season with salt and pepper, and dots of butter. Place in dripping pan and bake in a moderate oven about fifty minutes or until soft. Serve in shell with butter, and season to taste.

Germain's
**ZUCCHINI
SQUASH**

RECIPES FOR ZUCCHINI

FLORENTINE—Raw, cut in dice, about ¼ inch. Season with salt and pepper. Dip in flour, and then raw egg. Fry in skillet with olive oil and serve with drawn butter.

MORNAY—Cut in small squares about one inch. Boil for about one minute in salted water. Drain on a colander. Put in baking dish. Cover with cream sauce and a little Parmesan cheese and butter. Bake in oven until done.

JULIENNE—Cut in Julienne (like French fried potatoes), dip in milk, and then in flour. Fry in very hot grease. Season and serve.

Germain's
**BANANA
SQUASH**

GERMAIN'S ZUCCHINI SQUASH

Zucchini belongs to the squash family, the other name for it being Italian Squash. For piquancy of flavor, tenderness, and general palatability I have never tasted its equal. It is truly a gastronomic wonder. We have prevailed upon Marcell's wonderful chef to give us his recipes for preparing Zucchini which we are reproducing on this page. It is easy to grow, just like any squash, and yields heavily. Try a packet of it at least and see whether or not we are right in the claims we make for it. The photograph shows a slight reduction from the actual picking size.

Pkt. 10c, oz. 25c, ¼lb. 85c, 1 lb. \$2.50, postpaid.

Santa Barbara, Calif.

I have had good results with Zucchini Squash. It has proved very prolific, and is fine cooked in the ways you recommend. I also had good results with other seeds purchased from you.

FANNY BOSLEY.

Santa Paula, Calif.

I got a package of seed of your Zucchini or Italian Squash last spring, and they are fine. They began bearing in July, and are still putting on young squashes. We have just two vines (or bushes), and have had all we could use.

J. T. RENFRO.

Falfurrias, Texas

I have raised squash all my life. The Zucchini is the super-squash.

BRECKINRIDGE SOUTH.

Bakersfield, Calif.

I will say I planted the Italian Squash and had very good luck with them, and consider them a very good squash.

P. S. SPRAGUE.

Summerland, Calif.

We found the Zucchini most satisfactory, and can highly recommend it for anyone desiring quality as well as a very prolific bearer.

W. F. SMITH.

The Zucchini Squash I find is a very toothsome vegetable, so much so that I praise it highly to all my friends. The plant is a vigorous grower and bears well.

JOHN W. LAWSON, San Ysidro, Calif.

Germain's Globe Tomato

See Photograph to the Right

From all angles Germain's Globe tomato is probably the best grown. Primarily it gets its reputation from its shipping qualities, as it is undoubtedly the best shipping tomato known. During the past few months we have sent thousands of pounds of this variety into Mexico, where the vast majority of our winter tomatoes are grown. These come into the United States markets from January on, and provide the nation with winter fruit.

But as an all around tomato it is also equal to any and superior to most. For the home garden and for the market nothing better can be planted.

This variety is of a distinct globe shape, with a tendency to elongation, this resulting in a great number of slices being made from each fruit. The fruit is large, smooth skin, firm flesh, with few seeds. It is an early variety and ripens early. The color is rose with purple tinge.

Large quantities of fruit are borne by each vine, and as for quality it is unequalled by any, having a mild, pleasant taste and remarkably fine flavor.

Price: Packet 10c; ounce, 45c; ¼-lb., \$1.50; one pound \$4.50, postpaid.

Germain's Winter Queen

See Photograph to the Right

It is our business to find the best of everything for our customers. It is a policy that has made us a host of friends and built up a big seed and plant house.

One of our hobbies for years has been the tomato, and we have left no stone unturned in the development of this strain of **Winter Queen** to the high state of perfection which it now occupies.

Its compact bush is in striking contrast to the sprawling habit of other varieties—an appealing feature to the market gardener. It is a generous producer of even sized, finely colored fruit of remarkably firm flesh, which makes it a prime favorite with the shipper.

Another strong quality of **Germain's Winter Queen** is its hardiness, as it has been known to come through a frosty period in full vigor, where other varieties were entirely killed.

Prices: Packet, 10c; ounce, 50c; ¼-lb., \$1.65; pound, \$5.00.

Dixon, Ill.

I think the Winter Queen Tomato is one of the best on the market. I have tried seven or eight different kinds. In one way I like the Winter Queen the best; I have always had good success with it. I will have it as long as you will let me. It has proved to be everything you have said about it. I am sorry I have not time to tell you how it yields for me. I have the reputation of being a fine gardener especially tomatoes, and I buy the best seed I can find. I think you have one of the best. Excuse me for not saying more about this fine tomato. I am very busy selling them. All the seeds you have sent me have been very good.

R. E. BURKS.

Germain's New Stone Tomato

See Photograph to the Left

Germain's New Stone Tomato is a beautiful bright red, of large uniform size and with very few seeds. All farmers demand it because of its extremely firm meat and because of its assured tonnage. It is a thoroughly dependable, proven tomato, as it may be planted from the earliest spring month when danger of frost is passed, and will bear right up to the first frost in the Fall.

The desirability of this tomato is greatly enhanced by its extreme smoothness and its hardness. The one great requisite in a vegetable for private use is quality—first and always. The prime essentials are good flavor, the minimum of acidity, a tender skin, solid meat and flesh, few seeds and very little juicy pulp. Germain's New Stone Tomato meets all these requirements. It ripens evenly and in point of cost and labor in harvesting the chances of loss are minimized. Prices: Packet, 10c; ounce, 40c; ¼-lb., \$1.35; pound, \$4.00.

I had good success with the New Stone Tomato Seed, and have raised quantities of fine tomatoes even during the extreme warm weather. I am still getting fine tomatoes. We were bothered considerably with blight, but of course that has nothing to do with the seed. C. A. SCOTT, Delano, Calif.

VEGETABLE SEEDS

ALL PRICES ON THIS PAGE ARE POSTPAID

ARTICHOKE

Alcachofa Artischoke Artichaut

CULTURE—Sow any time except during hottest weather, when all seed beds require special care. Soil should be a free, moist loam and seeds should be planted an inch deep. Plant out when six inches high in rows four feet apart each way. Save offsets from best plants for new supply, as artichokes never come true from seed, some will prove inferior. When planting seedlings, reject those with spinist leaves.

Germain variety. **LARGE GREEN GLOBE.** The favorite garden Pkt Oz. 1/4lb 1lb.
Plants of large Green Globe Artichoke, see page 8. 10 1 20 4 00 12 00

ASPARAGUS

Esparrago Spargel Asperge

CULTURE—Soak seeds twenty-four hours before planting. Sow in February in beds broadcasted or in rows, covering about one inch. The following January transplant to rows three or four feet apart and a foot apart in the row, with at least six inches of soil over the roots. Light sandy soils are preferable.

NOTE: By planting two year old roots, much time and labor will be saved. See prices of roots, page 8.

ARGENTEUIL. The favorite in the Paris markets, and exceedingly popular wherever grown in the United States. The stalks grow to an enormous size, cook tender, of delicious flavor. . . \$ 10 \$ 20 \$ 50 \$ 1 50

Germain **PALMETTO.** Standard among the asparagus shippers of California is the Palmetto, and Germain's have gone to a really unwarranted expense to get seed from the most perfect first growth stock. This strain grows to mammoth proportions, and very even in size, which makes it especially popular with shippers. The shoots are a light green, slightly tinted with pink, and are tender to an unusual length. No one will be disappointed with the productiveness and fine edible qualities of the Palmetto Asparagus. . . 10 20 45 1 25

SEED WITH
FARMOGERM

LIMA BEANS

Frijole Bohne Haricot Nain

CULTURE—Beans for the home garden should be a continuous summer crop, and sowings may be made from the middle of March to September. Plant two inches deep and two feet apart. Have drills one and one-half to two and one-half feet apart, according to variety; directions will be found on individual packets for the respective sorts. The average amount needed to plant an acre is fifty pounds. One pound will sow one hundred feet of drill. They will thrive in any good soil.

BUSH VARIETIES

FORDHOOK BUSH LIMA BEANS

The old fashioned name of "butter bean" given to lima beans can best be appreciated when eating this delicious variety fresh from your own garden. There are from three to five beans in each pod, which grows in clusters of from two to five on long spikes, making the picking easy where the beans are eaten green. The bush is a vigorous grower reaching the height of two feet, erect and strong. Germain's have long recognized the Fordhook as a splendid variety and this year succeeded in getting a stock of seed which must be placed among the specialties, insuring the buyer of getting absolutely the best. Price, packet 10 cents; 1/2 pound 20 one pound, 35 cents; ten pounds, \$3.00. Write for prices on 100 lb. lots.

BURPEE'S BUSH LIMA. Splendid dwarf Lima; large and of excellent quality. Pkt 1/4lb 1lb 10 lb
10 20 35 53 00

Germain **BURPEE'S IMPROVED BUSH LIMA.** The earliest maturing of all the large seeded Limas. Pods very large, thick, and contain usually four beans, which are unusually thick, of large size and excellent quality. . . 10 20 35 3 00

FORDHOOK BUSH LIMA. See specialty above.
HENDERSON'S BUSH LIMA. A dwarf variety of the Sieva or Southern Lima; produces enormous crops. . . 10 20 35 3 00

MONSTROUS BUSH LIMA. What its name implies. Extra large in size. It should be planted 6 feet by 6 feet in order to give it a chance to develop properly. Good for market or home garden. . . 15 35 60 5 50

POLE VARIETIES

GIANT PODDED POLE LIMA. The largest podded of all Pole Limas, the pods being gigantic in size measuring very often from seven to nine inches in length and from one and one-half to two inches in width. A vigorous grower and invariably of finest flavor. . . 15 30 55 5 00

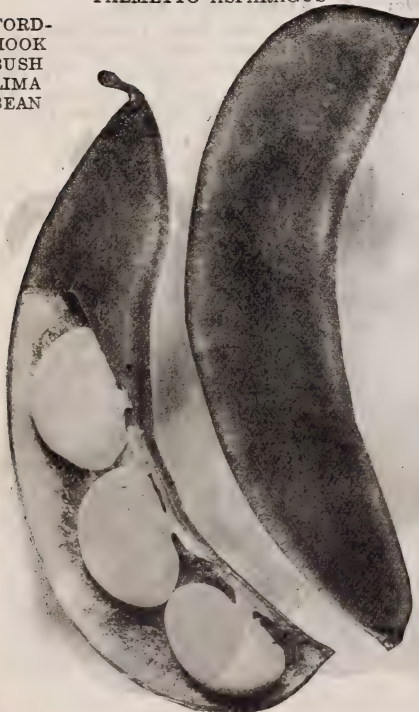

Germain **KING OF THE GARDEN LIMA.** A vigorous grower, bearing profusely; large pods, five to eight inches. Beans large and of rich flavor. . . 10 20 35 3 00

ALL PRICES ON THIS PAGE ARE POSTPAID

Note—Prices up to and including ten pound quantities include postage or expressage prepaid. When sent otherwise deduct 10 cents per pound or fraction thereof. Prices listed for larger quantities, if desired sent by Parcel Post, necessary postage should be added. See our Parcel Post Schedule on inside back cover page.

CULTURE—Beans respond very readily to good soil and cultivation. A light rich, well-drained loam is the most desirable. The use of manure is advisable but should be used sparingly as it might make the plant run too much to vine. There is no plant more sensitive to cold and wet than the bean. We therefore advise not to plant until the ground has become dry and warm. The largest returns will result in planting in drills from 2 to 3 feet apart. Cover the seed one and one-half inches deep and thin the young plants 3 to 6 inches apart in the row. If planted in hills, about 2 feet apart each way.

KEEP THEM COMING

For rotation, plant at intervals of from one to two weeks. The plants until time of blossoming should have frequent shallow cultivation, but any mutilation of the roots by cultivation after the plants come into blossom is likely to cause the blossoms to blast and so cut off the crop. Cultivation should always be very shallow and it is useless to expect a crop from a field so poorly prepared as to need deep stirring after planting.

DWARF OR BUSH GREEN POD

BURPEE'S STRINGLESS GREEN POD

German's The Stringless Green Pod is recognized as being one of the best beans offered for market garden or general use. In point of earliness, it ranks among the first, and is excelled by none in bearing ability and in good quality. It is one of the greatest green pod beans to date. The pod is very brittle, long and round and is entirely without strings. It is about five inches in length, green in color, very tender, and of the highest and best flavor, remaining for a long time in edible condition, and bearing continuously for weeks. See page fifteen.

Price, packet 10 cents, ½ lb. 20 cents, 1 lb. 35 cents, 10 lbs. \$3.00.

German's **CANADIAN WONDER.** This is a strong growing bush variety, bearing large numbers of flat, handsome pods, long and very tender, and with excellent flavor. They are widely known as the best for winter use, and are valuable both to the market gardener and for the home garden.

DWARF HORTICULTURAL OR CRANBERRY. A fine shell variety. Pods medium length, broad and thick, curved with splashes of bright red on a yellowish ground.

EARLY MOHAWK. Hardier than other sorts. May be planted earlier and will often furnish beans before any other kind.

EXTRA EARLY REFUGEE. Very early, prolific; fine quality; a great favorite for canning.

FRENCH MOHAWK. A favorite variety, productive. Fine flavor.

LONG YELLOW SIX WEEKS. A favorite variety; very quick growing, with green, flat pods, which are thick and meaty. The seed when fully ripe is yellow, hence the name. It is a well known market variety, tender and of good flavor; A good market variety, as it is a very heavy cropper.

WAX OR YELLOW-PODDED

IMPROVED GOLDEN WAX

German's This bean is a distinct improvement on the old Golden Wax. It is a stronger grower, more prolific and not subject to disease like the Golden Wax. The pods are flat and straight and are grown in great profusion, and we recommend it to the public as a superior bush wax bean—one of the most popular varieties for either market or general garden use.

Price, packet 10 cents, ½ lb. 20 cents, 1 lb. 35 cents, 10 lbs. \$3.00.

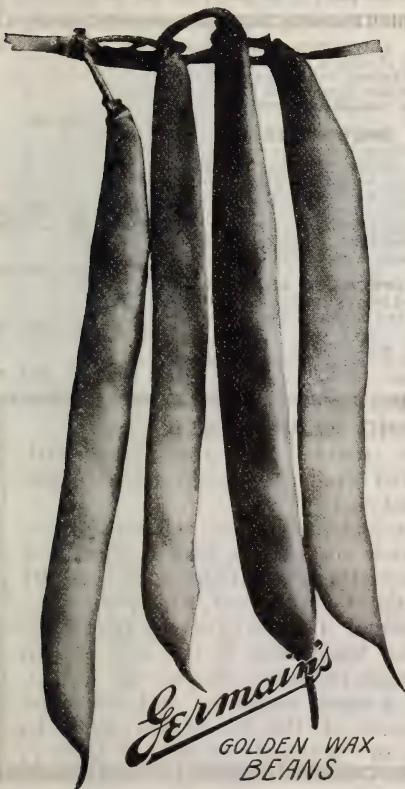

IMPROVED PROLIFIC BLACK WAX. In every respect first-class; pods round, a beautiful bright yellow color, very early and continues long in bearing; handsome and immensely productive.

REFUGEE WAX. A handsome, round-podded variety, extremely productive, bearing large, fleshy, wax-like pods of splendid quality.

German's **VENTURA WONDER WAX.** This bean is of California origin, and a very valuable addition to the wax varieties. It is a stocky variety of bush, bearing large numbers of long flat, yellow podded beans, containing white seed, that have a fine flavor. Either used as a snapped bean or dried for winter use. We recommend this bean either for market or general gardening

GERMAIN'S IMPROVED

WHITE KENTUCKY WONDER

A very popular and satisfactory type of the Kentucky Wonder Beans. It was introduced a few years ago and since then it has been growing in popularity by leaps and bounds until now it is a most desired variety.

Germain's Improved White Kentucky Wonder Bean is a pole bean of a tenderness that places it in the front rank of the bean family. Its productiveness is so exceptional that any one planting a bean garden should not be without it, and as for the market gardener, it will be impossible for him to find a bean that will yield greater returns per acre. It is earlier by two weeks than the other types of Kentucky Wonders and the Market Gardener, who is wide awake, realizes that the big returns are made by harvesting a heavy crop early.

Its tenderness, crispness and color make it very desirable. The pods average from eight to ten inches in length and are of a deep greenshade. These seeds when dry are of a snowy whiteness. See page 15.

Prices: 10c per pkt., ½ lb. 20c, 1 lb. 35c, 10 lbs. \$3.00.

ASPARAGUS, OR YARD LONG. Interesting and popular among those who raise it, this bean is still a novelty to many gardeners. No more tender or finer flavored bean ever went into the pot. Every housewife will appreciate the entire absence of strings in the Asparagus Bean, and it should be grown in every home garden.

Germain's **KENTUCKY WONDER BROWN SEED.** This bean is very early and enormously productive, the long green pods hanging in clusters on the poles. They are entirely stringless and very tender. It has long been known as a favorite, as it meets with a ready sale on the early market and is considered a delicacy in the home garden.

KENTUCKY WONDER WAX. Similar to above, yellow pods of a rich, buttery flavor as a snap bean; also a good white shell bean for winter. Of the finest flavor.

LONDON HORTICULTURAL, OR SPECKLED CRANBERRY. Vines vigorous, with large light-colored leaves; pods short, broad, pale green, becoming streaked with red as they mature; good either green or dry.

SCARLET RUNNER. Ornamental and useful. The vine is graceful; flowers of a brilliant scarlet, and the beans are of excellent quality, shelled or in a dry state.

CONTROLLING BEAN PESTS

Beans in California are troubled at various times with insect pests like Aphis, Red Spider, Weevil, and Fungous troubles such as mildew and rust.

Aphis can be controlled by a nicotine spray or with tobacco dust; Red Spider and Mildew by dusting with sulphur, and Rust by spraying or dusting with Bordeaux Mixture. See page 94

The most serious pest is the Bean Weevil, which only becomes apparent after harvesting. The only remedy is to fumigate the beans with Carbon Bisulphide at the rate of two ounces to 100 pounds. A simple method is to put the seed in a tightly closed room or in a small container and place the Carbon Bisulphide in saucers at the top, allowing it to evaporate. Be sure room or container is closed tightly.

CROSBY'S EGYPTIAN BEET

SWISS
CHARD

BEETS

Note.—Prices listed are postpaid.

TABLE BEETS

Remolacha Rothe Ruebe Betterave

CULTURE—This is one of few vegetables that can be grown the year round. A beet patch completes the garden. Seed planted at intervals of three weeks will keep beets coming in rotation. The seed should be sown in drills 15 inches apart and 1½ inches deep, and covered by hand unless following field culture. (The uses of a rake for this purpose disturbs the seed and often draws the seed out of the ground. The result will be an irregular row.) Thin out then to 9 inches apart in the row. These young beets are excellent used as spinach. Frequent cultivation is essential to produce a successful crop.

CROSBY'S EGYPTIAN BEET

Among all the table beets there is probably no other which has been so often featured by seed houses, where a first class stock of seeds can be obtained. A good purchase by one of our buyers causes us to put the Germain mark of approval on this variety this year by placing it among our specialties. Many experienced growers say "Crosby's Egyptian is the only beet worth planting," and while this may be somewhat of an exaggerated opinion, we will unhesitatingly recommend this lot of seed as being the best that money can buy. Crosby's Egyptian is a medium sized beet, very early and of small top. It grows smooth and the deep crimson flesh is sweet and tender. See page sixteen. Price, Pkt. 10 cents; ounce 20 cents; ¼ pound 45 cents; pound \$1.25.

BLOOD TURNIP. One of the best of the early table beets. Deep rich color and splendid quality.

CROSBY'S EGYPTIAN. See specialty above.

DETROIT DARK RED. One of the best beets for either market or home garden. Very rich in color, being a dark red. We recommend this as specially desirable to plant for market gardeners on account of its attractive appearance. The root is medium sized, globular or nearly round, very smooth and of dark red color.

EXTRA EARLY ECLIPSE. Eclipse is a well known variety of table beets. Nearly as early as the Egyptian. It is nearly round in shape and has a small top, while the flesh is fine grained and tender with bright red color.

EXTRA EARLY EGYPTIAN. Very early, of dark blood color, rather flat shape.

LONG BLOOD. A splendid variety of fine flavor and of long, symmetrical shape.

SWISS CHARD OR SILVER. Cultivated for its leafstalks, which are served like asparagus, and for its leaves, cooked like spinach. Cut often, as new stalks will be produced.

LUCULLUS SWISS CHARD. A new variety. Leaves very crinkled of an attractive light green color and very thick and fleshy. Easily grown and furnishes a supply of good greens for a long period.

CABBAGE

Col Repollo

Note—Prices listed are postpaid. Cabbage Plants are listed on page eight.

CULTURE—Knowing the first essential of successful cabbage growing to be good seed, we have always obtained our seed from expert seed growers, and therefore we enjoy an enormous volume of business on this variety of vegetable.

To raise cabbage successfully is not difficult, as it is comparatively easily grown. We advise the planting of seed in beds or land of light, rich texture at a depth not to exceed $\frac{1}{2}$ -inch; and the soil should be pressed firmly over the seed. The plants should not be allowed to crowd one another before they are transplanted, but as soon as large enough to be handled should be lifted out to their permanent place.

For early varieties, such as Winnigstadt, plant in rows 3 feet apart, plants 1 foot apart in the row. The larger headed varieties, $1\frac{1}{2}$ feet apart in the row.

For the permanent field, soil of a firm, stiff, rich nature is preferred. Immediately after transplanting, the plants should be watered and constant, deep cultivation is very essential. A cool, moist climate seems to be the most suitable of all for the culture of cabbage which generally grows to greater perfection in the coast region, as heat and drought are injurious to them.

Sudden changes of temperature have a tendency to make cabbage go to seed and growers should watch them carefully to see that their field is moist but properly drained. Sudden check in growth is prevented by this care.

It is only logical that a climate that is good for man would be good for insects also. California has a greater variety of insects which live longer and reproduce more generally than any other State in the Union.

On that account we have found it advisable to maintain an insecticide department which devotes itself to garden troubles of all kinds. Write to this department at any time and tell us your troubles. Our experts will gladly advise you to the best of their ability.

The cabbage, for instance, is a vegetable that while not bothered with a great number of insects, nevertheless has two enemies which do considerable damage if not routed.

These are the cabbage worm and the cabbage aphid. The former is velvety green in color and when full grown is about an inch and a quarter in length. They are easy to detect and the parent of this worm is present from morning to night in the shape of the common white butterfly, which seems so harmless when flying around in the garden. The best remedy is dusting or spraying with Corona Dry.

The cabbage aphid, or as otherwise known the "cabbage louse," is a small insect of a greenish black color and similar in appearance to the green aphid found on rose bushes. Nicotine sprays such as Black Leaf 40, or Tobacco Dust, applied thoroughly, will effectively combat the ravages of this pest.

SELECTED LATE FLAT DUTCH. A low-growing variety: heads large, bluish green, round, sound, broad and flat on top: an excellent fall and winter variety: good keeper.	10	35	1 20	3 50
SUREHEAD. One of the best main crop cabbages.	10	35	1 20	3 50

CHINESE CABBAGE (Follow Cultural Directions on Lettuce.)

Occidental races have always been slow to absorb anything from the Chinese, but it is surprising that so few people have learned to appreciate the value of the Chinese Cabbage, a type that has been maintained for hundreds of years by that race. It is largely grown for Chinese consumption, and it only remains for Americans to find out its merits to make it popular. It is tender, crisp, blanches itself perfectly, and is equally good raw or cooked.

CHINESE CABBAGE

CARROTS

Zanahoria

CULTURE—Sow any time in deep, loose soil, preferably sandy loam about one-half inch deep, in rows eighteen inches apart and thin to three inches apart. Water freely at all times. The carrot is one of the most wholesome and nutritious of our garden roots, deserving to be more extensively used for culinary purposes and we urge our readers to give some of the early table sorts a trial. For feeding stock, especially horses and milch cows, the carrot cannot be surpassed, and it should be more largely grown by farmers for this purpose. One ounce of seed will sow about 150 feet of row. Four pounds to the acre.

Note—Prices listed are postpaid.

Carrotte

OXHEART, OR GUERANDE, CARROTS

The common tendency of carrots to grow woody or pithy is least noticeable in this improved and popular strain. This variety may be left in the ground longer than any other without developing these depreciating qualities. The Oxheart is a short carrot growing about 4½ inches long and about 3½ inches thick at the shoulder, with a slight taper to the stump rooted bottom. For this reason it is especially desirable for heavy soils, which also grow the best carrots. The flesh is a bright orange, smooth grained and sweet, and it is equally fine for table use or stock feeding. We are pleased to include this variety in our specialties this year, and our selection of this season puts it among the stocks which we can guarantee. Price, packet 10 cents; ounce 20 cents; ¼ pound 45 cents; pound \$1.25.

EARLY CHANTENAY. This is the best early carrot					
Pkt	Oz.	¼lb	1 lb

CAULIFLOWER

Coliflor

Note—Prices listed are postpaid.

Blumenkohl

Chou-fleur

CULTURE: Prepare the seed-bed carefully, using only rich and thoroughly pulverized soil. Good results are obtained by keeping the plant in a healthy and rapidly growing condition. Broadcast the seed in the seed-bed prepared, sowing the early varieties from May 15th to July 1st; medium early varieties May 20th to July 5th; and late varieties any time from June 25th to Aug. 25th inclusive. When the plants are 40 days old, they are ready for the field. Transplant to 15 inches apart in rows 30 to 36 inches apart. Do not leave plants in the hot-bed over 45 days as the stems become hard and poor results follow. Keep the plants vigorous and growing.

Due to different localities requiring a different time of planting of Cauliflower, we advise your writing us for specific planting information, which we will be glad to give. Two or three week's difference in planting means success or failure.

CAULIFLOWER PLANTS See page eight.

GERMAIN'S SIX WEEKS CAULIFLOWER.

This new introduction in a cauliflower is a marvelous improvement over the other varieties for earliness and sure headed qualities. It is truly the "Earliest of the Early", and will mature a firm head of excellent quality in six weeks. It unquestionably will be a welcome addition to the home garden, and on account of its earliness will make rapid strides as a market garden variety.

25 cts. pkt. ¼ oz. \$1.00 1 oz. \$3.50 ¼ lb. \$10.00 1 lb. \$35.00

SEE DESCRIPTION OF GERMAIN'S SNOWFLAKE CAULIFLOWER Page 18.

EARLY SNOWBALL. It is a snow-white Cauliflower and its leaves have a tendency to over-lap at the top of the flowers. In this way, it protects from injury, exposure to frost, rain or heat. It is very essential that good Cauliflower be so protected on account of shipping, and in this, our strain is perfect. Our market garden trade is immensely pleased with this strain and our business on it has grown to very large proportions.

EXTRA EARLY ERFURT. Remarkably sure heading, early variety, dwarf habit; similar, not as early as Snowball.

GERMAIN'S DRY WEATHER. Produces large, solid and pure white heads. It is especially adapted for growing in dry locations where most varieties fail to produce good heads.

LARGE ALGIERS. A splendid late variety, eminently adapted for Southern California; heads large, white, solid. One of the best for market gardeners. Our stock is extra fancy.

VEITCH'S AUTUMN GIANT. A large, late sort of robust habit; heads compact, large outer leaves. Succeeds well in southern latitudes.

See Page 18 for [33] Cauliflower Specialty

CELERY

Apio

Note—Prices listed are postpaid. Celery plants are listed on page eight.

Sellerie

Celeri

CULTURE—Sow from February to May in drills one foot apart. Later, usually in June, transplant to rows four feet apart and six inches apart in row. Rows should be furrowed out so plants may be set six inches deep. Later, soil may be banked against rows for blanching, even so-called self-blanching varieties needing the cool moist soil to render the stalks crisp and tender, but this should not be done until a few weeks before harvesting. One ounce of seed will produce 5000 plants.

CHINESE GREEN TOP. The best "Green Top" variety grown; largely grown by Chinese gardeners.

EASY BLANCHING. A new variety that is meeting with great favor. The plant grows rather dwarf and compact with foliage light green tinged with yellow. It blanches more easily than any other variety and for that reason can be grown by the amateur gardener with complete assurance that it will equal in quality and appearance the best types found on the market.

GIANT PASCAL. Stalks very large, thick, solid, crisp and of rich, nutty flavor; blanches easily and quickly.

GOLDEN SELF-BLANCHING, CALIFORNIA STOCK. Similar to French Stock; seed raised in California from selected plants.

GOLDEN SELF-BLANCHING, FRENCH STOCK. See specialty opposite.

WHITE PLUME. We offer a choice strain of this valuable and popular variety. Unsurpassed for fall and early winter use, requiring very little earthing up to blanch

GOLDEN SELF-BLANCHING CELERY SEED (French Stock)

The trial ground test in comparison with samples of seed from thirty growers should prove the selected lot to be as fine seed as can be produced. This is exactly the test we applied to this year's stock of this variety, and even at the present high price of celery seed we are satisfied we are offering the greatest value for the money in this tried and true sort. Celery seed has for many years been a strong item with German's for purity and high quality, but with the establishment of our testing grounds we are in a better position than ever to praise this item. It is a thrifty variety, growing 18 to 22 inches in height, very stocky, heavy, perfectly solid and a splendid shipper. It is mild but characteristically flavored, and from every point of analysis is entitled to the mark of approval of this house. Packet 15 cents; ounce \$2.00; ¼ pound \$6.00; pound \$20.00. See page eighteen.

CELERIAC

CULTURE—It is grown in nearly the same way as common celery and like this vegetable, requires good rich, moist, and well-manured soil. It is generally sown in seed beds in February and can be planted until May. When about 4 to 6 inches high the plants should be removed from seed bed and planted 12 inches in the rows and the rows should be about 18 inches apart. Plants require no further attention than frequent watering and is necessary to have the ground well cultivated and free from weeds. See cut below.

CELERIAC, LARGE, SMOOTH PRAGUE. It is a turnip-rooted celery of a distinctive flavor similar to celery. It makes a wonderful salad when cooked and cut cold.

Pkt	Oz.	¼lb	1 lb
10	5 35	1 20	53 50

CHERVIL

Note—Prices listed are postpaid.

Perifollo

Kerbel

Cerfeuil

CULTURE—The seed may be sown throughout the entire year in open ground where the crop is to be grown, but in very hot weather it is better to sow in a shady position with a northern exposure. The leaves can be cut in from 6 weeks to two months from date of sowing.

The leaves are aromatic and they are used for seasoning and in salads. This vegetable is used a great deal by the English. For further culture same as parsley.

CURLED. Is a vigorous grower, handsome and ornamental. It has a pleasing flavor and is highly recommended for garnishing, also for flavoring soups. See cut below.

Chicorie

Chicoree

CULTURE—Sow any time except hottest weather, though early spring is preferable, in rows eighteen inches apart and three or four inches apart in row. The seedling plant requiring little care if soil is moist.

LARGE ROOTED MAGDEBURG. This variety is grown for its roots, which are dried or roasted and ground as a substitute or adulterant for coffee. The leaves can also be used but should be cut when fresh. They make a splendid salad. To secure large roots, soil should be light, rich and deeply worked. Plants should be thinned from 4 to 6 inches apart and the seed sown ¼-inch deep, using 1 oz. to every 100 feet of row. See cut below.

WITLOOF OR FRENCH ENDIVE. Is used as a salad and is most delicious served with French dressing and eaten like lettuce. Seed should be sown in June, July and August in drills 12 to 18 inches apart and the seedlings should be thinned out to stand not closer than 3 inches.

In the fall, lift the plant, trim off the leaves and store in sandy soil in a cool place until wanted for forcing.

The roots should be planted upright about 1½ to 2 inches apart in a trench 16 to 18 inches deep. This brings the neck of the root within 9 inches of the level of the surface of the trench, which should be filled with light soil. It requires about one month to force the root. The heads are then cut off with a small portion of the neck of the root attached. We recommend this vegetable to those who enjoy a salad of exceptional flavor. It can be easily grown if these directions are carefully followed. See cut below.

Malz

Mais

Mais

CULTURE—Sweet corn should not be planted until in the spring when all danger of frost is past. The soil preferred is one rich and moist. Corn is not a lazy man's crop, as continual cultivation is necessary.

Plant in hills 18 inches apart with rows 3 feet apart. Three or four seeds may be planted in each hill but not more than two allowed to stand. As "suckers" or excess shoots appear they should be removed as they take strength from the mother plant. Whenever soil presents an appearance of drying, irrigate. To prevent the Corn Ear Worm we recommend Corona Dry.

Note—Prices up to and including ten pound quantities include postage or expressage prepaid. When sent otherwise, deduct 10 cents per pound or fraction thereof. Prices listed for larger quantities if desired sent by Parcel Post, necessary postage should be added. See our Parcel Post Schedule on inside back cover. If quantities are desired, do not fail to write for special prices.

ADAMS EXTRA-EARLY. One of the earliest varieties; small cob and quite dwarf in growth.

BLACK MEXICAN. The sweetest, richest and tenderest of all sweet corn. Turns black only when too old for table use.

Germain's **COUNTRY GENTLEMAN.** The best for private use. Small white cob densely covered with splendid white grains of delicious flavor. Ears average eight to nine inches. Stalks six feet high, three or four ears to each.

EARLY MINNESOTA SWEET. One of the earliest, with ears of suitable size for market purposes.

GOLDEN BANTAM. A very sweet and most delicious corn. See page nineteen.

LARGE LATE ADAMS. An ideal variety for August and September planting for late crop. A rapid grower.

MEXICAN JUNE. A field corn used for roasting ears, etc. See page 49.

OREGON EVERGREEN. See page nineteen.

Germain's **STOWELL'S EVERGREEN.** The standard sort for main crops everywhere. Ears large, deep-grained, exceptionally tender and sugary; remains tender and eatable longer than any other variety. A general favorite with canners and market gardeners for late use.

CORN—POP

CULTURE. Requires same care and culture as a sweet corn.

QUEEN'S GOLDEN. A large-eared and handsome yellow popcorn; grains are large, pop perfectly white and are exceedingly tender. About six feet high, and yield three or four ears to the stalk; 1 pound 30 cents, 10 pounds \$2.50.

WHITE RICE. A popular and productive variety. The kernels are fine, white, and the ears are from four to five inches in length and from one to one and a quarter in diameter; one pound 30 cents, 10 pounds \$2.50.

Catalogue price subject to change without notice.

CORN—FIELD SEE PAGES 52-55

CORN SALAD

Canonigos

Feldsalat

Mache

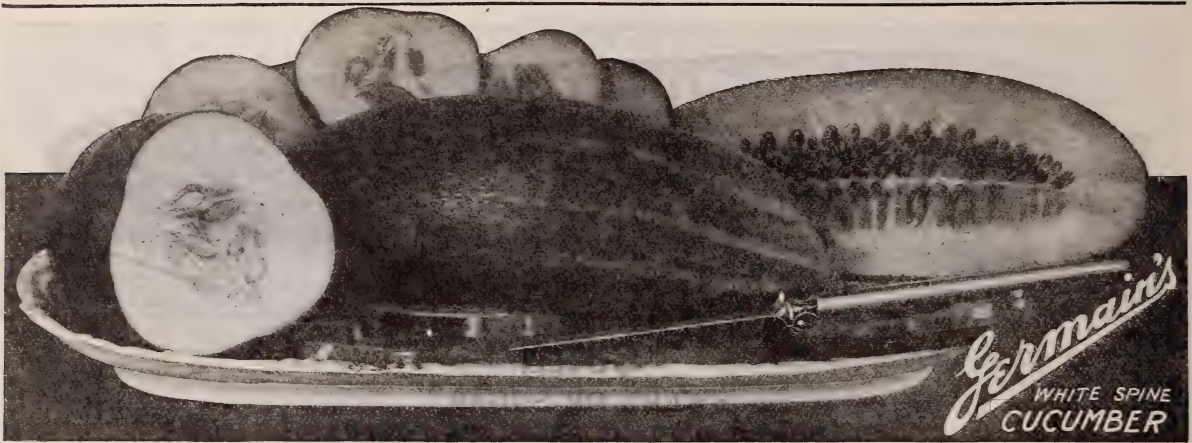

CULTURE—This should be planted in early spring or late summer. It is a hardy plant having no enemies and only requires 60 to 65 days to mature; it however, will not succeed in hot weather but must have cool growing weather. One ounce of seed will sow a row 30 feet long. The small leaves are served like lettuce or for garnishing dishes in the same manner as parsley or cress.

<i>Germain's</i> Fatticus, or Lamb's Let-tuce	Pkt	oz	1/4 lb	1 lb
10	30	1 00	3 00	

CHIVES

Cebelleto Schnittlauch Ciboulette

CULTURE—The same methods of growing are used as for green onions. However, when the plant is about 2 inches high it should be transplanted to 3 inches apart in rows which are 12 inches apart. Chives are grown for the young leaves which are produced freely from early in the spring throughout the summer. It is a perennial of continuous growth and as the leaves are cut away, new growth comes on. The flavor is mild, resembling that of an onion and is used in soups and various other dishes if onion flavor is desired. For plants see page eight. Per packet 15 cents, oz. \$2.50.

CUCUMBERS

Note—Prices listed are postpaid.
Pepino Gurke Concombre

CULTURE—Cucumbers should not be planted until all danger of frost is over and the ground is warm, because like all vine crops the seed is liable to rot unless proper conditions prevail.

Cucumbers should be grown in every garden, for slicing for the table and small fruits for pickling. In most sections two plantings can be made. First, as early as the weather permits, second, the latter part of July or first of August.

The early planting will produce cucumbers for table use and the late planting will give the best supply of young fruits for pickling purposes. Sow 6 to 10 seed in hills 4 to 6 feet apart. After all danger of pests are removed and you are sure of your plants, thin, leaving the three strongest. Cucumbers enjoy a light, sandy, rich soil. They should be planted one inch deep. One ounce will plant 50 hills; 2 pounds, one acre.

DAVIS PERFECT CUCUMBER. Everyone who saw the crop last year says they never saw anything to equal it. Dark, glossy green, slim and symmetrical, with an average length of ten to twelve inches. They hold color till nearly ripe, when they turn white without a yellow streak on them. Quality fine, as seed are very soft when fit for table use. Very tender, brittle and of exceptional flavor. Early as earliest strain of White Spine and outyields all others. Price, pkt. 10 cents; ounce 20 cents; ¼ pound 65 cents; pound \$2.00.

BOSTON PICKLING, OR GREEN PROLIFIC. One of the best pickling varieties; also excellent for slicing. A medium sized variety, tapering at both ends with large and prominent spines. Deep green. Fine for pickling.

CHICAGO PICKLING. Vine hardy and vigorous. Early, and quite productive. Used extensively for pickling and slicing.

EARLY GREEN CLUSTER. One of the best for table use. Vines vigorous, fruiting early and abundantly; fruit uniformly straight and handsome, dark green, with a few white spines; flesh tender and of excellent flavor.

EARLY WHITE 'SPINE.' One of the best for table use. Vines vigorous, fruiting early and abundantly; fruit uniformly straight and handsome, dark green, with a few white spines; flesh tender and of excellent flavor.

LEMON. Gets its name from its shape. Very early and exceedingly popular in the Los Angeles market. See page twenty.

JAPANESE CLIMBING. While all cucumbers are running vines this variety is much more so. It also quickly climbs on poles or trellises. It is entirely distinct. Quality is splendid. Well adapted for pickling as well as for slicing for salads.

KLONDIKE. A splendid variety of the White Spine family; very early.

LONG GREEN. Long and crisp; well-known and popular. See page twenty.

NICHOL'S MEDIUM GREEN. One of the best general-purpose cucumbers, the young fruit being very symmetrical in shape, deep in color, very crisp; for slicing there is none better.

WEST INDIA GHERKIN. Oval-shaped; prickly; for pickling only.

ENGLISH FORCING, OR FRAME VARIETIES

Superior in every way to the American varieties. Single specimens average twenty-four inches in length. Fruit is crisp and tender, with very few seeds.

IMPROVED TELEGRAPH. Unquestionably one of the best winter cucumbers; the best for forcing.

COLLARDS

Note—Prices listed are postpaid.

CULTURE—A plant similar to cabbage. It does not, however, produce a head, the central leaves often forming a loose rosette.

They are tender and are used as a pot herb like kale. They are also desirable as greens for poultry or rabbits. The same culture is applied as to cabbage, except spacing; plant 3 feet apart in rows 3 feet apart when in field.

TRUE GEORGIA. A strong growing variety with light green leaves. Pkt. 10 cents; ounce 20 cents; ¼ pound 65 cents; pound \$2.00.

CRESS, OR PEPPER GRASS

Note—Prices listed are postpaid.

CULTURE—There are many kinds of cress, all characterized by a more or less pungent taste. They are used in salads and for garnishing dishes.

Water cress is grown in almost any ditch, shallow stream, or moist earth and also under benches in greenhouses. It is a perennial and is propagated by scattering either seeds or freshly cut stems where the plants are wanted to grow.

Pepper grass or cress should be sown thickly in drills every few days if a succession is wanted. One ounce will sow 200 feet of row.

FINE CURLED (PEPPER GRASS). Grown very quickly from seeds sown thinly in drills. Leaves are finely curled and very ornamental but as the plant runs quickly to seed, frequent plantings should be made. The flavor resembles that of mustard.

WATER CRESS. A heavy foliaged plant, adapted to water culture. It has a slightly pungent taste.

DAVIS PERFECT CUCUMBER

DANDELION

Note—Prices listed are postpaid.
Amargon 100 Kuhblume Pissenlit

CULTURE—It is used for greens and is much prized by epicures. Sow seed in the spring in rows 1 foot apart and thin plants to stand 1 ft. apart in the row. Sandy loam soil is best suited.

IMPROVED. An early, large, broad-leaved variety Pkt 10 Oz. \$1 50

EGG PLANT

Note—Prices listed are postpaid. For plants see page eight
Aubergine Berengena Gherplanze

CULTURE—The plants should be started under glass if wanted early. If later results are desired, seed should be planted in cold frames or in boxes where special care can be given.

Egg plant seed is very delicate and will not grow unless special care is given it. It is easily affected by cold weather. Seed should be barely covered and particular attention should be given to have well-pulverized soil of rich composition. Moisture is an important factor and care should be taken to have the soil in beds or boxes moist, as any check to growth is exceedingly difficult to overcome and invites failure.

Plants should not be set out permanently until all danger of frost is over, using plants 6 to 8 inches tall of vigorous growth for setting in the field.

Space plants 3 feet apart each way and cultivate thoroughly throughout the season.

NEW YORK IMPROVED. Non of this delicious vegetable has ever been brought to such a state of perfection as GERMAIN'S Strain of New York. An early variety, large, oval-shaped and the deep purple kind that tastes surprisingly like oysters when fried. It has an indescribably delicate and alluring flavor when stewed. This variety is a great producer, 50 to 60 pounds having been grown from one plant. It has been perfected beyond any tendency to pithiness or dryness.

BLACK BEAUTY.—This is a fine, extra early variety, which has proven very satisfactory.

10	75	2 50	7 50
10	75	2 50	7 50

ENDIVE

Escarola o Endivia Endive Chicoree

CULTURE—The same as for lettuce.

This plant is highly esteemed by the French people and is their popular salad plant. Those Americans who have used it are unanimous in their praise. There is not sufficient of it planted.

To produce it properly it should be blanched and this can be easily accomplished by drawing the leaves together in a head and tying them together in a head a month before using for the table. One ounce of seed to 100 feet of row.

BROAD-LEAVED BATAVIAN. Leaves are broad, thick, green and more or less twisted with white midribs. It forms large hearts which when blanched, makes one of the best winter salads.

GREEN CURLED. Used very much in salads. Finds a ready market. Hardy, vigorous grower, with deep green leaves, midribs usually tinged with rose.

WHITE CURLED. A beautiful variety. The leaves are finely curled or massed and need no tying up to blanch as the coloring is naturally a pale golden yellow. This not only makes it very attractive but easy to grow, as plants can be gathered at any time.

HERBS IN COOKING

Every good cook uses herbs in the culinary art, but comparatively few housewives are acquainted with the delicious and appetizing flavors secured by the addition to many dishes of one or more of the old-fashioned herbs. Easily grown in the house yard and preserved for use simply by drying and placing in tight jars, no order for garden seeds should fail to include them.

LONDON FLAG LEEK

THOUSAND HEADED KALE

GARLIC

Ajo Knoblauch Ail

CULTURE—Garlic is a perennial plant with a bulbous root and belongs to the onion family. It has flat leaves and the bulb is composed of several parts or bulbels similar to those of a multiplier onion set. Garlic has a strong, penetrating odor and flavor and is highly esteemed for flavoring soups, stews, etc. We cannot offer seeds but can supply the bulbs or sets.

Prepare the ground as for onions, separate the sets and plant them in drills eight inches apart and four to six inches apart in the drill, covering two inches deep. Cultivate like onion sets. When the leaves turn yellow, pull bulbs and dry in the shade.

GARLIC SETS. Per pound 40 cents postpaid. Write for price when quantities are wanted.

Note—Prices listed are postpaid.

HERBS

POT, SWEET AND MEDICINAL

10 cents per packet.

A well assorted selection of the various kinds of herbs should have a place in every garden. Their value in seasoning and flavoring is well known and appreciated. Care should be taken to harvest on a dry day just before they fully blossom.

KALE, OR BORECOLE

Breton Blaetterkohl Chou Vert

CULTURE—This is a very popular boiling green and in Southern California can be grown the year around. It resembles cabbage in flavor, is a hardy plant and can be easily grown from seed. Plants are usually cut off when the leaves are 6 inches or more in length, but with the fine curled varieties the leaves can be gathered for use when of good size.

If the tall Scotch variety is planted, the lower leaves should be carefully pulled off so that the plants can grow on and furnish a continuous supply.

This is also true of Jersey or Tree Kale. One ounce of seed will produce 4000 plants. Seed should be sown thinly in drill and reset 12 inches apart in rows 3 feet apart.

DWARF CURLED SCOTCH. Very hardy, excellent Pkt Oz. 1/4 lb 1 lb
10 \$ 20 50 \$1 50

GREEN CURLED SCOTCH. The kind most commonly used; grows to a height of eighteen inches; spreads to three feet in diameter; leaves bright green and curled. 10 20 50 1 50

JERSEY, OR TREE KALE. Of vigorous growth, grown for chickens and stock only. 10 20 45 1 25

THOUSAND HEADED KALE. An excellent food for poultry, an immense yielder. Crops are known to have gone as high as 60 tons of green feed per acre. Anyone having poultry should plant it. 10 20 45 1 25

Seed should be planted in drills 3 feet apart and the plants transplanted when from 6 to 8 inches high. The plants should be set three feet apart each way.

They grow about 4 feet high with a wide spread of leaves and a single plant often weighs 30 to 40 pounds.

KOHLRABI

Collinabo Kohlrabi Chou-rave

CULTURE—This vegetable is a cross between a cabbage and a turnip. The edible portion is the large bulb which forms on the stem above the soil. We advise successive sowing in order to obtain tender bulbs, which have a mild, delicate, cabbage-like flavor. It is a hardy plant and seed may be sown practically all the year around. Plant it like turnip and thin to six inches apart in row. One ounce seed will produce 2000 plants.

EARLY PURPLE VIENNA. Very hardy; bluish purple. Pkt Oz. 1/4 lb 1 lb
10 \$ 30 \$1 00 \$3 00
EARLY WHITE VIENNA. Flesh white and tender. 10 30 1 00 3 00

LEEK

Puerro Lauch Poireau

CULTURE—Leek is a very hardy plant with a sweet onion-like flavor. It resembles the young onion growth in the spring as it does not bulb.

The neck or stems are blanched by drawing the earth up about them as the plant grows in size or they can be transplanted to trenches and the trench gradually filled as the plant grows. They should be planted in drills or rows 16 to 20 inches apart and the plants 10 to 12 inches apart.

Plant seed in seed bed, broadcast or in drills, covered to depth of one-half inch, and when they are about as thick as a good sized goose quill they should be transplanted.

LONDON FLAG. A large and strong plant; hardy. Pkt Oz. 1/4 lb 1 lb
10 \$5 \$1 15 \$3 50

ICEBERG LETTUCE

LETTUCE

 **Note**—Prices listed are postpaid.

Lchuga

Salat

Laitue

CULTURE—A world wide grown vegetable because it can be quickly and easily grown, is extremely palatable and very nutritious. Every garden deserves a lettuce plot. The quickest growing types are the loose leaf varieties and we suggest for the home garden a plot of loose leaf and a bed of the heading type. The loose leaf varieties will have matured and be used up by the time the heading types are matured.

The loose leaf Lettuce does not form heads but where the plants are grown a distance apart they make a large rounded cluster of leaves. Leaves are heavily crumpled and attractive in appearance, crisp and tender. We advise the planting of two ounces of seed for a 150 foot row and if the lettuce is too thick, thin after it has attained a size which can be pulled and used for salad or it can be thinned out when young and transplanted to another section of the garden. Lettuce needs considerable moisture, applied often but not too heavily and plenty of cultivation to obtain best results.

HEAD LETTUCE, is so called because of its extremely solid or compact formation. Such types as Los Angeles Market, Wonderful, New York, Big Boston and Iceberg, may be depended upon to satisfactorily mature a firm cabbage-like head.

Heading varieties should be sown the same as loose leaf except that it should by all means be thinned out when the fourth leaf appears leaving plants in the row 10 inches apart.

A rich pliable medium loam soil is best.

Germain RECOMMENDS

ICEBERG LETTUCE

A splendid Head Lettuce. For summer planting—compact, tender, crisp, creamy white heads.

Grows a solid head in midsummer and is highly praised by all users. Grow this large, crisp, tender and sweet summer heading lettuce when other varieties will not head. Germain recognized the superb qualities of this Iceberg Lettuce long ago and with our recommendation it is grown more extensively than any other lettuce during the summer. Pkt. 10 cents; ounce 30 cents; $\frac{1}{4}$ pound \$1.00; 1 pound \$3.00.

CABBAGE OR HEADING VARIETIES

	Pkt.	Oz.	$\frac{1}{4}$ lb	1 lb.
BIG BOSTON. A very deserving smooth-leaved head lettuce, which has not received the attention of California growers as it should. Extremely popular in eastern markets and very successfully grown out here. See page 21.	10	25	85	2 50
CALIFORNIA CREAM BUTTER. A fine summer variety; grows slowly and keeps well.	10	20	50	1 50
ICEBERG. See Specialty above.				
IMPROVED HANSEN. Very large, sweet, tender and crisp.	10	20	65	2 00
LOS ANGELES MARKET. See back cover.	10	50	1 65	5 00
NEW YORK. The pride of the Los Angeles market. By far the most profitable lettuce grown. It is shipped from here in carloads, as far as Colorado. Exclusively used by the best Los Angeles hotels. Hardy, uniform size, wavy leaved and blanches beautifully. Crisp, tender, of just the right flavor, it never fails to please. We have gone to great expense to secure the best and we list it with our strongest recommendation.	10	50	1 65	5 00
PARIS WHITE COS. An excellent variety; large, crisp, tender and of fine flavor; resists warm weather and is the best Cos lettuce known also as Romaine Cos.	10	20	65	2 00
WONDERFUL. A splendid variety for market or home use and the best sort adapted for fall sowing. A strong grower, making fine heads.	16	50	1 65	5 00

PRIZEHEAD. Large, loose-headed sort; leave stinged with brown; very heavy.	10	20	50	1 50
CHICKEN LETTUCE. —This variety of lettuce should not be confused with the regular heading or loose-leaved varieties. The plant grows very much like kale, to a height of four to five feet, with much growth of leaf. It is used mainly for chicken and rabbit feeding. It absolutely does not head and is seldom if ever used for table purposes. The wonderful leaf growth makes it ideal for green food for chickens, etc.	10	20	50	1 50

Prices Subject to Change Without Notice

MUSKMELONS

Note—Prices listed are postpaid.

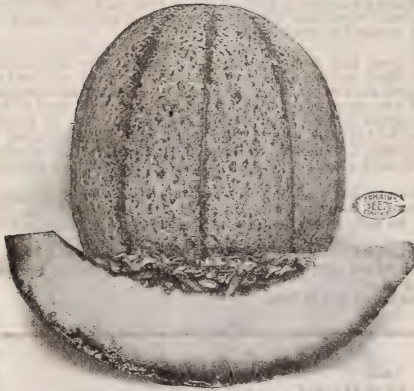

Melon Almizceno

Cantalupen

Muscade

CULTURE.—Muskmelons must not under ordinary gardening conditions be planted until all danger of frost is past. This is usually March, and planting may continue until July 15th. Warm ground is essential to the germination of the seed, for if planted too early in the Spring it will rot. It is highly important that your soil should be in proper planting condition. First, it must be thoroughly soaked or irrigated. Second, as quickly as the moisture has thoroughly penetrated and the soil is in a tillable or workable condition, spade or plow the ground and see that it is thoroughly pulverized. Third, prepare furrows 6 to 8 inches in depth and 5 to 7 feet apart according to space you can spare. Fourth, plant the seed in the furrows about 6 feet apart, covering the seed not more than 1 inch deep and as the plant grows, gradually fill up the furrow about it with soil until level with surface.

Continuous cultivation is now necessary and where soil conditions require, systematic irrigation should be followed. Do not, however, irrigate close to the plant as it will cause dampening off, and other diseases. The roots of the plant being as long as the vine, close up irrigation is not necessary and in cultivating see that these roots are not disturbed as it would ruin the plant. Practice frequent shallow cultivation. Plant 8 seeds to the hill and when thoroughly established pull out all but three. Two to three pounds of seed is used to an acre.

THOROUGHBRED ROCKY FORD CANTALOUPE

GREEN FLESHED VARIETIES

THOROUGHBRED ROCKY FORD. This is considered an improvement on the Rocky Ford; our seed is selected with the greatest care.

Germain **EXTRA-EARLY HACKENSACK.** Very popular sort, producing large, handsome, extra early melons of best quality. It is some two weeks earlier and almost as large as the famous New Jersey Hackensack; fruit nearly round, deeply ribbed and very coarsely netted. The flesh is green and most delicious.

LARGE HACKENSACK. Large fruit covered with coarse netting; thick green flesh, sweet and fine flavored.

MONTREAL MARKET. A very large, green nutmeg type, almost round, heavily netted; thick, luscious flesh, late and especially adapted to cool climates.

Germain **PINEAPPLE CANTALOUPE.** Large size, early, flesh green and rich flavor. Excellent shipper and a prime favorite with all.

GERMAIN'S "HONEY DEW" MELON

(See Page Twenty-two)

The color of Germain's Honey Dew Melon is a dull creamy white. The rind is very thin and close grained. The flesh is a rich green, very fine grained and exceptionally sweet and juicy. The flavor is indescribably delicious. It is a long keeping melon, remaining in good edible condition for several months. The size is about six to seven inches in diameter from top to bottom and about eight inches wide.

The fact that Germain's Honey Dew Melons may be selected by color when being picked for market enabled the grower to know in advance that his entire shipment is composed of first class melons such as will please the most fastidious trade. This feature makes this melon a very valuable type to grow for market. If you want the very last word in melon flavor, don't fail to plant Germain's Honey Dew. This is the melon that now commands fancy prices in every market. Prices, per packet 10c; per ounce 25c; per ¼ pound 85c; per pound \$1.50.

Mushroom Spawn

Seta Schwamm Champignon

Cultural instructions or growing mushrooms given free to every purchaser of spawn.

LAMBERT'S PURE CULTURE. This spawn is specially prepared for us and produces results where the average spawn proves a failure. It is a strong strain of spawn thoroughly acclimated to California conditions and selected with reference to earliness, size, flavor, appearance, prolificity and quality of the mushrooms that it will produce. We highly recommend this spawn to those who intend to raise mushrooms for the market.

Bricks 40 cents each, 5 bricks \$1.75, postpaid.

Mustard

Note—Prices are postpaid.

Mostaza Senf Moutarde

CULTURE.—Sow any time in the year, though autumn sowing brings best greens for they revel in cool weather. Not particular as to soil, though a medium heavy one is best.

SALMON FLESHED VARIETIES

ROCKY FORD PINK MEAT OR POLLOCK NO. 25. One of the most popular melons used in California for marketing purposes. Salmon colored flesh of fine texture, deep and firm. Probably the most extensively planted melon.

ROCKY FORD-POLLOCK No. 1025. The latest improved type of the popular Rocky Ford. Perfect shipping qualities. Very good flavor.

ROCKY FORD GOLD LINED. A perfect shipper due to the hard netted rind. Gets its name from the yellow tinge around the seed cavity. Has best flavor of all Rocky Fords.

PERSIAN. A new variety, yellow flesh, heavily netted but of smooth rind. Very sweet and of distinctive flavor. Splendid keeper—average weight about 7 pounds each—many much larger. See page 22.

BANANA. Grows one and a half to two feet in length and three or four inches in diameter; flesh salmon, and exquisitely flavored, resembling banana. Brings a high price in eastern markets.

Germain **BURRELL'S GEM.** Asplendid new variety. Superior to Rocky Ford. Flesh thick, salmon in color and fine flavor; rind heavily netted.

GOLDEN HONEY. A salmon-fleshed Honey Dew. Very good. See page 22.

Germain **HOODOO.** A new and excellent variety; an ideal shipper of medium size; rind thin; flesh very thick firm and highly colored; of fine texture and delicious flavor.

EMERALD GEM. A small, very early melon; form globular, flesh salmon-colored, exceptionally fine flavor.

INDIANA. Rich yellow flesh.

MANGO MELON, or "VINE PEACH." Fruit is size of a peach, of bright orange color; are not eaten raw but are fine for preserves, pies, pickling, etc. Ripen soon after falling from vine.

MILLER'S CREAM, or OSAGE. The fruit is large and round, with light green netted skin and thick, sweet, salmon-colored flesh.

PAUL ROSE. Handsome; oval, new variety; rich orange, flesh very sweet.

TIP TOP. A prime favorite for the home garden or nearby markets. Medium size, deeply ribbed slightly netted. Flesh salmon color, rich and sweet.

GERMAIN'S "MISSION BELL" CANTALOUPE

We consider ourselves very fortunate in being able to offer this splendid melon. The flesh is a full salmon color even up to the very rind, and is of unsurpassed flavor, bearing a high percentage of sugar. The rind is heavily netted and the melon is larger than medium size.

Mission Bell is a vigorous grower, early bearer, and if planted a bit late in the season is not so acutely susceptible to frost. An outstanding feature is the keeping qualities, both on the vine and after being picked. For an all round family melon, here is a crackerjack; and as for the market gardeners, we can say Mission Bell is grown by California's most extensive melon growers. You can't beat the Mission Bell. Pkt. 10c; oz. 40c; $\frac{1}{4}$ lb. \$1.35; lb. \$4.00.

CASABA MELONS

Note—Prices listed are postpaid.

CULTURE—The same as Muskmelon. Follow carefully. **CASABA POINTERS**—The Casaba is an exceptionally fine melon if grown, picked and cured properly and to insure success follow our pointers.

1. For early Casabas plant as soon as weather will permit, usually March. For a late crop plant from middle of June to middle of July.

2. Picking at the proper time is very important. If desired for immediate use do not pick until the rind will give under pressure, using the thumb to determine this. If rind is firm the melon is not ripe and full flavor has not yet developed.

3. Casabas can be picked green and held in storage until ripe. Green melons are used for shipments of any distance. Do not pick for shipment until the melon has lost its shiny appearance.

EASTERN. Long oval-shaped, skin very thin and delicate; flesh extremely tender, rich and sweet.

Germain **GOLDEN BEAUTY.** A variety of Winter Pineapple which it resembles in every way except color.

IMPROVED HYBRID. A variety that ripens late and is a good keeper. Thick flesh of excellent quality.

Germain **SANTA CLAUS.** The latest melon grown. Thin, hard skin with yellowish brown markings, flesh light green and good flavor. Can be picked in September or October and will keep for several months.

Germain **WINTER PINEAPPLE.** A large, late melon of unique appearance, corrugated skin, green flesh of pronounced pineapple flavor. Melons do not ripen on the vines. Flavor is greatly improved by being stored in a cool place.

WATERMELONS

☛ Note—Prices listed are postpaid.

Sandia

Wassermelone

Melon d'Eau

CULTURE—The same culture as applied to the Muskmelon is employed in growing Watermelons. Furrows of about 8 inches depth are prepared and 6 to 8 seeds are planted about 1½ inches deep every 10 feet in the furrow; furrows about 8 feet apart.

This plant assumes a more rapid growth than Muskmelons, consequently more frequent cultivation and care must be given while the plants are young. As the plants grow in the furrow, fill in the soil about them so as to establish roots well into the deeper soil and when the plants are securely established pluck out all but two of the most hardy and healthy ones. The furrows in which the plants are growing want to be filled gradually as the plants grow until level with the surface, and then in early cultivating throw the soil towards the plant until a slight knoll or hill is formed.

In irrigating soak ground thoroughly and follow by cultivation as quickly as practicable, in order to keep a permanent mulch and maintain the moisture. Use one and onehalf pounds of seed to an acre.

ALABAMA SWEET. A very popular variety in the south, especially in Texas, where they grow it in preference to any other. In shape it is long, color dark green, flesh red and absolutely stringless.

ANGELENO. A top notch melon; big producer, excellent shipper, oval shaped and fine color; medium size to large; pick only when green shades to gold. A prime favorite with all.

BLACK SEEDED ANGELENO. A combination of the unexcelled qualities of the famous angelelo and the favorite black seeded Chilian. Undoubtedly a melon of par excellence and a prime favorite for the market.

EXCEL. This is a new variety of black seeded melon that has proven very popular in the south and also in the San Joaquin Valley. Large size, extra good shipper, and heavy yielder.

FLORIDA FAVORITE. An old popular, long-stripe melon of good quality.

GEORGIA RATTLESNAKE, OR GYPSY. Standard southern variety, which possesses remarkable shipping qualities; oblong, scarlet flesh, crisp and juicy.

GERMAIN'S IMPROVED BLACK SEEDED CHILIAN. This melon possesses a rich, fruity flavor. It has all the good qualities of the white seeded melon but is a trifle sweeter and has a very thin rind. Home gardeners like this variety because of its moderate size and delicious flavor.

ANGELENO

GERMAIN'S IMPROVED WHITE SEEDED CHILIAN. Another unusual melon of exceptional merit. It is extra solid, extra crisp and extra sugary—a great favorite with growers because of its remarkable eating and shipping qualities. Each melon contains but few seeds and the crisp deep red flesh looks as though frozen to a crystal-like iciness.

KING AND QUEEN. See page 23.

KLECKLEY'S SWEET. This new melon is one of the best for the home market or family use. The melons are large, eighteen to twenty inches long and ten to twelve inches in diameter, dark green; rind thin, flesh scarlet and very sweet.

KLONDIKE. One of the sweetest and most prolific melons. Seeds one-half as large as in other melons. Although not a good shipper, good for local consumption. See page 23.

TOM WATSON. An exceedingly popular melon in the South. Fruit large, running at times as high as sixty pounds. Rind thin but tough, consequently a good shipper. A dark green in color with flesh a brilliant scarlet. Very large with small seed area. An early variety of delicious flavor.

YELLOW-FLESHED ICE CREAM. The melon grows very large, of oblong shape, the flesh is a beautiful yellow, and has a peculiar, delicious flavor, different from any other variety.

ONIONS

Cebolla

Zwiebel

Onion

CULTURE—Many different methods of planting onions are in practice but the one most practical to the general market grower is the following method:

Planting in this section usually starts in December, January and February unless the season is exceptional and then possibly earlier. The primary requisite is good seed and in this we excel, our seed being produced by experts who have been growing for us for years and our trade has been greatly increasing due to the excellence of our seed.

Sow onion seed with a seed drill in rows 14 inches apart, using on this basis from 4 to 4½ pounds of seed per acre. The land must be thoroughly plowed, disked, and harrowed when necessary. It is impossible to prepare your land too carefully in growing the onion as it responds readily and in order to get maximum yields, thorough preparations must be made.

As soon as the plants appear, hand weeding must start both in and between the rows. From this point on the plants must have a steady even growth as a check whether from disease or drought will cause them to go to seed extensively. When the onions are ready for harvesting the tops will be well ripened down. If, however, the tops are still green we would suggest running a light roller or plank over the field to press them down. In ten days after this operation the onions should be pulled and left in the field one deep to dry. When thoroughly dried the tops can be removed. However we do not recommend this until ready to ship to market. If the onions are to be kept any period of time they should not be sacked but put on a floor or in a bin where there is a complete circulation of air. In some localities the transplanting system is followed. If this is done the seed should be planted in beds during August and September and transplanted to permanent field during February and March. The seed should be sown broadcast in the bed about ¼ of an inch deep. When transplanted they are put in rows 14 inches apart and 6 inches apart in the row.

The land chosen for onions should be damp or easily irrigated, preferably loose sandy loam or peat and should ways be kept well drained. Heavy adobe or clay soil is good but here irrigation must be carefully practiced.

On this latter soil onions do not color up as well nor are they as even in shape as on lighter soil. Never pick weedy land for onions and avoid lands just free of grain crops. Garden lands are always preferable. Repeated planting for more than two successive seasons on the same ground is not advisable as onion diseases are bound to appear.

AUSTRALIAN BROWN ONION

The first requirement of the market gardener in selecting an onion is its shipping quality. The producer for home use finds this feature of equal value, for it insures him a prime supply of the vegetable in the cellar bin at all times. In stocking the Australian Brown, Germain's are entirely satisfied that under the most adverse conditions the grower will be more than pleased with this variety. The flesh is pure white, close layered, juicy and tender, growing to a good size. This hardy variety does especially well in the South, and when planted in rich, sandy soil and given an abundance of water, will produce more to the acre than any onion that has come under our observation. Germain's customers will not regret planting the Australian Brown, and we are pleased to note that we are stocked to take care of all orders. Pkt. 10 cents; ounce, 20c.; one-fourth pound, 60 cents; one pound, \$1.75.

AUSTRALIAN BROWN. The flesh is pure white, close layered, juicy and tender, growing to a good size. This hardy variety does especially well in the South.

Germain **BERMUDA RED.** An early variety resembling the White Bermuda, except in color, which is a pale red, flesh crisp and mild flavor. Fine market onion. (Teneriffe-grown)

Germain **BERMUDA YELLOW ONION.** This variety is more extensively grown for the early market than any other. Being ready for shipping when the storage supply is exhausted they bring the very highest price. Our stock of seed is from the Island of Teneriffe, grown by the most reliable seed grower in that celebrated district. A large, flattish onion, very mild and of a pale straw color.

Germain **CRYSTAL WHITE WAX.** A large white onion of the Bermuda type, becoming more popular every year. It is very early, mild in flavor. Excellent shipper and keeper. The seed is very generally sown in beds, and transplanted to the fields when partly grown. Our stock of seed is from the same Teneriffe grower that has supplied us with our fine strain of White Bermuda seed for years.

GERMAIN'S GREAT BUNCHING ONION. See following page
LARGE RED WETHERSFIELD. One of the leading varieties for many years. In color the skin is a deep purplish red. The flesh is white, tinged with red, and of good quality, crisp and solid. It grows to a large size and is both a good keeper and shipper.

Germain **MAMMOTH SILVER KING.** A large white onion with a silvery skin, flattened on top but quite thick.
NEW QUEEN.

Germain **PRIZE-TAKER.** The largest of the yellow onions, globular in shape, of a pale straw color. Produces enormous crops; bulbs frequently weigh as high as three pounds

Germain **SOUTHPORT WHITE GLOBE.** A great yielder, fine grained and firm; flavor mild.

SWEET SPANISH ONIONS. In this new onion you find all the good features of a perfect onion with none of the disadvantages of the common onion; no bite, no objectionable strength. Mild, sweet flavor, good firm meat, fine, tender texture.

Germain **WHITE PORTUGAL, OR SILVER SKIN.** One of the leading white sorts, of beautiful shape and very mild flavor. The bulbs are flat and mature early. Splendid variety for market garden. Bulbs average two to three inches in diameter

Germain **YELLOW FLAT DANVERS.** This is one of the very earliest varieties, a good shipper and keeper. Flat in shape, of straw color and mild in flavor.

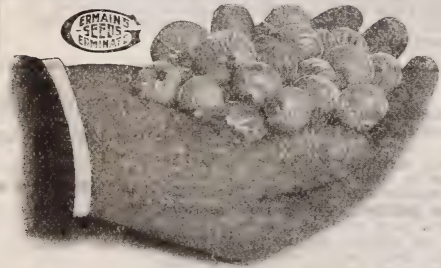

YELLOW GLOBE DANVERS. A well known early onion of fine quality. Flesh white and firm. Color a bright orange; grows to a good size, hardy, a sure cropper and a good keeper.

PRIZETAKER

GERMAIN'S GREAT BUNCHING ONION
This variety fills a long felt need for both the amateur and the professional gardener. It produces the long, tender and sweet green onions which are justly so popular on the table of those who enjoy good eating. It can be easily grown in every garden. Pull white medium sized before the bulb has formed. Price, packet 10 cents, ounce 35 cents, 1/4 pound \$1.20 pound \$3.50. Prices are postpaid.

PEAS

Chicharos o Guisantes

Erbesen

Pois

 **Note**—Prices up to and including ten pound quantities include postage or expressage prepaid. When sent otherwise, deduct 10c per pound or fraction thereof. Prices listed for larger quantities, if desired sent by Parcel Post, necessary postage should be added. See our Parcel Post Schedule on inside back cover page. If quantities are desired, do not fail to write for special prices.

CULTURE—We classify Peas into three distinctive types. First early, second or medium early, and late. Of the early peas, we recommend Nott's Excelsior, American Wonder and Gems. These planted in August and September will come into bearing for the early high price market. For the home garden first early the little Marvel should be used. The main market gardeners crop is of the second early type and we recommend the Stratagem and Admiral or Senator for this planting. Of the late peas the Telephone is to be preferred.

Peas may be planted in almost any kind of soil. In light soil during the warmer months they should be planted about 3 inches deep so as to be near moisture. In heavier soils or in fall months plant about 1 inch deep, that warmth may penetrate and help germinate the seed.

Excessive moisture will rot the seed, so do not irrigate after seed is planted until the plants are well out of the ground; this is an important point. Cultivate after each irrigation. Usual planting is at rate of 60 pounds per acre.

INOCULATE THIS
SEED WITH
FARMOGERM

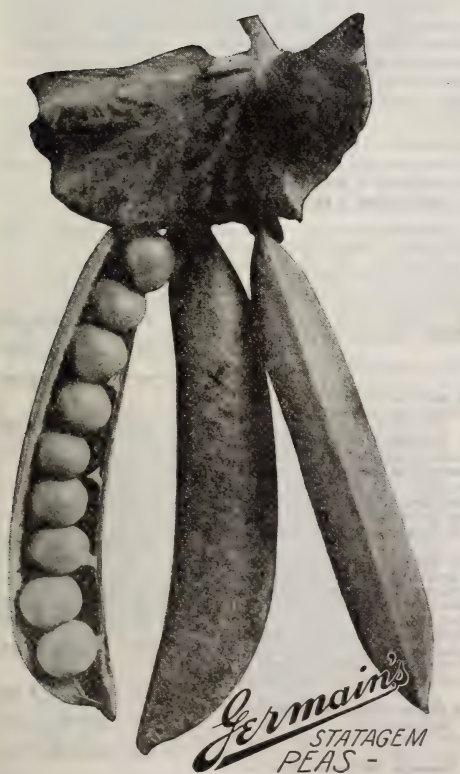

FIRST EARLY VARIETIES

AMERICAN WONDER. This is an early wrinkled pea of dwarf habit, the vines generally being about a foot high. Especially good for the private garden. It is quite distinct from other peas, being very stocky and erect. Very prolific.

DWARF TELEPHONE. This is a dwarf growing strain of the "Telephone" variety.

GRADUS. An early wrinkled Pea of the finest quality, bearing large pods well filled with the sweetest peas you ever ate. It is not only large and of good quality, but it is also one of the very earliest sorts, and brings the best prices. The demand for these peas from the hotel and choice trade is never supplied. Market gardeners should plant a liberal acreage of this variety. Does best in loamy soil.

LAXTONIAN. A fine wrinkled pea, being the largest podded of the dwarf varieties. The pods are similar to Gradus in shape, color and quality.

 **NOTT'S EXCELSIOR.** A splendid dwarf wrinkled sort, one of the best, hardy, vigorous, and will mature almost as soon as the smooth varieties, often ready to pick in fifty days. The pods usually contain from seven to nine peas. Tender and of fine flavor. This variety is rapidly growing in favor for early planting, as its hardiness and quick growth make it a very profitable market pea.

PREMIUM GEM. A fine early wrinkled pea with vines about fifteen inches high, pods long and produced in abundance. A profitable market variety excellent for private use.

2	10	20	35	3 00
1 1/2	10	20	35	3 00
1 1/2	10	20	35	3 00

SECOND EARLY VARIETIES

SENATOR OR ADMIRAL. A new sort introduced on our local market about three years ago. It is a good second early pea, has thick green foliage, and bears abundantly, large well-filled pods. We consider it one of the best peas for our local markets.

DWARF SUGAR or EDIBLE POD. A low growing vine bearing large sweet pods that can be cooked and used the same as stringless beans. Vines bear heavily of peas that have delicious flavor.

STRATAGEM. This variety has come into prominence on the Los Angeles due to the fact it is exceedingly prolific and sweet, and has a tendency to keep well after picking. The majority of peas purchased at the corner grocery or fruit stand are this variety. For the market gardener they are exceedingly profitable, and as it is profitable for him to grow them, it is also for the home gardener. It is the main crop variety which grows without any supports. A plot planted to this variety will be very profitable. See page 24.

YORKSHIRE HERO. Its strong, vigorous growth makes this pea especially valuable to the market gardener and in the home garden that is not too well taken care of, it will naturally be found the most healthy and productive of all the vegetables. It grows bushy, yields prodigiously, pods are filled with delicious peas.

2 1/2	10	20	35	3 00
2	10	20	35	3 00
2	10	20	35	3 00

LATE VARIETIES

 **ALDERMAN.** A wonderfully well flavored Pea and one that is bound to be sold largely in this market. In habit, the vines are tall and branching, bearing large deep green, straight and handsome pods, averaging 4 1/2 to 5 inches in length. When it is well known, this pea to our notion is bound to supersede the "Telephone". Do not fail to include the Alderman pea in your order, and if you are a market gardener and desire to grow a Telephone pea, specify Alderman. It will make you money.

TELEPHONE. A fine wrinkled pea growing about four feet high. The peas are large, and of a pale green color. It is very prolific and the pods are very large, containing eight or ten peas.

5	10	20	35	3 00

PEPPERS

Pimiento

Note—Prices listed are postpaid.

Pfeffer

Piment

CULTURE—For early market peppers, seed should be planted in hot beds during November and December, and when the plants are of proper size and the danger of frost is passed they should be planted in the open field or garden or the plants may be planted direct to the open ground before the frost period is over if they are given proper protection.

To harden off plants before setting out remove covering of hot bed during warmer part of the day, being sure to replace same as it starts to turn cool in the evening.

For main crop, plant in the hot bed during February, March and April; in later planting cold frames may be utilized. As pepper seed demands ideal conditions for growing, do not attempt to plant the seed in the open unless it be in the summer when the air and ground are warm. A loose sandy loam soil is best. One half pound of seed will produce enough plants for an acre. **PLANTS**, see page 8.

GERMAIN'S PERFECTION PIMIENTO PEPPER

California is famous for her production of all kinds of peppers among which the Pimiento stands pre-eminent among the home garden types. All home gardens could include Germain's Perfection Pimiento Pepper which is unquestionably the most wonderful home pepper ever offered, by any seedman. It is of brilliant red color, fine texture, but of thick flesh, with a semi-sweet tasty flavor. The absolute absence of any hot tendency insures just the right delicate touch in making up salads, finishing appetizing steaks, or as a stuffed side dish. To those who know the eating qualities of an unexcelled pepper, we need say no more, and to those who have never knows it, we can only say that you have missed a rare treat, and by all means should see that it has a place in your garden.

Price: Packet 10c; Ounce 60c; ¼ lb. \$2.00; 1 lb. \$6.00.

ANAHEIM CHILI. (Chili Caliente). The country around Anaheim is the greatest pepper growing section in the world, the shipments running over 100 car loads a year. Our seed is selected from the finest and most productive fields in that vicinity and is certain to produce splendid crops. This pepper is from 6 to 8 inches long and tapers from 1½ to 2 inches in diameter at the top to a point. When dried it is a brilliant scarlet.	Pkt	Oz	¼lb	1 lb
BELL, OR BULL NOSE. Early, sweet and of good flavor.	10	\$ 50	1 65	\$5 00
BIRD'S EYE or CREOLE. The smallest of all hot peppers and the most pungent in taste.	10	80	2 65	8 00
CAYENNE. Pods small, long and tapering; coral red when ripe, very hot and strong, best kind for seasoning pickles; the Cayenne Pepper of commerce.	10	80	2 65	8 00
CHINESE GIANT PEPPER. A pepper of exceptional merit. It is very mild in flavor and is an ideal variety for the home garden. Produces enormous peppers measuring as much as five inches broad at the top and of equal length. It is highly productive, plants being so thickly covered that they appear to bear in clusters. Its flesh is thick, solid, but of fine texture making the ideal stuffing pepper, for which purpose it is greatly and rightly famed. See page 25.	10	80	2 65	8 00
MEXICAN CHILI. The pepper that has made the tamales of Mexico famous is becoming very popular in the Southwest. Our seed is obtained directly from Mexico. It is a medium size, pear-shaped pepper, and turns bluish black when dried.	10	50	1 65	5 00
PERFECTION PIMIENTO. See above.	10	60	2 00	6 00
RED CHERRY. Tall plants with a number of bright red peppers about two-thirds of an inch in diameter. Very ornamental.	10	80	2 65	8 00
RED CHILI. A very pungent variety. Grows about 2 inches long, measuring from one-third to one-half inch at the base and tapering down to a point.	10	80	2 65	8 00
RUBY KING. A large growing sweet pepper of the Neapolitan type; strong grower and prolific. See page 25.	10	80	2 65	8 00
TABASCO. A tall, bushy variety producing many slender and fiery hot peppers about 3 inches long and ¼ inch thick.	10	80	2 65	8 00

Prices Subject to Change Without Notice.

PUMPKINS

☛ Note—Prices listed are pstpaid.

Calabasa

Kuebis

Cource

CULTURE—Pumpkins grow and thrive in most any soil. A well-drained soil subject to irrigation is best. Pumpkins like other vine crops, should be irrigated carefully, not allowing the water too close to the main stock. As the roots are long, irrigation can be made at the ends of the vine. When the fields are covered by vine, irrigate midway between the rows. Too much water is very detrimental to the vines. Plant hills 8 to 10 feet apart each way, placing 4 seeds to a hill and after established pull out all but the one healthiest plant. Use one pound of seed per acre.

BOSTON PIE OR SMALL SUGAR. A very popular small variety. The skin is a deep orange yellow and the flesh sweet and fine grained. As famous in Boston as the Boston Beans

CALIFORNIA FIELD. Selected, very large, for stock

CHEESE. Size large; reddish orange; flesh thick, fine and sweet; keeps well

Germain **CONNECTICUT FIELD, OR JACK O' LANTERN.** A fine variety for dairy ranchers, adding much to the quality and quantity of the milk and butter; an excellent keeper and can be strongly recommended

CUSHAW, OR CROOK-NECK. Solid, fine, sweet; keeps well

JAPANESE PIE. The flesh is nearly solid; the seed cavity being very small, fine grained, dry and sweet, having much the taste and appearance of sweet potatoes. They ripen early, keep well and are fine for home use

KENTUCKY FIELD PUMPKIN. A heavy fleshed and remarkably sweet pumpkin. A splendid keeper and a fine sort for family or market use. Its large size makes it desirable for stock also. Especially adapted to Southern California conditions.

Germain **MAMMOTH KING or POTIRON.** The best large pumpkin in use. Forms immense globular melons, flattened a little at the end. Skin reddish yellow in color and flesh rich orange. This is unquestionably the very best mammoth pumpkin we have. It runs very uniform in shape and color and all are of immense size

Germain **MAMMOTH TOURS PUMPKIN.** This pumpkin should be called the Prizetaker on account of its immense size, fine color and thick flesh. It is not only a fine stock food, but its rich flavor makes it valuable for canning or home use. It is a rapid grower and often attains a weight of 150 pounds

Germain **SWEET OR EARLY SUGAR.** This is the small, sweet pumpkin that has made the New England States famous for their pumpkin pies. Fine-grained

WINTER LUXURY PUMPKIN

RHUBARB OR PIE PLANT

Be sure to Read Page Nine

Ruibarbo

Rhabarber

Rhubarbe

CULTURE—Rhubarb seed requires considerable care and is discriminating as to where it grows. A rich light sandy loam is its delight and seed planted in this type of soil, about ¼ inches deep in rows which are 12 inches apart, in the early spring say February will be ready to transplant in from 4 to 6 months time. When they are as large as one's finger transplant the roots to mellow soil as described above, in rows 5 feet apart and about 3 feet apart in the row. The roots should be set in ridges with the crown even with the surface of the soil. The ground should be kept well cultivated and irrigated the first season and stalks may be pulled early the next spring.

RHUBARB ROOTS, see pages 6 and 107.

Germain

RECOMMENDS

WAGNER'S GIANT SEEDLING RHUBARB

It is grown from the seed of the famous Giant Rhubarb. Our seed was secured from Mr. J. B. Wagner, the originator and most prominent Rhubarb expert in the world, and is the best that can be gotten. Wagner's Seedling will yield as high as 20 tons per acre, is a strong rapid grower, and very much more productive than the Crimson Winter. It comes on soon after planting, and unless the ground is frozen it keeps on growing constantly. The stems are as large as the Crimson Winter, are hardy in any climate, and will grow and yield handsome returns where the common Crimson variety will be a failure. It is unsurpassed either in flavor, texture, size, or hardness. Germain strongly recommends this variety as the most profitable that can be grown, and is proving itself a tremendous money maker. Price, packet 10 cents, ounce \$1.60, ¼ pound \$5.00, pound \$16.00.

We especially call your attention to the roots of Rhubarb, a description and prices of which will be found on pages 8 and 9.

RADISHES

Note—Prices listed are postpaid.

Rabano

Radies

Radis

CULTURE—Sow any month of the year; will succeed in any good garden soil not over-moist or too heavy. For early and late crop a warm, sheltered situation should be chosen; for those sown in summer, a rather shady spot must be selected. For a succession, sow every two weeks. The ground where the sowing is to be made should be dug deep and raked fine. The seed is generally sown thinly broadcast, in beds four to five feet wide, with one-foot alleys between. One ounce of seed will sow about 100 feet of drill, or a bed forty square ft.

FRENCH
BREAKFAST
RADISH

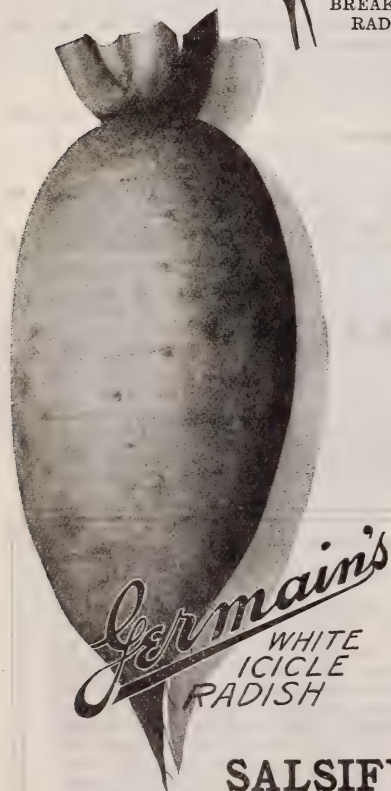

Germain's Epicure Radish

You know the old saying, "What's in a name". Truly there's something in a name when you consider **Germain's Epicure Radish**. Nothing more epicurean has ever been offered than this select strain of scarlet, white-tipped Radish, which is one reason for its popularity among market gardeners. It is the quickest growing Radish we know of, maturing in eighteen days. Firm, very mild in flavor and never pithy, it is truly a joy to the planter in every sense.

Prices: Packet, 10c; ounce, 20c; ¼-pound, 70c; pound, \$2.00.

	Pkt	Oz.	¼lb	1 lb.
BLACK SPANISH WINTER, LONG. Grows to a large size, of oblong shape; quite solid.	.10	.20	.65	2.00
BLACK SPANISH WINTER, ROUND.	.10	.20	.65	2.00
CALIFORNIA MAMMOTH WHITE. A winter sort introduced into California by the Chinese; eight to twelve inches long and two inches in diameter, flesh white, firm.	.10	.20	.65	2.00
CHARTIER. A long, smooth radish, red above and shading to clear white at the tip.	.10	.20	.65	2.00
CHINA ROSE WINTER. Medium size, oblong, of a bright rose color; one of the best varieties for winter use.	.10	.20	.65	2.00
CRIMSON GIANT TURNIP. Twice as large as any other turnip shape variety; does not get hollow or pithy; flesh white, solid, crisp and mild flavor. Excellent for forcing in open ground.	.10	.20	.65	2.00
EARLY LONG SCARLET SHORT TOP. Without exception the best long bright scarlet radish, very brittle and sweet, matures in twenty-five to thirty days.	.10	.20	.65	2.00
EPICURE. See specialty page 24.	.10	.30	1.00	3.00
FRENCH BREAKFAST. An early variety with good flavor and very pretty, being a light scarlet tipped with white. A favorite wherever known.	.10	.25	.85	2.50
JAPANESE SUMMER RADISH. Introduced by Japanese in Southern California some years ago. Grows as long as twenty-four inches and three inches in diameter; very tender, mild and of excellent flavor.	.10	.25	.85	2.50
LONG WHITE ICICLE. A very popular long white radish. Very sweet, crisp, and tender all through its growth and reaching a length of six inches.	.10	.25	.85	2.50
MIXED RADISHES. Supply a nice assortment for the table.	.10	.20	.50	1.50
SCARLET TURNIP. The little red turnip shaped radish every one asks for, crisp, tender and of fine flavor. Very quick growing.	.10	.25	.85	2.50
SCARLET GLOBE. Very early; a little longer than round.	.10	.20	.65	2.00
SCARLET, OLIVE-SHAPED. Oval; very early and handsome; flesh rose-colored, tender and brittle.	.10	.20	.65	2.00
SCARLET TURNIP WHITE-TIPPED. Turnip shaped, attractive in color, being scarlet and white. It is very quick to mature, being ready for table in twenty days. Excellent flavor a great favorite with market or home gardeners.	.10	.25	.85	2.50

Germain's
WHITE
ICICLE
RADISH

SALSIFY OR VEGETABLE OYSTER

Note—Prices listed below are postpaid.

Salsifi Blanco

Haferwurzel

Salsifis Blanc

CULTURE—Sow in early spring, one inch deep, in drills one foot apart and thin young plants to three or four inches in the row. The soil should be deep and loose, and never allowed to get dry. General care same as for parsnips and carrots.

SANDWICH ISLAND SALSIFY. An improved type and the largest and most delicious salsify in cultivation, with long, white tapering roots.

SQUASHES

■ Note—Prices listed are postpaid.

Calabasa

Kuerbiss

Courge

CULTURE—Sow after danger of frost is past. Light, warm soil is best. Plant in hills prepared the same as for pumpkins and melons, the bush kinds about four feet apart, and the running varieties from six to nine feet apart, according to their nature, as some will run more than others. Plant about one-half dozen seeds in each hill and thin to three best plants. The earth about the plants should be kept loose and clear from weeds until runners are well started. Cutting off the leading shoots of the running varieties is recommended as having a tendency to promote growth and early maturity of the fruit. One ounce of seed will plant from thirty to fifty hills.

SUMMER VARIETIES

	Pkt	Oz.	1/4 lb	1 lb
EARLY GOLDEN BUSH SCALLOPED. Similar in shape to the white.....	10	\$ 20	\$ 45	\$1 25
<i>Germain</i> EARLY WHITE BUSH SCALLOPED. An early variety, well-flavored, productive; excellent for market	10	20	45	1 25
ITALIAN OR ZUCCHINI SQUASH is a bush variety and should be planted five feet apart. It should be used when quite young. When stewed it has a rich, creamy flavor not equalled by another squash. Some gardeners have made considerable money making a specialty of it. For the family garden we would recommend its use instead of the small white bush scallop, because of the excellent flavor and it is much more prolific. See Page 26....	10	25	85	2 50
LONG WHITE VEGETABLE MARROW. An English variety of delicious flavor	10	20	60	1 75
SUMMER CROOK-NECK. This is the richest summer squash; very early and productive.....	10	20	50	1 50

WINTER VARIETIES

	Pkt	Oz.	1/4 lb	1 lb
BANANA SQUASH. Firm and solid flesh, good quality. See page 26.....	10	20	65	\$2 00
ESSEX HYBRID. An early and rapid growing variety, with thick, rich colored solid flesh, and one of the best keepers.....	10	20	50	1 50
FORDHOOK. One of the best of the late summer varieties, and will keep till the following May if stored in a cool dry place. Thick skin of a bright yellow color, heavy meat that can be used at any stage of growth.	10	20	60	1 75
<i>Germain</i> HUBBARD. Best winter variety, vigorous, productive. Fruit large, weighty, moderately warted, hard shell; color dark bronze green. A fine grained, thick, dry, richly flavored, orange-yellow flesh. Baked, it is similar to and as luscious as a sweet potato. We have spent a great deal of time and attention in selecting our stock and confidently recommend it.....	10	20	50	1 50
<i>Germain</i> PIKES PEAK or SIBLEY. A new, old variety that deserves all the good things that are said about it. It is preferred to any other by those who know it. Similar to the Hubbard, but a great improvement on it.....	10	20	50	1 50
RED OR GOLDEN HUBBARD. Similar to the Green Hubbard, except in color, which is a bright, deep orange. Flesh deep, golden yellow, fine grained, cooks dry, and is of excellent flavor....	10	20	65	2 00

SORREL

TOMATOES

 Note—Prices Listed are postpaid.

Tomate

Liebesapfel

Tomate

CULTURE—Sow in hot bed or frame, about September 1, for winter crop in frostless belts, or in early spring for summer crop. Growth must never be checked or a shortened fruit crop will result. When the plants are two or three inches high, thin them out and set in pots or in another bed, to give them room and make them "stocky." When five or six inches high, if the weather be warm and settled, transplant them to open ground, selecting a rainy day if possible; in the absence of rain, water and protect till well rooted. Set plants four feet apart each way. One ounce of seed will produce 3000 plants. The tomato requires a rather light soil to ripen early, but if handsome fruit and a plentiful crop be desired, every rich soil should be selected and good cultivation given. **PLANTS**, see page 8.

GERMAIN'S FIRST EARLY TOMATO

The early tomato is the one that gets the big money, but earliness alone does not do it. Quality, including size, smoothness, firmness, flavor and coloring, are all considered; and tomatoes of this type find a ready market even when prices are highest.

Germain's First Early Tomato embodies all these requirements and has found a warm spot in the energetic and prosperous growers' heart. For home gardening it is equally as valuable, for it requires no more care than other varieties and comes into maturity earlier. Running strong to foliage, it affords the fruit more protection than any other variety. Hence it is as hardy a tomato as can be found.

Packet, 10 cents; ounce, 50 cents; ¼ pound, \$1.75; pound, \$5.00.

ATLANTIC PRIZE (Early Ruby). A favorite early variety. Pkt 10 Oz. ¼ lb. 1 lb. color glossy crimson with a purplish tinge. 40 1 35 4 00

BEEFSTEAK. This variety has been exceedingly popular with our customers and our sales have been enormous. It is one of the best, if not the best tomato grown. It is very prolific and its growth is a marvel. For the home garden it cannot be surpassed. Of a bright red color, with very firm, substantial meat and luscious flavor. We take pleasure in again presenting this favorite to our customers. 10 70 2 35 7 00

BONNY BEST. An extra early, scarlet, round fruited variety of great value. The fruit is very even in size and shape. 10 40 1 35 4 00

CHALK'S EARLY JEWEL. Nearly as early as Earliana. Fruits are large and of fine flavor. 10 40 1 35 4 00

DWARF CHAMPION. An early and distinct variety, medium in size; plant of dwarf and compact growth. 10 40 1 35 4 00

GERMAIN'S GLOBE. A very nearly round tomato of good quality. Vigorous and productive vines, large, purplish pink in color; an excellent shipper. Early maturing. See page 27. 10 45 1 50 4 50

GERMAIN'S WINTER QUEEN. See page 27. 10 50 1 65 5 00

GRAPE OR RED CURRANT. A small red tomato about the size of a small grape. Useful for ornamental vine, for preserving, and for table decoration. 10 40 1 35 4 00

GERMAIN'S NEW STONE. See specialty page 27. 10 40 1 35 4 00

PONDEROSA. Grows to enormous size, sometimes weighing from two to three pounds each; very smooth and solid. 10 85 2 25 6 50

SAN JOSE CANNER. A fine tomato used for canning purposes in the North, and we recommend it also for the same purpose locally. It is also a good Market Garden tomato to be planted for the main crop. It should be planted at the same time as the Stone variety. 10 75 2 50 7 50

SPARK'S EARLIANA. Early and prolific; very solid and noted as a good shipper. 10 40 1 35 4 00

STRAWBERRY OR GROUND CHERRY. A distinct species; grows enclosed in a husk; excellent for preserves. 10 75 2 50 7 50

YELLOW PEACH. Beautiful clear yellow color, for eating and preserving. 10 75 2 50 7 50

YELLOW PLUM. Fruit plum-shaped, of clear, deep yellow color. Flesh yellow, used for preserving. 10 75 2 50 7 50

YELLOW PEAR. A small early variety good for preserves. 10 75 2 50 7 50

TURNIPS

 **Note**—Prices listed are postpaid.

Nabo

Ruebe

Navet

CULTURE—Sow during cool weather, from October to April. For early crops, sow the Early White Flat Dutch or Early Purple Top Milan during early winter; and for summer crops sow any of the other varieties at intervals of two weeks, in drills twelve inches apart; cover the seed lightly unless the season be very dry; thin out the plants to six or eight inches apart. For Fall or Winter use, sow the Golden Ball or Purple Top Strap Leaf. Success depends upon the selection of soil and its subsequent preparation. Stir deeply.

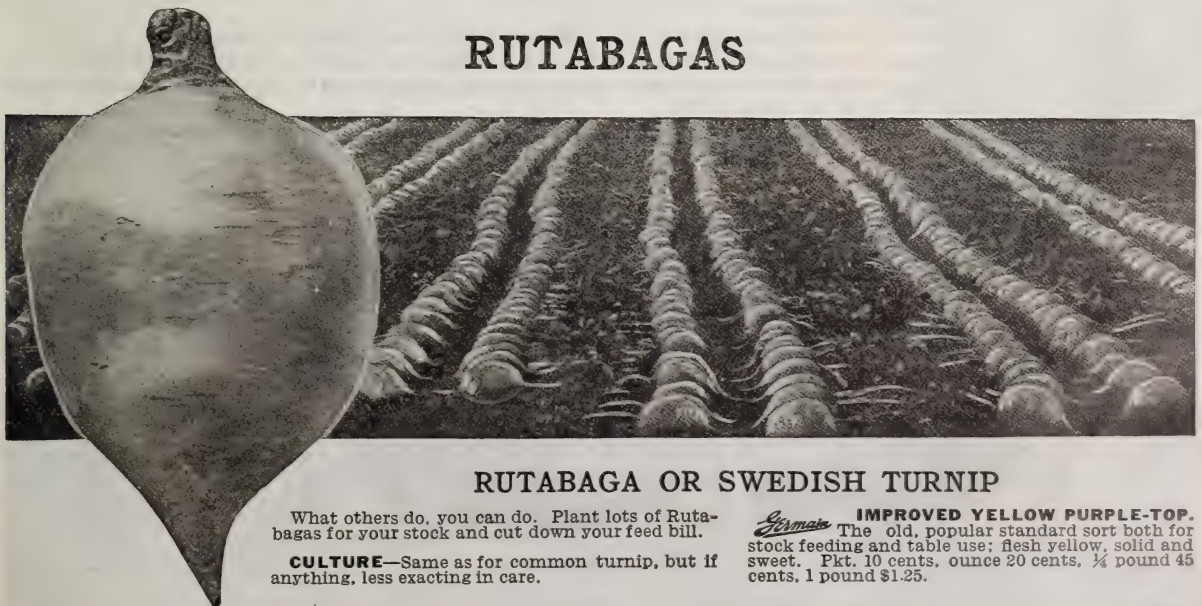

SNOWBALL TURNIP

Germain **RECOMMENDS**
EXTRA EARLY PURPLETOP MILAN TURNIP

This choice variety is not only a beautiful and unusually delicious vegetable, but pleases the grower by maturing a week earlier than the earliest of other sorts. It is of medium size, flat and thick, with a smooth, bright purple top, snow white flesh, and little given to leaves. It accommodates itself to either spring or fall maturity, and is a delight to those who appreciate the food value and fine flavor of a good turnip. A heavy cropper, it deserves the greatest favor from the market gardener, and is surely a top notcher for the home garden. Pkt. 10 cents; ounce, 25 cents; one-fourth pound, 85 cents; one pound, \$2.00.

	Pkt	Oz.	¼ lb	1 lb
COW HORN. This variety is pure white; in shape like a carrot, growing nearly half out of the ground, and slightly crooked. It is delicate and well flavored. Used also as a green manuring crop.	10	\$ 20	\$ 40	\$1 25
EARLY PURPLE-TOP MILAN. See Specialty above.				
EARLY WHITE EGG. An egg-shaped variety for spring and fall sowing; flesh firm, fine-grained, mild and sweet.	10	20	40	1 25
<i>Germain</i> EARLY WHITE FLAT DUTCH. White flesh, medium size, quick growth.	10	20	40	1 25
<i>Germain</i> RED TOP WHITE GLOBE. One of the handsomest and most salable turnips. Equally good for home or market. It is a large, rapid growing sort, flesh pure white and the best flavor of any turnip grown. The skin is white with red top. We have taken great care with this stock, and offer it with confidence that our friends will be fully satisfied.	10	20	40	1 25
GOLDEN BALL. Round, smooth English turnip of fine quality; yellow; good keeper.	10	20	40	1 25
PURPLE-TOP STRAP-LEAF. Very productive, matures quickly; flesh white and sweet.	10	20	40	1 25
<i>Germain</i> EARLY SNOWBALL. Some people may think that a turnip is a turnip, not realizing the great difference between the average stringy, pulpy vegetable and the sweet, mellow, crisp possibilities that have been achieved in the perfection of the Snowball. It was first introduced into this section by us several years ago, and our supply of seed this season is so unusually fine that we are strongly recommending it. Germain's Snowball will respond to any reasonable desire for early maturity; grows even in size and is most completely described by its name—pure white and round as a ball.	10	20	40	1 25
WHITE GLOBE POMERANIAN. A large round turnip, very sweet flesh, similar to Red Top White Globe, but pure white in color.	10	20	40	1 25

RUTABAGAS

RUTABAGA OR SWEDISH TURNIP

What others do, you can do. Plant lots of Rutabagas for your stock and cut down your feed bill.

CULTURE—Same as for common turnip, but if anything, less exacting in care.

Germain **IMPROVED YELLOW PURPLE-TOP.** The old, popular standard sort both for stock feeding and table use; flesh yellow, solid and sweet. Pkt. 10 cents, ounce 20 cents, ¼ pound 45 cents, 1 pound \$1.25.

SILOS, SILAGE AND ENSILAGE CORN

EUREKA ENSILAGE

Eureka Ensilage corn is without a doubt the heaviest yielding ensilage corn adapted to California climatic conditions. It grows to an average height of 14 feet, has very leafy stocks bearing one to three ears to the stock, and has established a record of an average production of 30 to 35 tons per acre. This when cut and put in the silo furnishes a feed that is very succulent and of the highest feeding value and is relished by all kinds of stock.

Our seed stock of Eureka Ensilage corn for this season is of exceptionally fine quality and selected for size uniformity for both ear and kernel.

Price per pound 25 cents, 10 pounds \$2.00, postpaid. Write for quantity prices.

ORANGE COUNTY PROLIFIC

Orange County Prolific is a California product of the white dent variety. It is also an exceptionally heavy yielder and highly recommended for ensilage purposes. We consider it next on the list following Eureka ensilage corn. What we have said regarding the selection of our seed stock for Eureka corn also applies to this variety.

Price per pound 25 cents, 10 pounds \$2.00, postpaid. Write for quantity prices.

BIG JIM CORN

An excellent ensilage corn... For description and prices, see page fifty-three,

GROWING CORN FOR THE SILO

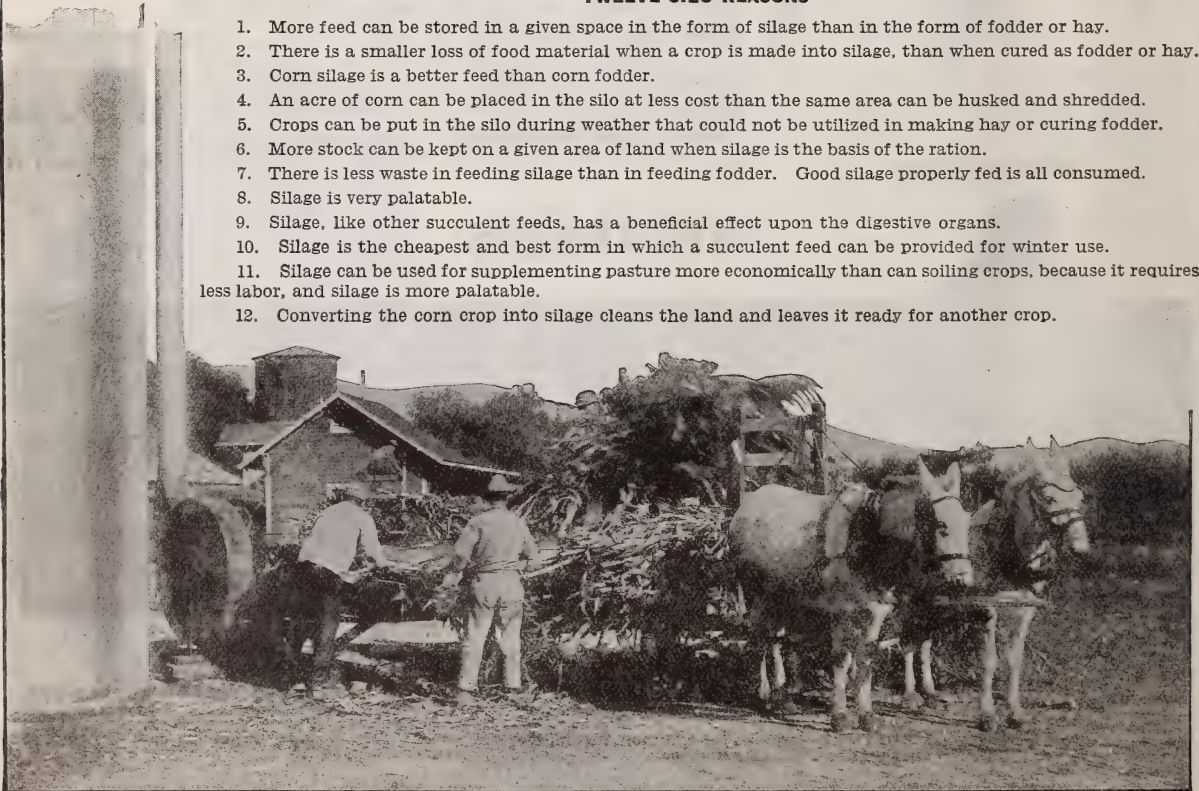

CULTURE. Generally speaking the seed should be sown in drills $3\frac{1}{2}$ feet apart using 15 to 30 pounds of seed per acre, the amount planted depending upon the purpose for which the silage is to be used.

Whenever less grain and more bulk is desired, more seed may be planted to the acre, giving a greater amount of leaf and stalk but less ear corn. For fattening beef cattle the opposite is true; the more ears produced the greater the fattening properties, and for that reason less seed should be sown per acre, giving it a better opportunity to mature. In either case the tonnage per acre will be the same. In the one case there will be more leaf and stalk and less ears and in the other instance the opposite, less stalk and leaf but more grain.

Also, by the use of these varieties, if the grower wishes, it may be cut at an early stage of its growth and used as fodder. Later it may be put in the silo in any desired stage and if the season promises to be long enough it may be allowed to ripen for corn if this be decided upon.

TWELVE SILO REASONS

1. More feed can be stored in a given space in the form of silage than in the form of fodder or hay.
2. There is a smaller loss of food material when a crop is made into silage, than when cured as fodder or hay.
3. Corn silage is a better feed than corn fodder.
4. An acre of corn can be placed in the silo at less cost than the same area can be husked and shredded.
5. Crops can be put in the silo during weather that could not be utilized in making hay or curing fodder.
6. More stock can be kept on a given area of land when silage is the basis of the ration.
7. There is less waste in feeding silage than in feeding fodder. Good silage properly fed is all consumed.
8. Silage is very palatable.
9. Silage, like other succulent feeds, has a beneficial effect upon the digestive organs.
10. Silage is the cheapest and best form in which a succulent feed can be provided for winter use.
11. Silage can be used for supplementing pasture more economically than can soiling crops, because it requires less labor, and silage is more palatable.
12. Converting the corn crop into silage cleans the land and leaves it ready for another crop.

BIG JIM CORN

Germain's Big Jim Corn has fulfilled our highest expectations. It has proven to be the greatest corn ever introduced in the Southwest. It has met with unanimous approval as is evidenced by the hundreds of testimonials that we are receiving—testimonials from men who have grown corn for years in the corn belt states. They say they have never seen anything to equal it. It has outyielded every other variety grown, some of the yields running as high as 100 bushels per acre. The ears of Big Jim Corn, usually borne two on each stalk, average from 10 to 14 inches in length and 8 inches in circumference. The kernels are a rich yellow and very large. The cob is proportionately small. The stalks attain an enormous height, bearing an abundance of large leaves.

For Ensilage

Big Jim Corn produces such an enormous growth of stalks and leaves that we are convinced that it is unsurpassed as an ensilage corn. It is not uncommon for Big Jim to produce from 35 to 40 tons of green corn per acre when sown thickly enough. Furthermore, the feeding value of this silage is greatly increased by the heavy yield of grain. Big Jim Corn for silage will insure the grower the greatest possible returns per acre.

Seed Selection

Special attention has been given to the improving of our Big Jim Corn. Only the best seed stock of this variety is planted, seed that came from perfect ears and high producing fields. The fields are given the most careful attention, they are regularly inspected by our corn experts, and the work carried out under their direction. The corn is carefully suckered, and any smutty stocks are quickly eliminated. The perfect ears, selected for seed, are dried on the cob, after which they are butted and tipped and shelled. The shelled corn is then carefully hand picked and put up in sacks for delivery. Every sack of Germain's Big Jim Corn, whether purchased direct from us or through one of our dealers, will have a red certificate of quality attached. None is genuine without this tag. While this work is somewhat expensive, adding slightly to the cost of the seed, the increased yield resulting more than offsets the increased cost.

1 lb., postpaid \$.30 10 lbs., postpaid \$2.50

Write for prices in larger quantities

CORN

WRITE US FOR QUANTITY PRICES ON FIELD SEEDS. ALL PRICES MENTIONED ON THIS PAGE ARE POSTPAID

NOTE—Prices up to and including ten lb. lots include postage or expressage prepaid. When sent otherwise, deduct 10 cents per lb. or fraction thereof. Prices listed for larger quantities, if desired sent by Parcel Post, necessary postage should be added. See our Parcel Post Schedule on inside back cover page. **If quantities are desired, do not fail to write for samples and special prices, as all field seeds are subject to market fluctuations.**

CULTURE. Good crops can be obtained on a variety of soils varying from the lighter sandy loams to heavy clay. When a choice can be had a warm, porous, well drained loam should be chosen.

Thin soil should be plowed shallow. On good soils depth of plowing seems to have little influence on the crop, plowing 5 to 7 inches deep is usual and is recommended.

Sub-soiling for corn is not a profitable practice. Corn should be cultivated about once every week or ten days, especially after every rain or irrigation. Begin soon after the seed is sown and continue to cultivate until the stalks are nearly as high as a man's head. The essential thing in corn cultivation is to keep the ground free from weeds and covered with a soil mulch. Remember that shallow cultivation should be practiced.

The time of planting corn, with us, should be immediately after danger of frost is over and the earlier thereafter the better.

From 2 to 3 inches is considered the best depth to plant corn. It should be planted in rows 3 to 4 feet apart with the seed from 9 to 16 inches apart in the rows depending on the variety.

CORN—FIELD

CHAMPION WHITE PEARL. This stalk is short and thick. The ear grows low on the stalk, from seven to twelve inches in length, almost parallel throughout, of medium size, averaging sixteen rows of grain. 1 pound 25 cents, 10 pounds \$2.00.

EARLY MASTODON. The largest yellow corn grown with the exception of Big Jim Corn. It has been known to yield over 200 bushels to the acre. The ears are even in size, cob small, with deep yellow grains. A vigorous grower and sure to give satisfaction; 1 pound 25 cents, 10 pounds \$2.00.

HICKORY KING, White. This corn is entirely distinct from all other varieties, having the largest grain with the smallest cob ever introduced in a white corn; 1 pound 25 cents, 10 pounds \$2.00.

IMPROVED LEAMING CORN, Yellow. 1 pound 25 cents, 10 pounds \$2.00.

IOWA GOLD MINE, Yellow. 1 pound 25 cents, 10 pounds \$2.00.

IOWA SILVER MINE, White. 1 pound 25 cents, 10 pounds \$2.00.

KING OF THE EARLIES. This is one of the very earliest of the Yellow Dent varieties.

It is a good yielder but not to be compared with Big Jim Corn. 1 pound 25 cents, 10 pounds \$2.00.

KING PHILIP, Yellow. This is a hard yellow flint corn and is generally referred to as ninety-day corn. It is drought resisting and will give a fair yield where most corns are a failure. 1 pound 25 cents, 10 pounds \$2.00.

MEXICAN JUNE CORN, White. Very early and hardy, stalks grow to an average height of 7 or 8 feet and produces 30 to 60 bushels of corn per acre. This corn is also used for roasting purposes in many sections of California. 1 pound 25 cents, 10 pounds \$2.00.

WISCONSIN WHITE DENT; 1 pound 25 cents, 10 pounds \$2.00.

CORN—POP See Page 35

GERMAIN'S FANCY DWARF MILO MAIZE

HAND SELECTED

The greatest improvement in Milo Maize in years. Germain's select strain of Fancy Dwarf Milo. An entirely different type, never attaining a height of more than three ft., the stalks being one mass of leaves overlapping each other, and outyielding the ordinary Dwarf Milo 2 to 1.

This wonderful strain of Dwarf Milo originated in the Salt River Valley of Arizona. It has been grown in the Imperial Valley for the past two seasons, where it has outyielded every other grain sorghum. It is also drought resisting to the last degree. According to statistics the average yield of Dwarf Milo Maize in the Imperial Valley is one-half ton per acre. Germain's Fancy Dwarf Milo last season gave an average yield of from 1¾ to 2 tons of grain per acre. The stalks never grow more than 3 ft. high. The plant is one mass of leaves which overlap one another. In fact, the stalk can scarcely be seen at all. This is an important point, for after the grain is harvested cattle will eat every bit of the plant down to the roots. This strain of Milo is very easy to harvest, the heads standing at a uniform height from the ground.

Our seed stock this year has been grown in both the San Joaquin and Imperial Valleys, thus enabling our customers to obtain seed acclimated in both sections. The fields from which our seed were selected from this season were hand thinned, only the largest heads being allowed to remain on each stalk. This insures only the very choicest seed.

Fancy Dwarf Milo can be grown successfully either under irrigation or under the dry farming method. When the dry farming method is followed it can be grown with as little as 6 inches of rainfall, providing the same is properly conserved during the winter months. It is generally planted in rows 3 ft. apart and the stalks thinned to stand 6 to 12 inches apart in the row, depending on whether irrigated or dry farmed, and also upon the nature of the soil.

READ WHAT ONE OF OUR CUSTOMERS SAYS ABOUT IT

Sirs:—

This is the second year I have grown the Arvin Brand of Dwarf Milo Maize and in future will plant no other. For large, firm, well filled heads it is unexcelled. My average yield in 1921 was 3 tons per acre, and from the appearance of my fields at this writing and from the opinion of old growers of the crop, who have seen it, I will exceed that figure this year. I planted from 20th to 25th of April. It will be ready to harvest by Sept. 20th

SUDAN GRASS—THE WONDER CROP

The Crop That Has Stood the Test of Time

WRITE FOR QUANTITY PRICES

No introduction in some years has had the marvelous success that has been attained by Sudan Grass. In 1915 when it first came into notice, we sold seed on the basis of \$2.50 per pound. Since then its popularity has increased by leaps and bounds until today it ranks next to alfalfa as a forage crop in this state.

Write for special pamphlet on Sudan Grass.

Price ½ pound 20 cents, one pound 30 cents, 10 pounds \$2.50, postpaid. Write for price in larger quantities.

The farmer who has never grown Sudan Grass can hardly appreciate the merits of this wonderful crop. It is being heralded from the western to the eastern, and from the northern to the southern boundaries of the United States as the

most drought resisting annual ever introduced.

Sudan Grass has long passed the experimental state. It has come to stay. It is of special value in the arid and semi-arid sections of California. It grows in a wide range of soils from sand to clay and produces from four to six cuttings of highly nutritious hay where other crops would be a failure, and as a pasture crop it is unequaled.

The photograph shows Mr. Waite, Horticultural Commissioner of Imperial County, standing between two stalks of our Imperial Valley grown Sudan Grass. The height of growth can be gauged by comparison with his figure and also by noting stalks as compared with height of automobile at the right.

CLOVER SEEDS

Inoculate this
Seed with
FARMOGERM

(QUANTITY PRICES AND SAMPLES ON REQUEST)

HUBAM CLOVER

We have obtained a very limited supply of this new Annual White Blossom Sweet Clover. We believe the discovery of this plant is to be a great factor in the improvement of our soils. It was discovered in 1916 by H. D. Hughes of the Iowa State College and since that time has made wonderful strides. We are as yet not prepared to say that it will supplant other forage and cover crops used in California. But we do feel that the discovery is important enough to warrant experimental work being done in this section. Hubam is a very heavy yielder, very drought resistant, and furnishes a good quality crop for hay or cover crop purposes.

Three pounds of seed will plant an acre of land and give maximum returns. In 1916 at the Iowa Experiment Station, Hubam made the remarkable growth of 4½ feet in 3½ months from seeding, while in 1920 the clover grew 9 feet in the same period. Its drought resistant qualities are remarkable. In one instance, without irrigation and with less than one inch of rainfall after seeding, it grew to a height of 7 feet. Hubam is a very heavy seed yielder also, producing as high as ten bushels per acre.

Price per pound, .60c; 10 lb. lots \$5.00, Postpaid.

INCREASE YOUR TONNAGE. Expense, time and labor is the same whether your crop be large or small. At a cost of only \$1.00 per acre you can get a fifty per cent. larger tonnage (in clover crops) by inoculating your seed, which we strongly advise. For particulars, see page 57.

ALSIKE (*Trifolium hybridum*). Very hardy, resisting cold and drought and is also well adapted for sowing on cold wetland. It yields a large amount of hay or pasture and makes a good bee plant; 50 cents per pound, 10 lbs. \$4.50, postpaid.

BURR CLOVER. Strongly resembling alfalfa. It is a great nitrogen-gatherer. Orchardists regard it with great favor as a green fertilizer, thriving in shady places where peas fail. Hulled, solid seed, free from burr. Fifteen pounds per acre. Per lb. 50 cents, 10 lbs. \$4.50.

MELILOTUS ALBA

Melilotus Alba Clover has for the past few years been recognized as one of the leading summer cover crops, especially in orange and lemon groves, but today hundreds of tons of Melilotus Alba Clover Seed are being sown in California as a general soil renovator. The large Beet Sugar Companies of the State are using it to reclaim their alkali soils so as to put the land in shape for further plantings of sugar beets. Melilotus Alba White Blossom Sweet Clover is a biennial and therefore lives only two years. It stands excessive moisture and also extreme drought. The flowers of the plant furnish excellent food for the bees and the plant itself furnishes excellent pasturage for all kinds of live stock. It will grow on any kind of soil, from light sandy soil to heavy clay soil, and when once established requires very little water, in fact in some of the foothill sections of California the plant grows wild, reseeding itself every two years and depending entirely on the annual rainfall for its growth. In California the seed is generally sown in the Fall of the year for the first rains, using on an average of 20 pounds of seed per acre. The seed can be sown with a nurse crop of grain or alone. The seeds should be covered very lightly in a well prepared seed bed for best results.

Prices: Per lb., 40c; 10-lb. lots, \$3.50, postpaid. Write for prices in larger quantities.

JAPANESE (*Lespedeza striata*). Makes a fine pasture plant for barren land, where it will grow eighteen inches high; on good soil it grows thirty inches. Stock of all kinds relish it. 70 cents per pound, 10 pounds \$6.50, postpaid.

MAMMOTH RED, OR COW GRASS (*Trifolium pratense* perenne). Very vigorous grower. 60 cents per pound, 10 pounds \$5.00, postpaid.

MELILOTUS INDICA (Sweet Clover). See page 58.

RED CLOVER (*Trifolium pratense*). Should be in all pasture mixtures; per lb. 60 cents, 10 lbs. \$5.00, postpaid.

WHITE CLOVER (*Trifolium repens*). See page 14. Pound \$1.00, 10 pounds \$9.00, postpaid.

SORGHUMS, SACCHARINES AND NON-SACCHARINES

WRITE US FOR QUANTITY PRICES AND SAMPLES OF FIELD SEEDS

EARLY AMBER. Furnishes a large yield of most nutritive forage, which can be fed either green or cured and will yield two or three cuttings a year, stooling out thicker each time it is cut. It grows ten to twelve feet high. Sow broadcast for forage at the rate of 60 pounds per acre. When sown in drills, sow at the rate of 10 pounds per acre in drills three and a half to four feet apart. Per pound 25 cents, 10 pounds \$2.00, postpaid.

HONEY SORGHUM is the prize variety without a doubt. We have seen it growing in Imperial Valley, San Diego County, San Joaquin Valley, and in the vicinity of Los Angeles. All growers every year are loud in its praise.

HONEY SORGHUM is a selection from one of the earliest introductions, and has been regarded with special favor for ensilage and for syrup purposes. It is the best variety for silage purposes, slender leafy stalks, varying in height from eight to twelve feet. It is medium, late maturing and has decidedly tender stalks, and is important from a forage standpoint.

Imagine an average of twenty-seven tons or over per acre.

The method of seeding will be determined largely by the purpose for which they are grown. When the crop is to be used for fodder or silage, it is usually planted in rows 3 to 3 feet apart, using up to 4 pounds of seed per acre.

Price per lb. 25c, 10-lb. lots \$2.00, postpaid. Write for special prices in larger quantities.

ORANGE SORGHUM. In habit of growth it is very similar to Early Amber Sorghum, but does not stool quite so closely nor does it grow quite so thickly. Per pound 25 cents, 10 lbs. \$2.00, postpaid.

SILVER TIP. Some manufacturers of Sorghum syrup prefer this variety to others for this purpose. On account of the fact that it is later in maturing than other varieties it is only possible to use the first cutting for syrup. However, succeeding cuttings can be used for pasturage or ensilage. Per lb. 25c, 10 lbs. \$2.00, postpaid.

DWARF MILO MAIZE. See page 54.

EGYPTIAN CORN. This is also one of the drought resisting non-saccharine crops. The grain is produced in large compact

heads and the seed is flat and pure white. The picture at the top of this page is that of 100 acres of Egyptian Corn from which our seed was selected this season. This seed is used very extensively as a chicken feed and also ground into flour which is used for edible purposes. Per pound 25 cents, 10 pounds \$2.00, postpaid.

FETERITA. This sorghum was recently secured from Sudan, where it is commonly grown under the name Feterita, an early maturing plant valued both for grain and forage. It resembles Milo in habit, except that the heads are uniformly erect, seeds bluish white in color. In drought resistance it compares favorably with any sorghum yet introduced. Sow 8 pounds to the acre. Pound 25 cents, 10 pounds \$2.00, postpaid.

SHALLU OR EGYPTIAN WHEAT. Is one of the most drought resisting grain crops known. Especially suited to dry land farming operations and localities where the normal rainfall is limited. Under irrigated conditions it grows to best advantage. The grain is claimed to possess all the feeding values of wheat, and is especially valuable as a feed for hogs, chickens and cattle. Pound 25 cents, 10 pounds \$2.00, postpaid.

KAFFIR, WHITE. Unsurpassed for dry alkali land, on which no better fodder and grain crop grows. A prolific member of the sorghum family, having more foliage and smaller stalks than the other varieties, and harvested very easily. Its great root system enables it to produce wonderfully in drought sections and breaks up new ground for other crops. Cattle relish the stalks, while the grain is a very valuable food for poultry. Pound 25 cents, 10 pounds \$2.00, postpaid.

HAGARI. This is one of the most recent introductions. Some experiments have been made on this crop in Arizona and it is claimed that it is a little sweeter than Kafir Corn or Feterita. The seed is round and white and does not shatter very readily. The heads grow very erect. It is drought resisting and stands some alkali. Per pound 25 cents, 10 pounds \$2.00, postpaid.

SUDAN GRASS. See page 55.

Look for this trade-mark of
QUALITY on every bag

Sold only in sealed bags and labeled with the above brand

PRODUCES 2½ TONS MORE HAY TO THE ACRE

This wonderful variety of alfalfa has taken the place of all other varieties in the States of California, Arizona, Nevada, Oregon and Washington. This is the plant that has created a big sensation among alfalfa growers. **Germain's Golden West Brand Hairy Peruvian Alfalfa** is the hardiest type ever introduced here successfully and has the longest producing season. It produces a greater abundance of leaves than any other variety, thus creating the highest feeding value. Results obtained by practical ranchers show an average increase of 2½ tons of hay per acre per season over common varieties. After each cutting it recovers very quickly, giving additional cuttings per season over other varieties. We successfully introduced this seed in this section—and we stand solidly back of it. All our seed is sold in sealed and labeled bags with the name Germain's Golden West Brand Hairy Peruvian Alfalfa—and in order to insure perfect results we advise you to buy only the proven Germain variety.

Prices, per lb. 40c; 10 lbs. \$3.50, postpaid. Write for quantity prices.

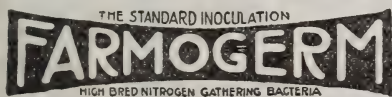

SMOOTH PERUVIAN ALFALFA

This variety of alfalfa is next to Hairy Peruvian in production and quality. Our stock of this seed is also especially selected re-cleaned and of the highest quality. Per lb., 40c; 10 lb. lots, \$3.50 postpaid. Write for quantity prices.

CHILIAN ALFALFA

This is the old type of alfalfa seed used extensively before the introduction of the Hairy Peruvian. We furnish only re-cleaned seed of high germination properties and can assure you that it is the best on the market. As it leaves our plant after being re-cleaned several times, you will find it free from foreign matter, and of high quality. Prices per pound, 40c; 10 pounds, \$3.50, postpaid. Write for quantity prices.

Write our alfalfa and field seed expert for any information on the seeds listed on this page. He is at all times ready and anxious to answer your questions. We have also some pamphlets on alfalfa and other crops which are of decided help. Write for them. They are free.

A Seed Inoculant that Increases Crop Production

Seeds of all legumes—beans, peas, clover, alfalfa, and related crops—will produce far better if inoculated with **Farmogerm**. In addition to the increased crops, these legumes leave in the soil a heavy deposit of nitrogen which benefits all succeeding crops. Gardeners and farmers who have used **Farmogerm** would not be without it.

No other inoculant on the market is so strong and virile; no other inoculant will thoroughly inoculate as much seed. The one-acre size bottle of **Farmogerm** is sufficient for 15 pounds of clover, 20 pounds of alfalfa, 100 pounds of Canada field peas, 60 pounds of vetch, etc. A different culture is required for each crop. Be sure to state what crops you wish to inoculate.

A special composite culture is prepared for peas, beans, and sweet peas, ¼-acre size only. You'll get more peas and beans, and larger sweet peas by using this. Ask for No. 5, price 50 cents.

Farmogerm prices are: 1-acre size, \$1; 3-acre size, \$2.50; 12-acre size, \$9. Full directions accompany each bottle.

Use Farmogerm [57] for Alfalfa

COVER CROP OR SOIL RENOVATORS

WRITE FOR QUANTITY PRICES

Note.—Prices on half pound and up to and including ten pound quantities include postage or expressage prepaid. When sent otherwise, deduct 10 cents per pound or fraction thereof. Prices listed for larger quantities, if desired, sent by Parcel Post, necessary postage should be added. See our Parcel Post schedule on inside back cover page.

CANADIAN PEAS

This small round smooth yellow Pea is generally grown for cover crop purposes in this section. Per lb 25 cents, 10 lbs. \$2.00.

WHIPPOWILL COW PEAS

Cow Peas are becoming more popular as the years come around. We predicted sometime ago that California would become a great user of Cow Peas and the time is now coming for this prediction to come true. The planting of Cow Peas for a Summer or early Spring cover crop is going to become more popular every year, and this variety is the best adapted for that purpose. The vines are large and spreading and if planted correctly will cover the entire ground of the orchard, which is so much desired by the orchardists.

This variety is especially recommended for its quick growing habits and therefore, is an ideal variety as a cover crop to counteract the June drought. Per pound 25 cents, 10 lbs. \$2.00.

MAMMOTH YELLOW SOY BEANS

This is another variety of early Spring or Summer cover crop seed which is also quite popular. They do not cover the ground as well as the Whippowill Cow Peas. However, as a nitrogen gathering plant they are hard to surpass and we strongly recommend them if you desire to obtain nitrogen for your soil. For years the Soy Beans used in California have been imported from Japan and has been inferior seed. We are offering this year the Mammoth Yellow Soy Bean which is far superior to all other varieties and will run true. 25 cents per pound, 10 lbs. \$2.00.

BLACK EYE BEANS (See page 59)

BRABHAM COW PEAS

This is a very popular variety of a soil renovator in the South. It is bound to become a favorite here. It should be planted the same as any variety of Cow Pea. 25 cents per pound, 10 lbs. \$2.00.

SMALL WINDSOR (New Zealand Horse Bean)

Analogous to the Broad Windsor variety, only smaller in size, but will yield the same amount of foliage. Pound 25 cents, 10 lbs. \$2.00.

RYE (See page 60)

BARLEY (See page 60)

GRASSES

The following varieties of Grass Seeds are those used in this section of the country. However, there are, from time to time various new varieties, and also there is a desire by many of our customers to try out new sorts. If you do not find listed herein the variety you are especially interested in and you desire information concerning some unlisted varieties, write us, and we will be glad to give you what information we have on it, and if you desire the seed, we will obtain it for you. We have experts with us who understand Grass Seeds and we are, therefore in a position to advise with you.

BERMUDA GRASS (*Cynodon Dactylon*). Suitable only for climates where the winters are not below the freezing point. It stands the hottest and driest season. Sow six pounds per acre. Pound 50 cents, 10 lbs. \$4.50.

KENTUCKY BLUE GRASS (*Poa Pratensis*). One of the best grasses for permanent pasture, furnishing a constant supply of the most nutritious feed during the greater part of the year. Sow 28 pounds per acre. For prices, see page 14.

CRESTED DOGS TAIL (*Cynosurus Cristatus*). A perennial grass with short, narrow leaves; valuable for lawns or pastures on dry, light land. Pound 75 cents.

CREeping BENT GRASS (*Agrostis Stoloniifera*). Well adapted for sandy pastures near the coast, and good for pasture on low lands. If sown alone, use 25 pounds per acre. Excellent for lawns. Use 12 to 15 pounds per 50-foot. Pound \$3.00.

ITALIAN RYE (*Lolium Italicum*). A quick-growing grass, attaining a height of 2½ to 4 feet; very desirable for temporary meadows or pastures. Thrives best on soils that are slightly moist, and will even stand considerable overflow. Grows easily and bears an abundance of foliage that makes the best and sweetest hay imaginable. Sow 40 pounds per acre. Pound 35 cents, 10 lbs. \$3.00.

AUSTRALIAN RYE GRASS (*Lolium Perenne*). A strong growing, hardy perennial grass, noted for its nutritive qualities. Is equally valuable for both grazing and hay. Forty pounds per acre.

For Lawns this is used and recommended by many gardeners. If sown thickly it makes a fine lawn, and for large grounds and parks it is very successful. Pound 35 cents, 10 pounds \$3.00, postpaid.

PACIFIC RYE GRASS. Used for lawn mixtures, also valuable as a green forage plant for growing on lands not easily cultivated. Per pound 35 cents, 10 lbs. \$3.00.

RED TOP (*Agrostis Vulgaris*). A good perennial grass. Generally sown for permanent pastures. Does best on moist or even marshy land. If the ground is not overflow land mix with Meadow Fescue, Orchard Grass or Alsike Clover. Sow 14 pounds hulled. Pound 50 cents, 10 lbs. \$4.50.

CHEWING FESCUE A most valuable grass for golf courses. Commonly used with clover and Red Top for pasture. Pound 60c; 10 pounds \$5.50 Postpaid.

FENUGREEK

In the past this was one of the most popular varieties of cover crop seed, but it has lately, become more or less obsolete, due to the advantages of the other crops over it.

VETCH (Spring)

This is the variety used by the Orchardists in Southern California as a cover crop, and large quantities are handled by us. The name "Spring" as applied to this sort is misleading, for it should be planted in the Fall to obtain the best results. The best time to plant is from the first of August to the first of January. Per lb. 25 cents, 10 lbs. \$2.00.

MELILOTUS INDICA

The most popular Cover Crop in Southern California. We handle hundreds of tons of it, and due to our new facilities for re-cleaning and scarifying this seed we are enabled to offer a quality of seed that is far superior to that which is ordinarily sold through out the country. We have tested out hundreds of samples, this year of different lots that have been sold in this section. One cannot tell by the appearance of this seed as to whether or not it is of good germination. The seed may look extra fancy and still may be of poor germination. We have made a study of this seed and find that by putting it through a certain machine, that we can raise the germination twenty to twenty-five percent on the ordinary seed that is sold on the market. We have prided ourselves on the quality of this seed and this year none of our seed showed a lower germination than ninety percent, and a purity test of ninety-nine and one-half percent. Per pound 25 cents; 10 lbs. \$2.00.

HORSE BEANS

This is the Broad Windsor Bean which is being used as a cover crop and is becoming quite popular in this section. The seed is, about an inch to an inch and a half long, and about half as wide. They are flat in appearance. Per pound 25 cents, 10 lbs. \$2.00.

PURPLE VETCH

Since the introduction of this super cover-crop nearly five years ago, the supply of seed has never been sufficient to warrant its introduction to the ranchers. We would advise that all interested in this wonderful cover-crop place their orders at once for future delivery. It makes the heaviest growth of any leguminous cover-crop known and contains more pounds of nitrogen per ton of green manure than any other cover-crop. It makes the quickest growth of any cover crop and can be planted later than any other cover crop. **Purple Vetch will practically do as much good in one year as any other crop can in two years.** Price per lb. 25 cents, 10 lbs. \$2.00.

FESCUE RED (*Festuca Rubra*). Forms a close rich sod, thrives well in dry, sandy and acid soils. Roots creep extensively. Valuable in lawns and should be included in putting green mixtures. Pound 60 cents.

MEADOW FESCUE. A valuable species for permanent grass lands; relished by live stock both in hay and pasture. Per pound 50 cents, 10 lbs. \$4.50.

ORCHARD GRASS or COCKSFOOT (*Dactylis glomerata*). Valuable alone or mixed with other grasses. Very often mixed with white clover, red clover, and rye grass. Per lb. 50 cents, 10 lbs. \$4.50.

VARIOUS LEAVED FESCUE (*Festuca Heterophylla*). Grows 2 to 3 feet high, valuable for permanent meadows, either for mowing or grazing. It is especially valuable as a lawn grass for shady places. Pound 75 cents.

RHODES GRASS. An Australian grass which grows readily on sandy or light soils. Grows thickly producing from 5 to 10 tons of fine quality hay. It is very palatable to stock, easy eradicated when desired and very highly recommended by farmers who have grown it. 1 lb. 85 cents, 10 lbs. \$7.50.

RHODE ISLAND BENT (*Agrostis Canina*). Resembles Red Top. Makes a close sod valuable for permanent pastures and meadows. Twenty-eight; pounds per acre. For lawns, use 12 to 15 pounds per 50-foot lot. Gives good results. Pound \$3.00.

SWEET VERNAL (*Anthoxanthum Odoratissimum*). Valuable to put in pasture mixtures and lawn grass on account of its earliness. Twenty-eight pounds per acre, but this grass is recommended only for use in mixtures. Pound 85 cents.

TIMOTHY (*Phleum Pratense*). This is the most valuable of all grasses for hay. Thrives best on moist, loamy soil. Sow early in the spring or fall. Sow 15 to 20 pounds per acre. Pound 30 cents, 10 lbs. \$2.50.

WOOD MEADOW GRASS (*Poa Nemoralis*). As a lawn grass its creeping roots soon form a good turf. Of early growth and thriving well under trees where other grasses will not grow, most valuable lawn mixture, especially for shady places. Pound 85 cents.

AWNLESS BROME GRASS. (*Bromus Inermis*) withstands drought that kills other grasses. Unexcelled under such condition. Price, pound 60 cents, 10 lbs. \$5.50.

FIELD BEANS AND PEAS

WRITE FOR PRICES

We have itemized on this page, by cuts and descriptions, the most popular beans raised in districts west of the Rocky Mountains. Owing to the fact that most of these beans are planted in quantities, we have not stated any prices, as they are subject to fluctuation due to the influence of season and of conditions in the commercial market. You can always depend upon our field beans being of selected, true-type varieties; and we are in position to furnish any quantity when the season will permit us to lay in large stocks.

GARBANZA OR CHICK PEA. Grown very extensively in California, preferably in the drier sections. It stands almost as much cold weather as horse beans or cowpeas, and can be planted as late as June, which makes it practically an all year round crop. The majority of the crop is exported to Spain for edible purposes.

TEPARY BEAN. The most drought-resisting bean grown in California. Suitable for planting on dry soils and in dry seasons. Very sensitive to cool climate and excessive moisture. Matures in ninety days, and by careful management two crops can be raised on the same soil in one year.

SMALL WHITE BEAN (NAVY). This is grown extensively on truck soils. It is especially adapted to coastal valleys as the intense heat of the interior valleys is somewhat detrimental to its growth.

LADY WASHINGTON. Commonly known as Large White bean. It might be known as an all round bean, especially adapted to bottom lands, and where moisture is easily obtained. It is also freer from attacks of mildew than the other common varieties of beans.

PINK BEAN. Very common variety. Will grow almost anywhere, provided it has plenty of moisture. It is more particularly adapted to bottom lands. Will also withstand very hot weather, and ripens early in the season.

RED MEXICAN. Grows like the Mexican Pink bean, but is a much heavier yielder under extreme heat, and for that reason is gradually replacing the pink variety.

SPOTTED RED MEXICAN OR PINTO. (With the exception that the spots are red instead of brown, as in the Colorado and New Mexico Pinto bean). It is grown very extensively in California and Arizona.

CRANBERRY. Will grow under almost every condition that the pink bean will stand. Is raised more extensively on river bottom land. Hot moist climate.

FRENCH WHITE. Resembles very closely the Lady Washington, but does not produce a trailing vine, and has a much larger bush. Also ripens earlier in the season than the ordinary small white bean. It is gaining favor each year.

LEWISMA. Commonly known as the Ventura Lima. Used for commercial purposes, and is grown on all land which is subject to heavy fogs, such as the Coast district.

BROAD WINDSOR (HORSE BEANS). A hardy winter crop, planted from October up to February and March, so that the harvest can not take place before the hot Summer months. Used extensively as a green manure cover crop in orchards. See cut.

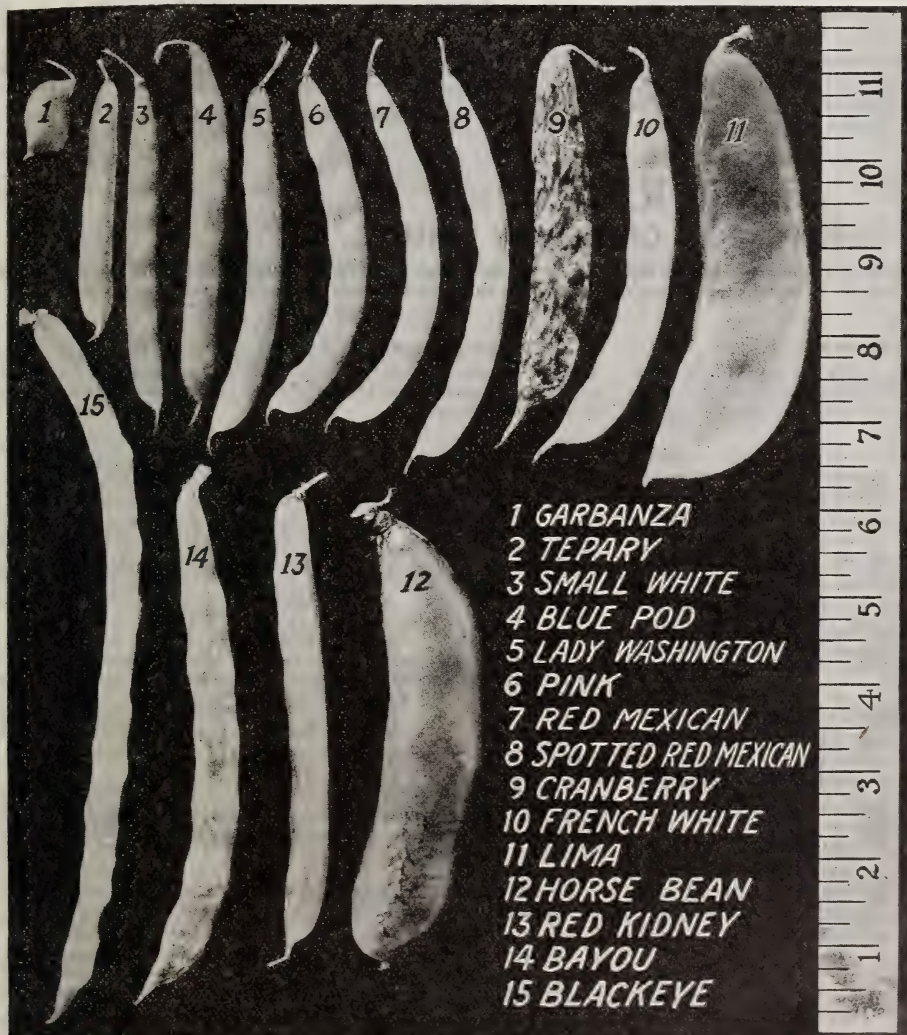

SMALL WINDSOR (NEW ZEALAND HORSE BEAN). Analogous to the Broad Windsor variety, only smaller in size, but will yield the same amount of foliage.

RED KIDNEY. Becoming very popular in the lower moist sections. Can be planted very early as it is a bush variety. The pods all grow so that they do not touch the ground, and therefore suffer a minimum of discoloration due to contact with the ground moisture. At harvest the leaves fall off, leaving the bean-pod exposed to the sun therefore curing very rapidly. May be planted in 18 to 24 inch rows and cultivated by hand. Splendid for table purposes; also becoming very extensively known commercially.

BAYOU. Rather difficult to raise except on river bottom land, and cannot be successfully forced by irrigation. Rather difficult to get to set properly, as it is somewhat susceptible to red spider pest.

BLACKEYE (COWPEA.) A dry land bean adapted to early planting in hot, dry districts. Matures too late on irrigated soil to be of advantage; also with excessive moisture it puts forth long runners which are very detrimental to quick harvesting. Very susceptible to cold weather, as the pods fail to set properly, and the plants are dwarfed. Grows splendidly on semi-alkali soil.

HENDERSON'S BUSH LIMA. This variety is commonly known as the Baby Lima, being very small; but is a particularly fancy bean for table use. Is very much in demand by the large hotels. It is unlike the large Lima bean in growth, as it can be raised on the interior dry sections and does not require the fog for moisture, as the large Lewis Field Lima variety.

WRITE FOR QUANTITY PRICES

STOCK BEETS

Stock Beets are one of the finest fat and milk-producing crops we have today and when fed in conjunction with grain they are worth nearly as much, pound for pound, as the grain itself. This statement may seem a little strong, but experience has shown that Stock Beets aid digestion and assimilation by keeping the animals in extra good condition. By feeding the same in conjunction with grains it increases the feeding value of the grains.

CULTURE

Stock Beet seed should be sown about one-inch deep, in well-cultivated soil in drills eighteen inches to three feet apart (depending upon the method of cultivation). When the plants are sufficiently large, thin out to stand ten to twelve inches apart in the rows. The seed is generally sown at the rate of eight to ten pounds per acre. Beet seed is very hard and does not germinate as easily as other seeds, therefore, the soil should be very moist at the time the seed is planted. If the soil should be dry it is advisable to soak the seed in lukewarm water for twenty-four hours before planting.

VARIETIES

German's Prize Mammoth Long Red

There is no other root crop grown which produces so large a tonnage per acre as the German's Prize Mammoth Long Red Beet. Our strain of Mammoth Long Red is exceptionally fine and expressly grown for our own trade from selected well-shaped roots.

This Beet has a distinct appearance; roots are massive, straight and uniform in size, broad shouldered, free from coarseness and of most excellent feeding and keeping qualities. Packets 10c, 1 lb. 60c, 10-lb. lots \$6.00, postpaid.

Giant Half Sugar Mangel

This variety is one of the favorites among the dairymen and hog raisers. It is very sweet and nutritious, as it has a larger sugar content than the ordinary mangel. It is a cross between a sugar beet and a regular mangel wurzel, therefore its name. It is also a splendid yielder and good keeper. Packet 10c, 1-lb. 60c., 10-lb. lots \$6.00, postpaid.

Golden Tankard

This is also a very popular variety. The roots are large, ovoid, but filled out at top and bottom, terminating with a small tap root; flesh deep golden yellow, solid, crisp, sweet and rich. Does not keep quite as well as the two above mentioned varieties. Packet 10c, 1-lb. 60c, 10-lb. lots \$6.00, postpaid.

Sludstrup

While this Beet is one of the favorites in Europe, its popularity in America is not to be compared with the Mammoth Long Red. The roots are very solid, large at the top and gradually tapering to a point. The part of the root growing above the ground has a greenish tinge, while the part growing in the ground is white. Packet 10c, 1-lb. 60c, 10-lb. lots \$6.00, postpaid.

SUGAR BEETS

This is a variety that can be planted for stock food purposes. The tonnage per acre will not be as great as above mentioned varieties, but the sugar content will be much higher. Packet 10c, 1-lb. 60c, 10-lb. lots \$6.00, postpaid.

STOCK CARROTS

It is a well known fact that Carrots are mighty good farm food and analyses made by a National Chemist showed the Carrot content as follows:

Albuminous Compounds.....	.7
Fat.....	.2
Pectine.....	1.2
Cellular Fiber.....	3.5
Sugar.....	6.5
Ash.....	.9
Water.....	87.0

For description and prices of the varieties we refer you to page 29. The varieties we recommend are White Belgian and Yellow Belgian.

ARTICHOKE (JERUSALEM)

See page 61.

GRAINS

WRITE FOR QUANTITY PRICES

To rid your grain crops of smut and rust, we recommend dipping your seed in a weak solution of "Blue Stone." The dilution is one pound of Bluestone to five gallons of water. Soak the seed for ten minutes. The same solution can be used over and over again.

BARLEY

Sow 65 to 100 lbs. to the acre

HULLESS OR BALD. This grain is sown about the same as wheat, in the fall of the year. The Hulless or Bald sort thrashes entirely clear of the hull, and is therefore a very valuable grain for the feeding of stock and poultry.

BEARDLESS. We have a perfect strain of this variety, produced from a single head of superlative type. The present crop is the sixth successive re-production from the original planting from the selected head, and is now producing perfectly without a single head of bearded type.

COMMON. This seed is selected from good, average-weight grain, free from foreign grain and weed seeds.

MARIOUT. This variety of barley is one that has just been introduced by the University of California after experiments conducted at their experiment station. It yields more prolifically than any other variety which has ever been tried on California soils. It is sown the same as other barleys.

BUCKWHEAT

JAPANESE. The most prolific variety with large grains, brown to dark brown in color. Sow after danger of frost is over either in drill or broadcast. The plant ripens early and stands well in the field. Price per pound 25 cents, 10 lbs. \$2.00.

OATS

RED RUST-PROOF, Texas grown. This seed is from selected Texas stock, thoroughly re-cleaned, giving you a higher percentage of plump oats than you can ordinarily buy from the mills. It is all graded according to the State standards of Texas, and we are so situated that we obtain the best seed which that great State is able to produce.

RED RUST-PROOF, California grown. These are the Texas oats after they have been grown in California two years, thoroughly acclimated, somewhat lighter in color than the Texas-grown, but in every way satisfactory for re-planting in California.

RYE

COMMON OR WINTER. Our seed is obtained from Utah fields, as this produces better in California than that which has been grown here, and yields larger kernels. It is used extensively for cover crop purposes.

SPELTZ

SPELTZ OR EMMER. This is of the same family as wheat. For semi-arid regions this species is very hardy and drought-resisting. It is valuable for stock feeding, both as grain and forage, and produces well on soils of poor character and little moisture. It is sown here in the fall or winter, in the same manner as wheat and barley.

WHEAT

It is not good practice to grow many different varieties and we have therefore selected only those most successfully grown in this section.

DEFIANCE. A rust-proof variety, a heavy yielder, hard and splendid for milling purposes; large heads, plump kernels.

SONORA. A popular variety in California, especially in the southern counties; matures early and yields heavily; will stand more drought than most; soft; suitable for blending in the manufacture of flour.

TURKEY RED. A hard red wheat, very high in gluten, valued for milling purposes.

EARLY BAART. This is a bearded variety of spring wheat, large white grain, of exceptional milling quality; will average two or three weeks ahead of ordinary sorts of white wheat; and produces a larger crop. Was planted extensively last season, and is continually increasing in popularity.

MISCELLANEOUS FARM SEEDS

(QUANTITY PRICES AND SAMPLES ON REQUEST)

 **Note.**—Prices on half pound and up to and including ten pound quantities include postage or express prepaid. When sent otherwise deduct 10 cents per pound or fraction thereof. Prices listed for larger quantities, desired sent by Parcel Post, necessary postage should be added. See Parcel Post Schedule on inside back cover page.

ALFILARIA

ALFILARIA (*Erodium cicutarium*). One of the most nutritious of plants; cattle, sheep, horses and hogs alike prefer it to any other natural product of the plains. Sow twenty pounds to the acre. Pound 85c, 10 lbs. \$7.50.

ARTICHOKE

ARTICHOKE, JERUSALEM (roots). The greatest hog food known, yielding over one thousand bushels to the acre. It can be grown without a great deal of cultivation and no harvesting is necessary. When the roots are full-grown, turn the hogs into the field and they will help themselves by rooting. We can supply the tubers from February until May. Per pound 25 cents.

BROOM CORN

STERLING DWARF. Per pound 30 cents, 10 lbs. \$2.50.

STANDARD TALL. Per pound 30 cents, 10 lbs. \$2.50.

COTTON

CULTIVATION.—Prepare the land by having it thoroughly ploughed. Lay off into rows about four feet apart; sow the seed along the center in a straight furrow made with a small plough or opener. It can also be sown in holes twelve to eighteen inches apart. Sow in March. The young shoot appears above ground in about ten days, and is subsequently weeded and thinned. Blooming takes place about the beginning of June. As a general rule cotton is a dry weather plant. For ploughing, the planter requires just sufficient moisture to give the soil a spongy texture. Give plenty of water in the early stages—but too much is productive of wood, at the expense of wool, and a severe drought will produce a stunted plant. From the blooming to the picking season, warm dry weather is essential.

DURANGO; 10 cents per ounce, 50 cents per pound.

EGYPTIAN. Originated in Egypt; erect and larger size than other cottons, producing an abundance of cotton; 10 cents per ounce, 50 cents per pound.

FLAX

FLAX. When grown for seed, plant forty pounds to the acre. One of the principal things to attend to when growing flax is to see that the ground is well cultivated. Price per pound 30 cents, 10 lbs. \$2.50.

LENTILS

LENTILS. Used for the table; growth and habits similar to the pea. Quite a favorite in California. Per pound 35 cents.

MILLET

LIBERTY OR GOLDEN (Formerly German). Few other grasses or forage plants have been able to produce the enormous yield of this plant; it has produced 4 to 5 tons of hay to the acre, and from 70 to 80 bushels of seed. It can be sown on newly broken ground in the spring, and as late as July leaves the ground in excellent condition for following crops. Pound 25 cents, 10 pounds \$2.00, postpaid.

PROSO MILLET (Hog Millet or Broom Corn Millet). Grown very extensively in Europe and Eastern Asia for food purposes. In America it is very commonly used for hog food. The culture is the same as for the Liberty Millet. Sow 70 lbs. to 80 lbs. to the acre. Pound 25 cents, 10 pounds \$2.00.

PEANUTS

Plant when weather is warm. A warm, porous, sandy soil, put into a good friable condition and freed from weeds, is most suitable. Remove the pods without injuring the kernel, and place contents in bags or baskets, a small quantity in each, where there is a free circulation of air, until needed for planting. Reject all shriveled kernels. It requires thirty-five pounds of peanuts in the hull to an acre. Plant in rows three feet apart and one foot apart in the row. Cultivate often and keep the ground loose, as after the blossoms drop, the peduncles enter the soil at the base and form the peanut.

VIRGINIA. The best variety for roasting; 35 cents per pound, 10 lbs. \$3.00.

SPANISH. In addition to their value for nuts, these are very largely used in the South as a forage and fattening crop for hogs and other stocks. They are early to mature, very productive, and in the far South, where they can be planted in April, two crops can be made in a year, the second crop being planted

early in July, the tops making a hay crop and the nuts a grain crop. In harvesting, the nuts hang to the vine and tops and nuts are fed together to hogs, cows and horses as a whole grain ration. Spanish Peanuts grow in more compact form than the Virginia Peanuts, making it possible to grow them closer, making the cultivation easier. 35 cents per pound, 10 lbs. \$3.00.

Bigger yields of Peanuts are obtained by Inoculation
Read page 57, it tells all about it.

RAPE

DWARF ESSEX. This crop is very highly recommended for pasturage for sheep and cattle, furnishing most rich and nutritious pasturage within six to eight weeks from the time of sowing. The fattening properties of Rape are said to be very much better than those of clover. It also makes splendid green feed for poultry. Rape is best sown in drills, at the rate of three to five pounds per acre, or it can be sown broadcast, when from six to eight pounds per acre should be used. Per pound 30 cents, 10 lbs. \$2.50.

SALT BUSH

AUSTRALIAN (*Atriplex semi-baccatum*). Will grow on alkaline soils. Much relished by stock, supplying the necessary salt. One pound of seed to the acre if sown broadcast; four ounces if transplanted. In cutting fodder be careful not to injure the crown of the plants. Ounce 15c, pound 85c, 10 lbs. \$7.50.

AUSTRALIAN "OLD MAN." A distinct species different from the *Atriplex semi-baccatum*. It succeeds on alkali land as well, and withstands drought. Plant in hills six feet apart each way, several seeds to a hill, thinning out the two strongest plants. Packet, 10 cents, ounce 30 cents, pound \$3.00.

SUNFLOWER

MAMMOTH RUSSIAN. Makes heads double the size of the common kind. The yield is enormous from this variety. It has produced as high as 125 bushels to the acre. Per pound 25 cents, 10 lbs. \$2.00.

TOBACCO

Tabaco Tabak Tabac

Cultivation of Tobacco is comparatively easy and a warm climate suits it best. The best time for starting the seed is January. Sow in seed beds of rich soil, and as the seed is extremely minute, it is first largely mixed with sand and wood ashes to assist in spreading it thinly. One ounce of seed will sow twenty-five feet square and produce plants for one acre. After the beds have been sown, cover the seed slightly and protect from light frosts. Remove covering as soon as can be done with safety, and the plants will then grow rapidly and are ready for transplanting about the first of June. Wet or foggy weather is the best for transplanting. The plants must be carefully raised from the seed bed and planted in the fields in rows three feet apart and leaving five feet between the rows. The crop needs much careful attention in weeding, and a watchful eye to prevent the ravages of various insect enemies. As soon as the plants begin to throw up the flower-shoot, it is clipped off; otherwise it would weaken the plant.

CONNECTICUT SEED LEAF. Grows to a height of about five feet, with leaves two and a half to three feet in length and from fifteen to twenty inches broad, one of the best varieties for cigar wrappers. Per packet 10 cents, \$1.00 per ounce.

HAVANA. Bearing a fine colored leaf, varying from straw color to dark brown or black; it surpasses all other varieties in flavor for cigars; heavy cropper, fine texture, and the earliest variety to mature and ripen.

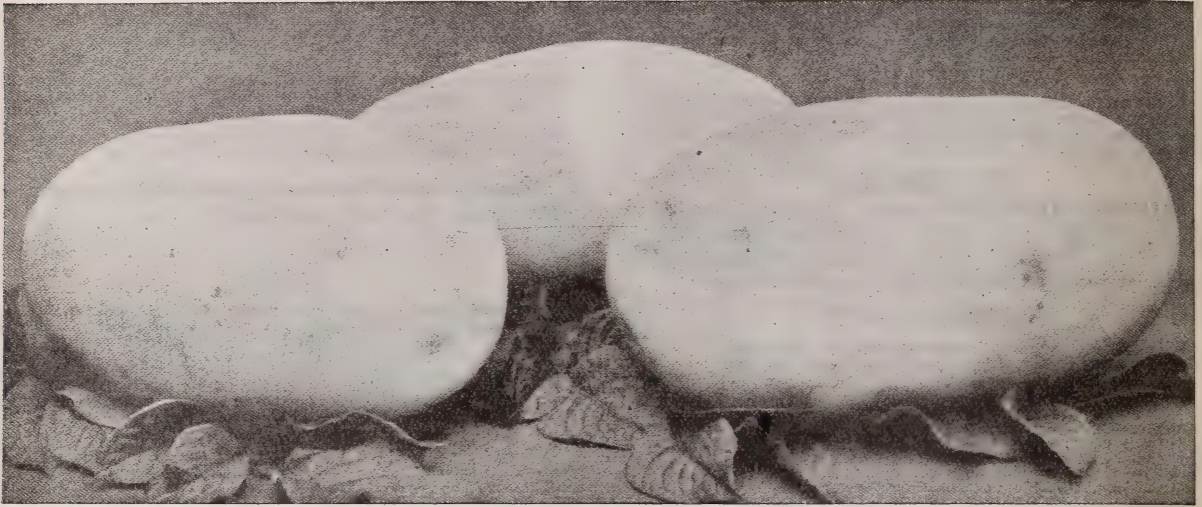

Big Havana (Vuelta de Abajo). Per packet 10 cents, ounce \$1.00.

SUMATRA. Per packet 10 cents, \$1.50 per ounce.

WHITE BURLEY. Per packet 10 cents, per ounce \$1.00.

GERMAIN'S SEED POTATOES

WRITE FOR PRICES

EARLY WHITE ROSE

We are equipped to give you information as to the variety to plant and when. Our experts will be pleased to answer any question in order to help you produce a better and bigger crop.

The soil should be well worked and thoroughly drained. Sandy loam with a clay sub-soil is best. Eight to ten tons of manure per acre should be used if the soil is lacking in fertility.

The hill or row system may be used in planting. If in hills, they may be three feet apart each way or thirty inches one way and thirty-six inches the other way. The rows are usually three to three and one-half feet apart. The distances between the hills in the row varies from 12 to 16 inches apart for early varieties and 17 to 20 inches for late ones according to the soil. On light soils early varieties may be planted four inches deep and late varieties five inches deep. Early varieties are planted any time after the middle of January, but there is danger of their being caught by frost if planted before February first. Usually it is best to plant the main crop of potatoes about the middle of February, as early planting usually gives better results than late planting. The cut seed should be as blocky in shape as possible. Long thin pieces are more likely to rot in the ground. A good method is to begin cutting of pieces at the stem and diagonally across the tuber until just enough is left at the blossom end to make two pieces, when this part should be cut in two so that all the eyes on the end will not be left on one piece.

When the rows are three feet apart and the space between hills is 15 inches, 600 lbs. of seed potatoes are required per acre, if the seed pieces are cut into 1 oz. This is about the average rate per acre for this region.

NORTHERN GROWN POTATOES

PACIFIC WHITE ROSE

Formerly known as British Queen or White Rose Purple Blossom

A uniform potato of the rounder type, yielding more heavily than the white blossom White Rose, but requiring a much richer and stronger soil. The vines grow rank, covering almost the entire ground. The tubers do not form in clusters as in the case of the white blossom, but are scattered, sometimes reaching as far as the center of the row. They mature about two weeks later than the white blossom but the yield where the soil conditions are suitable is so much heavier that it easily makes up for being somewhat later. It is an excellent market potato, and those who have grown it for the past two years recommend it highly.

EARLY RED ROSE

A Truly Wonderful Variety

The well known and popular pink skinned potato, bearing many qualities common to the White Rose. A real early maturing potato, excellent for first planting. Tubers are medium size, smooth and white meated—an elegant cooker.

AMERICAN WONDER POTATO

Selected Stock

A medium sized, smooth and heavy producing white potato, wonderfully well adapted to rapid growth under California conditions. Matures in a very short period being extremely healthy and vigorous. The American Wonder potato produces large quantities of perfect tubers in each hill and responds very readily to conditions meant for forcing. This variety is widely planted and many carloads are shipped from California every year.

EARLY WHITE ROSE

Oregon Grown

This seed is grown especially for us in Oregon of pedigreed stock. It is hill selected for yield and quality and has regular field inspection for vine diseases. We consider it by far the best potato to plant in California.

Send for leaflet that tells how to prevent scab on potatoes. It's free to those who ask for it.

CALIFORNIA GROWN POTATOES

WRITE FOR PRICES

GERMAIN'S CERTIFIED WHITE ROSE

White Blossom Type

These potatoes are grown under our supervision and inspected by us all through the growing season. They are subjected also to several examinations by the State Department of Agriculture. Every bag carries the State Inspector's tag certifying that the contents have passed his rigid test for freedom from disease and trueness to type and variety.

EARLY WHITE ROSE

We have secured a very fine strain of this well known and heavy producing potato which will be suitable for planting in almost any section. Most of these have been grown by us at our Trial Grounds being true to type and of excellent quality.

SWEET POTATOES.

We will be able to supply potatoes of such varieties as Yellow Nansemond, Large White and Jersey Red during fall and winter up to February. Write for prices. Plants after March. **SWEET POTATO PLANTS.** See page 8.

FLOWER SEED DEPARTMENT

A FEW CULTURAL SUGGESTIONS

Few people are aware of the great number and variety of flowers that can be raised from seed. In this glorious Southland, the time taken to obtain fine flowering specimens is not nearly so long as in colder climates, while varieties grow to splendid perfection, if given a reasonable amount of care. There may be a few of the very hardiest species that need a longer winter's rest than is here afforded, but it has been the experience of growers that these soon become acclimated and flower over a larger season than when the summer is short and hot—the winter long and cold. A little experience has to be obtained as to the suitability or otherwise, of certain kinds for special locations but once a general idea of the likes and dislikes of the plants is obtained, it is plain sailing.

One great advantage in raising a flower garden this way is the saving of money. The price of plants at certain seasons of the year and in times of scarcity, is high. This is unavoidable, but seeds can always be purchased for a few cents. Then the interest of watching—first, the tiny germ or seed leaves and eventually the stems and flowers—is great. It has a charm that is always fresh, always new, and the grower has a feeling that he or she is indeed the real owner of the plant. It has never belonged to anyone else. "I raised that from seed," the owner will say of perhaps a stately Delphinium or other fine herbaceous plant and the pride exhibited in that sentence is surely pardonable and proper. Then the pleasure of giving or exchanging plants with a neighbor is facilitated by seedling raising, because there is always plenty for everybody, so different to having to buy them by the dozen or hundred. A packet of seed usually means thousands. We have followed the usual course of catalog makers in classifying into hardy, half-hardy and tender annuals, biennials and perennials, but this need not be taken too literally in California, for many things tender in the east, middle west and north, are perfectly hardy here and will grow outdoors the year around without protection of any kind.

HARDY ANNUALS may be sown in the open air at any time. The name "Annual" indicates that they live only one season.

HALF-HARDY ANNUALS should be sown in a frame or given some protection until the seed germinates if needed early. By the middle of April, it is quite safe to sow in the open.

TENDER ANNUALS is a term used to distinguish those plants usually grown in greenhouses or frames. Speaking generally, they need more skillful treatment than the harder kinds, though it is getting quite common now to see such plants as Cyclamens, Cinerarias and others that were formerly grown entirely in greenhouses, flourishing outside on rockeries or beneath trees that throw sufficient shade to protect them from the hottest rays of the sun. This is a type of gardening peculiarly suitable for California, and especially Southern California. Ask us about it if you are interested.

HARDY BIENNIALS are those that flower in the second year from sowing the seed.

HARDY PERENNIALS are among the finest of our border plants. They do not usually flower till the second year after sowing, but may be relied upon to produce larger clumps of flowers year by year for many years.

HALF-HARDY PERENNIALS are those which require some protection during the coldest weather, as they will not stand frost.

TENDER PERENNIALS are those species that require greenhouse or other protection during the greater part of the year. See also tender annuals.

HARDY ANNUALS. The best time to sow is in the fall months, as they will make much stronger plants and flower much more abundantly when wintered over. They may be sown in any finely-prepared shady border, and transplanted when large enough, to where they are to flower. Do not cover the seeds too deeply. A good rule is to cover each seed its own depth with soil, at the same time taking care to water carefully. Never water so much that the soil gets "soggy," i. e., saturated; nor ever let the top get dry. Most varieties will germinate within ten days.

They may also be sown at any time during the spring months for summer blooming, care being taken to shade the young plants after transplanting, in hot weather.

HALF-HARDY ANNUALS may be sown in April out-of-doors, or in boxes, in March or earlier. If in boxes they should be covered or removed under cover during the night-time and during heavy rains. Those who have hotbeds may sow the seed in February and grow the plants in three inch pots for planting outdoors in April, thus gaining two months on those who have not this advantage. If sown in boxes, the boxes should have an inch of rough soil or gravel at the bottom for drainage; the remainder of the box should be filled within an inch of the top with sifted, light, rich soil, firmly pressed, and watered. The seed should be sown, and covered its own depth with soil then covered with a sack or burlap until germinated, when the covering must be removed. When the young plants are large enough to be handled, transplant to other boxes, planting them about one inch apart, and, when weather permits, they should afterwards be planted in the open ground in the place where they are to flower.

TENDER ANNUALS should be sown in pots as follows: Take a five or six-inch flower pot, put an inch of drainage in the bottom, then two inches of finely-sifted soil, firmly pressed, with a sprinkling of sand on top. Then sow the seed, and do not cover, but press into the soil. Water with a very fine sprinkler, and cover the top of the pot with a sheet of glass. Remove the glass for an hour daily to dry up the damp. When seedlings appear, gradually harden them off to the air. As soon as they can be handled, transplant to two-inch pots, and shift again when necessary.

HARDY BIENNIALS AND PERENNIALS should be sown in September. Many varieties, if sown then, will flower the next year. If sown in spring they will not flower till a year later. They may be sown in a shady border, and, when large enough, transplanted to where they are to remain.

HALF-HARDY AND TENDER PERENNIALS should be sown in boxes, and treated as recommended for Half-hardy Annuals till plants appear, when they should be transplanted to two inch pots, and shifted afterwards when necessary.

We have arranged our list of flower seeds according to the various classes: Annuals, including separate lists of Everlasting Flowers and Ornamental Gourds; Climbers, Annual and Perennial; Biennials and Perennials; Ornamental Grasses, Annual and Perennial.

ABBREVIATIONS. Hh means Half-hardy, Annual or Perennial; T means Tender, Annual or Perennial. When no abbreviation is used, the variety will prove hardy in this climate. The letter B affixed to a variety means that it is useful for bouquets and cut flowers.

Novelties and Specialties for 1924

CHINESE WOOL-FLOWER (Celosia Childsii)

The Chinese wool-flower is a new celosia, and a most magnificent garden annual and remarkable floral novelty. Plants grow two to three feet high, the blooms starting with a central head, round and globular, and often reaches the immense size of two feet in circumference. Pkt.

Crimson-Scarlet \$.25
Rose-Pink 25

GERMAIN'S NEW GIANT PLUMED CELOSIAS

A lovely new class of feathered coxcombs of the Pyramidalis type. The plants attain a height of 3 feet and over and during the months of August, September and October are crowned with immense, gracefully feathered plumes. Colors range from yellow to the various shades of rose, carmine, crim-

son, bronze, etc. From seed sown in March beautiful specimens may be had in full flower by the time above noted. Per packet 35c; 3 pkts. for \$1.00.

GERMAIN'S FIVE FAMOUS ZINNIAS

Germain's Mammoth Strain—Mixed from separate giant varieties 25c.

Dahlia Flowered Mixture—(For separate varieties see next page) 25c.

Giant Picotee—Petals all edged and tipped with contrasting colors. Distinct and effective 25c.

Giant Victory—Quilled. The best quilled strain. Rich in shades of old rose, russet, burnt orange and other autumn tints, 25c.

Mexicana Hybrida—(Haageana). The ideal border zinnia. Dwarf, compact and covered with small very double flowers of unusual shades, 25c. One Packet each of the Five Famous Zinnias, \$1.00.

Some Magnificent New Seed Novelties and Specialties for 1924

GERMAIN'S DAHLIA FLOWERED ZINNIAS

Zinnias have always been popular, but it was mostly because of their ease of culture and profusion of bloom. The modern zinnia is no harder to grow, but it is far removed from the hard colored stiff little flower of former years; fully four times as large, the zinnia of today possesses colorings which we would find it hard to duplicate in any other flower so delicate are they, and especially in pastel shades and the dull satiny tints so popular at present, the zinnia is very rich.

Size and color we have and now also the shape of the flower has been changed; we are offering this year Dahlia flowered zinnias in separate shades which for size, beauty of form and color, are incomparable.

Exquisite—Truly Dahlia-flowered. Exquisite in form and coloring. A light Tyrian Rose with deep rose center, 50c.

Golden State—Glowing orange-yellow, 50c.

Crimson Monarch—A variety of extraordinary merit. In size and color it is unsurpassed, 50c.

Dream—Beautiful deep lavender. A new and desirable shade in zinnias, 50c.

Polar Bear—Very large pure white, of true dahlia form, 50c.

Canary Bird—A delicate shade of primrose, 50c.

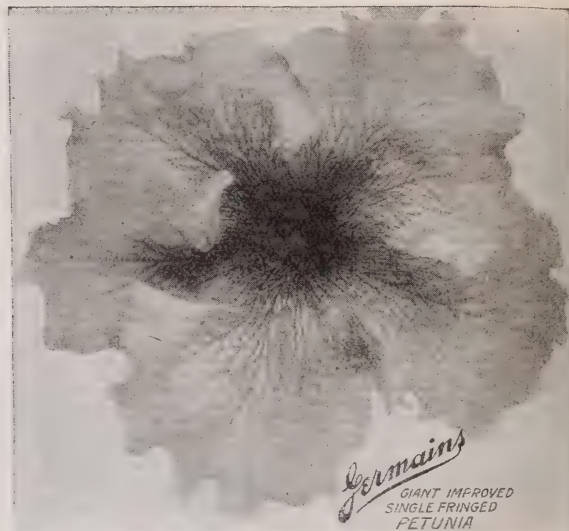

Scarlet Flame—A large, beautiful, bright scarlet, 50c.

Collection of seven separate colors, \$3.00.

Special Mixture. From named varieties only. 3 pkts. for \$1.00, 35c each.

GERMAIN'S IMPROVED RUFFLED GIANT PETUNIAS

Nearly everyone is familiar with the single superbissima type of Petunia, commonly referred to as "Giants of California," and while it is hard to realize that any improvement could be made, yet this new strain is far and away ahead of anything in the single Petunia line introduced to date. We have had individual blossoms that measured 6 inches in diameter. The petals are beautifully convoluted and frilled, and they contain a much wider range of colors than any strain of Petunias, elegant shades of lavender, crimson, carmine and copper are plentiful. Many of the blossoms are beautifully veined, others are blotched or striped. The well-known value of Petunias for Summer bedding and their ability to withstand our hot Summer suns and furnish a constant display of bloom throughout a protracted period should recommend them to every one. Price per packet 35c; 3 pkts. for \$1.00.

THE CALIFORNIA POPPY

Distinctly a native California flower, it has spread throughout the world on the strength of its beauty. In England and other European countries this wild-flower has been grown to such an extent that it has become one of the favorites.

For beautifying and enhancing the value of a vacant lot, for cut flowers and for general decorative purposes it is more valuable than hundreds of others.

We are offering this year seven entirely new colors, all quite distinct and all as beautiful as the original golden poppy of California.

Orange Flame—Admirably suited for borders. Very erect and compact, not over nine inches high. The flowers, slightly smaller than the ordinary Eschscholtzia, are of the brightest orange scarlet.

Ballet Girl—Beautifully frilled. The pedals are an intense cochineal carmine outside and creamy white inside. These widely contrasting colors are startling in the same flower yet form a most pleasing combination.

Tango—Bronzy red overlaid terra cotta, the tango color recently so fashionable.

Mauve Beauty—A pure Mauve. A new color.

Purple Glow—Bright reddish purple, darkest shade obtained so far.

Lovely—Bright satiny rose pink suffused with salmon. A lovely flower indeed.

Scarlet Beauty—A deep scarlet with the bearing and appearance of a scarlet tulip.

Mixed—A superb mixture, rich in shades of crimson, pink, orange and scarlet. Pkt. 25c; ½ ounce, 50c.

All the above varieties per packet 25 cents. The full collection of seven packets \$1.25.

For other varieties see page 88.

Novelties and Specialties for 1924

NEW GIANT SNAPDRAGONS (*Antirrhinum Maximum*)

This wonderful new group of Giant Snapdragons far surpasses anything yet introduced. The flowers, closely placed on tall spikes, are of magnificent size—Invaluable for garden decoration, they are also incomparable cut flowers of exceptional quality.

Apple Blossom —Rosy Pink	\$0.25
Cattleya —Lilac	.25
Old Gold —Rich Golden Yellow	.25
The Rose —Rich Rose Pink	.25
Copper King —Velvety Copper Scarlet	.25
Collection of five separate varieties	1.00
Choice Mixture —All Colors	.25

GERMAIN'S DOUBLE SHIRLEY POPPIES

The shirley poppies are far more graceful in habit than any other plant of the poppy family and their coloring infinitely more delicate. Germain's New Double Shirley is an exceptionally good strain of this popular flower.

Per Packet 25c

The engraving herewith produced conveys a fair idea of an individual flower of Germain's new giant Aster "Peach Blossom." The reproduction shows the individual flower in a greatly reduced form.

GERMAIN'S NEW GIANT NON-LATERAL BRANCHING ASTERS

The New Giant Asters are so distinct and so beautiful in their character that we unhesitatingly recommend them to our customers with confidence that they will not only please them, but all who may have the pleasure of seeing them. The plants are remarkable, not only for their giant height, attaining as they do a height of 3 feet and over but for their superb and elegantly formed blossoms coupled with their mammoth size. The flowers may be cut with individual stems which reach a length of fully 3 feet or over. As cut flowers and as decorative plants in the garden, these new Asters will prove a pleasant surprise and give a vast amount of satisfaction to our customers.

New Giant Aster—Peach Blossom—The photograph shown on this page conveys but a very inaccurate idea of the size and beauty of this particular type. The blossoms attain a diameter of 5 inches, individual stems fully 2 feet long. The blossoms in the opening buds are almost white; as the flowers mature they turn to a beautiful flushed peach blossom pink. Per packet 50c.

New Giant Aster—Light Blue—A splendid companion to the foregoing variety, the shade of blue to be noted in the flower of this superb sort is one of the richest conceivable. Price per packet 50c.

New Giant Rose—An exquisite shade of rich dark rose; the flowers are composed of long, narrow, twisted and curling petals. Per packet 50c.

New Giant Purple—Deep rich purple, a telling shade well displayed in the enormous sized blossoms. Splendid in stem, form and substance. Per packet 50c.

New Giant Asters Mixed—A well balanced mixture, including the above five varieties. Per packet 50c.

GERMAIN'S KING ASTERS

The King or needled type Aster is a favorite with cut flower growers. Its erect growth, long keeping qualities and heat resisting ability place it in the lead as an early aster for this climate.

In addition to sterling cut flower qualities, the King Aster presents a very distinct and attractive appearance. The long petals are narrow and fold so much as to make them appear quilled. The large well-filled flowers are borne on strong stems of good length.

King Crimson	\$0.15	King Shell Pink	\$0.15
King Lavender	.15	King Violet	.15
King Rose	.15	King White	.15
Collection of 6 colors	.75	King Mixed	.15

Some Magnificent Novelties and Specialties for 1924

SWEET PEAS

Seven superb new varieties of the extra early or winter flowering type.

Grenadier—This is the most brilliant early sweet pea yet introduced. The color may best be described as a glowing poppy scarlet. A wonderful addition to the early Spencer group. Pkt. 35c.

Blue Picotee—Pure white with an edging of violet blue on standard and wings. A novel and very attractive variety. Pkt. 25c.

Glitters—A glittering cerise. The large flowers are artistically placed on long and strong stems. They are boldly waved and appear usually in fours. It is the greatest sweet pea of this color in existence. Pkt. 25c.

Columbia—A new pink and white of exceptional merit. Salmon rose standard and pure white wings. A wonderful cut flower. Pkt. 25c.

Madonna—The finest pure white sweet pea to date. It produces four exquisitely waved and gigantic blooms on exceedingly long stems. Pkt. 25c.

Vanitie—Old ivory flushed rose. It is a very dainty and charming sweet pea. Pkt. 25c.

Glorious—An early flowering form of the ever popular Royal Purple. The flowers are of great size and a glowing purple in color. Pkt. 25c.

The collection of seven for \$1.50.

DIDISCUS COERULEUS

(Blue Lace Flower)

This charming introduction from Australia has immediately gained favor with the florists. A basket of these delicately formed blossoms possesses a grace not equalled by any other. The flowers are a light azure blue in color and their dainty globe-shaped construction reminds one of the art of lace-makers. The plant grows to a height of two feet. Pkt. 25c.

CALENDULA "ORANGE KING"

Double, dark orange-red, select strain, grown with the greatest of care, and with good cultivation will produce flowers four inches and over in diameter. Height, eighteen inches. Price, 10c per packet.

CALENDULA "LEMON QUEEN"

Double, bright sunflower yellow. This variety is equally as popular as "Orange King" as the blooms are fully as large. Height, eighteen inches. Price, 10c per packet.

VERBENA LUCIFER

A new Mammoth Verbena, in color an intense brilliant scarlet with no eye. It is a great improvement on the popular Scarlet Defiance and as a bed or border plant this brilliant subject will prove most satisfactory. Pkt. 25c.

LARKSPUR "EXQUISITE"

Charming new double Larkspur of a beautiful soft pink, the shade that is highly desired by all lovers of flowers. Price, per packet, 25c.

BALCONY PETUNIA

Balcony Petunia—The Balcony Petunias are among the most valuable plants for window or porch boxes, dry banks, terraces or among rock work. They thrive with little care and can be depended upon to supply an unsurpassed floral effect throughout the greater part of the year.

	Pkt.
Balcony Blue	.25
Balcony Rose	.25
Balcony white	.25
Balcony Mixed	.25

SCHIZANTHUS (BUTTERFLY FLOWER)

"Garaway's Hybrids." A splendid new strain with large blooms producing an endless variety of color. Price, per packet, 25c.

STOCKS—WINTER FLOWERING

A remarkable percentage come double and they are worthy of culture in any garden.

Crimson	Rose
Flesh	Salmon
Lavender	White
Purple	Yellow

Germain's collection of eight varieties for 75c. A wonderful type of imported stocks. Per packet 15c.

THE AMERICAN LEGION POPPY

This new Shirley of Merit is a dazzling orange scarlet of enormous size, borne on long stout stems. The plants are robust and of very erect growth. Per packet 25c; 3 pkts. for 60c.

EARLY DOUBLE COSMOS

The new early flowering Double Cosmos are superior in every way to the older types. The flowers are most artistic, varying considerably in their appearance. Some are entirely double while others show a double crest surmounted by a wide frill or collar. Sown in fall and winter they bloom in spring or summer.

Early Double Crimson	.25	Early Double White	.25
Early Double Pink	.25	Early Double Mixed	.25

ANNUALS

Our Selection Twelve fine varieties of Annual Flower Seeds, \$1.00.

Our Selection Six Fine Varieties of Annual Flower Seeds, 50c.

The quickest and cheapest way of making a good display of color in the garden is by sowing annuals. But to sow them thickly as is frequently done and then leave the little plants alone to fight for a position—eventually running straight up, flowering once and then dying—is not the right way to treat them. Each plant must have room to develop its branches as they are produced, and in order to obtain this, they must be thinned severely and often, so that each stands at from 6 inches to 1 foot apart, according to the kind sown. Some, as noted under the separate headings, are better sown in boxes or pots and transplanted. Others do well sown where they are to flower. But in all cases, prepare the ground well by deeply spading and incorporating, as the work proceeds, good, well prepared manure. If natural manures cannot be obtained, we have the best commercial fertilizers always in stock, and these are equally effective. But give the plants room to develop, allow plenty of moisture, and the display that these pretty plants make will delight and surprise the grower.

All 10 cent packets at \$1.00 dozen; 15 cent packets \$1.50 dozen; 25 cent packets \$2.50 dozen.

COLLECTIONS

ONE PACKET OF EACH OF THE HARDY ANNUALS LISTED BELOW FOR \$1.50. REGULAR VALUE \$2.10

ALYSSUM SWEET. White, height $\frac{3}{4}$ ft.
ARCTOTIS GRANDIS. White with blue disc, height 2 ft.
BALSAM (Lady's Slipper). Height 2 ft.
CALENDULA (Prince of Orange). Brilliant Orange, height $\frac{3}{4}$ ft.
CANDYTUFT. Pink, height 1 ft.
CANDYTUFT. Empress white, height 1 ft.
CENTAUREA IMPERIALIS. Finest mixed, height 2 ft.
CHRYSANTHEMUM. Choice mixture, height 2 ft.
CALIFORNIA POPPY. Golden yellow, height 1 ft.
CORN FLOWER (Ragged Sailor). Blue, height 2 ft.
GODETIA. Extra fine mixed, height $1\frac{1}{2}$ ft.

GYPSOPHILA ELEGANS. Very graceful for bouquets, height $1\frac{1}{2}$ ft.
LAVATERA TRIMESTRIS. Rose color, height $2\frac{1}{4}$ ft.
LINUM (Scarlet Flax). Beautiful Crimson Scarlet, height 1 ft.
MARIGOLD FRENCH. Mixed beautiful bronzed and yellow shades, height 1 ft.
MIGNONETTE. All sorts mixed, height 1 ft.
NASTURTIUM TOM THUMB. Finest mixed, height 1 ft.
PHLOX. Finest mixed, height 2 ft.
POPPY. Mixed all sorts, height 2 ft.
SCABIOSA (Morning Bride). Finest mixed, height 2 ft.
ZINNIA (Youth and Old Age). Mammoth mixed.

ABRONIA

ABRONIA UMBELLATA (Sand Verbena). Delicate rose. Pkt.
 Beautiful native trailer. Height $\frac{1}{4}$ ft. \$0.10

ADONIS

ADONIS FLOS (Pheasant's Eye). Crimson, with black eye. A beautiful showy, free-flowering plant. Hgt. 1 ft. 10

AGERATUM

AGERATUM MEXICANUM. Fine for bedding or mixed borders.
Imperial Dwarf Blue. Height $\frac{3}{4}$ ft. 10
Imperial Dwarf White. Height $\frac{3}{4}$ ft. 10
Imperial Dwarf Mixed 10

ALYSSUM COMPACTUM

ALYSSUM

Fragrant and pretty. Nothing better for borders or parkways. Sow thinly at any time of the year and thin the plants to 3 inches apart.

Compactum. Dwarf. White. Height $\frac{1}{2}$ ft. Pkt. \$0.10
Lilacinum. Pure lilac, fine for borders. 25
Sweet. White. Height $\frac{1}{2}$ ft. 10

AMARANTHUS

Hh. The Amaranthus are splendid plants to give a tropical effect in mixed borders and shrubbery. Plant in sunny places and poor soil.

Caudatus (Love-lies-Bleeding). Flowers in long drooping panicles, bright crimson. Height 2 ft. 10
Melancholicus (Ruber). Blood-red leaves. Height 1 ft. 10
Salicifolius (Fountain Plant). Leaves variegated. Purple crimson and gold. Height 3 ft. 10
Tricolor (Joseph's Coat). Foliage red, green and yellow. Height 1 ft. 10

ANAGALLIS

ANAGALLIS (Pimpernel). Mixed various colors. Free-blooming, attractive plant for borders. Height $\frac{1}{2}$ ft. 10

ARCTOTIS

This plant is not sufficiently grown. The beautiful flowers have a steely blue sheen, reflected from the back of the petals that gives them a delightful and unique appearance which no other composite possesses. It is one of the finest annuals for cutting. Try it this season. Sow early in order to get large plants and sheaves of flowers.

ARCTOTIS GRANDIS

ARCTOTIS GRANDIS. Plants are of easy culture, flower abundantly from early summer till fall. Height 2 to $2\frac{1}{2}$ ft. Pkt. \$0.10

ARGEMONE

ARGEMONE (Mexican Poppy). Mixed, white and yellow. Very showy. Height 2 ft. 10

ARNEBIA

ARNEBIA CORNUTA (Arabian Primrose). B. Yellow, spotted with black or maroon. Height $1\frac{1}{4}$ ft. 15

ASTERS

GERMAIN'S GIANT COMET BRANCHING ASTERS

Even with the most expensive reproduction process it is difficult to convey the real beauty of the splendid development of the good old Aster. The iridescent coloring of these great chrysanthemum-like flowers nearly as large as a saucer, with beautiful curved petals, makes a brilliant display in the garden, and the fact that they will keep well as cut flowers for a week or ten days is especially appealing to the busy housewife. The Giant (comet) is the finest among the loosely formed or ostrich feather type. The plants grow to a height of about 2 feet, are of full foliage and droop just enough for a graceful appearance. Planted from February to May, the Aster will furnish a continuous reward of gorgeous bloom from July to October. It grows easily, likes sunshine and a moderate amount of water.

ANNUALS

BALSAM

IMPATIENS BALSAMINA (Ladies' Slipper)

Good for flower beds, for mixed borders or for pots in the window garden or green-house. There is nothing that quite takes the place of the Balsam, as it is distinct from everything else in cultivation. Sow in February or March for use inside and in April in the open ground. Our strains are the finest selections from European and home grown varieties and cannot be excelled.

CALIFORNIA POPPY

(Eschscholtzia) See pages 64, 88.

CALLIOPSIS

If the varieties of Calliopsis were rare and high priced, people would rave about their beauty, but as they are so cheap and easily grown, they are often passed by unnoticed. The lovely combinations of yellow and brown are not excelled in any other plant and they have an elegance and grace all their own. Sow at any time of the year and in any position or soil.

CENTAUREA

Everyone knows and likes the old fashioned "Sweet Sultans". Known also as Bachelor's Buttons, Blue Bottle, Ragged Sailor, Bluet and Ragged Robin. In a variety of colors, they are great favorites of the florists, and they are also fine for the home garden, treated like any hardy annual. While they do fairly well in poor soil, no plant responds better to liberal treatment. The common Cornflower, Centaurea Cyanus, is decidedly the finest of all blue flowered annuals and a favorite wherever grown. Too good to miss and of the easiest possible culture. Sow anywhere at any time.

CATCHFLY

See *Silene Armeria*, page 74.

CELOSIA

This is the botanical name of the well-known cox-comb or Prince's Feather. The former, *C. cristata*, is a stiff, formal plant, bearing immense "combs" of brilliant colors. The latter, *C. pyramidalis*, is more graceful and equally bright. Raise the seeds in a gentle heat if possible in early spring and extra large plants will result. Any kind of soil suits them and plenty of sun.

<i>Cristata Empress</i> . Dwarf, crimson, splendid. Height 1 ft.	Pkt. \$0.15
<i>Glasgow Prize</i> . Crimson. Height 1 ft.	.15
<i>Finest Mixed</i> . Height 1/2 to 1 ft.	.10

CHRYSANTHEMUM

(ANNUAL) Painted Daisy

The annual *Chrysanthemums* must not be confounded with the autumn flowering *Chrysanthemum* or *Pyrethrum* *Sinense* of botanists. They are showy, effective plants of the easiest possible culture, requiring only to be sown in the position where they are to flower and thinned to 9 inches apart. They make a fine display all the summer.

<i>Carinatum Burrigeum</i> . White, with crimson ring. Height 2 ft.	.10
<i>Carinatum W. E. Gladstone</i> . Rich crimson. Height 2 ft.	.10
<i>Carinatum</i> . The Sultan. Scarlet.	.10

<i>Coronarium Double</i> . Mixed.	.10
<i>Segetum</i> , Eastern Star. Yellow with brown disc.	.10
<i>Segetum</i> , Evening Star. Yellow, light center.	.10

CINERARIA

Although in this favored southland, the *Cineraria* thrives outdoors in semi-shaded positions, it is as a greenhouse or window plant it is best known. Continental hybridists have been for years working on this flower and we annually add the best from these raisers to our own well known strain. Our seed plants are raised under the strictest surveillance of experts who are quick to note anything not up to the high standard set. The *Cineraria* dislikes heat at any time and must be always in a cool, moist atmosphere with plenty of air. Green fly or aphid is its worst insect enemy and must be destroyed on sight by light fumigation or dipping in one of the nicotine preparations sold by us. Sow at various times from May to August for winter and spring flowering.

CORNFLOWER (See *Centaurea*)

COSMOS

Cosmos is one of the most popular flowers for table decoration. The Mammoth varieties keep up a succession of bloom for a long period, and as they are fall flowers it is almost impossible to have flowers of the late variety in early spring. The early varieties can be had in bloom in early spring by fall sowing.

LAVATERA

LAVATERA TRIMESTRIS. Mixed. Height 2½ ft.

LIMNANTHES

LIMNANTHES DOUGLASSII. Sometimes called Yellow Nemophila. Yellow. Height 1-3 ft.

LINUM

LINUM GRANDIFLORUM RUBRUM (*Crimson Flax*). Crimson. Unsurpassed for brilliancy and duration of bloom. Height 1 ft.

Roseum. A pretty Rose color.

LOBELIA

Everyone knows the blue Lobelia, used so much for ribbon borders and now so much in favor for hanging baskets or pots. Dwarf or trailing all are free flowering. The seed is extremely fine and must not be covered deeply—see also perennials.

Crystal Palace Compacta. Rich dark blue; dark foliage. Pkt. Best dark blue for borders or bedding.	\$0.10
Emperor. Sky blue, compact and free flowering.	.10
Erinus. White. Most effective in contrast with the blue varieties.	.10
Hybrida Pendula Hamburgia. Blue, distinctly trailing in habit. Fine for hanging baskets.	.15
Hybrida Pendula. Sapphire. Deep blue, pronounced white eye, habit same as above.	.15
Hybrida Pendula. Miranda. Crimson Rose, with white eye. A well grown basket of this delightful trailing plant is a wonderful sight.	.15

LUPINUS

See also Perennials.

Mixed Annual Varieties. B. Height 2 to 3 ft.	.10
Nanus. Dwarf, blue. Height ½ ft.	.10

MALOPE

MALOPE GRANDIFLORA PURPUREA. Reddish purple. Height 2 ft.

MARIGOLD

Favorite showy plants for mixed borders. See also Calendula

AFRICAN MARIGOLD

CULTURE—Marigolds are hardy annuals and old favorites in our gardens. They are all showy, especially in masses. Sow the seed broadcast, or in rows in well spaded and finely prepared soil, covering not more than one-eighth inch deep, and thin out to 6 or 10 inches apart.

African Orange Ball. Perfect Ball-shaped flowers of a rich deep golden orange; tall stems; the finest of all. 2½ ft.	Pkt. \$0.15
African Lemon Queen. Lemon yellow; similar in all but color to orange ball. Grown together they form a striking combination.	.15
African Mixed.	.10
French Dwarf Orange. Double. 1 ft.	.10

French Dwarf Legion of Honor. Single golden yellow, velvety Brown center. ¼ ft.	.10
French Dwarf Double Mixed.	.10

MATHIOLA

Mathiola bicornis, or the Night Scented Stock, is a delightful little plant for edgings or small borders. No one who grows it once, cares to be without it afterwards.

MATHIOLA BICORNIS Purple; fragrant. Height ½ ft.

MESEMBRYANTHEMUM

MESEMBRYANTHEMUM TRICOLOR (*Dew Plant*). For edge or rockwork. rosy lavender. Trailer.

ANNUALS

MIGNONETTE

MIGNONETTE

CULTURE—This well known plant, is in fact a small annual shrub and grows wild on the sandy shore of Algiers. The name Mignonette is French and stands for "Little Darling." No gardener should be without this sweet little plant. Sow in any good garden soil, deeply spaded, covering the seed its own depth and keeping moist.

	Pkt.
Machet, Extra Select. An improved form of this large flowered, sturdy variety. Deservedly the most popular for the size and substance of its flower stalks and the intense fragrance of its flowers.	.10
Golden Machet. Splendid Golden Yellow.	.10
Victoria, Giant Red. Shows a brilliance of color which is truly surprising in this class of plants.	.10
White Goliath. (New). This new mignonette has very large spikes of flowers which might well be called double as the individual florets are larger and much fuller than in older varieties, presenting almost solid columns of white. It is excellent for cutting and rich in fragrance.	.25
Odorata. The sweet-scented favorite of old-time gardens.	.10
Mixed.	.10

NEMOPHILA

(Love Grove). Charming California annuals for borders.

Insignis (Baby Blue Eyes). Beautiful sky blue. Height ½ ft.	.10
Maculata. Large, white with purple blotch. Height ½ ft.	.10
Fine Mixed. Height ½ ft.	.10

NICOTIANA

Affinis (Ornamental Tobacco). White and fragrant. Height 3 ft.	.10
Sanderae. Pink. Large flowering hybrids, very showy, profuse bloomer, easily raised from seed.	.10
Mixed. All colors.	.10

NIGELLA

(Love-in-a-Mist or Devil-in-the-bush). B. Singular flowers, the upper petals being reflexed to resemble horns.

Damascena, Miss Jekyll. Double rich deep blue, contrasting well with the light green feathery foliage.	.10
Damascena, Double White.	.10
Damascena, Double Mixed. Blue and white.	.10

NASTURTIUM

Singularly suitable for growing on poor sandy soils where few things thrive. The dwarf kinds will make a glorious display on a sand bank or any comparatively useless patch of soil, while the climbing or vining varieties run a wild riot over anything unsightly in the garden or are good for temporary summer shade on porches and verandas. Beside the showy blossoms, the foliage makes a piquant salad much liked by many people, while the seeds, if gathered green, are fine for pickling. A plant of so many points can hardly fail to be popular. Sow the seed an inch deep, where the plants are to remain, as it is not an easy subject to transplant.

NASTURTIUM, TOM THUMB (See page 88)	Pkt.
Bronze. Distinct golden bronze. Height 1 ft.	\$0.10
Chameleon. A fine variety producing different flowers on the same plant. Height 1 ft.	.10

Dutch Bulbs

Afford the richest field for beautiful decorative effects for the least labor. Any woman will enjoy the care of these aristocratic plants and revel in the beauty of the waxy flowers and richness of perfume. We are the largest importers in the West. Special Bulb Catalog is usually ready about September first. Write for it.

ANNUALS

PHLOX

CULTURE—Phlox is an extensive and interesting genus of invaluable hardy annuals, producing fine clusters of flowers in a variety of colors which includes white, pink, rose, purple, and scarlet. Some of the scarlets have pure white eyes and each year new varieties are added to the list. The only treatment required is to sow the seed where the plants are wanted to grow, and for perfection of flowers, thin out to one foot apart each way.

ONE OF OUR FIELDS OF PHLOX

PHLOX DRUMMONDII. Showy bedding plants.	Pkt.
Bright Scarlet. Height 1 ft.	\$0.10
Pink. Height 1 ft.	.10

PLATYSTEMON

PLATYSTEMON CALIFORNICUS (Cream Cups). Yellow.	
Height 1 ft.	.10

PORTULACA

For exhibiting a display of dazzling brilliancy the Portulaca is unrivalled. It revels in sunshine, and will stand quite a degree of drought.

CULTURE—The Portulaca may well claim a prominent place in our garden. A large bed or border presents a gay appearance of dazzling brilliancy. They are best sown in February and March, as they grow with great rapidity in warm weather. Sow the seed very shallow in a sunny situation. Keep moist but never over water.

Single. Crimson. Height ½ ft.	.10
" Scarlet. Height ½ ft.	.10
" White. Height ½ ft.	.10
" Yellow. Height ½ ft.	.10
" Mixed. Height ½ ft.	.10

" White. Height ½ ft.	.10
" Mixed. Height ½ ft.	.10

POPPY

CULTURE—There can be no stronger and better proof of the beauty of this flower than the extent to which the varieties are grown. No other flower will produce such gorgeous brilliancy for bedding purposes. Sow the seed in beds where it is required, as it does not transplant easily. Cover it its own depth. Keep moist and thin out to six or eight inches apart. Height, except where noted, 2 to 3 feet.

See also list of Perennials.

SINGLE ANNUAL POPPIES.

Admiral. Glistening white, with a broad band of bright scarlet round the smooth edged petals.	.10
Danebrog. (Danish or Victoria cross poppy). Scarlet with white blotch at base of each petal, forming a perfect cross	.10
Miss Sherwood. The flowers are from 4 to 5 inches across, pure satiny white, tinged with chamois rose.	.10

ANNUALS

RICINUS

- Cambodgensis.** (Ornamental Castor Beans). Leaves and stems nearly black; very fine. Height 5 ft. 10
Sanguineus. Blood-red foliage. Height 6 ft. 10
Zanzibariensis. Mixed. Very large leaved. 10

SALPIGLOSSIS

(Painted Tongue)

SALPIGLOSSIS GRANDIFLORA

Not one amateur gardener in a hundred knows this splendid annual, one of the most magnificent of all. The throat of the flower is beautifully lined and marked with rich velvety tints like an exquisite Gloxinia, but the plants are so free flowering that armful of blossoms can be gathered daily from a small bed or border. They are graceful and exquisite, especially suitable for table decoration. Sow thinly where they are to bloom and thin to 1 foot on poor soil and 18 inches on good. Try them this season. They like plenty of sun, which does not spoil the color as in some other flowers.

SCABIOSA

(Mourning Bride or Pin Cushion Flower)

CULTURE—No "old fashioned" flower bed is complete without this sweet and dignified flower; and alone it is a worthy addition to any garden. Free blooming, hardy double annual. It succeeds in any ordinary garden soil. Handsome flowers growing to a height of two feet and fine for cutting. Sweet scented. An excellent border plant. Sow the seed ¼ inch deep, keep moist, never water so much that soil becomes soggy.

SCHIZANTHUS

The Schizanthus has been greatly improved by selection and hybridizing in recent years, and when gardeners awake to its many merits, it will increase rapidly in popularity. Not only are the flowers bright and telling, but the foliage is deeply cut and serrated like a fern, each plant forming as it were, a complete bouquet. It has been aptly termed the "Poor man's Orchid" as it closely resembles some of these aristocratic flowers. Sow in pots or boxes and transplant to good soil in the open, from February to May. Also fine for pot culture in the greenhouse.

A California plant, cultivated in Europe for many years. Of the easiest culture, producing in great profusion flowers not unlike those of the canterbury bell.

Grandiflora. Violet. Height $\frac{1}{2}$ ft. 10
Gloxiniodes. White and blue. Height $\frac{1}{2}$ ft. 10

STOCKS

These popular flowers are unrivalled for garden display and our strain of Giant Perfection is without doubt the finest obtainable, growing to a height of 2 feet, and producing long spikes of highly fragrant flowers and a larger percentage of double than any other strain grown.

CULTURE—For a splendid display in summer, sow in February and March, continuing to sow at intervals for a succession of bloom. Sow in June and July for winter cutting and even later than this in warm localities. The soil should be carefully prepared, three parts of light loam to one each of leaf mold and sharp sand, being an ideal mixture, though any good garden soil will do. Sift this and put the rougher parts in the bottom of the flats or pans. Then fill up with the finer part, allowing room for watering. Sow the seed thinly as a pinch of seed produces hundreds of plants. As soon as sown, cover with about one-eighth of an inch of fine soil and over this place a piece of burlap or old gunny sack and keep moist. Watch closely and remove the covering at once when the seedlings appear and gradually shift to sun to harden. In a few weeks, the little plants will be large enough to transplant.

Germain's
ZINNIA
DOUBLE
GIANT PICOTEE

ZINNIA

(Youth and Age)

The Zinnia is so easily grown that it is apt to be left alone after sowing, to look after itself, and this it will do to an extent that is quite surprising. But give it the same attention that is given to other and less valuable flowers and there is nothing that can equal it for gorgeous beauty. Our Mammoth strain produces flowers as large as the finest Dahlias, magnificent in petalage and of the brightest imaginable coloring. To get this splendid effect, prepare the soil with care and use plenty of well decayed manure which must be well incorporated as the digging proceeds. Then sow the seeds where they are to flower. The finest Zinnias are always from plants that have not been transplanted. Thin to 18 inches apart or less, if the soil is poor. Cultivate the ground between the plants regularly, give water in abundance in dry weather and grand results will be obtained. The flower lasts a long time looking cheerful until the seed is quite ripe. The fact of the flowers remaining so long perfect has given the plant one of its common names "Youth and Old Age."

There is no better strain of Zinnias in existence than that offered.

SEEDS OF CLIMBING PLANTS

Nothing lends such a charm to the home as vines and climbers. A vine clad porch or veranda on a hot day is a pleasant place. Vines soften ugly, hard lines in architecture, hide unsightly things in the garden, are beautiful in or out of flower and cannot be too freely planted. Many of the dwarf kinds are nice for hanging baskets or for clothing parkways. Others are good for scrambling over old dead trees or posts. In short, there is no garden, no matter how small, in which vines do not play an important part in the scheme of decoration.

P—Perennial

COLLECTIONS (Our Selection)

12 Beautiful Varieties, Climbing and Trailing Plants \$0.75
6 Beautiful Varieties Climbing and Trailing Plants \$0.35

ADLUMIA

ADLUMIA CIRRHOSA. P. The graceful Allegheny Vine; Pkt. also Mountain Fringe. Pink. Height 8 ft. \$0.10

AMPELOPSIS

This is the well known Boston Ivy, a plant known from coast to coast. It clings with great tenacity to anything within reach of the little tentacles, produced from the stem. In summer, the foliage is deep green; in autumn it turns to the most delightful tints. The seed may be sown at any time of the year.

AMPELOPSIS, Veitchii (Japan Ivy). P. Height 50 ft. 10

ANTIGONON

Planted in a sunny location, where it can ramble at will, there is not a more beautiful plant in existence than the Mexican Rosa de Montana. Nearly always in flower; the blossoms are like those of a rosy pink Begonia, but borne in the greatest profusion all over the plant. Will not thrive in a shady position.

ANTIGONON LEPTOPUS 15

ARISTOLOCHIA

A. elegans is the newer of the two and is a twiner with small leaves and gorgeously colored flowers, freely produced. It has none of the unpleasant odor complained of in the older Aristolochias. A. Sipho is not so remarkable for its flowers, but the foliage is grand, its great leaves of the deepest green being among the finest things known in horticulture.

Elegans. Hhp. Chocolate and purple. Height 30 ft. 10

Sipho. (Dutchman's Pipe). P. Very odd-looking and interesting. Yellow and brown. Height 40 ft. 10

AUSTRALIAN PEA VINE

See Dolichos lignosus.

BALLOON VINE

BALLOON VINE. Hha. Bears a pretty, inflated capsule. White and green. Height 8 ft. 10

BIGNONIA

(Trumpet Vine). P. Sometimes classed with Tecoma. Robust, hardy. Very ornamental.

Radicans. Orange-scarlet. Height 15 ft. 10

Tweediana. Bright Yellow; evergreen. Height 20 ft. 10

CALAMPELIS

(Eccremocarpus)

Scabra. P. Deep Orange. A valuable climber to cover trellises. Height 6 ft. 10

CANARYBIRD FLOWER

CANARYBIRD FLOWER (Tropaeolum peregrinum). Hha. A charming annual vine with delicate foliage. Flowers yellow. Height 8 ft. 10

CARDINAL CLIMBER

Ipomea Hybrid. It is one of the most striking climbers yet introduced. Grows to a height of 30 feet with attractive green foliage covered with a blaze of bright cardinal red flowers. A warm, sunny locality is best. Soak the seed in hot water over night, sow in boxes and transplant.

CLEMATIS

The beauty of the Clematis or Virgin's Bower is well known, but the plants are not as freely used as they ought to be. The new hybrid forms give a variety of color and size, some magnificent things having appeared among them, but there is not a single Clematis of any sort or kind that is not well worth its place in any garden. The seed takes a long time to germinate.

Jackman's New Hybrids. Mixed. Height 10 ft. 25
Among the newer strains of large flowering clematis there are none to surpass these famous hybrids. The flowers are of enormous size, in a wide range of colors especially rich in dark purple and blue.

Paniculata. Hardy perennial, massed with sweet scented white flowers. 10

CLIANTHUS

CLIANTHUS PUNICEUS (New Zealand Parrot's Bill). P. A very handsome climber. Bright scarlet. Hgt. 6 ft. 15

COBAEA

P. Rapid-growing bell-shaped flowers.

Alba. White. Height 20 ft. 10

Scandens. Purple. Height 20 ft. 10

Mixed. Height 8 ft. 10

DOLICHOS

Lablab. Hha. Mixed. Height 8 ft. 10
Lignosus (Australian Pea). P. Rose and purple; one of the best climbers for a hot, dry climate. Height 15 ft. 10
Lignosus Alba. A white form of the above. 10

HUMULUS

The Hop Vine is one of the quickest growers that we have and very beautiful. It rapidly covers arbors, fences or porches and is beautiful even when allowed to ramble at will about a pole or dead tree stumps. Sow in spring where plants are needed.

Japanicus (Japanese Hop). A. Height 20 ft. 10

Japanese Variegated. 10

IMPERIAL JAPANESE MORNING GLORY

Hha. Mixed, all colors. Very large. Height 30 ft. 10

IPOMOEA MEXICANA ALBA

IPOMOEA

Heavenly Blue. Hha. Light blue. Hgt 15 ft. \$0.10
Leari (Blue Moon-flower). P. Splendid. Height 25 ft. 10

Mexicana grandiflora alba (True White Moon-flower). Hhp. Height 30 to 40 ft. 15

Setosa. (Brazilian Morning glory.) A rapid growing vine of unique subtropical appearance. Large lobed leaves and beautiful rose colored flowers with satiny pink center. 15

KUDZU VINE

KUDZU VINE P. (Pueraria Thunbergiana). One of the most rapid-growing vines known. Will grow 50 feet in one season. The leaves are very large, making it a suitable for plant covering arbor, trellis, etc. Slow in germinating, soak seed in hot water over night. Flowers are pea-shaped and rosy purple in color. 10

SEEDS OF CLIMBING PLANTS

LATHYRUS

Free flowering, perennial climbers, excellent for covering fences, old stumps, trellises, etc. Flowers are similar to sweet peas and are even more showy, but are lacking in fragrance.

SMILAX. P. White; very useful for festooning, 6 ft.	.10
--	-----

SOLLYA

SOLLYA HETEROPHYLLA (Climbing Bluebell). Hhp. A pretty climber, with charming intense blue flowers. Height 6 ft.....	.15
---	-----

TACSONIA

This resembles the Passion Flower but is if anything more ornamental. The growth is extra robust and the large flowers hang pendant from it, making it especially suitable for arbors or roofs of porches. The colors are variable, but usually some shade of red, scarlet shades being extremely telling and effective.

Ignea. Red.....	\$0.25
Pink.	.25
Mixed. Height 6 ft.....	.10

THUNBERGIA

The best vine for windows and hanging baskets. It has deep, green leaves on scandent stems and the flowers are yellow or buff, with deeply colored eyes. One of the very best.

THUNBERGIA ALATA. Hha. Free bloomer of rapid growth; flowers of white and yellow shades, with striking black centers. Mixed, Height 6 ft.....	\$0.10
--	--------

WISTARIA

WISTARIA SINENSIS. P. A charming old-fashioned hardy climber, producing its pale blue flowers in large clusters in early spring. Light blue. Height 50 ft.....	Pkt. \$0.15
---	-------------

SWEET PEAS

CULTURE—Sweet Peas should be sown about three inches deep and require an abundance of water—but do not sprinkle the vine. Keep the flowers picked and do not allow them to run to seed or they will soon stop flowering.

GIANT WAVED SPENCER VARIETIES

The character of these flowers is of healthy and vigorous growth and quite distinct from the standard sorts. They are very large, measuring from 2 to 2½ inches across with large frilled and wavy standards. Three and four of these beautiful flowers are borne on one good long stem, making them unsurpassed for vases and other decorative flower work.

NEW GIANT WINTER SPENCER SWEET PEAS

Not a flower is more admired for its beauty and sweetness than are the Sweet Peas. Especially is this true when we find them in mid-winter arrayed in colors as varied and brilliant as they are delicate, combined with a freshness and sweetness of odor excelled by none. The New Giant Winter Flowering Spencer varieties produce flowers of the largest size and of true orchid flowered type. The petals are beautifully waved, the stems very long and the plants themselves grow tall, 10 feet being no exception. Plant them from August to November. They will begin to bloom in ninety days, and if flowers are gathered freely and all faded blossoms removed they remain in bloom for several months.

The Momordicas are very handsome. The fruit bursts when ripe, exposing bright orange-scarlet interior, which resembles a handsome flower.	

PERENNIALS

Our Selection 12 Fine Varieties of Perennial Flower Seeds. \$1.00

Our Selection 6 Fine Varieties of Perennial Flower Seeds. \$0.50

The very word "Perennial" conjures up old time memories of old fashioned plants, lovely old gardens with borders, semi-neglected, perhaps, but always overflowing with flowers; gardens where one can cut sheaves and handfuls of flowers without their being missed, where every day in the year, there is something new. Giant blue Larkspurs look over garden walls or fences; Lilies invite one into the garden by their grateful perfume, while in the spring, the tender shoots pushing through the soil are almost as beautiful and equally interesting as the flowers. In autumn, Chrysanthemums, Dahlias, Asters and Foxgloves brighten the shortening days, while even the decaying foliage of those which have been so glorious during the summer is not without its charm. This is not the place for the tidying up gardener. It is "Grandmother's Garden", a garden of sweet things, of memories, of beauties unknown to those who only look for glaring displays and hard color outlines. And all these can be had by anyone who will take the little trouble to plant a few seeds, for nearly all these precious plants can be raised from seed, as easily as a pansy. Especially in the Southland, is this phase of gardening neglected, just where it ought to be most popular.

COLLECTIONS

ONE PACKET OF EACH OF THE HARDY PERENNIALS LISTED BELOW FOR \$1.75. REGULAR VALUE \$2.25

ANEMONE CORONARIA. Mixed. Height 1½ ft.
ANTIRRHINUM (Snapdragon). Mixed colors. Height 2 ft.

Delila. Carmine Rose, white throat. .10
Fairy Queen. Rosy orange buff. .10
Fire King. Scarlet and orange. .10
Galathea. Crimson, white throat. .10
Pink. Clear pink. .10
Purple King. .10
Ruby Rose. Rose, tinted ruby red. .10
Venus. Large soft pink, white throat. .10
White. Tall snow white. .10
Yellow. Golden yellow, lighter throat. .10
Yellow and Orange. Very effective. .10
Tall Giant Mixed. .10
Collection: 1 Pkt. each of 12 colors. 1.00
Two dozen collection: 1 Pkt. each of every variety listed. 1.75

ARABIS

One of the first flowers of spring, better known as "Snow on the Mountain". Comes easily and freely from seed and produces a white sheet of flowers, fragrant and delightful. Fine for rock-work.

ARABIS ALPINA White. Height ½ ft. .10

AQUILEGIA

The old-time Columbine, a delightful plant in every respect, native to America, but much improved by cultivation and selection. Our Rocky Mountain Columbine is one of the finest of all, with its long caudate spurs and charming coloring. Every color is represented in such lovely combinations as to win the admiration of all.

Chrysantha. Yellow. Height 2 ft. .10
Coerulea (Colorado State Flower) blue. .15
Long Spurred Pink. .25
Long Spurred Hybrids. Mixed. .25
Double Mixed Hybrids. Very fine. Height 2 ft. .10
Single Mixed. Height 2 ft. .10

ARMERIA

ARMERIA. The Sea Pink, an edging plant without an equal; fine foliage even after the flowers are gone, always attractive. .10

ASPARAGUS

Sprengeri. A fine ornamental plant for hanging baskets. .10
Plumosus. A fine pot-plant; 100 seeds 85 cents. .10

ASPERULA

ASPERULA ODORATA (Woodruff). Very fragrant. Ht. ½ ft. .10

AURICULA

AURICULA. Finest English hybrids; from the finest collection. Fine deep colors, variously margined. Good for pot culture. Height ½ ft. .25

BEGONIA

The tuberous rooted Begonia is one of the finest greenhouse plants. Sow in early spring, in fine sterilized soil, leaf-mold and sand. Cover the seeds very slightly and place a sheet of glass over each pan or flat until the young plants are up. Prick off singly as soon as large enough to handle and place in small pots when ready, potting into the larger sizes as they fill the smaller with roots.

Tuberous-rooted. Double mixed (see page 73) .50
Tuberous-rooted. Single mixed. .50

BEDDING OR BORDER BEGONIAS.

Easily grown from seed. The bedding begonias thrive and bloom admirably in shady locations. The seed is very small. Sow in boxes in sifted soil and do not cover but press lightly into the surface.

Luminosa, fiery dark scarlet. Dark foliage .25
Prima Donna. Pink. Fine for pot plant .25
Erfordia. Bright Rosy Carmine. .25
Vernon. Bright Orange Carmine flowers, deep red foliage .25
Semperflorens Alba. White. .15
Semperflorens Rosa. Pink. .15
Semperflorens Mixed. .15

PERENNIALS

BELLIS

The popular **Double English Daisy**. Very useful for edgings.

Longfellow . Large, rose. Height $\frac{1}{4}$ ft.	Pkt. \$0.10
White	.10

CENTAUREA

Dusty Miller. Fine plants for borders.

Candidissima . White foliage. Height 1 ft.	.10
Gymnocarpa . Height 1 ft.	.10

CERASTIUM

CERASTIUM TOMENTOSUM (Jerusalem Star). White leaves; trailer; useful for edging and rockwork. **.15**

CHRYSANTHEMUM

Frutescens. (Paris Daisy or Marguerite). B. White, yellow eye. Height 2 ft. **.15**

Leucanthemum hybrid (Shasta Daisy); White, yellow center; flowers four inches in diameter; valuable for cutting. Height 2 ft. **.10**

Indicum (Chinese). Mixed. Height 3 ft. **.25**

Nanum (Pompona). Mixed. Height 2 ft. **.25**

Japonicum (Japanese). Mixed. Height 3 ft. **.25**

CINERARIA

CINERARIA MARITIMA CANDIDISSIMA. Silvery foliage, very useful for ribbon beds and borders. Height 1 ft. **.10**

CLIANTHUS

CLIANTHUS DAMPIERI (the Australian Glory Pea). A magnificent flower, scarlet, with black center. Water sparingly after sowing. Height 4 ft. **.15**

COLEUS

Gorgeous leaved plants, suitable for bedding out or indoor use. The coloring in our large leaved varieties is not excelled by even the finest Caladiums, while the variety in tints is remarkable. The Coleus likes plenty of sun, ample moisture and rich, light soil to bring out its best points. Sow in March.

New large-leaved. Very fine. Height 2 ft. **\$0.25**

Finest Mixed. Height 2 ft. **.15**

Germain's
COREOPSIS
LANCEOLATA

See page 83

PERENNIALS

COREOPSIS

The best golden yellow composite, fine for cutting and for garden decoration. It comes easily and quickly from seed and flowers very freely. Sow several times in the year for a succession of bloom. See page 80. Pkt.

Lanceolata. B. A beautiful plant, with lance-shaped leaves and showy bright flowers 2 or 3 inches in diameter. Yellow. Height 2 ft. \$0.10

CUPHEA

CUPHEA PLATYCENTRA (the Cigar Plant). Pretty tubular flowers. Scarlet and black. Height 2 ft. 10

CYCLAMEN

One of the most popular of greenhouse plants and deservedly so. The seed should be sown in autumn, any time from August to November, and again in the spring for a succession of flowers. During the last ten years, the strains have been greatly improved by European hybridists. We constantly add the finest varieties and there is nothing better than our strain in existence. The seeds should be dibbled in half an inch deep and 1 inch apart. Hh. Pkt.

Persicum giganteum. Fine mixed. Height ¾ ft. 25

DAISY See Bellis.

DAISY, SHASTA. See Chrysanthemum above.

DAHLIA

While Dahlias are more frequently raised from tubers than seed, there is great interest in growing some seedlings, as there is always the chance of getting something novel and distinct among them. Both single and double, also the Pompon and Cactus forms can be grown this way. Sow in February and March, under glass, or in April in the open ground. Watch carefully for slugs and small snails, as these will ruin hundreds of the young plants in a night, if allowed to. Something in the Dahlia is very attractive to these pests. Hh.

Large-flowered double, best quality mixed. Height 5 ft. \$0.15
Cactus. Mixed colors. Height 5 ft. 15
Pompon. Small bouquet, mixed. Height 4 ft. 15
Single, Mixed. Height 5 ft. 10

DELPHINIUM

The perennials larkspur is possibly the finest herbaceous plant in existence, rivaling even the Peony. The plants thrive in any soil and situation, withstand frost and heat and are always the central attraction in the hardy perennial border. The blue forms are superb, while the scarlet, though not quite as hardy as the others, is extremely showy. Sow in autumn and again in spring.

Cardinale (Scarlet Larkspur). Bright scarlet. Height 3 to 5 ft. \$0.10
Bella Donna Clear turquoise blue. 25
Elatum (Bee Larkspur). Mixed. Height 3 ft. 10
Formosum. Bright blue. Height 4 ft. 10
Hybridum. Double, extra choice mixed. Height 3 ft. 15
Gold Medal Hybrids. The finest strain of mixed hybrids. The plants are of strong vigorous habit and produce large spikes of delicately shaded flowers mostly in the lighter blue tints. 25

DIANTHUS

Belongs to the same family as the Carnation. Pretty and easily grown plants, coming freely from seed and liking a light, sunny position. Sow at any time. Pkt.

SINGLE PINKS. **Crimson Belle.** Velvety crimson. 10
Queen of Holland. Pure white. 10
Hedewigii (Single Japan Pink). Finest Mixed. 10
Hedewigii Laciniatus (Single fringed pink) mixed. 10
Plumarius (Single Florists. Pheasant's eye or Hardy Garden Pink). Delightful odor. Fringed edged flowers of many colors. 10

DOUBLE PINKS.
Fireball. Rich glowing red. 10
Mourning Cloak. (White Frill). Dark velvety crimson, margined white. 10
Purity. Beautiful double white. 10
Hedewigii fl. pl. (Double Japan Pink) double mixed. 10
Chinensis fl. pl. (Double China or Indian Pink) very double, colors varied and bright. 10
Diadematus Albus, fl. pl. Double white. 10
Diadematus, fl. pl. (Double Diadem Pink). Finest mixed. 10
Laciniatus, fl. pl. (Double Fringed Pink). Large double fringed, all colors, mixed. 10
Imperialis, fl. pl. (Imperial Pink). Double mixed. 10
Mixed Hybrids. Single and double in all varieties, mixed. 75
Collection of 10 choicest varieties. 75

DODECATHEON

DODECATHEON MEDIA (American Cowslip). Lilac. Fine for rockwork, etc. Height ½ ft. 10

DELPHINIUM

DIGITALIS

The Foxglove is one of the oldest garden plants and a favorite everywhere. Produces tall, showy spikes of pretty, showy flowers in a great variety of color. Pkt.

DIGITALIS GLOXINOIDES (Foxglove). Fine mixed. 3 ft \$0.10

ERIGERON

ERIGERON. Bluish lilac daisies. Producing a mass of flowers nearly all the year around. Good winter flowers. Height 2 ft. 10

ERYNGIUM

(Sea Holly)

PLANUM. Can be dried for winter bouquets. Produces handsome thistle-like heads of gray-blue flowers. 10

ERYTHRINA

CRISTA-GALLI (Coral Tree). Dark red. A handsome decorative plant for shrubbery. Hgt. 6 ft. 25

EVENING PRIMROSE See Oenothera

FERNS

All species mixed; choicest varieties. ½ to 2 ft. 15

FORGET-ME-NOT See Myosotis

DICTAMNUS

The Fraxinella or Burning Bush possesses the peculiar property of giving off a volatile oil or gas that ignites and flashes up for a second or so when a lighted match is applied, without injury to plant. A pretty, herbaceous plant, worthy extended culture. **FRAXINELLA** (Burning Bush). Red; handsome. The seed is slow to germinate. Height 2 ft. \$0.10

FREESIA

FREESIA REFRACTA ALBA. B. Well-known bulbous plants, blooming in one year from seed. White. Height ¾ ft. \$0.10

RAINBOW MIXTURE Many beautiful shades. 25

FRENCH HONEYSUCKLE

FRENCH HONEYSUCKLE (Hedysarum coronarium). Red and white mixed. Hardy, profuse-blooming. Succeeds well near the seaside. Not to be confounded with the climbing Honeysuckle. Height 3 ft. 10

PERENNIALS

Picta. Red and yellow. Height 1½ ft.	.10

GENTIANA

GENTIANA ACAULIS. An alpine plant of great beauty; fine for borders and rock work; intense blue. Height ¼ ft. .10

GERANIUM

B. Seed saved from best varieties of all kinds	
Zonale, Single. Finest mixed. Height 5 to 6 ft.	.10
Zonale, Double. Finest mixed. Height 3 ft.	.25

GERBERA

The original form of this fine composite was bright red, but we have now almost all colors. Comes rather slowly from seed, but well worth waiting for. Sow at intervals all through the spring and summer. See adjoining engraving.

Jamesoni (Transvaal Daisy). The Scarlet Daisy of South Africa.	Pkt. \$0.25
Hybrids. Mixed Colors.	.25

GEUM

Coccineum (Scarlet Avena). A Chilian plant of great beauty; very useful in mixed borders. Scarlet. Height 2 ft. .10

Mrs. Bradshaw. The double Mrs. Bradshaw is undoubtedly the finest Geum produced. The flowers are large and full, of a beautiful orange scarlet color, blooming from April to September. A hardy perennial. Height 18 inches. .25

GLOXINIA

GLOXINIA HYBRIDA. T. A beautiful greenhouse perennial bulb. Seed saved from the finest erect and drooping varieties. Finest mixed. Height 1 ft. .25

GOLDENROD See Solidago.

GYPSOPHILA

GYPSOPHILA PANICULATA. B. Very graceful, flowering in panicles, and excellent for cut-flowers. White. Height 1½ ft. See also Annuals. .10

HELIOTROPIUM

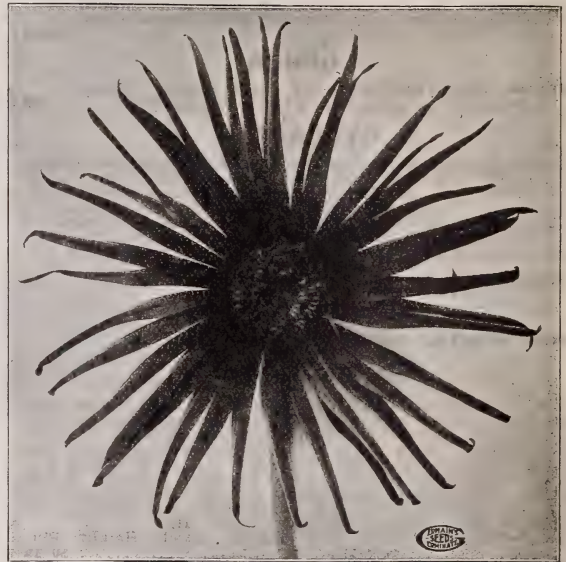

HELIOTROPIUM (Cherry Pie). Deliciously fragrant, also fine for pot culture. Finest mixed. Height 6 ft. .10

GEUM MRS. BRADSHAW

HEUCHERA

B. Allied to the Saxifragas; very graceful valuable for cut-flowers.	
Alba. White. Height 1 ft.	.15
Sanguinea. Crimson. Height 1 ft.	.15

GERBERA JAMESONI

Mallow Marvels. Robust Perennials. 3 to 5 feet high, bearing profusely, flowers of the largest size, in all the shades of crimson, rose, and white.	.10

HOLLYHOCK

The Hollyhock comes fairly true from seed and will flower the first year if the seed is sown early and transplanted to rich soil. Sow again in the fall and transplant in the spring. One of the few herbaceous plants that are effective in landscape work.	Pkt.
Allegheny. Semi-double, fringed, mixed. Height 5 ft.	\$0.10
Single Mixed.	.10
Double Crimson. Height 5 ft.	.10
Double Maroon.	.10
Double Newport. Pink. Height 5 ft.	.10
Double White. Height 5 ft.	.10
Double Yellow. Height 5 ft.	.10
Double Mixed. Height 5 ft.	.10

HONESTY

HONESTY. B. Interesting in a dried state, the membranous lining of the seed-pod making a handsome ornament for winter bouquets. Purple. A biennial. Height 1½ ft.	.10
--	-----

HUNNEMANNIA

HUNNEMANNIA FUMARIAEFOLIA. A showy plant belonging to the Poppy family. Yellow. Height 2 ft. .10

HYACINTHUS

HYACINTHUS CANDICANS. A bulbous plant, throwing up a spike bearing 20 to 30 yucca-like flowers; pure white and fragrant. Height 3 ft. .10

IPOMOPSIS

IPOMOPSIS (Texas Plumes). Showy scarlet and gold pyramidal blossoms and feathery foliage. Fine mixed. Biennial. Height 3 ft. .10

LANTANA

LANTANA. B. White, rose and yellow particolored fragrant flowers, like heliotrope in form. Finest mixed. Height 4 ft. .10

LAVENDER

LAVENDER SWEET. Blue; a hardy shrub, well-known and esteemed for its delicious fragrance. Height 3 ft. .10

LINARIA

LINARIA CYMBALARIA (Kenilworth Ivy). White and purple; very pretty for rock and hanging-baskets; trailer. .10

PANSY or HEARTSEASE

CULTURE—To have pansies in perfection, sowings should be made every month from the end of July to the end of April. Young, vigorous stock always gives the best results. Sow in pans or frames and transplant when large enough to a border of rich soil. Water must be given freely in bright weather and the flowers gathered as soon as they begin to wilt in order to keep up a succession and prevent running to seed, which injures the plants and tends to small flowers.

GERMAIN'S GIANT PRIZE PANSIES

What could be more interesting to any lover of flowers than a bed of Pansies fresh with the morning dew, some clad in their rich velvety petals and others turning their smiling faces upward asking only to be appreciated in their brief effort to make the world a little more beautiful!

GIANT PURPLE. Very showy.	Pkt.
Velvety Royal Purple.....	\$0.25
GIANT KING OF THE BLACKS.	.25

Red Alpine. European wild strawberry. Pkt. 25 cts.

GERMAIN'S CHOICE DAHLIAS

The Dahlia needs no introduction to any one interested in gardening. Like the Chrysanthemum it has come to be "Everybody's" flower. There have been great improvements made, however, in Dahlias during recent years, and in the following list will be found a collection second to none.

FIVE NEW AND RARE VARIETIES

AMUN RA (The Sun God) (Decorative). This immense flower of faultless formation resembles in color a glorious setting sun. The outer petals are copper and orange shading to gold and amber and deepening to rich bronze in the center.	Each \$5.00
EARL WILLIAMS (Decorative). This remarkable introduction is a giant among Dahlias. The color combination of brilliant crimson and white is so well balanced that it has been proclaimed the peer of all variegated Dahlias. No collection should be without it.	5.00
JOHN ELGUS (Decorative). Exceptionally attractive color combination of bronze and orange shades. The flowers are large and well formed. A good variety for all purposes.	5.00
NEW MOON (Hybrid Cactus). One of the best of recent introductions. Flowers of a pleasing canary yellow tipped white are held on straight stems. Excellent for exhibition and garden work.	3.50
THE ORIOLE (Paeony Flowered). A new and rare variety of rich and unusual coloring. The flowers of true paeony type are burnt orange, red and yellow in color and of the largest size.	3.50

SEVEN WONDERFUL DAHLIAS

CRIMSON DAWN (Germain 1924). A splendid new crimson decorative, our own introduction for 1924. The color is a splendid, pure crimson with no trace of shading to mar its extraordinary brightness. The large, well-shaped flowers are held erect on long, firm stems and are produced in the greatest profusion. Of excellent keeping quality, it is one of the most valuable cut-flower Dahlias we have seen.	Each \$5.00
JANE SELBY (Decorative). Delicate mauve pink of great substance and beautiful formation.	1.00
MRS. F. C. BURNS (Shell Pink). One of the finest decorative Dahlias of recent introduction.	.75
PRIDE OF CALIFORNIA (Decorative). A splendid dark red of enormous size.	1.00
GEORGE WALTERS (Cactus). One of the most magnificent Dahlias ever introduced. In color a delightful shade of crushed strawberry rose with a suffusion of bronze.	.75
MABEL B. TAFT (Decorative). A giant yellow Dahlia, suffused with pinkish apricot.	.75
KING OF THE AUTUMN (Decorative). Large, erect and perfectly formed flowers of a pleasing burnt amber, beautifully tinged with buff and old rose.	.75
The set of Seven Wonderful Dahlias (including Germain's new Dahlia Crimson Dawn) for	7.50

DECORATIVE DAHLIAS

This well-known type is one of the best for cutting. The flowers are regular in form and of great size and substance.

ABALONE. Light pink.	Each \$.50
ANNA MAIER. Deep pinkish red.	1.50
CAROLYN WINTJEN. Salmon pink, rose shadings.	1.50
DELICE. Bright rose.	.35
DR. TEVIS. Salmon rose, suffused with old gold shading to apricot.	1.00
EMBASSADOR. Dark red or maroon.	.75
FRANCIS BURNS, JR. Rosy pink with cream center.	.75
GUSTAVE DOAZON. Orange red.	.35
LADY RAY. Large canary yellow.	.50
LUCERO. Bronze.	.35
MILLIONAIRE. Lavender and white.	1.00
MINNIE BURGLE. Crimson.	.35
MISS QUALITY. Amber buff.	1.50
MRS. CARL SALSBACK. Mauve pink shading lighter.	1.00
PATRICK O'MARA. Orange buff.	1.00
ROSA NELL. Pure, bright rose.	1.50
SENORITA. Dark crimson.	3.00
SNOWDRIFT. Pure white.	1.00
TRYPHININE. Bright shell pink, shaded lighter at tips.	2.50
YSLETA. Yellow shading to copper, suffused with bright rose	1.50

PAEONY-FLOWERED DAHLIAS

Informal in make-up and exceedingly decorative in character. We recommend these very highly for use as cut flowers.

CHANSON. Deepest lilac with bluish sheen.	Each \$2.00
MRS. JESSIE SEAL. Old rose, shaded gold.	1.00
PA FENTON. Rosy magenta.	.50
GEISHA. Best known of the paeony-flowered Dahlias. Original in form. Color a rich combination of scarlet and gold.	1.00

CASTUS DAHLIAS

The Cactus Dahlia needs no introduction. The large, graceful flowers are admired by all. Chrysanthemum-like, their petals are long and pointed and frequently also quilled or interlaced, in-curved or reflexed according to the variety.

ARTHUR TWITCHETT. Faint blush pink.	Each \$2.00
BALLET GIRL. Orange and white.	2.00
CALIFORNIA BEAUTY. Amber copper.	1.00
CLAREMONT. Soft pink with cream shading.	.75
COUNTRESS OF LONSDALE. Salmon pink.	.25
ETHEL F. T. SMITH. Yellow shading lighter at center.	1.50
FIREBALL. Bright red.	2.00
GEE WHIZ. Soft buff, shaded salmon.	2.00
GLADYS BATES. Tan with rose reverse.	2.00
GOLDEN WEST. Yellow and orange buff.	.35
HELEN DURNBAUGH. Blush pink with deeper center.	.75
KALIF. Bright red.	.50
LA FAVORITA. Brilliant salmon, shading from reddish salmon center to salmon pink.	1.50
LAURINE. Deep pink shading lighter.	3.00
MRS. EDNA SPENCER. Lavender shading to white.	.75
PENNANT. Clear coral.	2.00
WHITE STAR. Pure white.	.50

POMPON DAHLIAS

The elegant miniature-flowered forms have become very popular of late. The twelve varieties listed are chosen from a large collection and are among the best of this type.

AMBER QUEEN. Lovely shade of amber.	Each \$.50
ANNIE DONCASTER. Soft yellow edged mauve.	.50
AIMEE. Bronze.	.75
DEWDROP. White tipped lavender.	.50
IDEAL. Best yellow.	.50
JOE FETTE. Pure white.	.50
KIM. Orange and bronze.	.50
LITTLE JOHNNIE. Deep crimson.	.50
MACEBETH. White tipped rose pink.	.75
NERISSA. Rose tinted silver.	.50
NELLIE FRASER. Lavender pink.	.50
SUNSET. Orange.	.50
The collection of twelve complete for	6.00

SPRING AND SUMMER FLOWERING BULBS

AGAPANTHUS UMBELLATUS

BLUE AFRICAN LILY. Bearing clusters of bright blue flowers on stout stalks, similar to the Amaryllis in appearance and culture. A valuable specimen for tub or pot culture. Planted in the fall they will bloom in July and August. \$0.35 \$3.50

AMARYLLIS

BELLA DONNA. "Bella Donna Lily," blush, delicately shaded with pink or light purple, flowering before the leaves appear, very fragrant and fine for cut flowers, lasting fully a week when cut. Plant in a sunny position, leaving the neck even with the surface of the soil.

	Ea.	Doz.
First size	\$0.25	\$2.50

A. JOHNSONII. Striped white on red ground; extra fine. First size 25 2.50

A. VITATTA. Mixed, most beautiful shades; extra choice 75 7.50

CALLA LILLY

AETHIOPICA. The white Calla Lily, or Lily of the Nile, too well known to need further description Ea. Doz.
First size \$0.35 \$3.50
Second size 25 2.50

ELLIOTIANA, THE YELLOW CALLA LILY

This is the finest Calla grown; large, deep, rich golden yellow color. The leaves are spotted with white, habit like our old favorite White Calla. Ready for shipment January 1st. Ea. Doz.

Small size	\$0.35	\$3.50
Large size	.50	5.00

IRIS

GERMANICA (German Iris). Though called German Iris, this is truly the Fleur-de-Lis, the national flower of France.

DOUBLE PEARL. \$0.15 \$1.50 \$10.00

MEXICAN EVERBLOOMING, SINGLE. Delightfully fragrant, very free flowering and of the easiest culture 10 1.00 7.00

STIM-U-PLANT

AN ALL-THE-YEAR FERTILIZER FOR GARDEN AND HOUSE PLANTS

Growers of fine flowers, shrubs and vegetables for the best markets and for exhibition, fertilize and stimulate them frequently, a little at a time. An excellent fertilizer for this purpose is Stim-U-plant, an odorless, highly concentrated plant-food, in tablet form, with guaranteed chemical analysis of 11 per cent nitrogen, 12 per cent phosphoric acid, 15 per cent potash.

These tablets increase production, heighten color and improve quality immediately. Many professional and amateur growers use them extensively all the year round—from early spring until late fall outdoors, during the winter for pot plants, hot-house benches, etc. They are as fine for evergreens and other trees as for all garden and potted plants.

EASY TO USE

Simply insert tablets in soil near plants, or dissolve in water at the rate of four tablets to the gallon and apply as liquid manure. Complete directions with every package.

Order Stim-U-plant tablets with your seed and plant order. Price, trial size, 15 cts., small size, 25 cts., 100 tablets, 75 cts., 1000, \$3.50.

It is estimated that mice and rats consume grain each year in the United States alone to the value of more than \$10,000,000. Most of this waste can be saved if Rax is given a chance.

RAX IS NOT A POISON

While it is absolutely deadly to rats and mice, it is **harmless to human beings, domestic animals, poultry and birds.** It may be used anywhere with complete safety.

Within a few days after eating bait prepared with Rax, rats and mice become feverish and seek the open air where they die—outdoors.

HOW TO USE RAX

Add water to the bottle and shake contents until water is cloudy. Then moisten bait (bread, crackers or cheese) with the mixture and place it near the holes. Rax does not affect the taste of the bait.

Directions are furnished with each package. One bottle is enough for an ordinary house; allow one bottle to each 500 feet of floor space in large barns, mills, etc. Price, 75 cts. per bottle.

HUMOGERM

A SEED AND SOIL INOCULANT

That Increases Crop Production and Greatly Improves the Soil

HUMOGERM IS ECONOMICAL AND EASY TO USE

Humogerm carries the nitrifying bacteria in a porous humus medium which acts as a natural home for them—keeps them fresh, active and vigorous. The ventilated cans are friction top and open easily without cutting.

Place seed in pile, moisten slightly with water and a little sugar, pour on Humogerm, and plant in usual way. This gives thorough inoculation, and is cheaper, safer and better than the discredited, laborious soil transfer method.

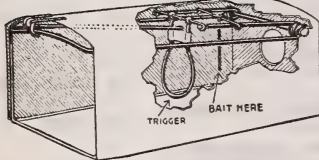

HOW TO ORDER

Specify crop and number of bushels you wish to inoculate. The can unit designations are on the bushel basis; for instance, the 1 bu. size contains sufficient culture to thoroughly inoculate 1 bu. of legume seed, any variety.

Special garden size for peas, beans and sweet peas, 25 cts.

TRAPS—GOPHER POISONS

KNOXALL GOPHER TRAP

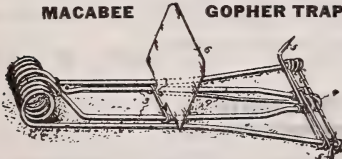

A metal box trap. Very popular and efficient. Each.....\$0.25

WESTERN WOOD BOX GOPHER TRAP

An old but popular and satisfactory style. Each.....\$0.25

MACABEE GOPHER TRAP

The most popular trap on the market. Made of strong steel wire. Each.....\$0.25

GO-FOR-GOPHER

Ready and easy to use. No mixing, no waste, never loses strength. Guaranteed to do the work or your money refunded. The only thing that will get a pocket gopher, and will kill ten where a trap will get one.

Experiments have proven that gophers will eat fruit when they will not eat anything else. For that reason Go-For-Gopher is composed entirely of fruit. No grain.

Go-For-Gopher is manufactured expressly for the German Seed Company and we guarantee its effectiveness.

Not mailable.

6 oz. can.....\$0.35 10 oz. can.....\$0.50

REDDICK MOLE TRAP

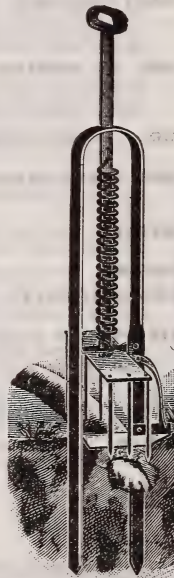

The frame is $\frac{3}{4}$ in. flat steel, has 6 tinned steel prongs $\frac{3}{4}$ in. long Japanned coil spring; length over all, 24 in.; width, 3 $\frac{3}{4}$ in. Nothing better for trapping moles. Each.....\$1.40

WEEDICATOR SURE SHOT

An invaluable remedy against weeds that infest the driveways, orchards and gardens. It will eradicate morning glory. Ground to which Weedicator has been applied cannot be planted for several months.

Quarts 85c.

Not mailable.

EUREKA SQUIRREL EXTERMINATOR

By working the bellows the Carbon Bisulphide generates a gas which is forced into the gopher holes, not forcing any of the liquid. Price \$14.00.

ANTROL

"Universal Ant Control"

A scientific method of ridding the home of ants. By far the most effective system yet devised. Furnished in jars in which the ant poison is placed. Safe, effective and economical. Can be mailed.

These are the poison containers only. The poison can be obtained from any drug store. Carton of 6 jars, \$1.50; carton of 12 jars, \$3.00.

KILMOL

This is a preparation which is recommended by State and Government authorities as being the most effective method for exterminating gophers and squirrels. It is composed of a liquid that gives off asphyxiating gases and also irritant poisons which insure the death of the animals. This material can be applied with either a special pump for that purpose or the waste ball method (Not mailable.) Prices, 1 gallon, \$2.25; 5 gallons, \$8.50. Write for circular. Sent by freight only.

CARBON BISULPHIDE.

This is a liquid which when placed in a gopher or rat hole gives off fumes which are poisonous to these rodents. In the open air there is no danger to the operator. Quarts 60 cents, gallon \$2.25. Not mailable, sent by freight only.

WASTE BALLS

These balls are made of jute and absorb about an ounce of Kilmol or carbon bisulphide. These are placed in the hole and a match applied. This is a satisfactory method during the rainy season. Price 65 cents per 100. \$5.50 per 1000.

BUNT'S RODENT EXTERMINATOR

A cartridge which when ignited gives off fumes poisonous to the gopher. Very effective. Per 125 \$3.50, per dozen 50 cents. Express or freight only.

POISONED BARLEY

Extensive experience with this type of Poisoned Barley has shown an efficiency far ahead of any other type of poisoned grain tested. The percentage of squirrels destroyed is far higher than with any other type of poisoned grain used.

The bitter taste of the strychnine is delayed for several minutes and squirrels can place in their cheek pouches a considerable quantity before any bitter taste is noted; it is then too late for the squirrel to get rid of the poison, as enough has been absorbed to kill the animal.

Prices, 1 pound can 40 cents; 5 pound can \$1.75; 50 pound drum \$10.00; 100 pound drum \$17.50 Not mailable.

INSECTICIDES AND FUNGICIDES

NOTE.—Only items marked "Can Be Mailed" are permitted to go by parcel post, others must go by express or freight.

"CORONA DRY" ARSENATE OF LEAD

We unhesitatingly recommend "Corona Dry" as being the best means of ridding trees and plants of all leaf-eating insects, such as codling moth, potato beetle, cabbage worms, etc. Its superiority as a successful dry powdered arsenate of lead is unquestioned, and for all uses it is far superior in all points to any paste arsenate of lead upon the market. It mixes easily, less freight to pay, economical, and always the same. One pound of Corona Dry will do the work of three pounds of paste and do it better. **Can not be mailed.**

1/2 pound size		\$0.35
1 pound size		.60
5 pound size		2.50

Write for prices in larger quantities.

CORONA BORDEAUX MIXTURE

It is manufactured by the Corona Chemical Company who have so successfully placed Corona Dry among the growers. It is a very fine powder that mixes perfectly with water and is the ideal spray for practically all plant diseases. It can be used also with great success against gum disease of citrus trees by simply adding sufficient water to make a paste. It is also the first successful dusting powder on the market. We unqualifiedly recommend this product as being the best possible. 1/2 pound size 25 cents; 1 pound size 40 cents. **Can be mailed.**

BLACK LEAF FORTY. A solution of nicotine sulphate containing 40 per cent nicotine. The most highly recommended spray for soft bodied sucking insects such as plant lice, thrips, leaf hoppers. Also used for canker and currant worms, cherry slug, etc. Mixed with Lead Arsenate and Lime Sulphur it is at one time a remedy for scab, lice, and codling moth on a tree. Four sizes, 1 ounce bottle 35 cents; 1/2 pound \$1.25; 2 pound can \$3.50; 10 pound can \$13.50. **Cannot be mailed.**

BLACK LEAF NICOTINE DUST. A nicotine dust containing a good percentage of actual nicotine. Very fine and fluffy and will give better results than any other dust. Made by the manufacturers of Black Leaf 40. Recommended for dusting against aphids on all plants. Per can of 5 pounds \$1.25. **Can be mailed.**

BLUESTONE. We carry only a high grade eastern Bluestone. This material is used for making Bordeaux Mixture as a spray for plant diseases, in the chicken house, etc. It is also used as a preventive for barley and wheat smut, by soaking the seed in a solution of one pound to five gallons of water for ten minutes. Per pound 15 cents. Write for prices in larger quantities. **Can be sent parcels post.**

CARBON BISULPHIDE. A highly inflammable liquid used for fumigating stored grain and seeds, to get rid of the weevil. Also used against ants. Pints, 40 cents; quarts 60 cents, gallons \$3.25. **Can be sent by freight only.**

CANCO. The only successful material we know to combat wire worms, mealy bugs and other insects in the ground. Highly concentrated and should be diluted from 100 to 200 times with water. Pints 40 cents; quart 70 cents; half gallon \$1.25; gallon \$2.00. **Cannot be mailed.**

DUCHECO NO. 20. An invaluable preparation for use against slugs, snails, cut-worms and many other surface insects. One pound packages 25c; 2 pounds 40c; 5 pounds 75c. **Not mailable.**

FORMALDEHYDE. It is of pronounced efficiency in destroying disease germs, affecting both animal and plant life, and is a successful preventive of fungus diseases as scab, rust, smut, etc. The dilution used is one pound (pint) Formaldehyde to 25 or 30 gallons of water; 1/2 pound bottle 75 cents, quart bottle \$1.50, gallons \$5.00. **Cannot be mailed.**

LEE'S GARDEN INSECTICIDE. A non-poisonous preparation put out by the Geo. H. Lee Co., the manufacturers of the famous Germozone, etc.

It is an all around preparation, effective against most all garden pests and diseases. Pound 35c.; 2 pounds 60c. **Can be mailed.**

FISH OIL SOAP. An excellent and inexpensive means for killing plant lice and scale insects. Makes a good wash for trees and plants. 1 pound 25 cents. In large quantities we quote very low prices. **Can be mailed.**

FLORAL NICOTINE

Everybody that has a garden knows the green bug or aphid which is so prevalent on rose bushes, etc., in the spring months. Their attack results in weak plants, and in spoiled blossoms. We are now offering to the public this material known as Floral Nicotine, which is the most effective insecticide for this purpose that we know. It is a concentrated material and will give very good results; 25 cents, 50 cents, and \$1.00 sizes. **Cannot be mailed.**

FLYOSAN. An insecticide ideal for household use. Kills flies and fatal to many bugs and insects such as ants, fleas, moths, roaches, bed bugs, etc. We recommend it highly. Pints 75c; quarts \$1.25; gallons \$4.00. **Can be mailed.**

LEMON OIL INSECTICIDE—SCALE KILLER

We are the California distributors for this highly successful material. It has been used in the East for a long time by the florists, nurserymen and private gardeners, who recommend it for destroying scale insects, mealy bug, lice, thrips, etc. It is odorless, non-poisonous, and economical. We are very glad to be able to offer this to the public as we feel certain every user will be highly satisfied.

1/2 pint		\$0.50	1/2 gallon		\$2.25
1 pint		.80	1 gallon		3.75
1 quart		1.25			

LIME SULPHUR (Rex Brand). The best combination insecticide and fungicide on the market. A standard remedy for the San Jose and other scales on deciduous fruit trees. A sure remedy for the pear leaf blister mite and the ovster shell bark louse. In three sizes: pints 25 cents, quarts 40 cent, gallons \$1.00. **Cannot be mailed.**

NICO-FUME FUMIGATING PAPER. A tobacco paper of proven worth for fumigating greenhouses against aphides, thrips, etc. 24 sheet can \$1.25; 144 sheet can \$5.50; 288 sheet can \$10.00. **Can be mailed.**

GERMAIN'S ROSIN WASH. This spray is recommended by most horticultural authorities as being the best insecticide for scale insects. It is an improved form of the well-known Resin Wash, and is far more convenient to handle and on account of its greater concentration is more economical. In pounds, thirty-five cents; two pounds at sixty cents and three and one-half pound cans at ninety cents. Also larger sizes. The pound can makes two and one-half gallons of spray. **Can be mailed.**

SOLUBLE SULPHUR COMPOUND

SOLUBLE SULPHUR is very penetrating—going through and through all scale and insect crusts; whereas the lime in the lime-sulphur solution solidifies and neutralizes the sulphur, forming a harmless crust or up the surface of the tree, preventing the normal function of bark and leaves, but cleans the surface from all such hindrance to tree growth.

A 100-pound drum of Soluble Sulphur is equal to a 600-pound barrel of lime-sulphur solution; effecting a saving of 500 pounds in shipping and handling weight.

It is used as a liquid spray as an insecticide and fungicide the same as lime sulphur for most all purposes.

100 pound drum		13.00
10 pounds		2.50
1 pound		.35

Small sizes can be mailed.

TALBOT'S INSECT POWDERS. This is a complete line of insecticides for the most common insects about the home. The ant powder, the bed-bug, the fly, and also the roach, are by far the best and most effective insecticides of their kind. Sold on a guaranteed basis. In twenty-five, fifty, and dollar size cans. When ordering specify particular insect. **Can be mailed.**

ANCHOR SULPHUR

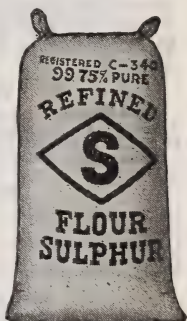

It has been proven and so recommended by the University of California that if you sulphur your grape vines and orchards six times they will not be affected by Mildew or Red Spiders.

Anchor Brand Velvet Flowers of Sulphur, packed in double sacks the fluffiest and purest sulphur that money can buy; the best for vineyards; the best for bleaching purposes, leaving no ash. Per lb. 10 cents; \$5.40 per sack of 110 lbs.

DIAMOND "S" SULPHUR

For Lime-Sulphur Solution, use our Diamond "S" Brand Refined Flour Sulphur. We can furnish you this sulphur at such a low price that it would pay you to mix your own solution and net you a profit equal to the amount paid out for labor in spraying your orchard, even if you pay your men \$4 per day for making the solution and applying same.

To create additional available plant food, drill into the sod 100 to 400 pounds per acre Diamond "S" Brand Powdered Sulphur, 100% pure. This has increased various crops up to 500%. Per sack of 110 pounds \$3.80.

TOBACCO DUST

Used as a dust for lice on rose bushes. Per pound 15 cents; 5 pounds 65 cents. **Can be mailed.**

TREE TANGLEFOOT. For protecting trees against climbing insect pests in a simple, economical and effective way, use Tree Tanglefoot—a sticky substance applied directly to the bark of trees. One application remains sticky on the trees three months fully exposed to the weather. Easily applied with a small wooden paddle; 1 pound will spread 8 feet long by 5 inches wide, 1-16 inch thick. Will stay on trees three months. 1 pound can 55 cents, 5 pound cans \$2.50, 10 pound cans \$4.75. **Mailable.**

NURSERY AND ORCHARD SUPPLIES

HOTKAPS

TRADE MARK

A new invention that is taking the market gardeners by storm. So constructed that the wind cannot blow these plant covers away, because the machine places dirt around the edges. They are already folded ready for use. One man can do the work of four. After setting, the field looks uniform, like a well kept garden. Price per 1,000 \$6.25. Machine for setting and carrying covers \$4.50. Write for prices in larger quantities.

MOSS

Moss Green. Fine and fresh. Is not stained. The best for hanging baskets. Per pound 30 cents. Quantity price on application.

PABCO PRUNING PASTE

In the pruning of trees, when the limbs are sawed off, the woody structure is left exposed. This wound is a possible gathering place for fungus growths and insects. Pabco Pruning Paste, if applied to the saw cut as soon as possible after pruning, insures successful healing.

Price, quarts 50 cents; gallons \$1.80.

BUDDING CLOTH

A cloth treated with resin and beeswax, useful for all budding and grafting purposes. Put up in 1/2 square yard and 1 square yard. The prices are respectively 40 cents and 75 cents.

WIRE HANGING BASKETS

(Round)

8-inch 60 cents, 10-inch 70 cents, 12-inch 85 cents, 14-inch \$1.00

WIRE HANGERS

Wire hangers for hanging wire baskets and also for the hanging flower pots, 30-inch lengths, 10 cents each.

WIRE WALL POCKETS

8 inch 65 cents, 10 inch 80 cents, 12 inch 90 cents, 14 inch \$1.00.

GRAFTING WAX

A Lion Brand preparation for healing wounds on trees, caused by pruning. Very excellent also for spreading around the graft in grafting propagation. Three sizes: pound 60 cents, 1/2 pound 35 cents, and 1/4 pound 20 cents.

FRESNO DUSTER

The most efficient knapsack duster on the market. Price.....\$19.00

THE FEENY DUSTER

The most satisfactory small garden duster ever put out. Very satisfactory. Price each \$1.25

DEMING SPRAY PUMPS

"PRIZE" SPRAYER, FIG. 669 For Garden and Greenhouse Spraying

Without some type of bucket spray pump, no assortment of garden tools may be said to be complete. The "Prize" is much used for spraying small trees, garden truck, flowers and shrubbery; washing windows, porches, autos and buggies; applying whitewash and disinfectants in barns and poultry houses; applying cattle-fly oil, stock dip, etc.

This is our lowest priced spray pump, but it is often referred to as "much in little." The "Prize" is double acting, discharging one-half the solution on both the up and down stroke, giving a continuous spray. It is light, easy to carry, and is "built for business." will develop a good pressure, is easy to operate, is practically non-breakable and will last for years.

Shipping weight 9 lbs.

"Prize" bucket pump, as illustrated... \$6.00
With "Bordeaux" nozzle instead of "Acme"..... 6.50

"SUCCESS" SPRAYER, FIG. 659 For Garden and Greenhouse Spraying, Etc.

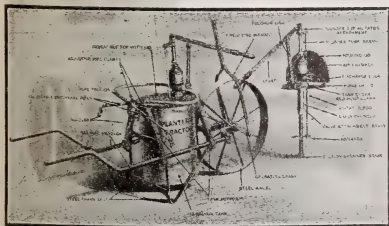

Without doubt, this is the most popular bucket spray pump on the market. Hundreds of thousands of them are today in use all over the civilized world. It is similar to the "Prize" pump, except that it has a large brass air chamber, which acts as a cushion while the pump is operated, and delivers a more uniform stream.

For spraying a small number of trees, for flower and vegetable gardens, greenhouses, etc., it is practically indispensable. The "Success" is also widely used for washing windows, buggies and autos, for applying whitewash and disinfecting barns and poultry houses, also for applying cattle-fly oil, stock dip, etc. An easy working, powerful pump, will last a lifetime if given reasonable care.

Shipping weight 10 lbs.

Each..... \$7.50

"PLANTER'S TRACTOR", FIG. 822

For spraying garden and field crops two rows at a time, this is a splendid machine. It is a "one-man power" outfit, in which the pump is automatically operated from the wheel. Operates under 40 pounds pressure when pushed at ordinary speed.

When used for tree spraying only the crosshead pin and connecting rod should be removed from the axle and pump lever, reversing the pump and tank.

Shipping weight, about 150 pounds.

Fig. 822—"Planter's Tractor," complete with galvanized tank..... \$42.50

"PERFECT SUCCESS" SPRAYER, FIG. 689 For Spraying Small Fruit Trees, Gardens

Fig. 689—The "Perfect Success" spray pump has some advantages over the "Success" pump in that the adjustable foot rest is combined with a bucket clamp. By means of this device, the pump and bucket are rigidly fastened together so the whole outfit can be carried from place to place by the bail when bucket is filled with mixture. Except for the combination clamp and foot rest the pump is the same as the "Success," and it has 4 feet of discharge hose instead of 3 feet. The bucket is not furnished but is illustrated to show how the outfit is used.

Shipping weight 12 lbs.

Each..... \$8.00

"AEROSPRAY", FIG. 663 For Garden, Vineyard and Greenhouse

The "Aerospra" is the best and most durable compressed air hand sprayer on the market. It is convenient in all respects. If the plunger is removed from the cylinder, it can be replaced without interference with the crimped plunger leather by placing it in the recessed cap of tank until the cap is attached again ready for operations.

The straps are for carrying it on the shoulders—or it can be carried by the handle, when carrying lock is attached—The operator can pump up and spray at rest, until the reduced pressure requires pumping again. The tanks are tested up to 100 pounds pressure—more than twice the pressure which is obtained by the average operator. The sprayer is patented and the name "Aerospra" is a registered trademark.

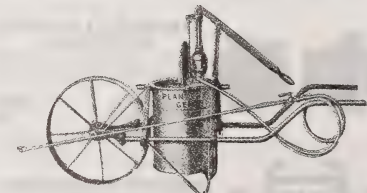

Shipping Weight—When boxed with all parts snugly packed the weight is about 20 pounds.

Fig. 663—"Aerospra" with brass air pump and brass tank, as illustrated and described..... \$14.75

Fig. 663—"Aerospra" as above, but with galvanized steel tank..... 10.00

Fig. 663—Brass with Adjustop Lance..... 15.50

"PLANTER'S GEM" SPRAYER, FIG. 821 For Garden and Small Orchard Work

This is a spraying outfit of the wheelbarrow type, which fills a want among gardeners and planters for a one-man operated sprayer. Nothing of the kind that has ever been put on the market so completely meets this demand. The outfit is well designed and constructed, convenient for the operator, built for durability, and is as light in weight as is consistent with strength of the assembled parts. All working parts of the pump coming in contact with the liquid are brass.

Shipping Weight—When crated, is about 140 pounds.

with galvanized tank..... \$38.00

KNAPSACK SPRAYERS, FIGS. 675, 654 For Garden, Vineyard and Greenhouse

Fig. 675—The "Success" Knapsack sprayer (the cut to the left) is a useful implement for the florist and grower of vegetables and small fruits. As a vineyard sprayer it is much used, but sprayers of large capacity are now more in use for this purpose.

Fig. 654—"Prize" Knapsack sprayer (cut to the right) is similar to Fig. 675, except that the tank is of galvanized iron, and the "Prize" pump is used.

Shipping Weight—The weights boxed for shipment are about 40 pounds.

Fig. 675—With brass tank as described..... \$20.00

Fig. 654—With galvanized tank..... 15.00

"GARDENER'S CHOICE" SPRAYER, FIG. 651

For Garden and Field Work, Small Orchards, Etc.

This is one of the most convenient spraying outfits for general use. As an all-round utility sprayer it cannot be beaten. It is particularly adapted for both the garden and greenhouse, also for orchard use, as well as for spraying livestock in the barn and livery stable. It is a splendid whitewashing outfit, as the pump is strong and durable and has a good agitator.

Shipping Weight, including cart, when crated, is about 120 pounds.

Fig. 651—"Gardener's Choice" as described above..... \$36.50

"PLANET" COMPLETE SPRAYING OUTFIT, FIG. 740 (Pump only is Fig. 763, listed below) Another Complete Outfit Mounted Ready for Use

Many fruit growers prefer to purchase a spraying outfit complete with equipment and which can be easily connected to gasoline engine if desired. For the convenience of such users and our dealers we have produced the "Planet" complete spraying outfit. Fig. 740, the "Planet" outfit, is composed of "Planet" spray pump, Fig. 763, No. 1 (listed below), with equipment as shown.

Shipping Weight—Crated, about 275 lbs.

TOOLS AND IMPLEMENTS

GERMAIN'S AUTOMATIC LAWN WEEDER

The Germain Automatic Lawn Weeder will kick out clover, bunch grass, dandelions, watercress, in fact, all weeds that a lawn may be infested with.

A little girl with a Germain Automatic Lawn Weeder can easily do the work of three or four men in weeding a lawn and do it better. And she does it standing in an upright position. No stiff back, no sore knees, no soiled hands. She could weed the lawn in her evening gown without soiling her hands.

All you have to do is firmly grasp the handle of the Germain Automatic Lawn Weeder, put point of weeder against weed, place foot against foot rest, do not move foot, just pull handle towards you, using foot as a pivot and the weeder will automatically kick the weed out.

There are no complicated parts, no knives to sharpen, nothing to get out of order. It's fool-proof.

Price, \$1.75 each, postpaid

The Multitool

Wherever hand cultivation is required—by you in your garden, or the hiring of labor on large tracts—you will find the MULTITOOL the most economical in money, time, and labor savings.

The MULTITOOL consists of 5 Reversible and Interchangeable blades, combining 18 cutting edges, together with a Universal joint at the end of a 5-foot handle. Total weight of the handle and 5 blades is 3 lbs. The blades are made from Sterling 85-point carbon steel, heat treated, making the blades hard yet exceptionally strong.

When used for cultivation the saw-tooth construction of the blades cuts all the weeds with very little resistance and leaves the surface of the soil in an exceptionally satisfactory condition. One man with a

MULTITOOL will accomplish twice the work of one man with a hoe.

It is also used as a garden rake, a thinning tool, sidewalk trenching tool, as a scythe for cutting large weeds and grass, as a hand cultivator and soil pulverizer, and entirely displaces many other small tools.

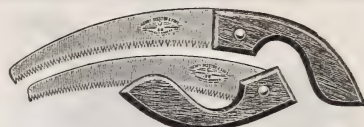

The MULTITOOL enables you to do all close work from a standing position thus avoiding back and leg ache and that tired uncomfortable dizzy feeling.

FARM AND GARDEN TOOLS

NO. 4 COMBINED SEED DRILL, SINGLE WHEEL HOE CULTIVATOR AND PLOW

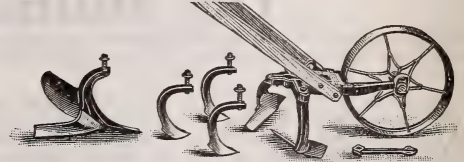

This is the most popular combined tool made. It combines in a single implement, a first-class hill-dropping seeder, a single wheel hoe or weeder, a cultivator and a plow. As a wheel hoe it is identical with the "Planet Jr." No. 17 Single Wheel Hoe, the very best machine on the market. Price complete \$20.75. As seeder only \$16.75.

NO. 20 SINGLE WHEEL CULTIVATOR

This is the handiest and most efficient Cultivator. By reason of the special patented shape of the shank or upright, the attachments always set at the same angle whether used for deep or shallow work. The bent oak handles may be instantly adjusted to suit the height of operator or to regulate depth for tools to run by loosening one wing nut—wrench not required.

Weight crated, about 18 lbs. Price each.. \$5.00

NO. 17 SINGLE WHEEL HOE, CULTIVATOR AND PLOW

The No. 17 Planet Jr. has a pair of 6 inch hoes, a plow, and a set of cultivator teeth, an outfit sufficient for most garden work. Price, \$8.75

NO. 22 SINGLE WHEEL CULTIVATOR

With three steel shovels, one pair steel hoes, one large diamond or mold-board, with landside of special design.

Weight crated, about 20 pounds. Price each \$8.25

FOODS FOR POULTRY

PLEASE WRITE FOR PRICES ON FEEDS OF ALL KINDS — SEND FOR FREE LITERATURE

REMIUM SCRATCH FOOD

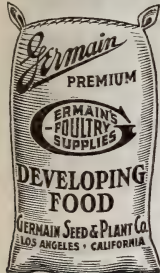

Premium Scratch Food is an ideal grain mixture making a balanced ration. The ingredients are correctly balanced so as to meet conditions extending throughout the entire year, including the laying period, moulting period, etc. It affords a wide variety of wholesome ingredients, being made up of different grains, sunflower seed, bone, etc. It meets the requirements of the fowl and insures a liberal egg production. A good scratch feed insures one of always feeding correct rations. Prices on application. A good scratch feed insures one of always feeding correct rations. Prices on application.

GERMAIN'S PREMIUM DEVELOPING FOOD

is an important factor to the poultryman. When the chicks are from six to eight weeks old they require a well balanced grain food. All the ingredients of Germain's Premium Developing Food have been carefully selected as regards size, adapt ability, etc. It insures a natural, even growth with uniform feathering. Write for prices.

GERMAIN'S PREMIUM PIGEON FOOD

The organism of squabs or pigeons is extremely delicate, and in feeding must be catered to as such. For success in the raising of these birds all efforts should be directed toward increasing the weight. This requires the selection of proper ingredients, each capable of upbuilding certain tissues and muscles, also promoting a healthy and rapid growth. In Germain's Premium Pigeon Food will be found ingredients of high protein content, such as Canadian Field Peas, or Soy Beans, Buckwheat, Vetches, Hemp Seed, Red Wheat, Kaffir Corn, Millet, and a number of other sound grains, all chosen because they are known to meet the needs of the pigeon. Write for prices.

GERMAIN'S PREMIUM HEALTH GRIT

The demands of the pigeon's organism exact certain ingredients which might not wholly agree with other fowls. Therefore Germain's Premium Health Grit (for pigeons) has been especially compounded and contains such foods as charcoal, salt, iron, grit, etc. It contains everything that the pigeon needs. If you are raising pigeons either fancy or for market, you cannot afford to neglect giving them Germain's Premium Health Grit. Write for prices.

GERMAIN'S CLUB PIGEON MIXTURE

Our Club Pigeon Mixture is made up according to a formula given us by the members of the Los Angeles Pigeon Club. This mixture is similar to our Premium Pigeon Food, only does not contain corn.

BLATCHFORD'S MILK MASH. No more bowel trouble, leg weakness or white diarrhea. Try a bag of this complete milk substitute, which nourishes all kinds of young poultry the same as pure whole milk, at half the cost. Five pounds will raise a chick to the age of three months. Write for prices.

BLATCHFORD'S CALF MEAL. Just the thing to raise or veal your calves right from birth. Then sell your milk and get the benefit of the high creamery prices. **No more scouring calves!** It is absolutely the only milk substitute containing all the elements necessary for rapid and healthy growth, and the only calf meal that is thoroughly cooked and prepared for digestion. Being the original and best, it will push your calves forward better and quicker than any other food. Sold in 100- and 25-lb. bags. **100 pounds make 100 gallons of Complete Milk Substitute.**

BLATCHFORD'S PIG MEAL

Wean your little pigs easily, safely and cheaply on **Blatchford's Pig Meal.** From **Pig-hood to Pork-age** it gives big bone and solid flesh. Prevents loss of growth and vitality during the critical weaning period, and always **makes the runts catch up.**

BLATCHFORD'S LAMB MEAL

For baby lambs: it is a complete equal for the ewe's milk—a steam cooked milk substitute. Because of their tender digestive organs, baby lambs always require a careful weaning. **Blatchford's Lamb Meal** is an ideal ration as it matures them quickly and prevents scours and set-backs. **Sold in 100-lb. bags.**

BLATCHFORD'S RABBIT MEAL. There are many different ways of feeding rabbits, but when it is all summed up, the proper food for them is **Blatchford's rabbit meal** which is a preparation of properly balanced ingredients to insure the rabbit perfect health, rapid growth and plumb flesh. It is not only good for the meat-producing varieties, but for the fur-bearing sorts as well.

SPRATT'S COOKED POULTRY AND GAME FOODS

Spratt's Poultry Food, No. 3 (for grown birds). A cooked food, baked and granulated. As an egg producer and conditioner of Show Birds this food has no equal. Used by breeders of high-grade poultry the world over. It is no exaggeration to say that a majority of the prize-winning birds at leading shows have been conditioned on it. See directions for mixing below.

Prices—100-pound bags, **\$10.00**; 50-pound bags, **\$5.10**; 25-pound bags, **\$2.60**; 10-pound, **\$1.15.**

Spratt's Chick Meals, No. 5 and No. 12. (For the little chicks). These foods are composed of cereals, meat, vegetables and other nourishing ingredients essential to young chicks. By starting your chicks on Chick Meal you thereby reduce mortality among them to a minimum. Used and recommended very highly by leading poultry fanciers. Prices—100-pound bags, **\$10.00**; 50-pound bags, **\$5.10**; 25-pound bags, **\$2.60**; 10-pound bags, **\$1.15.**

DIRECTIONS FOR MIXING SPRATT'S COOKED FOODS

Take four parts food to three parts hot water or milk. Mix well, and let stand until cold. Sprinkle over a little **Spratt's Crissel** and it is ready to feed. Feed cold always. The food, when ready for feeding, should be **crumbly moist.** Neither too wet nor too dry.

SPRATT'S CRISEL

(Best meat). This preparation is very rich in protein and is a substitute for insect life and ant's eggs. It is used by many successful breeders of pheasants and poultry because of its quality and can be used in connection with **Spratt's** various poultry foods and pheasant meals by sprinkling a quantity of it over the food after it is mixed.

Prices, 100-lb. bags, **\$9.80**; 50-lb. bags, **\$4.90**; 25-lb. bags, **\$2.50**; 10-lb. bags, **\$1.10.**

EGG FOOD

Coulson's Egg Food is manufactured in Petaluma, Cal., where there are more chickens than in any other equal area in the world. It is the best and only successful balanced ration for Dry Hopper Feeding; is best when kept before the fowls dry in the hopper all the time. It may also be fed wet as a morning mash, whether for Chickens, Pullets

Hens, Cockerels, Capons, Ducks, turkeys or Geese. All the ingredients it contains are of the best, and it is therefore especially valuable as a food for breeding fowls and ducks. Prices on application.

SPECIAL CHICK FOOD

Coulson's Special Chick Food contains the ingredients that are best adapted to give nourishment to the growing chicks. Sweet, tender seeds, cracked grains, blown free from dust, cut oat meal, tiny pieces of cooked and dried meat, and particles of fresh cut bone charcoal, burnt bone, etc.

Write for prices.

GROWING CHICK FOOD

Coulson's Growing Chick Food is a balanced ration of cracked grains, seeds mill feeds, meat and bone meals, carefully mixed according to a formula which has been compiled only after much experimentation.

It contains everything that a young chick requires up to three months old. Write for prices.

COULSON'S TURKEY FOOD

Turkeys are one of the most delicate varieties of fowls, and consequently their food has to be very carefully prepared in order to insure the best results and carry them over their most delicate period. **Coulson's Turkey Food** is made from a formula which is proven. It has stood the test for many years and is extensively used in the Imperial Valley where most of the California turkeys are raised and where the finest turkeys for the high-class trade are produced.

BABY CHICK MASH

This is a buttermilk mash especially adapted to baby chicks from the time they are hatched until they attain an age of about six weeks. The tender foods used in its manufacture are combined scientifically to supply every need of the baby chicks. Write for prices.

STOCK SALT

Take either rock salt or a salt lick and put it in a box or keg anywhere in the feed lot or shed where every animal can help itself, but where rain and weather won't waste it. Just see that a quantity of salt is where the stock can reach it any time, and then think no more about it.

Dairy Salt, 50-lb. bags, **\$1.75** per 100 lbs.

LESLIE'S SALT LICKS

This popular Salt is furnished in two ways, the plain brick, weighing 5 pounds, for the manger, and the wire loop for hanging. Indispensable for stock.

Plain Bricks, **\$0.25** each
Wire Bricks, **.30** each

Lee's Louse Powder is big value in both size and quality. 1 1/4-lb. pkg. for 30c; 3-lb. 60c. Round sprinkler top cartons. Very effective.

LEE'S LICE KILLER

Lee's Lice Killer has been for twenty years the poultryman's standby in keeping chickens and poultry house free from lice, mites and scaly-leg. A liquid, simply painted on roosts. Sizes, 60c, \$0.90 and \$1.50.

LEE'S WHITE DIARRHOEA REMEDY

This is a good medicine for any form of bowel complaint in chicks or fowls and for the treated white diarrhoea is the only really satisfactory treatment that has come to our notice. In 25c and 50c sizes.

REMEDIES AND DISINFECTANTS

DEVONSHIRE'S EARTH SALT

For Stock and Poultry

WHAT ARE EARTH SALTS?

The elements which have been commonly recognized as "inorganic matter" or those "represented by the compounds of soda, lime, magnesia, iron, potash, and silicon, as made up by the union of these, with sulphur, phosphorus, chlorine, fluorine, and oxygen, making twelve mineral compounds, commonly known as "tissue salts."

We find that the different forms of life are represented by individual life units, and each unit is made by nature capable of drawing its life from the elements of nature designed to be life perpetuating, and can only be taken into its organism through that upon which it feeds.

This being true, it is of the most vital importance to have an evenly balanced ration, and, as it has been "taught until recently that the albumins or, properly speaking, the proteids, from the physical basis of life," we have been feeding those elements to excess, with the result that we have our fowls so fat that they cannot produce eggs, or on the other hand there is an absence of the mineral matter in the food to such an extent that there is no gastric juice to assimilate the food, and the animal or fowl will languish and die.

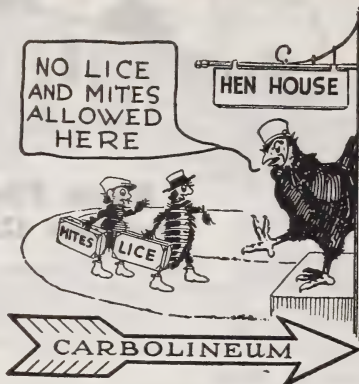

Having ascertained that the shortage is in the "tissue salts," we copy nature by taking the twelve "tissue salts," and combining them in the same proportions in which they are found in the average food-stuffs, we add them artificially to the food, and find that the same chemical action is set up in the stomach, after contact with the gastric juice, as is set up by the natural salts in the food. It applies to every form of animal life.

Earth Salts being the natural Body Builders, should be made a part of the regular ration every day. This method, continued, will cause your stock and poultry to be immune from disease, and while it will overcome disease after it has fully developed, it is better to make it a regular portion of their diet, and in that way you will ward off disease, having strong, vigorous stock, and get the very best results at all times.

Many of the leading stock breeders of the west and central west are using "Devonshire's Earth Salts" with the greatest success, and a few statements from parties well known in Southern California, are herewith given. The original letters can be seen in our office.

Prices, 75c and \$1.50 cartons; 10-lb. \$4.50.

ARROW CARBOLINEUM

A single application of Arrow Carbolineum, however, will be sufficient to destroy and eradicate mites from a poultry house for a whole year or more. It kills every louse or mite it touches. It can be used with a brush or a sprayer and will readily penetrate all cracks and crevices and thus reach the mites at close quarters.

We guarantee that one thorough application of Arrow Carbolineum, either by brush or sprayer, to the interior walls of a hen-house or barn, after a previous cleaning, and no matter whether they consist of wood, tar paper or plastering, will exterminate the vermin in same for a whole year.

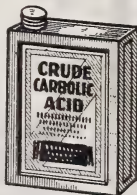

Quarts, 65c; gallons, \$2.00; 5 gallons, \$9.00

CRUDE CARBOLIC ACID

This well known disinfectant and germicide is extensively used in white-wash and also in crude oil and distillate for spraying poultry buildings and roosts.

It is also largely used undiluted as a preservative of timber. Before setting posts for poultry yards in the ground it is well to dip the ends in Crude Carbolic Acid, which insures them for an indefinite period from rotting.

Prices, f. o. b. Los Angeles: Quart can 60 cents, 1 gallon can, \$1.25, 5 gallon can \$5.00.

PREMIUM INTESTINAL CLEANSER FOR POULTRY

Formula of A. M. Pollard, Former Extension Instructor in Poultry Husbandry at Delaware Agricultural College.

Intestinal worms are the cause of most of the diseases of poultry. This Cleanser does not expel the worms, but causes them to be digested, thereby retaining in the birds all of the elements previously taken from the birds. In expelling these worms all of the elements are lost.

This positively will cleanse the intestinal tract of all kinds of worms and insure perfect health and more eggs.

Price, 35c per lb.; 5 lbs. for \$1.50.

BUHACH

Buhach is an insect powder that will get rid of house flies, ants, bedbugs, fleas on dogs and cats, lice on chickens and rabbits—in fact it will drive out many insect pests. It is a necessity in every house, as it protects from loss and adds to the comfort and peace of the residents. In 25c, 50c and \$1.50 packages.

KOW-KARE

Both need Kow Kare

Kow-Kare is one of the most liberally advertised of cow remedies and through its splendid reputation, gained by giving satisfaction for over a quarter century, it is an item that moves with a minimum of effort.

Kow-Kare has positive medicinal qualities that act upon the organs of production and reproduction, making them function properly. It is widely used as a preventive of disease, and is especially effective in removing such ailments as Scouring, Lost Appetite, Bunches or Red Water. For the treatment of Abortion, Barrenness, Retained Afterbirth or Milk Fever it has no equal. Its use upon "poor milkers" will usually increase the milk flow from 10 to 20 per cent. Price, 65c and \$1.25.

Be sure and send for Latest Edition of The Home Cow Doctor—FREE.

BAG BALM

A Great Healing Ointment

Bag Balm is a most effective remedy for chafed bags, cow pox, chapping, bunches, inflammation, chafing, extreme soreness and tenderness. It is invaluable in relieving any udder trouble. Also used for cuts and bruises. Fever spots are cooled and inflammation is allayed almost immediately. It keeps little hurts from getting big and is a great aid around the calving period. Price, 60c per package.

AMERICAN HORSE TONIC

We recommend American Horse Tonic as a general improver for horses. Hundreds of users tell us that horses look better, feel better, act livelier, are full of snap and ginger when they are given it. Besides this, we recommend it as a worm expeller, for lost appetite, rough hair, coughs, inflammation of lungs and bowels, stoppage of water, recent foundlers, distemper, etc. Price, 65c per box.

HORSE COMFORT

We recommend Horse Comfort for all flesh wounds, wire cuts, galls and sores of long standing, for blood poison, proud flesh, scratches, mud fever, for snag wounds, sore shoulders, grease heel, malignant ulcers, fistula, poll evil, corns in horses, etc. We claim that Horse Comfort has won the right to the name—"The World's Greatest Healer." Price, 30c and 61c per bottle.

GRANGE GARGET CURE

We recommend Grange Garget Cure for that serious disorder so peculiar to cows, garget, or the hardening of the udder. Inexperienced people often mistake it for caked bag, bunches in bag, etc. Remember it is a separate disease, with its own peculiarities, causes and remedy. Twenty-five years use by dairymen and farmers proves the economy and value of using Grange Garget Cure. Price, 65c per can (enough for 15 cases.)

CARBOLA—The Disinfecting Germ-Killing White Paint

Carbola saves time, money and labor—it paints and disinfects at one operation. It is a finely powdered mineral pigment combined with a germicide 20 times stronger than pure carbolic acid—but is neither poisonous nor caustic. Carbola makes everything clean, white and absolutely sanitary. It stays white and has no disagreeable odor. Use Carbola instead of whitewash on poultry houses (inside and out), dairies, outhouses, hog pens, etc. By disinfecting and painting at the same time Carbola reduces labor costs—the big expense item on the farm—and gives much better results than whitewash.

WILL NOT BLISTER, FLAKE OR PEEL OFF

Carbola can be put on with a brush or with a spraying machine. It will not blister, flake or peel off no matter how many coats are put on. Carbola can be applied to wood, brick, stone or cement, plaster board, tar paper, or over whitewash or oil paint surfaces.

Carbola is an efficient and economical aid to the dairyman. It keeps the stables clean and sanitary and kills fly eggs, prevents germs and disease from getting a start in the herd. Carbola can be sprinkled or sprayed onto cattle and brushed through the hair to kill lice. It can also be sprayed on the floor and in the manure drain. Used on the walls it will keep stables clean, sweet smelling and sanitary.

The most troublesome of all external parasites on poultry is the common chicken mite. Mites multiply very rapidly and often cause serious losses before their presence is discovered. They sometimes become so numerous they kill some of the flock, and their presence always reduces egg production, and affects young chickens so they fail to make a normal growth. Other times the mites are not so numerous as to injure the hen, but prove deadly to the little chicks.

Prices, sample pkg., 35c; 10-lb. pkg., \$1.50; 50-lb. pkg., \$6.25.

RABBIT REMEDIES

RAISE MORE RABBITS

The rabbit industry on the coast is progressing with leaps and bounds, but there is room for many times the present output. The successful breeders state it is the coming business to supply the markets with meat of the most nutritious kind, the profits are good, and the demand excellent for fryers, broilers and mature stock for breeding purposes. In addition there is a ready sale for the pelts if properly attended to after they are taken off the carcass.

Some breeds are very desirable for meat purposes, as the young ones grow rapidly to broiler and fryer stage with a maximum of flesh. Others are suitable for the pelts to use in the fur industry, on account of the hair having good staying power after the skin is cured.

SALT SPOOLS

Salt is as of vital importance to the Rabbit as it is to all other animals. Salt Spools are a convenient form, which can be hung in the rabbit hutch. Price, 10c each.

BARNES RABBIT REMEDIES

Barnes Anti-Diarrhoea. Diarrhoea should be curbed as quickly as noticed. Not only does this disease incur unsanitary conditions but is disagreeable for those working about the animals. Treatment is simple and there is no reason why a remedy should not be given, especially when of reasonable price besides being extremely effective. Price, 35c, 50c and \$1.00.

Barnes Anti-Slobber. Slobbers is a disease which has baffled many rabbit breeders and many remedies have proved ineffective. Barnes Anti-Slobber was used on advanced cases during its manufacture until a perfected remedy resulted. The disease is characterized by a constant flow of saliva from the mouth, wetting the fur on the chest, jaw and lower down on the legs. Prices, 35c, 50c and \$1.00.

Barnes Liver Tablets. This remedy is used in cases of diseased liver, constipation, pot belly, etc. When the rabbit appears lifeless and lacks energy it is doubtlessly caused directly from a disordered liver. Barnes Liver Tablets will relieve such conditions. Price, 50c.

LYON ELECTRIC BROODER

A Perfect Brooder

An important feature in the economy and upkeep of these improved brooder is that all air is evenly heated by scientifically designed units, and the ventilation is drawn evenly from all parts of the brooder so there are no dead spots. The heating units heat at a very

low temperature and are the longest lived unit on the market. The large heating units will insure sufficient heat so the brooders may be used in any of the northern states.

GERMAIN'S SAN DIEGO HEATER A Fresh Hot Air Heater

This Heater is based on a new principle and is by far the most perfect Heater on the market. On account of its ventilating system the chicks are always furnished with clean fresh air heated to the proper temperature before reaching the hover proper. By the same system the foul air is discharged continuously, thus always leaving the chicks in a clear atmosphere.

QUEEN INCUBATORS

SEND FOR QUEEN INCUBATOR CATALOG

For fifteen years Queen Incubators have been regarded by poultrymen as the high-grade moderate-priced line of America. In the Queen, you have the very best incubator that could possibly be built.

THE BABY QUEEN

No. 1—85-Egg Capacity
Each, \$29.50

Floor space, including lamp, 23x28 inches.
Egg tray, 16½x18½ in.
Shipping weight 80 lbs.
Just the right size for those who keep only a few chickens, or for the fancier to use for small select hatches.

THE BEGINNER'S QUEEN

No. 2—135-Egg Capacity
Each, \$39.75

Floor space, including lamp, 28½x33 in.
Egg tray, 21x24 in.
Shipping weight, 95 lbs.
The size meets the requirements of the small poultry raiser and farmer, which explains its enormous sale. It only requires the output for a few days of a small flock of layers to fill it. A mighty good machine for raising a small flock.

FARMER'S FAVORITE QUEEN (But Thousands are Sold in Towns)

No. 3—180-Egg Capacity, Each, \$47.90

Floor space, including lamp, 30½x35½ inches
Egg tray, 24 x36 inches
Shipping weight, 105 pounds

Just a good average size, not too small for the larger poultry raiser, nor too big for the small one.

Write for Prices

THE "DUCK" QUEEN

No. 4—275-Egg Capacity, Each, \$61.00

Floor space, including lamp, 34½x45½ inches
Two egg trays, 16½x30 inches
Shipping weight, 142 pounds

So many of our customers are buying this size to use for hatching ducks, that we call it the "Duck" machine. However, it is just as good a chicken hatcher as a duck hatcher, and is used by many big poultrymen.

THE MONEY MAKING QUEEN

No. 5—400-Egg Capacity, Each, \$72.25

Floor space, including lamp, 34½x63 inches
Three egg trays, 16½x30 inches
Shipping weight, 185 pounds

For broiler farms and people who go in strong for chickens, this size is a general favorite. It produces big hatches of the right kind of chicks.

STYLE K QUEEN INCUBATORS

The Style K line of Incubators is not of the same high standard as our Queen line, in material nor workmanship, but they embody all the principles that have made the Queen line so successful and famous.

However, they are good substantial machines, built to sell at a lower price to people to whom price is an important consideration.

The regulator is the same as the Queen, except of lighter construction, and has a three-inch brass wafer.

No. 20—70-Egg Capacity
Each, \$17.75

All Copper Tanks and Heaters

Floor space, including lamp, 23x28 inches.
Egg tray, 16½x18½ in.
Shipping weight, 46 lbs.
This little machine is a wonder for the money. It is not so thoroughly constructed, nor so completely equipped as the regular Queens, but it is made of California Redwood, has a copper heating system, and a special Queen Regulator. It will serve the need of those who want to get into the poultry business on a small scale economically.

No. 21—130-Egg Capacity, Each, \$29.50
No. 22—220-Egg Capacity, Each, \$39.50

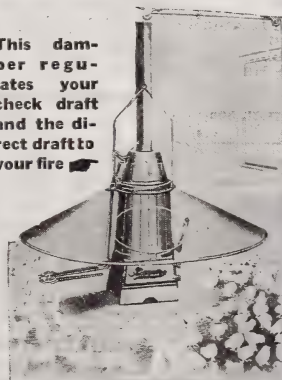

No. 25—600-Egg Capacity, Each, \$108.50

Floor space, including lamp, 34½x81 inches
Four egg trays, 16½x30 inches
Shipping weight, 248 pounds

QUEEN BROODERS

THE "QUEEN" IS THE ONLY BROODER STOVE WITH AUTOMATIC CONTROL OF BOTH CHECK AND DRAFT

This damper regulates your check draft and the direct draft to your fire

The "Queen" Colony Brooder is a new and improved design of Brooder Stove. It is made of highest quality iron castings that will wear and last indefinitely.

There are no drafts on the smoke pipe of the "Queen". The check rests on top of the Stove and opens outward when fire is too warm, thus giving a gentle inflow of air to retard the heat. While the opening of the draft to increase the fire is located at the top of the Stove, it opens into the fire at the base through an opening extending down the side to the bottom. This feeds the draft into the fire from underneath with no opening below the hover. As will be seen from the illustration, the check and the draft lids are cast together and operate together. Thus, when the fire is too hot, the wafer expands and closes the draft and opens the check, both at the same time. When it is too cool, the wafer contracts and closes

the check and opens the draft. This keeps an even heat all the time, both night and day, in cold weather or warm, and does it automatically. You don't have to pay any attention to it whatsoever. Just set the regulator for the proper temperature at the start of the season—it will do the rest.

Gas-proof and Fire-proof. There is no possibility of gas escaping below the hover to harm the chicks, because all drafts are located above the hover and are so arranged that all gas and smoke must go out through the smoke pipe.

No. 1—600 Chick size, \$23.50
No. 2—1200 Chick size, 29.00

GERMAIN'S PERFECT FEEDERS AND FOUNTAINS

SINGLE CHICK FEEDERS

These Feeders are strongly constructed of galvanized iron and will not break or rust. The edges are rounded to prevent waste of food, yet make them easily cleaned. The wire front prevents the chicks from getting into the Feeder and ruining the food. We recommend these Feeders for the man who raises a few chicks in the back yard as well as for the commercial raiser. They will soon pay for themselves in the food they save. Prices, 12-inch 30c, 18-inch 40c, 24-inch 50c.

DOUBLE CHICK FEEDERS

These Feeders are especially efficient for use in small quarters or where a large number of chicks are kept, as they save room as well as labor. The edges are round to make cleaning easy. The wire fronts protect the food from chicks and also prevent waste of food. These Feeders are constructed of galvanized ware and are strong and durable and will not rust or break. They come in three sizes, 12-inch, 18-inch and 24-inch. The prices are: 45c, 60c, and 70c, respectively.

PERFECT CHICK FEED TROUGHS WITH TRIANGLE TOP

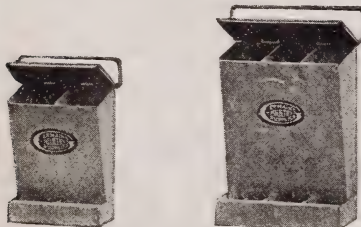

These troughs are very convenient for feeding very small chicks as they can feed on both sides of the trough. They are made of galvanized iron and are strong and durable. It is impossible for chicks to stand in feed tray as they are prevented from so doing by a shield. These troughs are in three sizes, 6-inch, 20c; 12-inch, 30c; 18-inch, 40c.

PERFECT RABBIT MANGER

These Mangers are constructed for feeding several rabbits at a time. Has wire divisions which prevents rabbits from contaminating food. Wire hooks are attached so Manger can be hung in hutch. Sanitary in every respect. Very convenient for quick feeding. Prices—6-inch 35c, 12-inch 40c, 18-inch 50c, 24-inch 60c.

SANITARY GRIT AND SHELL BOX

The use of this Grit and Shell Box will save all the grit, shell and charcoal that would ordinarily be scratched about, trampled upon and wasted, if fed from open dishes.

This Grit and Shell Box is stamped out of the best grade of galvanized iron. Cover is placed on a slant. Has three compartments for grit, oyster shell and charcoal. For small flocks will serve as a dry food hopper. Two-compartment size, 75c; three-compartment size, \$1.00.

PERFECT WALL HOPPERS

This style of hopper is an exceptionally good seller because it prevents waste of feed and keeps it clean and free from dirt. Just enough is let down at a time to keep fresh food before birds all the time. They are made of galvanized iron and are therefore strong, durable, sanitary and easily cleaned. In two sizes, single and double. Price, Single \$1.50; two compartment, \$1.40.

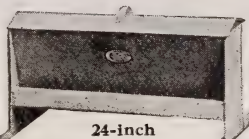

PERFECT DOUBLE DRY MASH HOPPER

Has double compartment thus feeding several fowls at a time. Is large at top and small at bottom, feeding poultry only as they consume the mash. A great convenience for those having fairly large flocks. Made of heavy galvanized iron and is filled from the top; capacity about four gallons. Heavy galvanized wire handle for carrying. Comes in one size only. Price, \$1.75.

PERFECT DRY MASH HOPPERS

A real food-saving and labor-saving device, hand made out of heavy galvanized iron and having a double compartment. The Hopper has a sliding cover, which protects the feed at all times from filth and moisture and the trough is high enough to prevent the fowls from scattering and wasting their feed. It is made especially for feeding dry mash such as Coulsons Egg Food, etc. Strong and durable. Made in 3 sizes, 18-inch, \$2.00; 24-inch, \$2.50; and 30-inch, \$2.75 each.

24-inch

PERFECT BABY CHICK FOUNT

Safety first. The chicks can not get into the water when this convenient fountain is used. Very easy access for the chicks. This style founts for baby chicks is probably more widely used than any other. It will last a life time and we keep four different sizes so that we can suit any size flock. Don't take chances but protect those tiny chicks by using this modern fountain. Price of Founts—1-quart, 40c; 2-quart, 50c; 4-quart, 65c; 6-quart, 80c.

PERFECT PIGEON WALL FOUNTS

These Founts are so constructed that the bird cannot get into water and foul it. They are easy to handle and more sanitary than the ordinary floor fountain. The flat back makes them easy to hang up. A galvanized hood extends over the water trough and protects the water from dirt and filth. Can be used for poultry or baby chicks, but is especially useful for pigeons. Price, 1/2 gal., 75c; 1 gal., \$1.00.

GERMAIN'S EGG TESTER

No. 3

For testing eggs for hatching; fits any ordinary size house lamp or the lamp furnished with the Cypher's and Queen Incubator. Price, No. 2, 45c ea.; No. 3, 50c each.

No. 2

SEARCHLIGHT EGG TESTER

This electric tester is the most simple and at the same time most efficient tester yet devised. By simply moving the tester over the rows of eggs, the searchlight effect on the air cells of the egg illuminates the entire contents and as the germ always rises to the top it instantly and clearly appears in plain view. Weak or dead germs, blood-spots, cracked shells and clear eggs are all instantly detected. Price, \$5.00.

NESTS

These Nests are made entirely of the very best of heavy galvanized iron. Metallic Nests are the only practical and sanitary method of nesting your poultry as metal nests are vermin proof. Lice or mites will not live in metal nests.

Single Compartment, each.....\$1.00
Two Compartments, each.....2.00
Three Compartments, each.....2.75

EXHIBITION COOP WATER CUP

These Feeders and Cups designed especially for use in exhibition coops, are also used in conditioning coops and cockerel pens. Made of galvanized iron. Price, pint, 30c.

SYPHON CHICK FEEDER AND FOUNTAIN

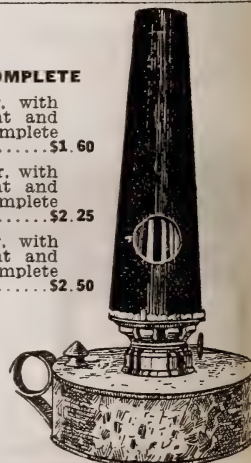

Just the Fountain you have been looking for. It feeds water, grain, grit, oyster shells, etc., and is the most Sanitary Fountain on the market, having a glass reservoir which is easily cleaned, and you can always see just how much water it contains without taking hold of it, and is so simple any child can fill it. Any size Mason glass jar fits it. Price, 15c; 2 for 25c.

No. 3 Burner, with 8-inch Fount and Chimney, complete Price each.....\$2.50

POULTRY ACCESSORIES—THERMOMETERS

CHAMPION ADJUSTABLE LEG BANDS

This is a well-known Leg Band. It is one of the oldest bands on the market and has met with an immense sale during several years past. It is well and durably made from one thin strip of aluminum, and is used by thousands of successful breeders and exhibitors. Being held by a double lock, it is impossible for them to come off. Made in one size only and adjustable to fit any size fowl. Prices, postpaid, 15c for 12; 75 cents per 100.

ECLIPSE POULTRY BANDS

A modern Band in colors. These Bands are made with extra large figures on a plain white background. The numbers are easily visible even when the fowl is moving about in the yard. The figures are protected by a thick, transparent cover (not simply glazed) making it extremely durable. The Bands are made of aluminum, consequently they are very strong and very light in weight.

Come in three sizes: Prices postpaid: 50c for 12; \$3.00 per 100.

"SPIR-OL"

Celluloid Leg Bands Are Best, Because:—They are easily placed, easily distinguished, cannot come off, can be used over again, do not break, they are cheap.

Colors, Black, White, Red, Yellow, Blue, Green, Purple, Light Blue, Maroon and Pink.

When ordering be sure to state size and breed of fowl.

Prices, postpaid, 15c for 12; 25c for 25; 40c for 50; 70c for 100; \$6.00 for 1000.

ROGERS POULTRY PUNCH

All Steel, Nickel Plated, Punches Clean Hole; is right size; will not bruise the foot. Price, 40c by mail.

CRONOLITE ROOFING

Cronolite Roofing is by every test the Best Roofing on the market. It is universally known, and is made by people who know how.

1-ply, about 35 lbs. per square. \$2.25
2-ply, about 45 lbs. per square. 2.60
3-ply, about 55 lbs. per square. 3.00

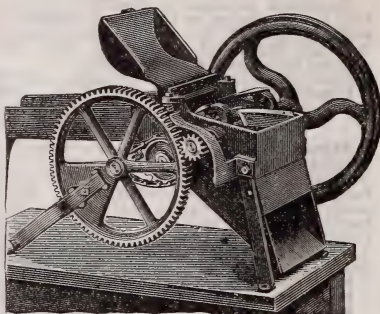

FREEMAN'S No. 7 SPECIAL HAND FEED CUTTER

The frame is made of hard wood with mortise and tenon joints and is exceptionally well braced. Feed rolls are governed by an equalizer bar and spring so that both ends of feed rolls are raised equally and there is no binding in the boxes. This machine has the adjustable cone feed gearing by which length of cut is changed.

Capacity per hour: No. 7 two knives—dry fodder, 15 to 200 pounds; green fodder, 300 to 400 pounds. Weight 150 pounds.

Price, \$33.50.

NEW MODEL CLOVER CUTTER

Will cut either green or dry clover, alfalfa, straw, vegetable tops, etc., in one-eighth inch length, suitable for chicks or grown fowls. The cutter bar is adjustable, and easily accessible for sharpening; the four 7-inch spiral steel knives can readily be removed for sharpening. Has large capacity, strong feed and runs easily. Length of cutter 28½ inches. Weight 60 pounds.

Price, \$20.00 F. O. B. Los Angeles.

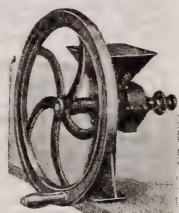

FREEMAN'S POWER CUTTER No. 10½

Three Knife Cutter. It is built the same as the No. 10 large hand cutter with the exception that the crank gear is done away with and the knife head shaft is extended so that pulley or balance wheel can be placed on either side of the machine, but both cannot be placed on the same side at the same time.

Power required, 1 to 1½ horse power. Speed 300 to 400 revolutions per minute. Weight with 10-inch diameter by 3-inch face pulley, 300 lbs. Price each, \$57.00.

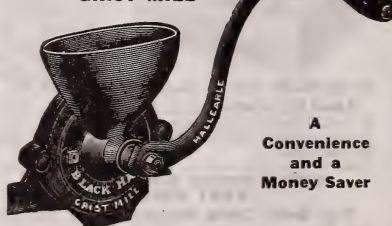

STOVER HAND GRINDING MILLS

These machines will grind dry corn, barley, rye, peas, nut shells, stale bread, etc., for poultry feed, or will grind table meal for family use. They will also grind dry bones and oyster shells, providing the pieces are not too large, in which event they can readily be broken by a stamper, an ax or some other available tool, and placed in the hopper a few pieces at a time; then the machines will pulverize them as fine as desired.

No. 32—16-inch Fly Wheel \$ 6.25
No. 33—19-inch Fly Wheel 7.50
No. 35—20-inch Fly Wheel 10.00

BLACK HAWK GRIST MILL

A
Convenience
and a
Money Saver

The Black Hawk Grist Mill grinds corn into meal, wheat into graham flour, or will crack it for breakfast foods. Grinds rice into flour, cracks peas for soups; grinds beans.

Price complete, \$4.25.

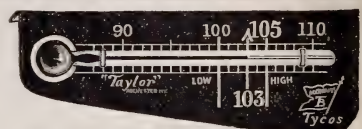

BLACK HAWK CORN SHELLER

Very strong and durable, made of malleable iron and chilled iron. Just the thing.

Price, \$4.25. Special pamphlet giving full description FREE.

TYCOS INCUBATOR THERMOMETER

No. 5774

Black oxidized brass scales, white filled figures and graduations, mercury tubes, angle pattern, flange turned over on upper edge to hook on wire or metal strip. Price, 75c each, postpaid.

No. 5770—Straight Pattern. Each 5.75
No. 5782—Certified, same Pattern as No. 5774. Each 1.00

No. 5792 BROODER THERMOMETER

When placed in a hole in top of the brooder or hover the scale can be read from the outside while the bulb of the thermometer is inside. Price each 75c.

TYCOS HYGROMETER

Millions of chicks die in the shell every year for the want of proper moisture conditions. The importance of a correct percentage of moisture during incubation has made the Tyco's Hygrometer as necessary as the Tyco's Incubator Thermometer. Neither takes the place of the other, but together they give the practical poultry raiser all the facts required for successfully regulating the heat and moisture of his incubators. The Tyco's Incubator Hygrometer is not a regulator of moisture, but an indicator, showing (together with the Tyco's Incubator Thermometer) exactly what the conditions are, so that if not correct they may be made so.

Standard grade Tyco's Incubator Hygrometer, black oxidized brass scales, white filled figures and graduations, glass water cistern, silk wick, complete directions with each instrument. Price, \$1.75 each.

Extra Silk Wicks for Hygrometers, 15c each. Booklets on Incubator and Dairy Thermometers sent upon request.

GERMAIN'S PET SHOPPE

DOGS, PUPPIES, CATS, KITTENS, PARROTS, RABBITS, ETC.

PUPPIES

AIRDALE TERRIER. This dog is of fairly recent creation. He is a sensible and companionable dog, game to the core and a fine guard. He has a well knit frame, with keen expression and wiry, weather resisting coat: can be kept in or out doors. Females \$10.00 to \$15.00. Males \$15.00 to \$25.00.

Boston Terrier. Or Boston Bull as they are sometimes called. Are a very keen and active dog, smooth coated, brindle in color with white markings, usually screw tail. A dandy house dog. Females \$25.00 to \$35.00. Males \$35.00 to \$50.00.

Cocker Spaniel. This dog is shaped like a miniature setter but is more merry and alert in expression and behavior. They come in many colors. Jet black, red, brown and parti-colors mixed with white. They make a wonderful house and duck dog. Females \$25.00. Males \$35.00.

Collies. The collie is a lithe, active dog and is remarkable chiefly for his intelligent, cunning, yet kindly outlook, his magnificent coat and the devotion he displays to his master. A wonderful dog for children. Females \$15.00. Males \$20.00 to \$25.00.

Fox Terrier. The wire hair fox terrier resembles the airdale excepting for size and color. They grow about sixteen inches tall, about twenty pounds in weight, white pre-dominates with black or tan markings.

Germain's maintain the largest, most sanitary, and complete Pet Stock Department on the Pacific Coast. Everything in our shop has been built for the comfort of the animals to keep them in a healthy condition. Our kennels are spotless white enamel and the shop equipped with the Vacuum Ventilating system. All these features insure the purchaser clean, healthy stock, absolutely free from disease. We have on hand constantly the largest supply of pet stock in this part of the country which consists of dogs and pups of most every known breed, fancy Persian and Angora cats and kittens, talking parrots that do talk, rabbits, guinea pigs, squirrels, chipmonks, tame white rats and mice, tame monkeys and many other pets too numerous to mention. We cannot give a lengthy description of each animal but must be brief; therefore, ask our customers to correspond with the manager in charge of this department for desired information of any breeds not mentioned.

Make wonderful watch and house dogs. Females \$25.00 to \$35.00. Males \$35.00 to \$50.00.

The smooth coated fox terriers are the same dog as the wire hair excepting the coat is smooth. Same disposition, etc. Females \$10.00 to \$15.00. Males \$15.00 to \$25.00.

Irish Terrier. Has the same characteristics as the Airdale only red in color and a trifle smaller. This dog is not plentiful, yet popular. Females \$25.00 to \$35.00 Males \$35.00 to \$50.00.

French Poodle. Usually pure white, curly coats with black eyes and nose. Weigh about five pounds when full grown. They are very intelligent and can be taught many tricks. Females \$15.00. Males \$20.00.

Esquimo Spitz. Are pure white, medium size, well built and obby, covered with a thick fur. They have rather a small eye of dark color and convey a very intelligent and lively expression. The ears are erect, broad at the root and taper to a point, the tail is short and heavy coated and curled over the back. Very popular dogs. Females \$15.00. Males \$25.00.

PARROTS

Our selection of Talking Parrots cannot be excelled in quality and quantity. While we carry most all varieties such as the Double Yellow Head Mexican, Red Head Mexican, Amazon, African Grays and Pana-

mas, we do specialize on the Panama Parrot for many reasons. They are one of the hardiest birds and make the finest talkers of all talking birds and are usually finger tame. The following prices prevail on birds that we guarantee to talk within ninety days.

Double Yellow Head Mexicans \$ 25 00
Red Head Mexicans 15 00
Amazon Parrots 25 00
African Grays \$60.00 to \$100.00
Baby Panamas \$35.00 to \$50.00
Bee Bee or Dwarf Parrots \$10.00 up

RABBITS

Belgian Hares (Utility) \$2.00 each up
Rufus Reds 3.00 each up
Flamish Giants (Extra Heavy) \$15.00 pair up
Chinchillas (Price on request)
Dutch Black-Blue \$10.00 pair up

MISCELLANEOUS

Guinea Pigs (Common Variety) pair \$2.00
Squirrels (Prices on request)
Chipmonks (Striped Variety) each 2.00
White Rats (Pink Eyes) each .50
White Mice pair 1.00
Tame Mice (All colors but white) pair 1.50
Tame Monkeys (Ringtails) \$50.00 up
Tame Monkeys (Java) 35.00 up
Tame Monkeys (Spider) 50.00 up

Persian and Angora kittens come in many colors such as Orange, Cream, Blue, Black, Brown, Taby, Silver Gray, light and shaded. Female \$10.00. Males \$15.00 and up.

SINGING AND DECORATIVE BIRDS

CANARY BIRDS

These beautiful birds are the favorite song birds and today no home is complete without a dainty cage and its joyful occupant. Their wonderful vocal powers make them desirable pets and one finds it also interesting and very profitable to raise them. They readily breed in cages or aviaries and one can easily care for them by following the directions given in our book. We carry in stock only the best of these—both male and female—and can quickly furnish them in any number desired.

THE ROLLER

Considered the finest singers among the canaries, these birds are bred and trained in the United States. The birds are handled only by experts who use bird organs to train the vocal powers. St. Andreasburg Rollers represent years of training of the canary's voice.

THE HARTZ MOUNTAIN WARBLER

These birds have been raised in the United States since the war. They rightly deserve their famous renown as a joyful and active singer besides possessing extraordinary vocal powers.

THE ENGLISH OR NORWICH CANARY

Bred for their beautiful plumage and size, as well as for their strong song, these birds make splendid pets and should be in every home. Prices of birds on application. We always have on hand choice singers at \$15.00 and up. Safe shipment by express.

GOLDFISH, FOODS, ACCESSORIES

Write for Price List

Today the ornamental Fish has come into its own and no home decorative scheme is considered complete without colorful, fancy shaped Fish in attractive bowls or aquariums. Cleanly washed river sand or gravel and some ornamental piece of rockwork should be placed in the bottom. It is also necessary to have some fresh water plants that will grow underneath the water, in order to supply oxygen. Scavengers and snails should be included in the equipment as they clean up refuse that would otherwise decay and spread disaster through the aquarium.

DECORATIVE FISH

We have a wide assortment of ornamental fish in a varying degree of sizes and color, including Gold Fish, Telescope Eye Fish, Straight-tails, Dwarf Transparent, Calico and others. There is a great variation in the color of the Telescope Eye—some are all black, others are black and gold, gold and white, and blue-black and gold. The latter are called Calico fish. The Dwarf Transparent Gold Fish are exceedingly small and only grow to one inch in length. They are trans-parent and stay near the top of the water. Write for price list.

FISH FOOD

Spratt's Aquarium Fish Food 15 per pkg
Germain's Special Fish Food 10 per pkg

SCAVENGERS

Scavengers resemble snails but are much smaller in size. Both scavengers and snails are necessary in aquariums as they eat the refuse and keep both water and glass clean. Price on application.

FISH BOWLS AND AQUARIUMS

We carry a complete stock of fish bowls and aquariums and will be glad to quote on the various kinds and styles.

WATER PLANTS

Anacharis Moss 15c per bunch; 2 for 25c
Parrots Feather 10c per bunch; 3 for 25c
Bell Grass 10c per plant; 3 for 25c
Water Hyacinths 15c per plant; 2 for 25c

DOG AND CAT REMEDIES AND SUPPLIES

We maintain a highly efficient, well equipped dog and cat department—carrying a full line of the Spratt foods and remedies as well as the famous Clayton remedies. This department is under the supervision of experts who can give you authentic information and advice on the feeding and proper care of dogs and cats. We want our patrons to feel at liberty to ask for any information at any time.

CLAYTON'S DOG REMEDIES

DISTEMPER is an acute contagious disease. The nervous system is generally, if not always, involved, and there is a characteristic skin eruption to be found, but not present in all cases.

This disease has been treated for 35 years very successfully with CLAYTON'S DISTEMPERINE TABLETS for all ages and all breeds. A trial will convince you.

SPRATT'S DOG FOODS

"SPRATT'S DOG CAKES"

Composed of meat, wheat and vegetables. The standard food for dogs. A staple and constant food for all breeds. Used at leading kennels and Dog Shows throughout the world.

Prices. 100-pound bags, \$11.75; 50-pound bags, \$6.00; 25-pound bags, \$3.10; 10-pound bags, \$1.45; 5-pound bags, 75c; cartons, 35c.

"SPRATT'S" PUPPY BISCUITS

A perfect and whole food for puppies of all breeds. Puppies should be started on these biscuits when about one month old, and they should be continued until such time as their teeth become large and strong; usually when they are about six months old. Follow directions on each package.

Prices. 100-pound bag, \$12.25; 50-pound bag, \$6.25; 25-pound bag, \$3.25; 10-pound, \$1.50; 5 pounds, 80c; cartons, 40c.

"Spratt's Cod Liver Oil Biscuits are invaluable for old or delicate dogs. Cod Liver Oil builds up a dog as well as a human being. 25-pound bags, \$3.35; cartons, 40c.

Spratt's Kibbled Dog Cakes. These are the regular dog cakes, only broken; 100 lbs. \$12.00, 50 lbs. \$6.15, 25 lbs. \$3.20, 10 lbs. \$1.50, 5 lbs. 80c.

"Spratt's" Fibro. A splendid food for dogs that are "off their feed," or "shy feeders," or those recovering from sickness. Good as a change of food at any time for all dogs. 100 lb. bags, \$13.75; 50 lb. bags, \$7.00; 25 lb. bags, \$3.60; 10 lb. bags, \$1.65; 5 lb. bags, 85c; cartons, 40c.

"Spratt's" "Midget" Charcoal Biscuits. To correct all bowel troubles, weak digestion, fetid breath, etc. All dogs should have at least once a week, and preferably at regular intervals, a meal of these excellent cakes.

Price. Cartons, 40c.

"Spratt's" Rodnim. The best granulated Dog Food. Can be fed either dry or moistened with water, milk, or gravy, and is recommended as a change from the regular Dog Cake.

Prices: Bags, 100 lbs. \$12.75; 50 lbs., \$6.50; 25 lbs., \$3.35; 10 lbs., \$1.55; 5 lb. bag, 80c.

"Spratt's" Bulldog and Terrier Meal. Breeders of the "Bull" have largely demanded of us a genuine meal suitable to the breed. We have kept pace with the demand, and here offer a food which will be found highly satisfactory in its conditioning and muscle and bone-making properties. Prices: 100 lbs., \$12.75; 50 lbs., \$6.50; 25 lbs., \$3.35; 10 lb. bags, \$1.55; 5 lb. bags, 80c; cartons, 40c.

"Spratt's" Plain Puppy Meal. The standard weaning food. To be fed before, during and after weaning. 25-Pound bags \$3.10, cartons 40 cents.

"Spratt's" Pepsinated Puppy Meal. Contains pepsin and recommended for puppies of weak digestion. Tins 35 cents, and 70 cents.

"Spratt's" Orphan Puppy Food. Substitute for natural milk. For use when mother is dead or deficient in milk. Tins 60 cents and \$1.25.

"Spratt's" Bone Meal for Puppies. "The strong frame builder." 25-Pound bag \$1.85; tins 45 cents.

"Spratt's" Oblongs. Milk-meat-wheat. This is something entirely new and is especially fine for lap dogs, bad doers, puppies, cats, etc. Where difficulty is experienced in getting a dog to eat regular dog cakes, feed him Oblongs. All dogs eat them and thrive on them. Cartons 20 cents.

"Spratt's" Ovals. By far the most popular puppy and dog biscuit ever introduced. Cartons, 35c and 70c; 5 lb. bags, 80c; 10 lb. bags, \$1.55; 25 lb. bags, \$3.35; 50 lb. bags, \$6.50; 100 lb. bags, \$11.00.

"Spratt's" Malted Puppy Food. For shy or dainty feeders. Tins 30 cents.

CATNIP MICE

A new plaything for the cat in the way of Catnip. The animal has a wonderful time playing with it, besides being of great health benefit. Price, 15c each.

CATNIP BALL

Its object is to afford amusement to and benefit the health of cats. In endeavoring to get the catnip it induces them to exercise. If the cat plays with it violently, it is saying as plainly as though it could talk that it desires CATNIP. Price, 20 cents each.

SUMMIT BRAND LOOSE CATNIP

Catnip is medicinal for all cats and where these pets are kept some should be on hand. Summit's Brand Loose Catnip is carefully selected and prepared from loose catnip leaves and tops. It is free from adulterations, dirt or foreign matter and is especially intended for making Catnip Tea. Price, 15c.

SPRATT'S CAT FOOD. A complete food for cats. Used at the leading catteries throughout the world and daily becoming more popular among the fancy. Cartons, 40c.

SPRATT'S CAT FOOD WITH PASTEURIZED MILK. Excellent for kittens and invalid cats. Prices, same as regular cat food.

SPRATT'S MALTED KITTEN FOOD. Thousands of kittens that are somewhat delicate at birth or that are without stamina die for want of proper food and nourishment. For these little fellows we strongly recommend this food. Price, 30c.

SPRATT'S FISH CAT FOOD. Use this as a change of diet, especially during the summer months. Prices, same as regular Cat Food.

BOOKS

THE TWO BEST BOOKS FOR YOUR LIBRARY

WESTERN POULTRY BOOK

There is just off the press a new edition of the famous book by Mrs. Basley. It is by far the most authoritative book on the raising and care of poultry of all kinds, including chickens of all breeds, turkeys, ducks, geese, etc. It is comprised of 220 pages of practical experience, written in a way that everyone can understand. We believe that any who has poultry or is contemplating raising them should have one of these valuable books.

PRICE \$1.00, POSTPAID

WESTERN RABBIT BOOK

A revised edition of this very popular and authoritative book by Mrs. Richey. It reads easily and is of equal value to the beginner or the experienced. It treats of rabbits of all kinds, deals with them exhaustively, and will pay for itself at once.

GENERAL DIRECTIONS TO OUR PATRONS

SEEDS BY MAIL

IMPORTANT NOTE—The weight limits in the 1st, 2nd and 3rd zones have been increased to 70 pounds; in other zones the limit is now 50 pounds

Parcels Post—Since the installation of the new parcels post law seeds, bulbs, tools, plants and garden supplies (excepting poisons and liquids) may be sent by mail to all parts of the United States, including Alaska, Canal Zone, Guam, Hawaii, Porto Rico and the Philippines. Packages are subject to a limit of maximum weight in the first and second and third zone of 70 pounds; in all other zones of 50 pounds. The maximum size of a package is 84 inches for length and largeness of the girth combined.

Zone Rates—May be had by applying to your postmaster, who will tell you which zone you are in with reference to Los Angeles or upon application we will tell you if you supply us with the name of your postoffice.

For Parcels Weighing 8 Ounces or Less, containing seeds, bulbs or books only, the rate of postage to all zones is 1 cent, for 2 ounces or fraction. (Over 8 ounces the parcels post rates apply).

For Parcels Containing Fourth Class Matter—other than the above—up to 4 ounces is permitted to all zones at 1 cent per ounce. (Over 4 ounces the Parcel Post zone rates apply.)

To Mexico the parcel post rate is 12 cents per lb. to any point.

On shipments weighing 20 pounds or more beyond the 2d postal zone it is cheaper to ship seeds by express. As the express companies give a receipt for each package, it amounts practically to insurance without cost, whereas it costs extra, according to value, to insure a parcel post package. We guarantee the safe arrival in the U. S. of all seeds shipped by express or insured parcel post.

If goods are wanted by parcel post, postage must be added as per table below, except for those quantities of seeds we offer to deliver free.

FREE DELIVERY

FOR CERTAIN QUANTITIES OF SEEDS

We Deliver Free in the United States and Possessions, and Mexico, by **Parcel Post or Express to any express office at our option all vegetable and Flower Seeds by the Packet, Ounce and 1/4 Pound, and up to and including ten pounds.**

Purchasers pay transit charges on larger quantities of seeds, and other merchandise, unless otherwise provided.

When goods are wanted by Parcel Post, add postage for the quantities we do not deliver free (see **Zone Rates on this page**).

Please Order Early, thus enabling us to forward promptly. It will hasten forwarding materially, if customers will kindly make up orders alphabetically, as the goods are listed that way in the catalogue. Seeds are also put in compartments in our stores alphabetically, hence an order can be filled more quickly if it is made out in that manner.

Counter Customers—We suggest to those who purchase in person at our store the advantage of having their lists made out before they call. They may be left and called for later, taken at once, or shipped. In any case it is a great saving of time to the purchaser. The list should have full name and address written on it so that our catalogues may be mailed to the purchaser as issued. We also urge early purchases.

Error in the Filling of Orders—We use the greatest care in filling, checking and packing orders. Yet should anything be omitted we will promptly forward when advised. Keep a duplicate copy of your order for comparison.

Remittances may be made by Express Money Order, P. O. Money Order or Bank Draft; if stamps or cash send in a Registered Letter. We must decline sending goods C. O. D. unless 25 per cent. of their value accompanies the order.

Accounts—Parties having no account with us—who order goods without remittance—must furnish satisfactory reference.

NON-WARRANTY

The Germain Seed and Plant Company gives no warranty, expressed or implied, as to description, quality, productiveness, or any other matter of seeds, bulbs, plants or trees they send out, and they will not be responsible in any way for the crop. If the purchaser does not accept the goods on these terms they are at once to be returned.

Testimonials from Customers—We are always pleased to hear from our customers regarding the results of their gardens. Photographs of gardens and particularly of vegetables and flowers, are thankfully received by us.

Questions and Correspondence—We endeavor to answer promptly all letters of inquiry—which should be on separate paper from orders—but we cannot undertake the planning of entire gardens and grounds.

PARCEL POST WEIGHT LIMIT

The weight limit within the Local, 1st, 2d and 3rd Zones is seventy (70) pounds, within the other Zones it is fifty (50) pounds, and the size limit eighty-four (84) inches for combined length and largest girth.

Packages of seed weighing 8 oz. or less can be forwarded anywhere in the U. S. at a cost of one cent for each two ounces, or fraction thereof.

One among thousands of choice varieties

Included in the preceding pages you will find many varieties of flower, vegetable and field seeds. Vegetables for your table, flowers for beauty, and the field seeds for utility.

A careful perusal of this catalog will enable you to select products that will add to your store of health, happiness and prosperity.

Germain's *Los Angeles* *Market Lettuce*

A lettuce that is supreme the country over for quality and popularity.

GERMAIN'S LOS ANGELES MARKET LETTUCE forms a large, tight head of very sweet and tender leaves. It is unsurpassed in flavor, in quality, or in yield by any of the heading kinds. Try it.

The letters reproduced below will tell you better than we can the worth of this variety.

For culture see page 39. Prices: Packet 10c; ounce 50c; ¼-pound \$1.65; one pound \$5.00.

Found Los Angeles Market Lettuce seed excellent. The finest lettuce we ever had. All the seed from your house has proven satisfactory as far as tried.

J. P. PARKER, Fairmead, Cal.

As the local gardeners told me that the California lettuce would not head I did not thin or transplant much of the seed (Los Angeles Market) that I sowed. I was agreeably surprised to find that the transplantings headed up in fine style and were much larger than the local varieties—the flavor was excellent. I intend to show some of these "experts" some real lettuce this next spring.

EDW. DERKSEN, Oshkosh, Wis.

I sent some of the Los Angeles Market Lettuce Seed to my friends in the East, as I had such good success with my garden here I wanted the eastern people to try it and I wish you could have seen some of the heads I saw this last August at my home town. Why I think that I have got myself in trouble as I had to promise all I gave the seeds to send them another lot this winter. The people East had never seen such lettuce before, simply crazy over it.

C. V. DUDLEY, Morenci, Ariz.

It certainly was a success. It was everything you claimed it to be.

A. T. ECKLES, Exeter, Calif.
